The plaintiff sued to recover the value of a valise, which he as a passenger upon the defendants' steamboat, running from New York to Fall River, had deposited in his stateroom. The plaintiff testified that he took stateroom No. 9, and paid for the same; that he had a valise with him, containing some clothing and other articles, which he took into the stateroom with him. A key was furnished him by the clerk of the boat. He locked his stateroom and went down to the saloon; in his absence the valise was taken from the state room.

The defense was, that the luggage was not delivered by the plaintiff to the defendants, who had a regular baggage master to receive and care for the luggage, and consequently they were not liable.

The justice gave judgment for the plaintiff, and the defendants appealed to this Court. The following is the opinion of the Court by BRADY, J.—The defendants in this case claim exemption from liability, on the ground that the plaintiff's valise was never placed in their custody. The liability of a carrier is like that of an innkeeper. Hollister *vs.* Nolan, 19 Wend., 236; Cohen *vs.* Frost, 2 Duer., 341; and it was declared in Caylis Case, 8 Co., 33, that it is no excuse for the innkeeper to say that he delivered the guest the key of his chamber in which he lodged, and that he left the door open, but he ought to keep the goods and chattels of his guest there in safety. This doctrine has been frequently recognized and approved, (Burgess *vs.* Clements, 4 M. & Sel., 310; Hollister *vs.* Nolan, *supra*,) and cannot be questioned, as resting on acknowledged, just and reasonable duties and obligations. A distinction is admitted to exist where the traveler assumes the charge of his goods *animo custodiendi*, and the jury on the facts disclosed, find such intention to have existed. Burgess *vs.* Clements, *supra*; Tower *vs.* Utica and Schen. R. R. Co., 7 Hill, 47. The innkeeper would then be excused. The mere act, however, of taking the key of the room in which the guest lodged, his goods having been placed therein, would not discharge the innkeeper.

The only case which seems to be in conflict with the rule here suggested is Cohen *vs.* Frost, *supra*. In that case, the plaintiff, who was a passenger on a sea voyage, took his trunk into the steerage and tied it with ropes to his berth. During a violent storm the ropes were cut, and the trunk stolen. The plaintiff had a verdict, but the general term set it aside, on the ground that the trunk had never been delivered to the defendants, the defendants' possession being exclusive. The Court say, in delivering the opinion, that the case is not to be distinguished from that of a guest at an inn, who, when he takes his luggage to his own chamber, of which he keeps the key, discharges the innkeeper, and this is declared to be the law, on the authority of Burgess *vs.* Clements. The learned judge who delivered the opinion in Cohen *vs.* Frost, must have confounded Burgess *vs.* Clements with some other case, because the King's Bench did not declare any such rule. The plaintiff was defeated because his goods were not received *causa hospitandi*. He had asked for, and obtained a room in which to show his merchandise for sale, not as a guest, but as a vendor, and his property was, under the circumstances, held not to have been within the rule which required the innkeeper to protect it. The opinion, therefore, in Cohen *vs.* Frost, is not sustained by the authority on which it is based, so far as it relates to the legal effect of the innkeeper's giving the key to his guest; and the general doctrine which seems to be declared by it, that a traveler on a sea voyage must place his luggage in the special charge of the officers of the ship, is disclaimed, in effect, in Van Horn *vs.* Kirmit, E. D. Smith, 453; the reasons assigned why a contrary rule should provail are well settled.

So far as the adjudications which bear upon this question have been discovered, they sustain the rule that a mere supervision of one's baggage, or the means of entering the place of its deposit, is not sufficient to discharge the carrier. There must either exist, the *animo custodiendi* on the part of the traveler to the exclusion of the carrier, or he must be guilty of such negligence as discharges the latter from his general obligation. Robinson *vs.* Dunsmore, 2 B. & P., 416. Burgess *vs.* Clements, *supra*; Tower *vs.* Utica and Schen. R. R. Co., *supra*; East India Com. *vs.* Pullen, 1 Strange Rep., 694.

It was pretended in this case that the plaintiff was guilty of negligence, and so far as it may be necessary to consider the question whether the plaintiff retained the custody of his valise or not, it is only necessary to say that the finding of the justice is against the defendants upon that issue. I do not understand upon what process of reasoning it can be maintained, that giving the key of a room on board of a vessel to a traveler, in which he is permitted to deposit his baggage, is not in fact, an assumption of the possesssion of all that is therein packed. The whole vessel is in the possession, and subject to the control of the owners. The custody of the vessel, and the general government of the room given the traveler, continues with them. The use of it is a convenience for which the traveler pays, and if its employment absolves the carrier from vigilance, the security of property succumbs to the ease or pleasure of the journey. Such cannot be the law. The defendants can protect themselves if they wish, by notifying their patrons that no goods can be placed in the stateroom hired, except at the risk of the owner, and thus advise them of the consequences of the act. But as long as they permit a traveler thus to deposit his baggage without notice, the mere circumstances of his taking a key will not be considered sufficient to relieve them from their duty to protect him against theft.

The judgment should be affirmed.

☞ One third of the grading on the railroad from Woodstock to White River Junction is completed. The contractors need more laborers, and offer good pay and constant employment during the winter.

Personal Luggage.

A case of importance to railway travelers was heard at the Exeter County Court, England, on the 9th ult. The question raised was, "What can be deemed the correct definition of the term 'personal luggage,'" with respect to the obligations of railway companies in the event of luggage being lost by them? The case arose on a suit for damages against the South Devon, on account of the removal by the company of a box containing photographic apparatus from the train at Teignmouth, instead of at Bovey Tracey, where the plaintiff was going. The judge, referring to Mr. Marshall's work on the liabilities of railway companies, said it was there laid down that "the obligation to carry the luggage of a passenger, and the responsibility for its safety as common carriers, does not apply to goods unconnected with the personal use, comfort or convenience of the passenger." In the case of "Phillips vs. the London and Northwestern," it was decided that a solicitor's documents in an action in which he was professionally engaged could not be regarded as personal luggage; and in a case against the Midland, argued in the Court of Exchequer, it was held that an artist's pencil sketches were not his personal luggage. The test, therefore, was whether the articles were necessary for the personal use and convenience of the traveler. If they did not fall within that description the owner was not entitled to seek compensation, and he must decide unequivocally that a mechanical apparatus used for the purpose of photography could not fall within the description of personal luggage. Plaintiff nonsuited accordingly.

Gold Product of Nova Scotia.

The Halifax *Mining Gazette* contains the following statement of the gold product of Nova Scotia during the following years:

	ozs.	dwts.	grs.
1 July, 1860, to 31 Dec., 1861 (est).	6,000	0	0
1 Jan. to 31 Dec., '62 (official) ...	7,275	0	0
1 Jan. to 31 Dec., '63 "	14,001	14	17
1 Jan. to 31 Dec., '64 "	20,022	18	13
1 Jan. to 31 Dec., '65 "	25,454	4	8
1 Jan. to 31 Dec., '66 "	25,204	13	2
1 Jan. to 31 Dec., '67 "	27,294	11	11
1 Jan. to 30 June, '68 "	10,411	9	12
	135,664	11	15
Allow for gold stolen and not reported, at least	135	8	9
	135,800	0	0

This represents a gross value of $2,716,000, Nova Scotia currency. The quantity of gold at present reported for the month of September amounts to 1046 oz. 19 dwts. 17 grs.

Chatham (N. C.) Railroad Bonds.

The Wilmington (N. C.) *Journal* states that the bill authorizing the Chatham Railroad Company to extend its road to the South Carolina line, and making an appropriation for that purpose, to be raised by selling State bonds, was protested against by fourteen Senators as unconstitutional, but that it was passed by the North Carolina Legislature, nevertheless. The Journal intimates that the State will hereafter repudiate these bonds, and warns purchasers to be on the lookout before buying.

☞ The contract for building the Cairo, Mound City and Vincennes Railroad has been award to Messrs. Dodge, Lord & Co.

Union Pacific Railroad.—Eastern Division.

The ninth section of the act of July 1, 1862, authorized the Union Pacific Railway, Eastern Division, to construct a railroad and telegraph line from the Missouri river to connect with the Union Pacific Railway at the one hundredth meridian, and that the route in Kansas west of Fort Riley be subject to the approval of the President of the United States to be determined by him on actual survey. By the first section of the supplemental act of July 3, 1866, the company received the privilege of changing their route, but were restricted to the same amount of government bonds they would have been entitled to by the original route. This change of route rendered it necessary that the exact distance from Fort Riley to the one hundredth meridian should be ascertained in order to determine what amount of bonds the company would be entitled to; and Major Howell, of the United States Army, was in June last assigned to the duty of making the survey. Major Howell has completed the survey, and finds the distance to be a fraction over 258 miles. The distance from the initial point on the Missouri river to Fort Riley is 135 miles. The survey has been approved by the President, who has ordered that the distance for which the company may become entitled to the subsidy of the government on the completion of its railroad and telegraph line is a fraction over 393 miles.

Canadian Railroads.

The earnings of these roads for the month of September, 1867 and 1868, have been as follows:

	1867.	1868.
Great Western Railway	$334,988	$355,810
Grand Trunk Railway	603,632	624,108
London & Port Stanley R.W.	5,219	4,404
Welland Railway	12,459	13,101
Northern Railway	41,175	49,019
Port Hope, Lindsay and Beaverton Railway and Peterborough Branch	31,990	30,119
Brockville & Ottawa Railway	14,893	17,085
St. Lawrence & Ottawa R. W.	8,628	8,732
New Brunswick and Canada Railway	7,185	8,541
European and North American Railway	14,028	16,167
Nova Scotia Railway	22,913	29,179
Total	$1,097,110	$1,156,265

☞ The following gentlemen have been elected directors of the Western Maryland Railroad Company: Granville S. Haines, John Welty, Isaac Motter, Joshua Biggs, P. P. Pendleton. The city interest in the road is represented by D. J. Foley and J. C. Baugher.

☞ The managers of the Pleasant Valley Railroad are contemplating, we understand, the extension of their line from its present terminus at City Hall, Allegheny, to the Custom House in Pittsburg.

☞ A meeting of the citizens of Salisbury, Md., was held on the 22d ult., for the purpose of taking some measures to secure the extension of the Wicomico and Pocomoke Railroad, to some point on the Wicomico river.

☞ The Colombia and Port Deposit Railroad is advaancing. The track is laid to Rock Run, and the bed of the road pretty nearly completed for the cross ties up to where the junction with the central road will be made.

Railroad from Rochester to Salamanca.

A corps of engineers is now engaged in Wyoming county making the preliminary survey for a railway from Perry to Warsaw, to bring the former village into railway communication with the Buffalo and Hornellsville division of the Erie Railway. This section of a few miles will probably be constructed ere long, but it is intimated that it is only a beginning of a road to run from Rochester to Salamanca, so as to establish broad gauge communication between this city and Cincinnati.

The route suggested for the road is through the towns of Chili and Wheatland in this county, Le Roy, Genesee county, and so on direct to Perry and Warsaw. From Warsaw the road will take a tolerably direct course to Salamanca, the junction of the Erie and Atlantic and Great Western Railways.

The proposed road would cross several railways, including the Buffalo and Washington Road, which is to an important coal road. The new road would be open to Rochester a large market at the Southwest, and bring us within easy reach of rich coalfields. The project is one which ought to commend itself heartily to the favor of our citizens. We are not advised that any organization has been undertaken, but no doubt a move will be made ere long to consummate this enterprise.—*Rochester Union.*

Pine Grove and Lebanon Railroad.

The *U. S. R. R. and Mining Register* says that the Pine Grove and Lebanon Railroad, about 22 miles long, will be put in operation early next spring. Much progress has been made in the work of graduation, on which a large force is employed. It is the intention, also, to push forward the twenty miles of road between Lebanon and Manheim, which when opened, will fill out a continuous line from Pine Grove to Columbia.

A connection is being made between the railroads in the Pine Grove region and the railroad which hitherto has had its only outlet on the Susquehanna at Millersburg. Another new link of road is located, and will be built, to connect the Treverton Railroad with the coal roads in the Mahanoy region. In very short time the Philadelphia and Reading Railroad Company will have a connected communicating net work with all the coal basins between the Schuylkill and Susquehanna rivers.

Taxes upon Traveling in Great Britain.

In the financial year ending March 31st, 1868, the duty on fares received from railway passengers was paid on £9,702,725, and amounted to £485,136. The stage carriage duty of one farthing for every mile traveled was paid for 34,428,057 miles, and amounted to £35,857, and the license duty produced £9,843. 10,695 licenses for keeping post horses were taken out in Great Britain, 1,968 in Ireland, and produced £139,089. The twenty shillings license duty for hackney carriages (London) produced £5,774, and the weekly duty of 7s. (or 6s. if not used on Sunday) produced £103,153.

☞ At a recent meeting of the directors of the Turner's Falls Company and of the Vermont and Massachusetts Railroad Company, it was voted to build a branch railroad from the station in Montague to Turner's Falls, to be completed on the first of July next. The cost of the branch is estimated at $100,000 and the distance is 5¼ miles.

☞ The Selma, Rome and Dalton Railroad was completed to Rome Ga., on the 31st ult.

Pittsburg and Connellsville Railroad. The graduation, masonry and ballasting upon the following sections of this road have been allotted to the following parties:

To Alexander & Ruff, sections 59, 60, 61, 62, 63, 64, 65, 66, 73, 74, 76, 80, 81, 82, 83, 84, 85, 86, 87; to Jas. H. Hoblitzell & Bro's, sections 88, 89, 90, 91, 92; to John C. Howley & Co., section 106; to McCue & Hoover, section 110, 112; to P. & T. Collins & Co., sections 115, 116, 117, 122, 133; to J. M. Campbell & Bro's, sections 118, 119, 130; to John Humbird, sections 128, 129; to John C. Brodhead & Co., section 140. Sections 59 to 87, inclusive, embrace that part of the road lying west of Ursina and east of Connellsville. Sections 88 to 140 embrace that part of the road lying east of Ursina, extending to Cumberland. Section 106 takes in the newly laid out town of Garrett. Some of the contractors are already on their portions of the line making preparations for commencing work at once, and the road will be in running order within two years.

☞ The City Council of St. Paul have granted $100,000 twenty years six per cent. bonds to the Chicago and St. Paul Railroad, on condition that the cars will be running to Hasting by November 1869; and also $50,000 to the Minnesota Valley Railroad, to enable the latter company to bridge the Mississippi at that city, and establish their depot on the St. Paul side of the river. These appropriations will be submitted to the voters of the city for their ratification in April next.

☞ The Union Pacific Railroad is completed 900 miles west from Omaha, leaving 135 miles to Salt Lake City. The road is graded nearly all the distance and the iron for the track is all shipped. It is expected that the road will be completed to Salt Lake this year.

VAN NOSTRAND'S
ECLECTIC
Engineering Magazine.

80 to 96 Pages, Large 8vo., Monthly.

FIRST NUMBER to be ISSUED JAN. 1, 1869,

Price $5 a year in advance. Single Copies, 50 cents.

VAN NOSTRAND'S MAGAZINE will consist of Articles Selected and Matter Condensed from all the Engineering Serial Publications of Europe and America.

This will be done under the direction of Mr. A. L. HOLLEY, the well-known Author and Constructor in various branches of Engineering.

Few active engineers or artisans can take all or most of the professional newspapers; none can afford the time to wade through the columns of the whole scientific press to get at the really important news, information and opinion.

The object of this Magazine is to present within limits of space and cost that all can afford, the cream of not less than fifty engineering, mechanical, chemical and metallurgical publications. The French and German Magazines will be largely translated. Papers and discussions before Societies will be condensed. Professional news from all sources will be compiled at length.

D. VAN NOSTRAND,
Publisher and Importer,
192 Broadway,
New York.

*** Our new Catalogue of Scientific Books, 48 p. 8vo., sent on receipt of six cents in stamps to pre-pay postage.

TEN NEW DUMP CARS,
For Coal, Ore, or Gravel.

Body 11+8. Corner Posts, Bottom and Sides of Iron. 33in. wheels. Gauge 4 ft. 8½ inches. Can be delivered in ten days.

WILLIAMS, PAGE & CO.,

LARGE AND VALUABLE BUILDING
For Manufacturing Purposes

In SOUTH BALTIMORE, at Auction.

We shall sell at the Exchange Sales Rooms, Second st. in the City of Baltimore, on Thursday, Nov. 12th, at one o'clock, P. M., the lot and improvements of the BALTIMORE FILE COMPANY, situated near the Baltimore Gas Works, in South Baltimore, bounded on three sides by open streets, and fronting about 222 feet on Ohio Avenue, over which passes the LOCUST POINT Branch of the Baltimore and Ohio Railroad Co., and most admirably located and adapted for manufacturing purposes.

There is upon this lot a Brick Building, nearly new, 240 feet long by 40 feet wide, of one high story, with a wing 75 feet long, and two stories high, recently erected with great care by the Baltimore File Company. The entire building is of 14 inch walls, on heavy stone foundations, and covered with a superior slate roof, making it one of the most substantial buildings in this vicinity. Adjoining the main building is a substantial brick Engine and Boiler House.

ALSO

At same time will be sold

One Splendid New Steam Engine,

100 HORSE POWER, built by Woodruff & Beach, of Hartford, Conn., with all the modern improvements, and a TUBULAR BOILER of the capacity of **300** HORSES, built in Baltimore. With these will be sold SHAFTING, COUNTER SHAFTING, BELTING, &c.

The property must be sold to close the concerns of the company, and an unusual opportunity is thus offered for any large manufacturing establishment to locate advantageously.

Terms ¼ cash, balance in 4 and 8 months, with interest. Title indisputable. Possession given within ten days after sale.

For further information apply to Messrs. KEYSER, TROXALL & CO., HAYWARD, BARTLETT & CO., or WARD BROS., Baltimore, Md.

J. B. CANNON & CO.,
Auctioneers, Baltimore, Md.

MEMPHIS, EL PASO AND PACIFIC

ONE OF THE
BEST INVESTMENTS.
THE
First Mortgage Bonds
OF THE
UNION PACIFIC
RAILROAD COMPANY.

900 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value.

3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of less than $30,000 per mile.

4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the Trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.

6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it.

7. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

9. The bonds pay six per cent. in gold, and the principal is also payable in gold.

10. The earnings from the local or way business were over FOUR MILLION DOLLARS last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.

12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent. premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure.

13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds *will find it to their advantage to do so at once.*

The price for the present is 102 and accrued interest at 6 per cent., from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
Nov. 1, 1868.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

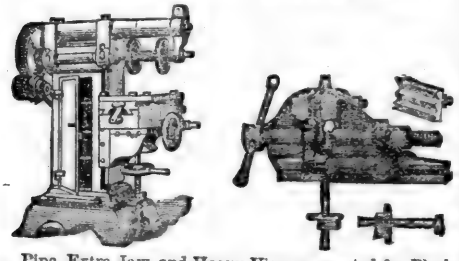
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

McGregor and Sioux City Railway.

Our readers may remember that we called their attention last winter to the efforts of the McGregor and Sioux City Railway Company, both in our state Legislature and in Congress, to secure such aid as would warrant them in undertaking the construction of a line of railway through the undeveloped portion of Northern Iowa, from some point on the McGregor Western Railway, running directly West to the Missouri River.

Their efforts at that time to secure the desired point were only partially successful, and therefore the company were not warranted in attempting to construct the road beyond the Cedar River, to which point, or St. Charles, it was put under contract in Sept. last, since which time a force of nearly one thousand men have been at work, it being the purpose of the company to complete the grade over this part of the line before winter sets in, with a view of having the cars running to St. Charles, in time to market the next year's products of the Cedar Valley, in the city of Milwaukee.

To our mind this is one of the most important railroad projects yet attempted in the Northwest, and we trust that the representatives of the people, both in our State Legislature and in Congress, will do all in their power, consistent with the public good, to promote the early extension of this work, and its completion, at an early day, to its proposed terminus on the Missouri river.

We understand that it is the purpose of the McGregor and Sioux City Railway Company, which, we may here remark, is substantially the same as the Milwaukee and St. Paul Railway Company, whose President is Alexander Mitchell, of Milwaukee, a gentleman known to the entire northwest for his financial ability and sound business qualifications, to make application at an early day for such land grant as will enable them to resume the work beyond the Cedar as soon as possible, and push it to final completion.

We are not much in the habit of bestowing unmerited compliments in these columns, either on individuals or corporations, but we cannot forbear to express our gratification at the quiet and determined energy with which Mr. Mitchell has developed the Railway system of the Northwest since his acceptance of the Presidency of the Milwaukee and St. Paul Railway Company; and we, here at McGregor, as well as the people throughout all northern Iowa, feel that to him we are mainly indebted for the reasonable prospects of direct communication with the Missouri river; and we trust that in his efforts to prosecute this work, Mr. Mitchell will be supported as we have no doubt he will be, by the united influence of every person, both in Congress and out of Congress, who takes pride in the growth and development of this Northwestern country of ours.

With this work completed to the Missouri River, there will be an unbroken line of nearly 500 miles running west from Milwaukee, over which the products of Wisconsin, Northern Iowa, and a large part of Minnesota, together with the vast trade of the upper Missouri, extending to the foot of the Rocky Mountains, will pass to her market, to say nothing of the immense amount of merchandise from the East—from the markets of New York and Boston—and the traffic of the intermediate cities that will be forwarded over the same road. The completion of this work will retain to Milwaukee her ascendancy as the great grain market of the West. Hence we assume that the people of that city must feel a profound interest in the success of the enterprise.—*North Iowa Times.*

Oregon Branch of the Pacific Railroad.

From the northern end of Salt Lake, where the Central Pacific Railroad will pass, to Portland, in Oregon, is 645 miles, of which distance 315 miles may be traversed by steamers in the Snake and Columbia rivers, leaving only 330 miles of railroad to be built in order to open up a line for freight and passenger transportation between these points. All Eastern Oregon, and a considerable part of Idaho, would be made accessible to this route. In the winter season, however, the above streams would be closed to navigation. Yet this seems to be the favorite route with those who take an interest in the matter. The Central Pacific route was laid at the northern end of Salt Lake for the purpose of securing the most favorable starting point for this northern feeder.

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem and Branches for the year ending June 30, 1868:

	Memphis Branch.	Lebanon Branch.	Main Stem.
Passengers..	$89,228 51	$83,377 00	$672,497 27
Freight.....	92,935 98	86,965 91	1,025,712 06
Express	8,020 81	8,672 36	73,023 35

		1,309,514 83

Net earnings (41.24 per cent.)	$919,094 61
Interest account	227,208 21
Balance	$691,891 40

The following is a comparative statement of the earnings, expenses, etc., during the past and preceding years:

	1866–'67.	1867–'68.
Gross earnings	$2,158,874 57	$2,228,609 44
Operating expenses	1,348,405 90	1,309,514 83
Net earnings	$810,468 67	$919,094 61
Interest	182,912 71	227,203 21
Balance	$627,555 96	$691,891 40

This shows an increase in gross earnings over the previous year of $69,734 87, with a decrease in expenses of $38,891 07—making the increase in net earnings, $108,625 94.

At the date of the last annual report, June 30, 1867, the bonded debt of the company was $2,965,000 for the Main Stem and Branches, (exclusive of the Lebanon Branch Extension.) On the 30th of June, 1868, it was $2,883,500—showing a

Redemption of bonds during the year of	$81,500 00
Added to construction during the fiscal year	28,090 85
Interest paid during the same time	227,203 21
	$336,794 06

By reference to the annexed statements it will be seen that the mortgage debt of the Lebanon Branch Extension is placed at $600,000 and the amount of Louisville City bonds (borrowed) at $600,000 more, making a total of $1,200,000. Of the mortgage bonds, 88 had been sold, also 333 of the City bonds—leaving 512 of the mortgage, and 267 of the City bonds unsold. In compliance with a resolution of the Board, July 14, 1868, (as stated in a note by the Secretary,) all the unsold bonds have been canceled and destroyed; and $6,000 of the Main Stem mortgage bonds, due January 1, 1869, have been redeemed—leaving the mortgage debt of the company, September 1, 1868, $2,449,500. The President in his report says:

The Board of Directors, under the virtual instructions of the stockholders, have continued the work on the Lebanon Branch Extension between Crab Orchard and London at the usual speed, most of the line between those points having been let to contract before your last annual meeting, and no part of it has been put under contract since that time. It has been the purpose of the Board to keep that work in such a state of forwardness as to be able to meet the Knoxville and Kentucky road at the State Line, connecting at Knoxville with the Blue Ridge Railroad, or to meet the Virginia roads from Norfolk through Bristol to Cumberland Gap, or to meet both of said lines at the points designated, if hereafter deemed advisable by the stockholders, together with the Ashville, Morristown, Cumberland Gap, and Charleston line, now being built in East Tennessee, and completed within three miles of the North Carolina State line and within forty miles of Cumberland Gap. This line, completed as contemplated by its projectors, will connect us at Cumberland Gap with the interior of East Tennessee, North and South Carolina, and some of the most important points on the Atlantic seaboard; and it is sincerely hoped that these connections will speedily be made. A few years of prosperity for the country will insure their accomplishment.

We report the favorable progress of the work on the Richmond Branch. It is believed that it will be completed and in running order by the 15th of November of the present year. From the character of the soil and productions of that portion of the State, and the wealth, industry and energy of the people of the counties through which the road passes, coupled with the fact that it will serve as a feeder to seventy-five miles of the Lebanon Branch and thirty miles of the Main Stem, it is earnestly hoped that the company will be more than repaid for the outlay in its construction.

In September, 1867, the Board of Directors leased for the term of ten years the Memphis and Ohio Railroad, leading from Memphis to Paris, Tennessee, since which time it has been run by this company. The road was, of course, out of order, as were all other southern roads at the close of the war. But since the lease it has been put in good running order, and no doubt is entertained that the arrangement will result favorably to your interests. The Memphis, Clarksville and Louisville Railroad is still in the hands of a receiver of the State of Tennessee, and your company is now running it under and as the agent of the receiver, by which arrangement, and by our lease and possession of the Memphis and Ohio road, we operate the line from Louisville to Memphis as one line, making the whole length of road run by this company 561½ miles.

We have pleasure in stating that the affairs of the company generally are in a healthy and safe condition, with bright prospects of rapidly increasing prosperity in the near future. Our connections in all directions will doubtless be speedily completed. We have now uninterrupted connection by our Main Stem with Nashville, and through that point to Middle and East Tennessee, and Virginia, North Alabama, Charleston, S. C., and North and Middle Georgia, by the Nashville and Chattanooga and Nashville and Decatur Railroads—with Mobile and South Alabama, from Humbolt, on the Louisville and Memphis line, by the Mobile and Ohio road—with Western Tennessee, Central Mississippi, Louisiana, and Texas, by our Memphis line, and from Humbolt by the Mobile and Ohio, Mississippi Central, and the New Orleans, Jackson and Great Northern Railroads and their connections; and there is now a daily line of sleeping cars from Louisville to New Orleans and from New Orleans to Louisville without change of cars.

The work on the Railroad Bridge at Louisville is progressing favorably, and the entire structure will probably be completed by the 1st of September of next year, which will secure direct and uninterrupted connection with all points north, north-east, and north-west of Louisville. The Louisville, Cincinnati and Lexington road from Lagrange, on the Louisville and Frankfort road, to Covington or Newport, opposite Cincinnati, a direct line from Louisville to Cincinnati, will be completed and in operation in the Spring of 1869, giving us additional facilities for all connections north and north east of Louisville.

By the Louisville and Frankfort and Lexington and Frankfort roads, we have direct connection with Frankfort, the capital of the State, and with Lexington and the adjacent country, perhaps the finest in the State of Kentucky; and after the construction of the road from Lexington to the mouth of Big Sandy, which will doubtless be accomplished within a very few years, our road will connect with the Baltimore and Ohio Railroad and its connections by the Big Sandy route. And by our Lebanon and Richmond Branches we have and will have connections with the finest mineral region of Kentucky, and little inferior, if any, in agricultural resources to the best portions of the State; and by the Lebanon Branch Extension and its connection with the Virginia, North and South Carolina, and East Tennessee roads, as already indicated in this report, we will have all the desired eastern connections.

At Memphis we have connection with the finest agricultural portion of the State of Mississippi, by the Mississippi and Tennessee Railroad, which runs from Memphis to Grenada, Mississippi, there connecting with the Mississippi Central Railroad. And at Memphis also we will doubtless shortly be connected with the most fertile portion of Arkansas by the reconstruction and completion of the Memphis and Little Rock Railroad. That company was greatly crippled by the war, and is struggling to reclaim its losses by finishing the road to Little Rock, which can only be a question of time. Its early completion is, of course, a matter of more than ordinary interest and concern to your company.

And at Elizabethtown, on our road, and from that point by way of the projected Elizabethtown and Paducah Railroad, we will penetrate another portion of this State, as yet without railroad facilities, and not surpassed in the great elements that make up the wealth of a State by any portion of the Southwest. The stock in the company has not yet been subscribed for, but in the energy, industry, and perseverance of its President, Samuel B. Thomas, Esq., we have guaranty of final success.

And with all these various connections in almost every direction, now completed and speedily to be completed, by judicious management on our part, there can be no reasonable ground to doubt that a few years of prosperity in the country will make the Louisville and Nashville Railroad all that the stockholders should desire.

The half million of bonds of the Louisville, Cincinnati and Lexington Railroad Company, for which this company subscribed in aid of the construction of the road from Lagrange to the Ohio opposite Cincinnati, have been sold without loss to our company.

Under the amendment to our charter, accepted by the stockholders on the 31st of March, 1868, the Board of Directors have made preparation for the issuance and sale of the bonds contemplated by the amendment, and have caused to be executed a mortgage upon the property of the company to secure the payment of the bonds and interest, and are now offering for sale a limited amount of the bonds in New York and Louisville.

It was the purpose of the retiring Board to sell the bonds only as the proceeds were needed, for the preservation of the property, and the objects contemplated by the amendment, and with this purpose steadily adhered to by our successors the wisdom of the amendment will very shortly be made practically obvious. The property cost the company more than $13,000,000, and is now worth certainly over $15,000,000, with a mortgage debt upon it less than two millions and a half; and by the proper use of the proceeds of the bonds issued under the amendment in the acquisition of additional property, the debt of the company will not certainly increase more rapidly than will the property increase in amount and value, and it is believed that much better than this may be done for the company.

We have made arrangements for the registration of our bonds, and in such manner as will protect the holders against loss by fire, theft, or other casualty, and all persons who may desire a safe security for themselves or others dependent upon them, may accomplish this purpose by a purchase and proper registration of our bonds. Our company is a home institution of growing prosperity and undoubted solvency and permanency, and will continue to increase in value as the country continues to develop and prosper.

The total length of the Main Line (Louisville, Ky., to Nashville, Tenn.,) is 185 miles; sidings, 19.81 miles—total, 204.81 miles. Length of Bardstown Branch (Junction to Bardstown) 17.30 miles; sidings, 0.81 mile—total, 18.11 miles. Lebanon Branch (Junction to Lebanon,) 37.30 miles; Knoxville Extension, (Lebanon to Brodhead,) 54.90 miles; sidings, 8.88 miles—total, 101.08 miles. Richmond Branch, (Junction with Knoxville Branch to Lancaster,) 7.75 miles; sidings, 0.67 mile—total, 8.42 miles. Memphis Branch, (Junction to Tennessee State Line,) 46 miles; sidings, 3.55 miles—total, 49.55 miles. Total length of road and branches, 348.25 miles. Total length of sidings, 33.72 miles. Total miles of iron, 381.97.

The following statement, from the report of the

General Superintendent, contains in a condensed form the general results of the operations of the Main Line and Branches during the years ending June 30, 1867 and 1868:

	1866–'67.	1867–'68.
Gross earnings	$2,158,874 57	$2,228,609 44
Operating expenses	1,348,405 90	1,309,514 83
Net earnings	$810,468 67	$919,094 61
Proportion of expenses to earnings	62.46 per ct.	58.76 per ct.
No. of miles run by trains	760,843	772,867
Earnings per mile of train	$2.84	$2.88
Expenses " "	1.77	1.69
Net earnings " "	$1.07	$1.19
Length of road in operat'n.	333.3m.	336.3m.
Earn'gs per mile of road.	$6,477 26	$6,626 84
Expenses " "	4,045 61	5,893 88
Net earnings " "	$2,431 65	$2,782 96
Mileage of freight cars	5,640,917	6,182,132
" passenger cars	2,194,208	2,130,712
Number of tons carried	222,937	243,918
Do. carried one mile	27,504,811	29,321,009
No. of passengers carried	358,747	365,646
Do. carried one mile	23,078,589	21,420,247

The results of the operations of the Main Stem and Branches are shown separately in the annexed statement:

	Main Stem.	Bardstown Branch.	Lebanon Branch.	Memphis Branch.
Gross earnings	$1,823,767 33	$28,051 52	$186,109 83	$195,666 26
Operating expenses	1,008,592 34	12,554 49	132,279 97	146,088 13
Net earnings	$815,171 09	$497 03	$53,829 86	$49,597 13
Proportion of exp. to earnings	55.30 per cent.	97.84 per cent.	71.07 per cent.	74.65 per cent.
Number of miles run by trains.	578,080	12,264	85,513	97,060
Earnings per mile of train	$3.15	$1.88	$2.17	$2.01
Expenses per mile of train	1.74	1.84	1.54	1.50
Net earnings per mile of train	$1.41	$0.04	$0.63	$0.51
Length of road in operation	185 miles.	17.3 miles.	88.3 miles.	46 miles.
Earnings per mile of road	$9,858 18	$1,332 45	$2,114 87	$4,254 02
Expenses per mile of road	5,451 85	1,303 82	1,503 18	3,175 83
Net earnings per mile of road	$4,406 33	$28 73	$611 69	$1,078 19
No. of passen. carried one mile.	16,951,202	289,522	2,058,679	2,120,843
Tons of freight carried one mile	25,190,442	195,548	1,755,231	2,178,788

In 1866–'67 the earnings of the Main Stem were $1,790,197 24, the expenses $1,045,519, and the net earnings $744,678 05, showing an increase in earnings of $33,566 09, with a decrease in expenses of $36,926 95—making the increase in net earnings, $70,493 04.

The earnings of the Bardstown Branch in 1866–'67, were $20,961 67, and the expenses, $24,370 67—showing a loss of $3,409. This year the net earnings are $497 03, an improvement of $3,906 03.

Only 85 miles of the Lebanon (Knoxville) Branch, were in operation in 1866–'67, the earnings upon which were $189,108 53, the expenses, $141,130 05, and the net earnings, $47,978 48. In 1867–'68, 88.3 miles were in operation. A comparison of the business of this branch during the past and preceding year shows a decrease in earnings of $2,999 20, with a decrease in expenses of $8,850 08—making the increase of net earnings, $5,850 88.

The earnings of the Memphis Branch in 1866–'67, were $158,607 13, and the expenses, $137,385 99—leaving as net earnings, $21,221 14. Comparing this with the business of the past year, shows an increase in earnings of $37,078 13, with an increase in expenses of $8,702 14—making the increase in net earnings, $28,375 99.

Statements are given showing the profits accruing to the main line from the operations of the several branches thus: the freight business transacted at the stations of the Bardstown Branch amounted to $36,794 53; the proportion due the branch was only $9,981 92—leaving for the Main line $26,812 61. The total earnings from passenger business which originated on the same branch was $24,343; $11,609 51 of which was due to the branch, and $12,733 49 to the Main line—making the gross revenue from business brought to the Main line from the Bardstown Branch, $39,546 10, and the net revenue derived therefrom, $18,338 87.

The total earnings from freight received at and forwarded from all stations on the Knoxville Branch, were $150,066 19, of which only $87,073 were due the branch—leaving for the Main Stem and other branches, $69,993 19. The earnings derived from the passenger business were $120,894 34; the proportion due the branch was $99,036 83—making the gross earnings of the Main Stem and other branches, $21,858 01. The total gross earnings were therefore $84,851 20, and the net revenue, $38,475 95. To which add net revenue of the branch, $53,829 36—making a total net revenue derived from the branch directly and indirectly, $92,305 31.

The estimated value of the Memphis Branch as a feeder to the Main Stem and other branches is as follows: earnings from freight received at and forwarded from stations on the branch, $328,343 26; proportion due the branch, $92,935 98. Earnings from passenger business which originated on the branch, $203,848 90; proportion due the branch, $89,228 51. The amount due the Main line from both passenger and freight business being $350,027 67, and the net revenue therefrom $157,842 93. The net revenue of the branch was $49,592 13. Total net earnings, $207,435 06.

The company have 66 locomotives, 45 passenger, 15 baggage, 8 express, 362 box, 110 rack, 43 gondola, 136 flat, 82 stone, 11 boarding and 1 wrecking cars. There have been added during the year, 14 box, 12 rack, and 17 flat cars. Miles run by locomotives with passenger trains, 438,804; with freight trains, 412,754; distributing trains, 71,913—total, 923,471.

Number of local passengers carried north, 158,683; do., south, 148,816—total, 307,499. Number of through passengers carried north, 27,834; do., south, 30,313—total, 58,147. Total local and through, 365,646. Total mileage of through passengers, 10,241,393; do., local, 11,178,854—total, local and through, 21,420,247. Miles traveled by each passenger, 58.58; do., by each local passenger 36.35. Revenue from through passengers per mile, 3.87 cents; do., local, do., 4.11 cents. Number of tons of freight carried, 243,918; do., carried one mile south, 17,468,694; do., north, 11,852,315—total tons carried one mile, 29,321,009.

Debt of Illinois.

In the year 1840 the State of Illinois, having then a population of 500,000, owed a debt of fourteen millions of dollars. A large portion of this debt was incurred for stock in the State Bank, in which the State was a stockholder. When the bank failed the stock became worthless, and the State received nothing for its subscription. The remainder of the debt was incurred under the old system of internal improvement, and for the Illinois and Michigan Canal. All that the State has to represent its then large debt is the canal. The debt was enormous, and the State seemed financially ruined. Its bonds had gone to holders for ninety, fifty, and even thirty cents on the dollar. In 1847, bills for funding the principal of and arrears of interest upon the debt were passed, and by the Constitution of 1847 a sinking fund, known as the two mill tax, was provided. The State, up to 1857, was able to pay only a part of its accruing interest. In 1857 a bill for funding the arrears of interest accruing between 1847 and 1857 was passed, and the State then, for the first time, began to pay its interest in full. The debt had, by its own increase, grown to some eighteen million dollars. In 1861 the debt was still further increased two million and fifty thousand dollars, for expenses of placing troops in the field, and for other war expenses.

By the application of the two mill tax fund and the receipts from the Illinois Central Railroad, and receipts from canal revenues, the debt has been continually decreased. With the fund raised for interest purposes, all the accruing interest has been paid. On the 1st day of December, 1866, the debt, excluding a nominal amount of scrip outstanding and unfunded, of $42,209 10, was $8,638,252 21. On the 15th of October, 1868, the debt was (excluding the old scrip, which was probably lost or destroyed) $5,999,603 50; showing a reduction of $2,638,648 68 in two years, represented as follows:

Internal improv't b'ds (old) due 1870	$2,000.00
New internal improv't stock, due '70..	1,635,953.74
Interest bonds of 1847, due 1877....	996,149.44
Interest stock of 1857, due 1860....	134,311.46
Liquidation bonds, due 1865....	193,400.00
Refunded stock, due 1862....	213,000.00
Refunded stock, due 1865....	9,000.00
Refunded stock, due 1869....	69,000.00
Refunded stock, due 1870....	396,000.00
Refunded stock, due 1876....	67,000.00
Refunded stock, due 1877....	334,000.00
Refunded canal stock, due 1860.....	8,000.00
Normal University bonds, due 1879..	48,000.00
Thornton loan bonds, due 1879.....	108,000.00
$1,000 war bonds, due 1879....	324,000.00
$500 war bonds, due 1879....	165,000.00
$100 war bonds, due 1879....	69,200.00
Canal bonds, dated July 1,'41, due '70	19,000.00
Canal bonds, registered, due 1870...	8,400.00
£225 canal bonds, payable in London, due 1870....	697,000.00
£225 canal bonds, registered, due '70	181,300.00
£300 canal bonds, payable in London, due 1870....	57,333.33
£300 canal bonds, registered, due '70	256,200.00
£100 canal bonds, payable in London, due 1870....	12,888.89
£100 canal bonds, registered, due '70	63,466.67
£225 canal bonds, payable in New York, due 1870....	25,000.00
£225 canal bonds, registered, due '70	7,000.00
Total interest bearing bonds.....	$5,939,603.53

Called in for payment, money appropriated to pay and to be paid as soon as surrendered by the holders:

1 refunded stock bond, due 1860....	$1,000
20 canal bonds of July 1, 1837, due 1860..	10,000
1 canal bond of July 1, 1837, registered, due 1860....	350
2 canal bonds of 1847, due 1860....	2,000
7 interest stock bonds, due 1860....	7,623
Total....	$20,978

On the first day of January next there will be in the Treasury, applicable to the payment of the debt:

Estimates State debt fund of 1867, collected in 1861....	$900,000
Estimates Illinois Central Railroad payment, to be made to Oct. 8, 1868.....	200,000
Total....	$1,100,000

The Canal Trustees will, in January next, probably make a payment upon the registered canal debt, from the canal revenues of 10 per cent., or $140,000, so that the debt of the State, after January next, will be about $4,700,000, mostly due in 1870. The registered canal debt, which is a lien upon the canal, is something over $516,316.67.

The following table shows the receipts from the Illinois Central Railroad Company for the percentage upon its gross receipts since its organization:

To Oct 31,'56	$29,721.59	For six months, ending	
For six months, ending		Ap'l 30, 1862	$74,465.34
April 30, 1856	31,529.00	Oct. 31, 1862	137.709.26
Oct. 31, 1856	46,102.66	Ap'l 30, 1863	126,634.83
April 30, 1857	59,196.82	Oct. 31, 1863	178,759.75
Oct. 31, 1857	86,449.02	Ap'l 30, 1864	170,055.08
April 30, 1858	60,255.76	Oct. 31, 1864	235,458.96
Oct. 31, 1858	71,749.77	Ap'l 30, 1865	240,553.84
April 30, 1859	51,137.68	Oct. 31, 1865	255,936.00
Oct. 31, 1859	73,966.78	Ap'l 30, 1866	205,501.70
April 30, 1860	89,612.56	Oct. 31, 1866	221,574.05
Oct. 31, 1860	96,944.66	Ap'l 30, 1867	207,169.70
April 30, 1861	84,934.36	Oct. 31, 1867	236,838.04
Oct. 31, 1861	92,323.65	Ap'l 30, 1868	194,603.01
Total			$3,345,213.67

The war debt incurred by the State has already been refunded to the State by the United States Government, and the money so received has been appropriated to and used for purposes of revenue or for defraying the ordinary expenses of the State Government, so that, in effect, the war debt has been paid. The war bonds now outstanding, amounting, as above, to $558,200, would long ago have been paid, if presented, but the holders do not seem to desire their payment, and they do not become due until 1877.—*Waukegan Gazette, Oct. 24.*

Intercolonial Railway.

The *Canadian Monetary Times* gives the following particulars in reference to the various proposed lines which have been examined with a view to obtaining the best and shortest route. The one selected by the Government is the No. 15, or Major Robinson route, which, all things considered is probably the best. The line is very straight to Halifax, being 560 miles from Riviere du Loup, the terminus of the Grand Trunk Railway. Halifax is 316 miles nearer to Liverpool than Portland, 373 nearer than Quebec, 357 nearer than Boston, and 550 miles nearer than New York. It is claimed for this route that it will best secure the largest European passenger traffic, the carriage of mail matter and express freight, and could accommodate, next to the frontier line, the largest amount of local freight. The *Times* says:

For the sake of presenting at one view the comparative distances (of the different lines projected) from Riviere du Loup to St. John and Halifax, and the number of miles of railway already built, we give this table:

	To St. John.			To Halifax.		
No. Rail-line.	of way built.	Not built.	Total.	Railway built.	Not built.	Total.
FRONTIER ROUTES.						
1	27	292	319	184	401	585
2	45	305	350	202	414	616
3	00	301	301	157	410	567
CENTRAL ROUTES.						
4		326	326	157	435	592
5		328	328	157	437	594
6	37	343	380	120	452	572
7	77	349	426	80	458	538
8	37	307	344	120	416	536
9	77	313	390	80	422	502
10	96	326	422	61	435	496
11	37	323	360	120	432	552
12	77	320	406	80	438	518
BAY CHALEURS ROUTES.						
13	37	387	424	120	496	616
14	96	377	473	61	486	547
15	96	390	486	61	499	560

The shortest frontier route to St. John is 301 miles, and to Halifax 567 miles; the shortest Central route to St. John is 326 miles, and to Halifax 496 miles; and the shortest Bay Chaleurs route to St. John is 424 miles; and to Halifax 547 miles.

The average number of inhabitants for each mile of railway by the different routes is given as follows:

Frontier line	260	per mile of railway.
Central	122	" "
Bay Chaleurs	235	" "

The route recommended by Major Robinson as the best general direction for the proposed railway is from Halifax to Truro, at the head of the Bay of Fundy, passing over the Cobequid Hills, and on and near to Amherst and Bay Verte crossing from these over to the River Richibucto and Miramichi; then by the valley of the northwest Miramichi and Nipisguit River to Bathurst; then along the shore of the Bay Chaleurs to the Restigouche River; then by the valley of the Matapedia over the River Metis; then along the banks of the St. Lawrence, at a distance of eight or twelve miles from the south shore to Riviere du Loup. The line is No. 15 in the above table. The distance to St. John and Halifax by this line are estimated as follows:

RAILWAY TO ST. JOHN.

	Miles.
From Riviere du Loup, to Metis and Matapedia, to Dalhousie	196
From Dalhousie to Bathurst	53
From Bathurst to E. and N. A. railway	141
Along E. and N. A. railway to St. John, constructed	96
Total	486

RAILWAY TO HALIFAX.

From Riviere du Loup, by Metis, Matapedia, Dalhousie, and Bathurst, to Moncton	390
From Moncton to Truro	109
From Truro by railway to Halifax, constructed	61
Total	560

Wooden Railways.

There are many parts of the country that suffer from a lack of railway facilities, without any prospect of bettering their condition in that respect, unless they can secure a road less costly than an iron railway. The advantages to be derived from wooden railways seem to have impressed themselves very forcibly on the minds of such as have taken the trouble either to inspect the wooden railways at work near the United States border or to go through the estimates and calculations furnished respecting their cost, working expenses and earnings. Lines of wooden railway are "projected" in both Provinces, Quebec and Ontario; in the former, there are three in embryo—from Lennoxville to Lake Megantic; from Arthabaska to Upton, and from Quebec to Gosford; in the latter, from Meaford to Collingwood, and from North Douro to Haliburton.

Some time ago, we published an interesting letter from Mr. C. J. Bloomfield, the representative of the Canadian Land and Emigration Company, giving the result of a personal inspection by himself and others of the wooden railway which runs to the Clifton Iron Mines, near Ogdensburgh a distance of twenty-four miles.

These gentlemen are of opinion that such railways would be of great service to Canada as feeders to main lines, and likely to prove active agencies in the development of remote settlements, or such sections of county as do not enjoy the advantage of lines running near them. In the back country the materiol is ready to hand. A saw mill, a blacksmith shop, plenty of maple, and a comparatively small amount of capital are all the requisites. As to the cost, estimates, of course, must be based on the character of the country through which a line would run and the price of timber. At any rate, from two to four thousand dollars per mile may be taken as about the probable cost. The solid maple rails 4×6 inches are wedged every three feet into heavy notched ties, the notch being made by machinery, and the wedges, two at each notch, from the waste of the maple rails. A few minutes suffice to unwedge the rails and lay down new ones. Being tightly notched in, the rails cannot warp sideways. It is said that the wood is made to make a curve in a way that would be found impossible with iron. Fine sand and dust which get on the rails are soon crushed into the wood by the car wheels and form a hard and gritty surface, which does not wear, and greatly facilitates the traction. The maple rail, if sound, will last a number of years, the average life being according to a good authority, five years, as the wet weather does not materially affect it. Good, broad wheels are essential; where the rolling stock is heavy, the wheels have a rim five inches in width. The sleepers are not adzed. A speed of ten miles an hour for freight trains, and twenty miles an hour for passenger trains, may be attained on these roads without any more risk, where the road is properly built, than would be incurred by running at the same speed on iron rails. This rate is higher than is generally supposed as capable of attainment on wooden railways, and certainly is as much as is realized on some of our iron railways. One of the requisites for the successful working of wooden railways is that the locomotives shall be light, and also the goods carried. We have already given the estimate per mile for costs of superstructure, but we reproduce it now for the sake of those who may not have given the subject attention:

1,760 ties delivered at 10 cents	$176 00
21,120 feet b. m. maple rail	316 00
Wedges, say	40 00
Notching ties and track laying	468 00
	$1,000 00

—*Canadian Monetary Times.*

Hoosac Tunnel.

There has perhaps been no time during the whole of these long past years of indecision, doubt and struggle, when the hope of ultimate success have been so steady, so probable, so alluring, as at present. With Mr. Farran at the head, management has become progressive at a rate that we have never known before. Already he has opened a passage through at the West end, four thousand feet in length, by which the vast labor of raising the debris through the shaft and pumping out the water will be obviated, as both can now be conducted through the opening, thus saving time, labor and money, in a way which should give confidence to the most doubting, and a fresh impetus to every one interested in the success of the enterprise. Of this four thousand feet, eight hundred is already completed tunnel, arched with brick, and the four hundred feet remaining heads to the point of communication with the heading of the West shaft. From here, twelve hundred feet more brings you to the West shaft, and East of this sixteen hundred feet have been pierced into the mountain. From the West end to the West shaft there remain twenty-four hundred feet which, with the exception of two or three hundred feet, will require to be built up with masonry, and then after that, Eastward from the shaft, the work is through the solid rock.—*Hoosac Valley* (North Adams) *News.*

St. Paul and Lake Superior Railroad.

The corps of engineers under Mr. DeKosta are now at work locating the line of the St. Paul and Lake Superior Railroad from the Dalles down to the navigable waters of Lake Superior.

Such a number of lines have been run that the country in the neighborhood of the Dalles is represented as nearly cleared. They have about thirty men at work, a majority of whom are choppers, and per consequence the timber has been brought low.

One line is being located into the village of Fondulac; on this route they come down the valley close to the river with an average grade of fifty feet to the mile. On this line there must necessarily be some very heavy curves.

The other line pointing to the head of the lake, starts from the Dalles and runs nearly east, crossing the Reserve road near its crossing of Midway river; from there it tends a few degrees to the south and passes about four miles back of Fondulac, and from there making as near as practicable an air line for Rice's Point, or Duluth; either of which may by this means be made the objective point.—*Superior Gazette.*

☞ LOUISVILLE AND NASHVILLE RAILROAD FIRST MORTGAGE 30-YEAR 7 PER CENT. BONDS, INTEREST PAYABLE APRIL AND OCTOBER, AT THE BANK OF AMERICA, IN NEW YORK.

INCOME ACCOUNT NO. 7 FISCAL YEAR ENDING 30TH JUNE, 1868:

Gross earnings		$2,228,609 44
Running expenses	$1,309,514 83	
Int. account same time	227,203 21	
		1,536,718 04
Net earnings		$691,891 50

Road and branches finished and running 367 miles, with monthly increasing earnings, and a mortgage debt of only $2,450,000.

For the purpose of retiring the above OLD indebtedness, and of extending its connections Southward, the Corporation has executed a mortgage to JAMES PUNNETT and JUNIUS B. ALEXANDER, of the city of New York, as Trustees, upon its entire lines of Road, with all its rolling stock, property, franchise and INCOME, to secure the prompt payment of its bonds for eight millions of dollars, in denominations of one thousand each, payable thirty years from 1st of April, 1868, and bearing seven per cent. interest—Coupons payable April and October, at the Bank of America, in New York. This mortgage provides for the *registering* of these bonds on the books of the Company, and at its agency in New York, by any holder who may desire this security against loss by theft or otherwise; and also that $2,500,000 of the Bonds shall be set apart for the *express purpose* of retiring at maturity the present indebtedness—thereby making this the *only* and *first* mortgage, on a road costing *double the amount.*

There is no Railroad Corporation in America whose bonds should more fully command the entire confidence of capitalists than this, which has never faltered in the payment of its obligations, of every description.

The net earnings of the Road are more than fourfold the interest on its present bonded indebtedness, and the stockholders have received eight per cent. cash dividends.

It is the purpose of the Company to issue, at present only a small portion of their Bonds secured under this mortgage, which we are now authorized to sell, in lots to suit purchasers, at ninety and accrued interest. Personal knowledge of this property, and its management, fully warrant us in unhesitatingly recommending these Bonds as in *all respects* a *first-class* security.

J. B. ALEXANDER & CO.,
No. 19 Nassau Street.

New York, November 10, 1868.

Baltimore and Potomac Railroad.

We are pleased to learn that this much-needed public work is progressing as rapidly as it is possible. The right of way in most cases has been secured and paid for, and through the efforts of Gov. Bowie, the worthy president, we doubt not that the whole work will be completed in a shorter period than its most sanguine friends anticipated. —*Annapolis Republican.*

☞ The Debt of Kentucky has been reduced $992,000 during the past year, and now stands at $8,619,191 46.

American Railroad Journal.

Saturday, November 14, 1868.

Stock Exchange and Money Market.

The Money Market has been extraordinarily close and oppressive to borrowers since our last. The offerings of capital on Thursday and Friday, the 5th and 6th insts., were on an extremely limited scale, and usurious rates of interest were exacted from even first class street houses, for such aid as they stood in urgent need of. The effect of this remarkable stringency was discernable in the panicky dealings in the public funds, as also in railway and miscellaneous shares, and, to some extent, in produce and merchandise, the ruling values of which were all more or less seriously depressed, and characterized by frequent and violent fluctuations. On Saturday, advices were received from Washington, intimating that Secretary McCulloch contemplates an early issue of a portion of the reserve of fifty millions of legal tender notes, and also a re-issue of retired but uncancelled greenbacks; further that the Secretary would presently issue a fresh batch of three per cent. certificates, with a view to the relief of the loan and discount market, and the benefit of legitimate business interests. These advices led to a partial subsidence of the distrust and feverishness previously so prevalent in the street, and to a corresponding improvement in fund and stock values, on a more confident purchasing demand. On Monday and Tuesday, there was a much improved tone in the money market, and a greatly diminished pressure for accommodation has been noted, on the part of nearly all classes of street borrowers. To the Government houses as well as to the leading stock firms, money has been quite freely offered, especially toward the close of Tuesday, at 7 per cent. in currency; and this, too, although the street was considerably agitated by a variety of rumors, more or less conflicting, relative to the probable financial action of the Secretary of the Treasury in the immediate future, and to the financial and commercial situation at the West and Northwest, whence rather discouraging reports were received during Tuesday. On Wednesday the 10th, the market was decidedly in favor of borrowers, whose wants were generally supplied at the legal rate on first class collaterals. Discounts were quoted at from 8 to 10 per cent. per annum, for the best names, and were much more animated on the final day than on any preceding day, of the week under review, which, taken as a whole, was one of the most critical for the business of the city, state and nation, as far as regards financial influence that we can recall to memory. The city banks made a discouraging exhibit, in their last weekly returns reporting a loss of $4,423,721 of legal tender notes, and a gain of $5,826,215 in specie, with a reduction of $5,753,678 in loans. The deposits have been cut down $6,391,889, and the circulation increased $100,427. Secretary Mc Culloch's statement of the public indebtedness, for Nov. 1, has been generally regarded as favorable to the public credit. It shows a decrease of $7,514,166 in the net aggregate obligations of the Government, since October 1. The cash in the Treasury on the 1st inst., was $113,873,019 (including $10,465,033 of currency, and $103,407,985 of coin) $110,257,841 (of which $13,365,994 currency and $96,891,847 coin) on the 1st ult. The net debt is now $2,527,129,552, of which the sum of $2,107,557,950 bears coin interest.

The specie reserve of the city banks is now $16,446,741, against $12,816,984 same time last year. The city bank deposits are now $175,556,718, against $177,849,809 week ending Nov. 2, 1867. The legal tender reserve amounts to $47,167,207, against $55,540,833 same time last year. The circulation now stands at $34,353,637, against $24,069,903 same time last year. The loans are now $256,612,191, against $247,719,175 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $146,095,267 a day, against a daily average of $134,908,757 the preceding week, and $141,262,407 the week ending with Oct. 22, 1868. The current week's exchanges average about $130,187,185 a day. The city banks, last week, gained $5,826,215 of specie, while they lost $6,391,829 of deposits, and $4,423,721 of legal tender notes. They reduced their loans, $5,753,678; and increased their circulation, $100,427.

The New York Gold Exchange Bank reports for the week ending Saturday, the 7th day of November, 1868, the average amount of loans and discounts as $1,683,864; average amount of specie, $697,759; average amount of deposits, $1,553,243.

National Bank notes to the amount of $89,60[illegible]

were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,450,876, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,515,001, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,935,875. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,495,600; and for the public deposits, $38,060,350—making a total of $379,555,950. The Treasury Department last week redeemed and destroyed $365,500 of worn and mutilated fractional currency, and issued $544,673 of new. The outstanding amount of fractional currency on the 1st of November, was $33,413,985, against $32,933,614 on the 1st of October, 1868.

The U. S. Sub-Treasury receipts, week ending with Nov. 7, were $27,266,903, including $1,887,810 from customs duties; payments, $36,902,855, including $10,707,000 of coin interest; balance at the close of the week, $82,363,664, against $91,484,109, at the close of the preceding week, showing a decrease of $9,635,952. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday $3,471,146 including $329,469 from customs; add payments, $3,480,257, including $1,104,000 of coin interest; on Tuesday, receipts, $1,220,747 including $317,000 from customs, and payments, $1,337,301, including $596,250 of coin interest. The balance at the close of business on Tuesday stood at $82,237,998, against $83,216,312, a week previous; and $93,703,339, on Oct. 21, 1868. The aggregate receipts of the office from all sources in October, were $56,749,293; aggregate payments, $59,249,680. The balance on the 1st of November was $91,999,615, or about 2½ millions more than on the 1st of October, which amounted to $94,499,990.

The outstanding amount of coin certificates on the 1st of Nov., was $19,716,840, against $20,236,400 on the 1st of Nov., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $2,860,000, and retired $1,801,810 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during October, reached $5,208,560.

Government revenues have been unfavorably affected by the pressure in the money line, and have yielded only very moderately, since our last. The excises, last week, yielded about four millions; customs at the port of New York, $1,887,810, and at the outports about $630,000 (in coin) more, making the grand total income for the week equal to about $7,651,100 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $85,000,000.

Gold has fluctuated rather widely, during the week, influenced more or less directly by the course of the loan and discount market. The dealings have been extensive, mainly on speculative account. The extreme figures have been 135⅞, and 132, and the closing quotations on Wednesday, were 134⅛@134¼, on a more liberal offering and a less confident inquiry, particularly from speculative sources. The export call has fallen off, and the customs drain has been on a reduced scale. According to the November debt statement, there were $103,407,985 of coin, and $10,465,033 of currency in the Treasury on the 1st inst., making an aggregate cash reserve of $113,873,019, against $110,257,841 on the 1st of October. Of the coin in the Treasury at the beginning of the current month, $83,691,145 belonged to the Government, and $19,716,840 to holders of an equivalent amount of outstanding coin certificates of deposit. On the 1st of October private depositors owned $20,236,400 of the $96,891,847 of coin then in the Treasury vaults.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,436,919, against $2,701,000 same time last year. The customs demand for Gold last week, averaged $312,968 a day; thus far, this week, it has been equal to $323,235 a day, or equal to a weekly aggregate of $1,939,410. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $53,861 and from California, $58,438. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $104,258,433, against $106,722,466 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $32,630,230, against $25,302,796 in 1867, showing an increase thus far in 1868, of $7,327,434. The exports of specie, from this port, last week, were $264,829, against $298,112 same week last year; total, since Jan. 1, 1868, $68,207,430, against $44,135,444 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $10,707,000; since Jan. 1, 1868, $74,577,609, against $54,540,681 same time in 1867.

There has been a decidedly weaker market reported for foreign exchange, partly influenced by the money pinch, on a reduced business. The later dealings indicated a little more steadiness in rates, but were not of any notable magnitude. Bankers' prime sixty day bills on London closed on Wednesday at 109¼@109½, and on Paris to 5.20c.@5.16¼; sight bills on London to 109⅝@110, and on Paris to 5.15c.@5.13¾. The offering of produce bills has been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,943,195, against $4,663,445, same week last year; total, since Jan. 1, 1868, $141,564,277, against $161,471,616 in 1867.

There has been unusual excitement in the market for Government securities, which have fluctuated violently on a very active trade. The closing transactions were on a less extensive scale, but were indicative of a strong and buoyant temper in the market. The official report of the public indebtedness on the 1st inst., shows a net decrease of $7,514,166 in the aggregate of the national obligations since Oct. 1. The net total is given at $2,527,129,552, against $2,534,643,718 on the 1st ult. Of the debt, the coin interest bearing portion is now up to $2,107,577,950, or $7,423,650 more than a month before. The increase is altogether in the form of five-twenty six per cent. bonds, of which there are outstanding $1,602,312,250 of all issues, including $514,771,600 of the issue of 1862, and $1,087,540,650 of the subsequent issues of 1864, 1865, (old and new,) 1867 and 1868. In the currency interest bearing portion of the debt, a reduction is noted of $11,156,930, consisting of retired compound interest notes and three per cent. certificates, and in the matured debt, not presented for payment, a decrease is shown of $2,686,520. Of the six per cent. currency interest bearing bonds, issued in aid of the several Pacific Railroad enterprises, $2,560,000 were put out by the department in October, making the outstanding aggregate of these bonds $42,194,000, against $39,634,000 a month ago.

U. S. sixes of 1881 closed here on Wednesday at 113¾@114; U. S. Five-twenties of 1862, (ex Nov. coupons) 108⅝@108¾; U. S. Five-twenties of 1864 at 106⅝@108⅞; U. S. Five-twenties of 1865 at 105¾@107; U. S. Five-twenties of 1865, consolidated, 109⅝@109⅞; U.S. Five-twenties of 1867, 109⅝@109⅞; U. S. Five-twenties of 1868, 110¼@110⅜; U. S. Ten-forties at 104⅛@104⅞; U. S. Six per cent. currency bonds, 99@99½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 28.	Nov. 4.	Nov. 11.
Consols	94¾	94⅜	94⅜
U.S. 5-20's of 1862	73⅜	74⅞	74¼
Erie	28½	28	27
Ill. Central	97¼	97¼	96½

Railway and miscellaneous shares have been very heavily dealt in, most of the week, but on the basis of much lower and unusually variable prices. Toward the close, the demand for the favorite stocks of the street operators was fairly active, and the market wound up in favor of sellers, though rather feverishly withal.

There has been less animation in the produce line at generally easier prices. Breadstuffs and provisions closed heavily. Middling upland cotton closed weak on Wednesday at 24@24½ cents per lb. The stock of cotton now here is estimated at about 28,500 bales. The receipts at the port this week, have averaged about 6,000 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 374,000 bales, against 217,000 bales same time last year; exports, same time 126,500 bales, against 71,000 bales same time last year; stock on hand at latest dates, 155,000 bales, against 115,000 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 18,871 pkgs., against 10,128 pkgs., same time last year. At the Live Stock market, this week, Beeves have been moderately active at from 10@16c. per lb.; week's receipts, 5,490. Veal calves in fair request at from 8@13½c. per lb.; receipts, 1,154. Sheep and lambs less inquired for at 4@6¼c., and 6½@8c. respectively; per lb., receipts, 34,705. Swine, saleable at 8@8½c. per lb., all live weight; receipts, 23,504. Foreign merchandise has been less sought after, and less buoyancy has been noted in prices of nearly all imported articles. The total imports of foreign dry goods, last week, were $1,137,381, and the total amount marketed $1,098,141. The value of foreign merchandise imported last week, was $2,725,930—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $3,863,311,

against $5,102,722 same week last year; from Jan. 1, 1868, $221,592,489, against $227,189,555 same time in 1867. The ocean freight market has been somewhat brisker, but rates have been irregular. For Liverpool we quote flour at 2s. 6d. by sail, and 3s.@3s. 3d. by steamer, per bbl.; grain at 7d. by sail, and 8@8½d. by steamer, per bushel; cotton at ¼d. by sail, and ⅜@½d. by steamer, per lb.; and heavy goods 22s. 6d.@30s. by sail, and 30s.@40s. steamer, per ton. Total number of vessels in port on Wednesday, 517.

The New York exports, exclusive of specie, for the week ending Nov. 10, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,663,445	$2,943,195
Prev. reported	156,808,171	138,621,082
Since January 1	$161,471,616	$141,564,277

The imports for the week ending November 7, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,381,967	$1,137,381
Gen. merchandise	3,720,755	2,725,930
Total for the week	$5,102,722	$3,863,311
Previously reported	209,724,158	211,667,434
Since January 1	$214,826,880	$215,530,745

The balance in the Sub-Treasury on Wednesday was $82,337,301 22.

☞ Six Per Cent. Gold Interest, Principal also Repayable in Coin.—First Mortgage Bonds, based upon the valuable franchises, grants, railroad, equipment, &c., of the Central Pacific Railroad Company, now nearly completed, and forming one of the most assured and productive lines of traffic in the world. The way traffic alone is large and remunerative, independently of the immense through business soon to follow.

A portion of this loan is offered to investors at 103 per cent., and accrued interest, in currency. The bonds have semi-annual gold coupons attached, payable January and July, in New York city.

Information, &c., to be had of

FISK & HATCH,

Bankers, &c., 5 Nassau street, N. Y.

Hudson River Railroad.

A meeting of the stockholders of the Hudson River Railroad Company will be held on the 30th inst., for the purpose of authorizing, if they see fit to do so, an increase in the capital stock of the company, $2,100,000, as recommended by the directors, at their meeting on the 4th inst., for the purpose of providing for the payment of the bonded debt of the company maturing in 1869. No portion of the stock is to be issued at less than par; the same to be first offered to stockholders at the time of the issue at par.

Fort Wayne, Richmond & Cincinnati R.R.

The City Council of Fort Wayne have adopted a resolution that whenever the Fort Wayne, Richmond and Cincinnati Railroad Company shall complete the whole line of said railroad, and the cars shall be running thereon and in connection therewith from Cincinnati through Richmond into Fort Wayne, the said city will provide by ordinance for a subscription by said city to the capital stock of said company of $100,000, and will issue the bonds therefor payable to said company in an equal amount and with like interest as the bonds authorized to be issued to the Fort Wayne, Muncie and Cincinnati Railroad. Both of these roads will be put under contract in a short time.

☞ The town of Middlefield, Ct., has voted to issue bonds to the amount of five per cent. of its grand levy, to aid the air line railroad, to be secured by second mortgage on the road, as provided by the legislature. The amount thus voted will be about $25,000.

☞ The President has accepted the twenty mile section of the Central Pacific Railroad commencing at the 370th mile and ending at the termination of the 390th mile east of the initial point at Sacramento City, California.

☞ The Cerro de Pasco Railroad Company has been formed in Lima and the greater part of the capital subscribed. This will be the first railway made in the interior of Peru.

Journal of Railroad Law.

CONSTRUCTION OF A BILL OF LADING.—RAILROAD COMPANY BOUND BY THE ACTS OF ITS AGENT.

The facts in the late case of LeSage *vs.* The Great Western Railway Company and The Detroit and Milwaukee Railroad Company, [1 Daly 306] are as follows:

The action was brought to recover the value of five bales of cordage and rope, received by the defendants for shipment from New York to Milwaukee. The goods were delivered by the plaintiff to the Hudson River Railroad Company at New York, and on presentation of the receipt of that company at the office of one Beach, the joint agent of the defendants in New York, the agent gave a bill of lading as follows:

"New York November 15, 1860.

"Received of S. & L. (Receipt of H. R. R. R.,) three bales cordage, two ditto rope, which goods the Great Western, and Detroit and Milwaukee Railways agree to transport over their lines to Milwaukee, at the rates herewith mentioned," &c., &c.

In the margin of the bill of lading it was declared that "no liability is assumed for miscarriage or wrong delivery of goods that are not properly marked, and as directed by bills issued at this office."

The goods were marked, as stated by the Hudson River Railroad receipt, "E. S. Barrows, Janesville, Wis., *via* M. D. R. R." It was admitted on the trial that the goods were carried by the Hudson River Railroad to Albany, where they were delivered by that company to the New York Central Railroad, and consigned by the latter company, as per its way bill, to Buffalo, where the goods were shipped on board of the propeller Dacotah for Milwaukee, by Lakes Erie and Michigan. The propeller and her cargo were lost on Lake Erie in a storm.

The defense was that by the defendants' rules and regulations, which they allege were known to the plaintiff's, all goods and property delivered or to be delivered to them, to be transmitted over their roads, should be distinctly marked "*via* G. W. & D. & M.," or "D. & M. all rail;" and if the plaintiff's goods had been so marked, they would have been delivered to the defendants at Suspension Bridge, and by them transported over their roads to Milwaukee.

At the trial the plaintiff's agent who procured the bill of lading, testified that no questions were asked as to how the goods were marked, and nothing was said to him in reference thereto by the defendants' agent.

The jury rendered a verdict for the plaintiff. The opinion of the court was delivered by Judge DALY.—By appearing and pleading to the merits, the defendants waived all objections to the form of the summons. (Gosling *vs.* Broach, 1 Hilt., 49.)

The receipt or bill of lading is in the name of both of the defendants and is signed by Beach as their agent. Upon its face it is an acknowledgment of the receipt by them of the five bales, marked as in the margin of the bill, to be transported over their lines to Milwaukee. The clerk who obtained it declared that nothing was said to him as to the manner in which the goods were marked; that he presented the receipt of the Hudson River Railroad Company at Beach's office, Beach not being there, and gave it to a young man who gave him the bill of lading; and that no questions were put to him as to how the goods were marked. Beach and the young man Haight testified to a very different state of facts which, if true, would have exempted the defendants from all responsibility for the loss of the goods. The jury having found for the plaintiff, they must have discredited the statements of Beach and Haight, and their finding upon such a point is conclusive.

The bales were not in the actual custody of either of the defendants at the time of their loss upon the propeller on Lake Erie. Their mutual agent received the receipt of the Hudson River Railroad Company. He or the holder of the receipt was alone entitled to receive them in Buffalo; and if they were sent on a different route from the road of either of the defendants, it was upon the defendants to show how that occurred, and that it was under circumstances that would relieve them from responsibility. Their mutual agent by taking the receipt and giving a bill of lading assumed the control and transportation of the property from Buffalo to Milwaukee. He engaged to transport it first by the Great Western and afterwards by the Detroit and Milwaukee road, as marked and directed, charging the full freight for its carriage by their connecting routes; and it is now well settled that an agent of a railroad corporation may bind his principal by such a contract, (Hart *vs.* The Rensselaer and Saratoga R. R. Co., 4 Seld., 37; Quimby *vs.* Vanderbilt, 17 N. Y. 312 Mallory *vs.* Burnitt, 1 E. D. Smith, 234) I see nothing in the case to disturb the judgment. Judgment affirmed.

Illinois Central Railroad.

The statement of this Company for the month ending October 31, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	18,015.14 for	$179,119 02
Acres Int. Fund Lands sold	1,241.48 for	14,299 00
Acres Free Lands sold	3,735.65 for	56,393 29
Total sales during month of September, 1868	22,992.27 for	$249,811 40
To which add Town Lot Sales		850 00
Total of all	22,992.27 for	$250,661 40
Cash collected in September		$428,750 64

TRAFFIC DEPARTMENT.

Receipts from Freight		$492,498 00
do. Passengers		154,366 24
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		110,000 00
Total Receipts in September, 1868		$767,222 57
Total Receipts in September, 1867		$732,220 92
Estimated earnings in the month of September, on the D. & S. C. R. R., not included above		$134,408 63
Corresponding month of 1867		$142,485 44

☞ The Board of Directors of the Chesapeake and Ohio Railroad, at a meeting recently held in Richmond, Va., resolved that the Chief Engineer be authorized at once to make surveys and estimates for connecting the Chesapeake and Ohio Road with tide-water, and the York River Railroad by horse-power; also estimates and plans for new depots at Richmond.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States October 1, and November 1, 1868:

DEBT BEARING COIN INTEREST.

	Oct. 1, 1868.	Nov. 1, 1868.
Five per cent. bonds	$221,588,400.00	$221,588,400.00
Six per cent. bonds of 1881	283,677,300.00	283,677,300.00
Six per cent. Five-twenty bonds	1,594,888,600.00	1,602,312,250.00
Total	$2,100,154,300.00	$2,107,577,950.00

DEBT BEARING CURRENCY INTEREST.

Six per cent. Pacific R. R. bonds	$39,634,000.00	$42,194,000.00
Three-year compound interest notes	5,251,930.00	.....
Three per cent. certificates	65,230,000.00	58,325,000.00
Navy pension 3 p. ct.	13,000,000.00	14,000,000.00
Total	$123,115,930.00	$114,519,000.00

MATURED DEBT NOT PRESENTED FOR PAYMENT.

Three years Seven-thirty notes, due Aug. 1, 1867, June and July 15, 1868	$3,537,000.00	$2,956,950.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867, and May 15, Aug. 1, and Sept. 1 and 15, 1868	6,322,070.00	5,128,310.00
Bonds (Texas indemnity)	256,000.00	256,000.00
Treasury notes, (acts July 17, 1861, and prior thereto)	154,111.64	151,611.64
Bonds April 15, 1842, Jan. 28, 1847, and March 31, 1848	967,650.00	487,500.00
Treasury notes, March 3, 1863	445,492.00	445,492.00
Temporary loan	744,920.00	314,860.00
Certificates of indebtedness	13,000.00	13,000.00
Total	$12,440,243.64	$9,753,723.64

DEBT BEARING NO INTEREST.

United States notes	$356,021,073.00	$356,021,073.00
Fractional currency	32,933,614.17	33,413,985.42
Gold certificates of deposit	20,236,400.00	19,716,840.00
Total	$409,191,087.17	$409,151,898.42
Total debt	$2,644,901,560.81	$2,641,002,572.06

AMOUNT IN THE TREASURY.

Coin	$96,891,847.10	$103,407,985.77
Currency	13,365,994.76	10,465,033.47
Total	$110,257,841.86	$113,873,019.24
Debt less cash in the Treasury	$2,534,643,718.95	$2,527,129,552.82

By comparing this with the statement of October 1, it is shown that the debt bearing coin interest has increased $7,423,650; the debt bearing currency interest has decreased $8,596,930; the matured debt not presented for payment has decreased $2,686,520; and the debt bearing no interest has decreased $39,188 75—making the decrease in the total debt since October 1, 1868, $3,898,988 75. The amount of coin in the Treasury during the same period has increased $6,516,138 67, and the amount of currency has decreased $2,900,961 29—leaving the amount of debt less cash in the Treasury November 1, $7,514,166 13 less than on October 1st.

☞ The Directors of the Chesapeake and Ohio Railroad Company, at a meeting recently held in Richmond, resolved that the Chief Engineer be authorized at once to make surveys and estimates for connecting the Chesapeake and Ohio Railroad with tide water, and the York River Railroad by horse power; also, estimates and plans for new depots at Richmond.

Louisville and Portland Canal.

We have already mentioned the fact that Brevet Major General G. Weitzel has established his headquarters in our city, and is vigorously pushing forward the improvements of the Tennessee river and the enlargement of the Louisville and Portland canal.

The plan of General Weitzel, which was adopted by the Government, for the improvement of the canal, provides for the construction of a strong crib dam across the crest of the rocks, at the head of the falls, in front of this city, to raise the low water mark three feet, and another strong crib dam across the head of Falling Run pool, to raise the low water mark between it and the foot of the falls, so much that at no stage will there be less than six feet of water between them. Both of these dams are to be provided with suitable sluices; the lower one will have a sluice way next to the Indiana shore, two hundred feet wide, in which the water shall be confined by a return of the crib dam parallel to the Indiana shore. This return will be 1 200 feet long, as the fall produced by this dam, in extreme low stages of the river, would be about four feet. Boats could navigate up this sluice in the very lowest stages.

The upper dam improves Grassy Flat shoals, one of the worst obstructions in low water between this city and Cincinnati, while the lower dam improves the river up to Big Eddy. Neither will raise the high water mark more than two inches.

The two dams will reduce the fall, in extreme low stages, to twenty-five feet, thus diminishing the lift of the locks by one foot. It is estimated that the upper dam will cost about seventy-five thousand dollars and the lower one about a hundred and seventy-five thousand dollars. The upper dam saves three feet of solid rock excavation along the whole line of any canal that could be built. This item, in the extension of the Louisville and Portland canal, amounts to $270,500. The lower dam saves, in the same work, all the channel rock excavation below the locks, amounting to $190,000. Thus deducting the cost of these two dams from the amount they save, there is a clear gain of $235,500 on this route alone. On the Indiana side the gain will be much greater, because on that side they make a route which comes out just below the falls, as suitable as the longest one, coming out at Falling Run. The lower one, furthermore, gives an unobstructed ferry communication, all the year round, between New Albany and Portland, as well as to Louisville, which will be a great benefit to the intercourse between these points.

The work of surveying the upper dam has been completed, and the lower dam will soon be located. During this winter Gen. Weitzel proposes to get all the materials in readiness, so as to give out the contracts next spring. Owing to the high stage of the river for some time past, the work of surveying the upper dam has been delayed. The importance of this great work cannot be overestimated.—*Louisville Courier.*

James River and Kanawha Canal.

The annual report of the James River and Kanawha Canal Company shows that the actual tonnage moved on the canal last year was 175,482 tons—an increase of 16,000 tons over the previous year.

The receipts from sources other than loans were $175,024 39.

The receipts from tolls were.....	$115,139 75
The receipts from Richmond dock...	35,297 79
The receipts from rents.....	13,777 45
Total.....	$164,214 99

The ordinary expenses, exclusive of interest paid on mortgage bonds, were $78,628 27, or an average of $9,052 monthly.

☞ A railroad has been projected to run from Northampton, Mass., *via* Barre, to Sudbury.

Progress of Iowa Railroads.

It is gratifying to the State pride of all Iowans, and it is certainly encouraging to all those who feel an interest in the development of its resources, to witness the vigor with which the system of railroads is being pushed the present year throughout the State. While some of those interested have been making an effort to secure an extra session of the Legislature in order to obtain legislation more favorable to their projects, and that, too, from a State that always has been more liberal in its legislation for the benefit of railroads than any other State in the Union, yet at the same time they are now pushing ahead the new roads faster than they ever have been during any previous period. The Des Moines Valley road is pushing through from Des Moines up to Boone, to connect with the Northwestern. The Burlington and Missouri road is stretching away as fast as possible across the State in the strife to reach Council Bluffs and tap the Union Pacific. The Rock Island and Pacific is pushing out west from Des Moines, and is already completed and in operation at least half way to Council Bluffs, at least seventy or eighty miles.

But Northern Iowa is doing the most actual work, and on a larger number of lines, than any other section, and thus really opening up the most country. The Dubuque and Sioux City road has been graded from Iowa Falls to Fort Dodge, and the contractors are now laying the track at the rate of three-quarters of a mile to a mile each day, and will have the road finished to Webster City, if not to Fort Dodge, before New Year's. At the same time, the road has been extended up the Cedar Valley from Waverly to Charles City, a distance of forty miles, and the cars are running regularly each day. In the Spring the road will be extended on to Austin, Minn., the right of way having been secured already as far as the Minnesota line. At the same time the Eldora Railroad has been built from Ackley to Eldora, and grading is now going on south of the latter place to Marshalltown. Contracts have been let for grading the McGregor and Sioux City Road as far west as Charles City. In this we mention none of the projected roads, more or less of which will be speedily pushed on, but only those whose work has been actually done.

We have now another road, one leading directly into Dubuque, on which it is proposed to go to work at once. The Dubuque and McGregor Railroad Company have made arrangements for putting a party of surveyors in the filed under charge of Mr. Ainsworth, who will make a survey on the proposed route along the river bank to McGregor. This company was organized last December, and is composed of Platt Smith, J. K. Graves, Governor Merrill and others, who are recognized as men well able to push on such an enterprise. This road will without doubt be pushed through within a short time, and will thus form the only connecting link between New Orleans and St. Paul. It will be an important feeder to Dubuque, and its early completion will add not a little to the growth and prosperity of the town.—*Dubuque Herald.*

Louisville, Harrodsburg and Virginia R.R.

The Lynchburg *Virginian*, referring to the proposed railroad from Louisville, by Harrodsburg, to Virginia, says: "This route would include the valley of the New River, and connect the Kentucky road with our Virginia and Tennessee road, at or near Central depot, in Montgomery county. It would furnish almost an air line from Louisville *via* Lynchburg to Norfolk, avoiding the great detour *via* Cumberland Gap and Bristol, and develop a rich and productive country, now wholly without railroads. It would be the nearest route for Louisville to the sea that could be opened, and would make our Southside line of railroads the great highway of commerce between the West and the East, and Norfolk the golden horn through which it would be poured."

American Society of Civil Engineers.

At an election for officers of this Society, held at the rooms of the association, No. 63 William street, this city, on the 4th inst., Wm. J. McAlpine, was re-elected president, and Charles W. Copeland and Julius W. Adams vice-presidents. James O. Morse was elected secretary and treasurer.

This society holds semi-monthly meetings and publishes papers on engineering subjects. Those already printed form a good sized volume. The society numbers over one hundred members, embracing some of the most talented civil engineers in this country.

☞ SEVEN PER CENT. INTEREST IN GOLD.—The First Mortgage Seven per Cent. Sinking Fund Bonds of the Rockford, Rock Island and St. Louis Railroad Company, pay both Principal and Interest in GOLD COIN, FREE OF GOVERNMENT TAX.

Each Bond is for $1000 or $200 Sterling, and is convertible into stock at the option of the holder. The coupons are payable Feb. 1st and Aug. 1st, in New York or London, at the option of the holder.

The Road runs from Rockford in Northern Illinois to St. Louis, a distance including tracks to Coal Mines, &c., of about 400 miles, and traverses the finest district of Illinois.

The Bonds have 50 years to run, and are a lien of $21,000 per mile upon the Company's railroad franchises, its coal lands—of which it has 20,000 acres containing A HUNDRED MILLION TONS OF COAL—its rolling stock, and property of every sort.

A Subscription of $8,800,000, at par, to the Capital Stock of the Company, furnishes a large part of the means required to construct and equip the road.

Nearly half the entire length of the road is graded and substantially ready for the iron; the rails are now arriving upon the line. The first division, giving an outlet to the coal, will be in operation in 60 days, and track-laying will from this time be prosecuted with the utmost energy till the last rail is in position. The Company intend to have the whole road in readiness for the Autumn business of 1869.

The Bonds are for sale at 97½ and accrued interest in currency, and may be obtained through bankers and brokers throughout the country, or at the office of the Company, 12 WALL STREET, New York.

Governments and other securities received in exchange at market rates.

The Trustees for the Bondholders is the UNION TRUST COMPANY of New York.

Pamphlets giving full information sent on application.

H. H. BOODY, Treasurer.

☞ The Lebanon and Pinegrove Railroad is progressing rapidly. It is expected to be ready in the spring. The distance is 22 miles from Pinegrove to Lebanon—and it is also proposed to run it to Manheim, a further distance of 20 miles, where it will connect with the road leading to Columbia.

☞ The Milwaukee *Wisconsin* says that Messrs. D. S. Wells & Co., Kansas City, have advertised for 1,000 men and 200 teams to work on the Missouri River, Fort Scott and Gulf Railroad, and that work will continue through the winter.

Central Pacific Railroad.

The President of the United States has accepted the twenty mile section of the Central Pacific Railroad and telegraph line just completed, commencing at the termination of the 350th mile and ending with the 370th mile east of the initial point at Sacramento City, Cal.

☞ SEVEN PER CENT. IN GOLD. FIRST MORTGAGE 20 YEARS' 7 PER CENT. BONDS OF THE CALIFORNIA PACIFIC RAILROAD COMPANY, Principal and Interest payable in GOLD COIN at the National Park Bank of the City of New York. Coupons due first of January and July.

The entire line of road constructed, and to be constructed is, from Vallejo to Sacramento, 60 miles, (forming the only direct connection between the Union Pacific and Central Pacific Railroads with the waters of the Bay of San Francisco,) and from Davis' Junction to Marysville, 45 miles, making a total of 105 miles. The road is finished to within seven miles of Sacramento, and will be in operation to that city next month. The Marysville Branch, 45 miles, is in process of construction, the grading nearly completed, with one-hird of the iron on han d, and the balance purchased and on the way, and will be laid, and the whole road completed early the coming Spring.

The road is fully equipped with first class rolling stock.

The earnings for the month of September on 46½ miles then in operation was $17,500, gold, exclusive of all construction traffic.

The total amount of bonds authorized to be issued is $2,250,000. or less than $22,000 per mile. The net receipts now are more than double the interest on the whole issue of bonds, and when the road is completed it is estimated they will reach $125,000, gold, per month. These bonds are secured by a first mortgage on the entire property of the company, including the lands at Vallejo, which are very valuable.

We offer a limited amount of these bonds at par and accrued interest in currency.

Government and other securities receive in exchange at market rates.

TURNER BROTHERS, Bankers, No. 14 Nassau street.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st Oct., inclusive, during the years 1867 and 1868, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1867..	286,500	5,999,100	14,009,100	2,303,500
1868..	339,100	9,913,700	15,950,200	2,346,100
Inc..	52,600	3,914,600	1,965,100	42,600

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase of 835,520 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of October in the years indicated:

	1866.	1867.	1868.
Canal opened—	May 1.	May 6.	May 6.
Flour, bbls.	213,700	286,500	339,100
Wheat, bushels..	3,893,900	5,999,100	9,913,700
Corn, bushels...	23,135,900	14,009,100	15,959,200
Barley, bushels.	3,210,600	2,303,500	2,343,100
Oats, bushels...	7,786,400	5,819,100	9,189,100
Rye, bushels....	857,500	625,100	500,700
Malt, bushels...	386,900	251,200	360,000

☞ The grading and masonry along the entire line of the Louisville and Cincinnati Railroad has been completed, and thirty-six miles of the track laid. All the bridges have been completed in the shops, and nearly all of them delivered along the line. The longest bridge on the road is the one over Bank Lick creek, about nine miles from Covington, which is now building. It is seven hundred and fifty feet in length and one hundred and fifteen feet high.

☞ A movement is on foot to divert the Belfast and Moosehead Lake Railroad from its present location, and run from Belfast westerly to Winslow, thence on the Somerset and Kennebec road to Skowhegan, and up the river to Solon, and ultimately by Bingham through to Moosehead Lake.

☞ Mr. THATCHER PERKINS has been appointed Superintendent of Machinery and Purchasing Agent of the Louisville and Nashville Railroad Company.

☞ The first cars from the Middleburgh and Schoharie Railroad reached Albany over the Susquehanna road on the 5th inst.

ONE OF THE
BEST INVESTMENTS.
THE
First Mortgage Bonds
OF THE
UNION PACIFIC
RAILROAD COMPANY.
900 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value.

3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of less than $30,000 per mile.

4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the Trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.

6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it.

7. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

9. The bonds pay six per cent. in gold, and the principal is also payable in gold.

10. The earnings from the local or way business were over FOUR MILLION DOLLARS last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.

12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent. premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure.

13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds *will find it to their advantage to do so at once.*

The price for the present is 102 and accrued interest at 6 per cent., from July 1, 1868, in currency.

Subscriptions will be received in New York
At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,
And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
Nov. 1, 1868.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

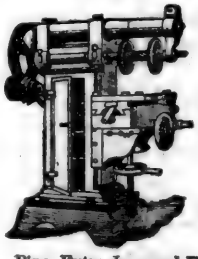
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

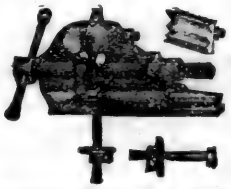
OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,



for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

Selma, Rome and Dalton Railroad.

As previously stated by us, the first train over this road, from Cave Springs to Rome, Ga., a distance of about 14 miles, reached the latter place on the 31st ult. The entire length of the road from Selma, Ala., to Rome, is about 196 miles, 61 miles of which, from Blue Mountain to its present terminus, has been constructed since the middle of January last, when active operations were first commenced. For the energy which has characterized the prosecution of this enterprise the public are mainly indebted to E. G. Barney, Superintendent, acting as agent for A. D. Breed, Lessee and Contractor. We learn that the Selma train has since passed over the Rome Railroad, with which it connects, to Kingston, on the Western and Atlantic Railroad, a further distance of 20 miles. The road is to be extended to Dalton, some 35 miles, during the coming year. Eugene Le Hardy, Esq., of Rome, Ga., is Chief Engineer.

Vineland Railroad.

The work of grading and preparing the ground to receive the rails has been commenced on the new road from Vineland to Greenwich Point. From Vineland this road is to be built eastward, crossing the Atlantic track in the vicinity of White Horse Station, thence to Moorestown, where it will intersect with the Mount Holly and Hightstown track, thus forming a continuous line to New York.

☞ SEVEN PER CENT. INTEREST IN GOLD.—The First Mortgage Seven per Cent. Sinking Fund Bonds of the Rockford, Rock Island and St. Louis Railroad Company, pay both Principal and Interest in GOLD COIN, FREE OF GOVERNMENT TAX.

Each Bond is for $1000 or $200 Sterling, and is convertible into stock at the option of the holder. The coupons are payable Feb. 1st and Aug. 1st, in New York or London, at the option of the holder.

The Road runs from Rockford in Northern Illinois to St. Louis, a distance including tracks to Coal Mines, &c., of about 400 miles, and traverses the finest district of Illinois.

The Bonds have 50 years to run, and are a lien of $21,000 per mile upon the Company's railroad franchises, its coal lands—of which it has 20,000 acres containing A HUNDRED MILLION TONS OF COAL—its rolling stock, and property of every sort.

A Subscription of $8,800,000, at par, to the Capital Stock of the Company, furnishes a large part of the means required to construct and equip the road.

Nearly half the entire length of the road is graded and substantially ready for the iron; the rails are now arriving upon the line. The first division, giving an outlet to the coal, will be in operation in 60 days, and track-laying will from this time be prosecuted with the utmost energy till the last rail is in position. The Company intend to have the whole road in readiness for the Autumn business of 1869.

The Bonds are for sale at 97½ and accrued interest in currency, and may be obtained through bankers and brokers throughout the country, or at the office of the Company, 12 WALL STREET, New York.

Governments and other securities received in exchange at market rates.

The Trustees for the Bondholders is the UNION TRUST COMPANY of New York.

Pamphlets giving full information sent on application.

H. H. BOODY, Treasurer.

Locomotive for City Railways.

A new method of applying steam for locomotive purposes on street railways, so as to avoid the use of fire in the engine while running on the streets, was recently exhibited on a temporary track at the establishment of Grice & Long, Philadelphia. In this engine the necessity for a fire-box, smoke stack, &c., is done away with by substituting a strong tank or reservoir for holding water previously heated to a high temperature in a stationary boiler. The water so heated is forced into the locomotive tank, and is capable of giving off an amount of working steam for a considerable length of time, sufficient to drive the engine and draw one or more cars. The new locomotive weighs about five tons when fully supplied with the requisite storage of heated water. At the trial it ran 45 minutes, making 125 stoppages, and reducing the steam pressure from 80 pounds at starting to 20 pounds when the trial ceased.

No noise was made other than the rumble of the wheels over the rails, and the machine seemed to be at all times under the perfect control of the engineer, being stopped almost instantly while running at the rate of six miles per hour. The temperature of the water is kept up by a non-conducting jacket three inches thick around the tank. It is proposed, in adapting the invention to the street cars, to place a stationary steam boiler at one end of the road to charge the locomotive with a sufficient quantity of hot water to perform the trip.

New Cotton Route.

This route has grown up like magic since the completion of the Selma, Rome and Dalton Railroad, and the promptness with which the Georgia and Charleston roads perfected arrangements to bring freights this way. It is the shortest route from Selma, Alabama, to Charleston, South Carolina, and goods are sent through *without change of cars* and at a much less rate. We believe the advantage of this route, in distance alone, its nearly three hundred and fifty miles. Freights can now be carried with much more expedition than formerly from Charleston to New York, Boston, Philadelphia, Baltimore, and from these points to Rome, Chattanooga, Selma, Meridian, Vicksburg, and Mobile. We are informed that more than two hundred bales of cotton are now daily shipped over this line, and very sanguine expectations are entertained of increasing the number in a short time to four or five hundred.—*Selma, (Ala.) Times.*

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of October, as compared with the same period of the year 1867:

	1868.	1867.
From freight	$562,487 49	$484,189 99
" passengers	253,066 72	267,588 84
" express matter	10,651 50	8,626 50
" mail	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	1,000 00	9,486 88
Total	$842,114 04	$784,800 54
Expenses	421,336 61	386,991 97
Net earnings	$420,777 43	$397,808 57

This shows an increase in earnings of $57,313 50; with an increase in expenses of $34,344 64—making the increase in net earnings, $22,968 86.

The earnings and expenses, from January 1 to October 31, compare as follows:

	1868.	1867.
Earnings	$6,610,816 32	$5,977,800 99
Expenses	4,021,223 09	3,983,936 74
Net earnings	$2,589,593 23	$1,993,864 25

This shows an increase in earnings of $633,015 33; with an increase in expenses of $37,286 35—making the increase in net earnings, $595,728 98.

"Drummers" on the Railroad.

The directors of the Rutland and Burlington Railroad have taken a step which gives rise to some angry discussion, in forbidding station agents to receive as baggage any trunk, valise or box known to contain commercial wares. The reason assigned in the order is that agents often carry about with them in small space articles of great value, and having got them checked as personal baggage, seek to hold the company responsible for damage or loss. The law in the case is plain. The company has a right to protect itself. This is not an attempt to limit its liability as a common carrier, as might at first seem. A railroad is a common carrier, both of persons and goods; but the former must go as passengers, subject to rules and charges as such; the latter as freight. There is only one point on which by legal decisions and immemorial custom (the railway coach being the legitimate successor of the stage coach, and inheriting all its traditions and usages), this distinction in the treatment of goods and persons is not observed; and that is in the transportation of personal goods, *i. e.*, technically baggage. It is yet an open question whether a railroad company can limit its liability as a common carrier in regard to personal baggage; and there is no question that in the absence of any stipulation it is fully liable. But whether the rights of the passenger in regard to his baggage can be restricted by the company or not, it is certain that the law only understands the word baggage in its narrowest sense. Wares are not baggage. Nothing is baggage that is carried with any view beyond personal convenience and comfort. The nineteen bureau trunks of the Saratoga belle are baggage in every sense; but the valise full of uncut silks or watches is not baggage. It is not a question at all of quantity or even of value; but of object and use. There is only one way in which liability for such effects can be acquired by the railway company, except when taken as freight, and that is by the authorized agent of the company receiving and checking it, knowing its character. We believe there is one decision of the courts which holds that this imputes liability, though it would be difficult to see how it could do so against the regulations of the company. The act of its agent outside of, and in contravention of its published rules, surely could not conclude the company.

But if the company is not liable for loss, why not receive the trunks or valises of commercial agents when they do not exceed the ordinary dimensions of personal baggage? The answer made to this by the Rutland and Burlington directors is that they are annoyed by demands and threatened with lawsuits in case of accidental detention or loss, and are even put to expense to defend themselves from such actions; and that they prefer to cut off the source of all the trouble in this way so long as these parties have no claim to having their baggage checked or carried. They even go so far as to direct the station agents in all cases of doubt to inquire and ascertain whether it is legitimate baggage which is presented.

The wisdom of the course is another matter. Drummers are a fact, and must be considered as such. Traveling agents, with samples, or with goods, are effecting no inconsiderable part of the exchanges of the country, and are destined to do more. Something has got to be conceded to their usefulness as well as to their existence. It would not seem difficult to make some arrangement by which the companies could be relieved of all danger or annoyance on account of a liability that does not properly belong to them, and at the same time the necessities of the traveler be considered. As to sending such goods by freight—as railroads forward freight now-a-days—it would be simply absurd.—*Springfield Republican.*

Evansville and Crawfordsville Railroad.

The earnings of this road for the years ending August, 31, 1866, 1867 and 1868, were as follows:

	1866.	1867.	1868.
Passenger	$218,695 33	$190,575 23	$193,981 28
Freight	222,102 72	289,947 54	230,481 70
Express	12,493 70	16,562 30	19,011 36
Mail	9,400 00	9,400 00	9,400 00
Rents	270 00	307 25	312 00
	$462,961 75	$507,792 32	$453,186 34
Expenses, viz.:			
Runn'g road	$87,958 65	$85,541 18	$74,087 34
Maintenance of way	79,908 35	83,655 94	86,438 77
Maint'na'e of bridges, etc	54,825 12	40,216 59	34,591 47
Repairs of engines & cars	50,617 12	61,433 57	70,053 17
General exp.	72,069 56	73,597 12	70,095 50
	$345,378 80	$344,444 40	$335,266 25
Net earn'gs.	$117,582 95	$163,247 92	$117,920 09
Int. & taxes.	116,940 81	108,356 34	108,946 28
Balance	$642 14	$54,891 58	$8,973 81

The earnings, expenses, etc., of this road for the past ten years have been as follows:

	Total earnings.	Operating expenses.	Net earnings.
1858-'59	$171,048 90	$97,797 37	$73,251 53
1859-'60	206,944 27	102,970 89	103.973 38
1860-'61	222,352 13	113,362 90	108,989 23
1861-'62	244,540 43	106,954 50	137,585 93
1862-'63	384,058 10	164,196 39	169,851 71
1863-'64	451,223 36	218,539 13	232,684 23
1864-'65	559,127 68	312,407 28	246,720 40
1865-'66	462,971 75	345,378 80	117,582 95
1866-,67	507,792 32	344,444 40	163,247 92
1867-'68	453,186 34	335,266 25	117,920 09

The receipts from all sources during the year, including $32,427 97 from the previous year, were $486,768 18; and the expenditures, $510,393 57—showing an excess of expenditures of $23,625 39. The expenditures embrace—

Transportation expenses, as above	$335 266 25
Interest paid	96.083 90
Internal revenue taxes	6,108 98
State, county and municipal taxes	7,754 10
Construction	46,028 71
Equipment—new freight cars	14,056 82
Increase in supplies on hand	6,095 51
Total	$510,393 57

The liabilities and assets of the company at the close of the year were as follows:

Liabilities—		
Due other lines		$20,996 46
Other liabilities		31,868 84
		$52,365 30
Assets—		
Cash on hand	$11,254 99	
Due from agents	14,405 42	
Open accounts	3,079 50	
		28,739 91
Excess of liabilities		$23,625 39

There has been expended for construction and equipment during the year, the sum of $60,085 53, making the total cost of the company's property, to date, as follows:

Construction of road	$2,402,733 55
Equipment	358,321 23
Total	$2,761,054 78
Which is represented by—	
Common stock	$1,044,010 47
Preferred stock	100,000 00
First mort. bonds, Main Line	1,090,000 00
" Rockville Extension	150,000 00
Earnings expended	377,044 31
	$2,761,054 78

The company's property may be described as follows:

	Miles.
Main Line of road, Evansville to Terre Haute	109
Rockville Extension	23
Total length of Main Track	132
Length of sidings	10
Total length of rail	143

Its terminal, way, and water station structures consist as follows:

Commodious bricks shops and engine house, with fair equipment of shop machinery at Evansville.

A large brick engine house, with black-smith's shop, at Terre Haute.

Two frame engine houses at Vincennes and Rockville.

One cheap and convenient passenger station, with shelter for cars and convenient waiting rooms and offices, at Evansville.

The joint use, with the Terre Haute and Indianapolis, and St. Louis and Terre Haute Railroads, of the Union Passenger Depot at Terre Haute, under a lease.

Two ample new brick freight depots, at Evansville and Terre Haute.

Nine good frame freight houses, with waiting rooms for passengers, at Fort Branch, Princeton, Patoka, Vincennes, Carlisle, Sullivan, Rosedale and Rockville.

At the other twenty-five way stations we have only such accommodations for our passengers and freight as the proprietors of neighboring dwellings and store-houses choose to afford us.

Eight water stations (each never failing) conveniently distributed. One of which, that at the shops, is worked by steam. Five are worked by horse power; one by hand, and is self supplying.

The road-way, structures and rolling-stock are in good, safe running order, and have, with the exception of the rails, been greatly improved during the year.

The rails have been repaired or renewed by purchase and re-rolling, to the extent apparently required by safety for the time being. But the general wear of the rails is yet in excess of renewals, and will speedily necessiate far greater annual expenditures for renewal than have yet been incurred.

The managers have determined in future renewals of rails to adopt the splice bar pattern,

already being generally adopted on neighboring roads, as insuring a smoother track and greater economy and maintenance.

There has been expended during the year the sum of $8,090 06 on the extension of the brick freight depot at Evansville, the total cost of which, to date, is $31,848 44. Also, the sum of $11,446 31 on the new freight depot at Terre Haute, the total cost of which is $15,734 43.

There has also been expended, during the year, on the new track running out of Evansville, the sum of $10,971 76, which has cost altogether, exclusive of rails and ties, which were charged to repairs, the sum of $12,622 99. There are yet unsettled claims for right of way, which will probably add $2,000 or $2,500 to this cost.

The new White River bridge has been completed; the expenditure for which, during the year, was $12,627 88. This is the only long bridge on the line, and consists of four spans of one hundred and fifty feet each, and a draw of fifty feet; total length, 650 feet. The plan of the bridge is what is called the Improved Burr Bridge, with very strong arches, and is, after stone arch bridges, believed to be the most reliable and safe bridge extant. The two abutments are all of the old structure, not renewed. The whole superstructure and the four piers are all new. One more pier has been rebuilt than was originally designed. These piers are of Putnamville limestone, unsurpassed in strength and durability, and cost upwards of $5,000 each. The estimates, including the rebuilding three piers, were about $50,000 00. The total cost of the work, including the four piers, is $57,902 71. This expense has been spread over the last three years.

The expenditure for cross-ties has been unusually large, covering twenty-one miles of new ties. Eleven hundred carloads of ballast have been put on the road during the year, and charged to maintainance of way.

Considerable progress has been made, at the joint expense of the company and land owners, in fencing the road, at a cost to the company, for the year, of $5,985 40.

The cost per mile of main track, and the whole equipment of the road as it now stands, is $20,917 08. An unusually low cost for a railroad, the greater part of which has been in operation for thirteen years.

The earnings of the road for the year, from all sources, are $456,186 34. These receipts fall short by $51,605 98 of those of the previous year, and are less by $6,775 41 than those of the year ending August 31, 1866. This loss of earnings is altogether on freights, and is attributable partially to the failure of western and southern crops, and partially to the lower freight rates of the past year.

Our train service for the year has been very little less than for the previous year, and a little greater than for the year ending August 31, 1866.

The working expenses for the year are, $335,266 25, being $9,178 15 less than for the previous year and, $10,112 55 less than for the year ending August, 1866.

Judging from the present year's crops of the West and South, harvested and growing, we have reason to hope for a heavier freight traffic for the ensuing year, and judging from the present improved condition of our road and equipment, we may hope for diminished expenses in proportion to our traffic.

The process of extending the first mortgage bonds of the company on the main line of road is not yet completed, but it is so progressing as to inspire confidence in the ultimate result. The company will immediately begin to pay a sinking fund for the redemption of the extended bonds within twenty years.

The Evansville, Henderson and Nashville Railroad, connecting this line directly with the whole system of Southern Railroads, is fast approaching completion, and will probably be opened through its whole length during the year 1869.

We have strong reasons to hope for the early commencement of work on our immediate northern connection, the Chicago, Danville and Terre Haute Railroad, giving our line a very short and direct connection with Chicago.

The rolling stock of the company consists of: 15 locomotives, 11 passenger, 1 paymasters', 4 baggage, mail and express, 3 caboose, 81 local freight box, 37 compromise box, 28 platform, 31 coal, 10 stock, 10 construction, 27 hand, and 17 push cars.

The miles run by all trains for three years, having been for the year just ended, 261,697; for the previous year, 272,310, and for the year ending August 31, 1866, 254,192.

GENERAL BALANCE SHEET, Aug. 31, 1868.

Construction of road		$2,402,733 55
Equipment		358,321 23
Real estate not necessary for use		7,957 70
District Fair Ground Stock		1,000 00
Fuel on hand		16,625 17
Materials in shops		21,351 51
Cash	$11,254 99	
Due from agents	14,405 42	
Open accounts	3,079 50	
		29,739 91
		$2,836,129 07
Capital stock paid in		$997,851 13
Fractional stock		8,988 25

Preferred stock		100,000 00
Seven p. ct. bonds, Main Line		1,090,000 00
" Rockville Divis'n		150,000 00
Due other lines		20,996 46
Other liabilities		31,368 84
Income Account:		
Earnings expended for construction	$377,044 31	
Balance of account	22,708 99	
		399,753 30
		$2,836,129 07

President & Sup't.—JNO. INGLE, JR.

Directors.—Jno. Ingle, Jr., Samuel Orr, J. S. Hopkins, W. Baker, L. S. French, J. W. Maddox, J. Alsop, H. K. Wilson, C. Rose, J. H. Turner, W. R. McKeen, G. K. Steele, J. J. Daniels.

Secretary and Treasurer.—J. E. MARTIN.

Ass't Superintendent.—L. PEARSON.

Baltimore and Ohio Railroad.

The annual meeting of this company was held in Baltimore on the 16th inst.. On motion of Mr. Michael Warner, Albert Schumacher, Esq., was chosen Chairman, and Joshua I. Atkinson, Esq., Secretary.

John W. Garrett, Esq., President of the company, presented the fortieth annual report of the President and Directors to the stockholders, being for the fiscal year terminated 30th September, 1866.

Mr. Garrett stated that the remainder of the reports were being prepared, and would probably be published for the information of the stockholders prior to the next annual meeting.

The report was then read by the Secretary. This report is being printed in pamphlet form, and will be ready for distribution at an early period.

After the reading of the report, no other business being presented, the stockholders' meeting adjourned for the election of Directors to serve for the ensuing twelve months. Messrs. William J. Albert, Miles White and Michael Warner acted as judges. On counting the ballots the following gentlemen were found to be unanimously elected by a vote of 37,667 shares; Johns Hopkins, Samuel W. Smith, Francis Burns, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, James Harvey, Galloway Cheston, William W. Taylor, Samuel Kirby, Allen A. Chapman, Albert Schumacher. The members elected are the same as for the past year, except that A. Schumacher, Esq., has been elected to fill the vacancy occasioned by the death of William Heald, Esq.

Jefferson Railroad.

The Wayne *Citizen* says that the negotiations pending between the Erie and Jefferson Railroad Companies, has resulted in the lease of the Jefferson by the Erie Company at 7 per cent. interest on the cost of the road, payable semi-annually, the rent amounting to about $21,000 per annum. The Erie Company prosecute the extension of the Jefferson Railroad now in progress, at their own expense and covenant to locate the depot within the borough limits. Under the management of the contractor Mr. B. Folsom, the work of extending the road to Cherry Ridge bridge is being rapidly put forward, and it is expected that it will be completed by the 1st of January, 1869, at which time it is understood that the Delaware and Hudson Canal Company will begin the shipment of coal over the road. Mr. Folsom has just commenced the most arduous part of the work—that of turning the current of the river and laying a wall 600 feet in length, from 12 to 14 feet in height, and 7 feet at the base. He employs nearly a hundred men, and is pushing the work forward with great energy and success.

Massawippi Valley Railroad.

Contracts for the construction of this road have been awarded to the following parties, viz: From Lennoxville to Ayer's Flat, 18 miles, Mr. McGovern, of Ascot. Ayer's Flat to Smith's Mills, 8 miles, Messrs. Ryan and Brooks. Next two miles, O. Morrill and J. B. Williams. From the boundary to the last mentioned point, O. Morrill, J. C. Wiswell, and J. H. Judd. Spur from main line to Rock Island, by Morrill, Wiswell and Judd. The last named parties have the contract for fencing the whole line and furnishing all the ties, and have sub-let 18 miles to Messrs. McGovern and Charles Brooks. Work will be immediately commenced at several points on the line.

☞ A party of Philadelphia capitalists have made arrangements with the officers and stockholders of the Fredericksburg and Gordonsville Railroad Company to complete the road at as early a date as is practicable. About twenty-five miles of the road were graded and ready for laying the track before the war. The road is about forty miles long. H. C. Wainwright, Esq., of Philadelphia, is to be President of the company.

☞ The engineers have begun work on the Air Line Railroad east of the Connecticut River, and on Monday were in the vicinity of East Hampton, Ct. Preparations are also making for early commencement of work between Middletown and New Haven. J. L. Ferry, of New York, is the Engineer, and Ira Y. Sage, of Middletown, the Assistant Engineer, in charge of the party running the line from the river to Willimantic.

☞ At the last meeting of the Petersburg City Council, a committee was appointed to take initiatory steps in the matter of the construction of a ship canal from that city to the Appomatox River, where the water is of sufficient depth for the accommodation of sea-going vessels.

Virginia State Bonds held by Citizens of West Virginia.

Governor Boreman, of West Virginia, has issued a notice, under date November 6, 1868, in which he says that he will proceed on the 1st day of December next, and thereafter until the 1st day of February, 1869, to perform the duty required of him by a resolution adopted by the Legislature of West Virginia on the 23d of January, 1868, which resolution is as follows:

Resolved, By the Legislature of West Virginia, that the Governor of this State be requested to adopt such steps as he may deem most proper and expedient, to ascertain the amount of registered and coupon bonds of the State of Virginia held and owned by the citizens of the State of West Virginia, on the 20th day of June, 1863, and still so held by the citizens of this State, together with the names of the persons holding the same, and the several amounts held by them.

The Governor deems it his duty to inspect each bond before he can report its existence, and therefore the persons who hold bonds which they wish reported under the above resolution are required to produce the same before him, in order that such inspection may be had.

An affidavit of the claimant, or some one else, will also be required that the bonds were "held" by such claimant on the 20th day of June, 1863, and were "still so held" by him or her on the day the above resolution was adopted, to wit: on the 23d day of January, 1868; and that such claimant was a citizen of West Virginia on both of the days mentioned.

Quincy Railroad Bridge.

The new Railroad Bridge which spans the Mississippi River at Quincy, Ills., was completed on the 6th inst., and the 7th was set apart by the Chief Engineer, contractors, directors, &c., to test its capabilities for the purposes for which it has been constructed. Quite a large number of engineers, bridge builders, railroad men, and leading citizens of Quincy responded to the invitation to be present, and all manifested deep interest in the details which developed the immense strength of the bridge, and its eminent fitness for the purposes for which it has been built.

The Bridge Company was organized on the 20th of November, 1866, by the amalgamation of two incorporated companies, one chartered by the General Assembly of Illinois, and the other by the Legislature of Missouri. It took the name of the "Quincy Railroad Bridge Company." Nathaniel Bushnell, of Quincy, was made President; James F. Joy, of Detroit, Managing Director; C. A. Savage, of Quincy, Secretary; A. T. Hall, of Chicago, Treasurer; N. Flagg, of Quincy, General Agent; J. L. Lathrop, of Hannibal, Auditor; W. Colburn, Toledo, Consulting Engineer; and T. C. Clarke, of Chicago, Chief Engineer.

Surveys were made, the bridge located at once, and the work commenced. The main bridge, that which spans the main branch of the river—consists of two draw spans, 160 feet each, making the length of the draws, or rather swing, 360 feet. Two spans of 250 feet, three of 200, and eleven of 157 each—making a total, with the mason work, of 3,250—constitute the main bridge. The embankments and trestle work between are 1,400 feet in length. Bay Bridge, 613 feet; one draw, 190 feet long, and four spans of 85 feet each. Total length of the bridge and embankments, from the Chicago, Burlington and Quincy to the St. Joseph tracks, nearly two miles. The bridge is elevated ten feet above high water mark, and twenty feet above low water mark, on stone piers, the stone coming from Grafton, Mo., and Hamilton, Ill. The superstructure is entirely of iron, and on the Pratt truss principle. The masonry and foundations are the work of the Bridge Company, under the immediate direction of T. C. Clarke, Esq., Chief Engineer. The total cost of the bridge is $1,500,000. The bridge is so proportioned that a train of two locomotives and the heaviest freight cars strain the iron only about 7,500 pounds to the inch, while the ultimate strength of the bridge is 60,000 pounds to the square inch. Strength, before any permanent stretch begins to be seen, 28,000 pounds to the square inch. Every piece of wrought iron in the ties, links, bolts, &c., was tested in a hydraulic press up to 23,600 pounds to the square inch, and struck with a hammer, while under tension, before being used in the bridge. The first stone of the structure was laid September 25, 1867, and the last stone August 5, 1868. It was opened for traffic November 7, 1868.

The structure is all that could be desired, and great credit is due to Mr. Clark and his assistants for their unwearied exertions to make it so. It is pronounced by those competent to judge, one of the best if not the best bridge yet constructed. The bridge will be operated by the Hannibal and St. Joseph R. R. Co. The following result of the test was signed by all the engineers present:

QUINCY, Nov. 7, 1868.

The railroad bridge over the Mississippi at this place is now completed, and will be put in use for freight and passengers on Monday next. It has been to-day subjected, in the presence of a party of engineers and others, to various tests, the results of which are as follows: Three of the heaviest locomotives were coupled and placed at rest centrally upon the span 250 feet long, and the deflection or yielding of the bridge very accurately observed by means of instruments. The total weight of the load was 300,000 pounds, and the maximum deflection at the centre of the span was 2.4228-10,000 inches, being one-sixteenth of an inch less than the deflection previously calculated.

The same load was then placed upon a span 157 feet long, and a deflection produced of 1.375-1000 inches which varied but little from the result of previous calculations.

The three locomotives, still coupled, were then run over the 157 foot span several times, at rates of speed varying from ten to sixteen miles per hour. The deflection produced was 1.406-1000 inches, being an increase of only 3.100 inch over the deflection while at rest. Probably no severer strain than the above will ever be applied to the bridge in actual use. In each case, on the removal of the load, the bridge at once resumed its previous form.

A few words of explanation of the above experiments may be interesting to the public. Short of the dangerous and expensive process of actually breaking down a bridge by the weight equal to its ultimate strength, the only method of proving its safety is to measure the deflections produced by stationary or running loads. If these do not exceed the deflections, calculated as due to the known elasticity of the material, it may be safely inferred that the bridge is free from dangerous defects, either in material or workmanship. The strain applied to day was 5,100 pounds to the square inch of wrought iron, and 5,800 pounds per square inch of cast iron.

On the 157 feet span, the strain applied was 9,000 pounds per square inch on the wrought iron, and 10,200 pounds to the square inch on cast, being about one-quarter more than the strain produced by the passage of the heaviest freight trains. All the wrought iron had been tested before being used, by a strain of 28,000 pounds per square inch. Specimens of the wrought iron which were subjugated to the ultimate strain, broke only at from 60,000 to 80,000 pounds per square inch.

C. SHALER SMITH, St. Charles Bridge.
O. CHANUTE, Kansas City Bridge.
J. E. AINSWORTH, Dubuque Bridge.
R. H. TEMPLE, St. Charles Bridge.
J. B. MOULTON, North Missouri Railroad.
D. C. JENNE, Keokuk Canal.
G. H. MORRISON, Kansas City Bridge.
G. H. Nettleton, Chief Engin'r, H. & St. J. R.R.

Tennessee Railroads.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

The six railroads in the hands of receivers are indebted to the State on interest account, due July 1, 1868, $1,120,996 86. The interest of these roads as well as that of the State requires that they shall be sold and the proceeds thereof be applied to the reduction of the State debt.

I would have seized two other roads for failure to pay the July interest, and placed them in the hands of receivers, but that I had learned by experience that to do so would only entail increased burdens upon the State Treasury.

I recommend that no more appropriations be made to railroads, except in those cases where the State has large interest in said roads, and would suffer heavy loss on account of the lack of such appropriations. Of this class are the roads running out, north and south, from Knoxville, and the one extending south from Morristown; and, also, the road of which Hon. Senator Parker is President. These roads, in order to become profitable and productive to the State, will require enough additional appropriations to enable them to complete their lines, so as to connect with other roads now in process of construction. I propose, however, to meet these demands in a way not to increase the liabilities of the State. The plan is this:

Leading gentlemen connected with important railroads largely indebted to the State, are asking for authority to issue second mortgage bonds, with a view of exchanging them for State bonds; thus purchasing State bonds by the avails of these second mortgage bonds, the debt now due by the State would, in like amount, be transferred to these railroad companies, and so the State would be relieved of a burden of several million dollars of debt now resting upon it.

I regard this proposition with approval, and advise its adoption by the Assembly. The payment of the large debts now due from the roads alluded to, and the sale of the roads already in the hands of receivers, would reduce the State's liabilities at least one-third.

This plan, it is seen, would enable the General Assembly not only to reduce materially the State's liabilities, but also to render necessary additional aid to the roads whose completion is demanded by considerations of public economy.

Several of the railroad companies have unsettled accounts with the sinking fund, the State being indebted to them, and they being indebted to the State. It is important that an early settlement of these accounts be had. I recommend, therefore, that the proper action be had by your respective houses to procure the desired settlement with the said railroads.

Since the adjournment of your extraordinary session, the Comptroller has visited New York and made satisfactory arrangements for the payment of the July interest. This fact, together with the result of the late State and Presidential elections, has induced an appreciation of our State bonds and a material depreciation in the price of gold.

☞ The Grand Rapids and Indiana Railroad Company are busy laying the road bed through the village of Kalamazoo, Mich., which they have nearly completed.

Quartermaster General's Report.

The annual report of the Quartermaster General has been submitted to the Secretary of War. From this we learn that the balance of the appropriation to the credit of the department undrawn July 1, 1867, was in round numbers $19,000,000; the deficiency appropriation for the fiscal year of 1867, was $12,000,000; the amount credited to appropriations on account of various sales was $6,000,000, making a total sum subject to the requisitions of the Quartermaster General of $37,000,000. The expenditures have been $36,500,000, leaving with the balance of appropriations for 1868, and the appropriations for 1869, of $14,000,000, nearly $15,000,000 available for the fiscal year of 1869. The operations connected with the settlement of the Southern railroad accounts are treated of at length. The total debt of these roads for material purchased and interest upon it is $8,500,000. The payments to September 30, 1868, had amounted to less than $4,000,000. Sixteen railroads have paid in full, namely:—Petersburg; Virginia Central; Virginia and Tennessee; Mobile and Great Northern; Memphis and Charleston; New Orleans, Jackson, and Great Northern; Mississippi Central; Montgomery and West Point; Rome; Western and Atlantic; Richmond, Fredericksburg and Potomac; Georgia Railroad and Banking Company; Southwestern; Macon and Western; Muscogee, and South Carolina. Many have shown a disposition to discharge their debts faithfully. Some have been obliged to ask for time, but others appear to be holding off in the hope of being relieved by Congress or in some other way from the just debts to which they have pledged their faith and given their bonds to the United States. Nearly two-thirds of the total amount unpaid is the debt of four roads in Tennessee, namely:—Nashville and Chattanooga; Nashville and Northwestern; Memphis, Clarksville and Louisville; East Tennessee and Georgia. In the matter of general railroad transportation, he says that of the sum earned by the Pacific Railroad one-half is paid in cash and one-half credited on the bonds issued to them by Government. Transportation over railroads other than the Pacific lines has been as follows: 90,000 tons of freight at a cost of $289,221, and 40,000 persons at a cost of $484,122. The Union Pacific Railroad transported from the 30th of June, 1867, to the 30th of September, 1868, about 20,777 tons of munitions of war, and 7,415 persons, at a cost of $1,070,655. The Union Pacific Railway, Eastern Division, for the same time, transported 15,570 tons of freight, and 6,395 persons, at a cost of $531,275. The fleet of transports, 1,000 strong at the close of the war, have been sold or released. Twenty-seven Government vessels of all kinds have been in the service of the department for the whole or part of the year, and thirty-nine vessels of all kinds have been chartered for greater or less time.

☞ The Washington *Intelligencer* says that three parties, numbering in all four or five hundred hands, are working on the branch line of the Baltimore and Potomac Railroad extending from Washington towards Collingwood.

☞ There are said to be upwards of 300 miles of railroad under contract in the State of Maine, the aggregate cost of which will be $9,000,000.

Coal on the Central Pacific Railroad.

A correspondent, whose letter appears in the San Francisco *Bulletin* of October 19th, notices the discovery of coal near the line of the Central Pacific Railroad, not far from the dividing line of Humboldt and Lander counties. The discovery of coal east of the Sierra is of the greatest moment to the railroad interests which are now assuming such vast importance. Without coal the chief dependence of the Central Railroad would be upon wood taken from the Sierra; and although there is at present an abundance of wood in the mountains, yet for hundreds of miles beyond there is not enough to stock a railroad for any considerable length of time, and a hundred wood-burning locomotives would strip the mountains of all accessible timber at a very rapid rate. The discovery of coal anywhere on the Eastern Slope, or in the great Central Basin, must be of vital consequence to the railroad.

"But there is another interest," says the *Bulletin*, "to be developed by such a discovery. There are vast deposits of silver ores so rebellious that they cannot be worked without the fire process. Mines are idle where assays have been made showing a yield of silver as high as a thousand dollars per ton. If the first smelting can be done on the spot, an important step is taken towards success. The Montezuma metal is now sent down in pigs, containing silver, lead and antimony, which are parted in this city. But this mine is probably not richer than the Sheba, or hundreds of others further south in the Reese River country. Nothing more is wanted than the discovery of an abundance of coal to insure a new era in silver mining in the rich mineral belt which is cut by the railroad. Mount Diablo coal is used for parting silver, lead and antimony, with success in this city. But with tolerable coal near the silver mines and with the improvements which have recently been made in fire processes, the old difficulties in working rebellious ores will disappear. We hear also of other coal discoveries further east, in Wyoming Territory. These will probably be available for the Union Pacific Railroad. Upon the whole, the fuel question is likely to be settled in a satisfactory way. These discoveries are most important just now, not for the amount of coal actually found, but rather as indicating the existence of deposits which may be found in time, sufficient for all railroad and mining purposes."

Resources of National Banks in the South.

The official returns of the National Banks in the Southern States for October, show the following results: Of those in

North Carolina (incl. $36,000 in specie)	$2,247,000
South Carolina	2,237,000
Specie	26,000
Georgia	5,757,000
Specie	37,000
Alabama	1,114,000
Specie	37,000
Mississippi (no specie)	148,000
Louisiana	3,781,000
Specie	100,000
Texas, nearly	2,000,000
Specie	218,000
Arkansas	1,029,090
Specie	2,500
Virginia	9,050,006
Specie	83,000

The total amount of United States bonds to secure circulation is $6,552,000, and of compound interest notes only $42,000.

☞ The building of the railroad from Norridgewock to Madison, in Somerset Co., Me., has been contracted for and work will be done on it through the winter.

Little Rock and Fort Smith Railroad.

The great activity of the gentlemen interested in this enterprise seems likely to result in the early completion of a railroad from this city to Fort Smith, on the north side of the Arkansas river. In view of the great importance of such an achievement to the state at large, we will be glad to see the enterprise successful. This company organized before the war, and under the congressional land grant in aid of the Cairo and Fulton road and its branches received a like proportion of lands with that company. During the war the grant expired, its terms not having been complied with, but was again revived by the thirty-ninth congress and a large addition was made to the original grant. The lands now held by the company representing this route amount to about 1,000,000 of acres. In any event it is probable that the work on this road will commence early in the coming year and be prosecuted vigorously.

Col. William P. Denckla, who represents the interests of the road, is in our city, and gives an encouraging account of the prospects of the company. Col. Denckla is a man of wide experience in railroad matters and possesses a large influence among capitalists.—*Little Rock Gazette*, Nov. 3.

Debt of Kentucky.

The following is a statement of the debt of this State on the 10th of October, 1868:

Amount of six per cent. debt due and outstanding	$84,394 00
Amount of the five per cent. debt due and oustanding	16,000 00
Amount of six per cent. bonds unredeemed not due	1,726,500 00
Amount of five per cent. bonds unredeemed not due	160,000 00
Bonds held by the Board of Education	1,632,297 46
Total State debt due Oct. 10, 1868	$3,619,191 46

Between the 10th of October, 1867, and the 10th of October, 1868, the outstanding bonds of the State have been redeemed to the amount of $992,008, which expresses the reduction of the permanent debt of the State for the year.

Finances of St. Louis.

The value of property subject to State and County taxes in the City and County of St. Louis is $144,337,328; increase over last year $8,121,200; total taxes, $3,410,949. The valuation of taxable property in the city is $105,000,000, on which taxes were collected to the amount of $1,243,755. The total revenue of the city was $1,814,513; bonded debt of the city, $12,235,500. The police department of the city cost during the year, $300,000; fire department, $152,000; health department, $220,000; street improvement, $180,000; street cleaning, $100,000; the floating debt of the city on October 12th, was $616,934. The amount so far expended on the new water works, is $1,812,579.

☞ The Treasurer of Montana reports the population of the Territory on July 1, 1868, at 38,875; total value of real and personal property, $9,400,000; acres of land in cultivation, 243,427; value of gold and silver, refined and run into bars, $8,640,000.

☞ Mr. J. B. Hurlburt, Engineer, is now engaged with the Secretary of the Gosford (Ca.) Railway Company, in surveying the proposed route for the wooden railway.

☞ The *Railroad Record* says that Ransom Gardner, of Three Rivers, Mich., is advertising for 500 additional railroad hands to work on the road between Otsego, Allegan and Grand Rapids

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

American Railroad Journal.

Saturday, November 21, 1868.

Stock Exchange and Money Market.

The monetary pressure has measurably subsided, and the supply of capital available to street borrowers has been largely augmented since our last, leading to a decline in the loan and discount rates, more particularly noticeable in the instance of temporary advance to the dealers in the public funds and to the leading Stock firms, who have been freely tendered round sums at 6@7 per cent. in currency. The speculative inquiry for aid has been less urgent, and the tendency of the market has been toward increased ease. The city banks, in their last weekly statement, make an unexpectedly conservative and favorable report, showing an increase of $4,299,486 in their legal tender reserve, with a reduction of $7,492,652 in their loan and discount averages. A decrease of $406,129 is noted in the deposit line, and of $291,733 in the specie hoard, with a contraction of $104,733 in the circulation. On Tuesday of the current week, the bank movement was unusually extensive, the exchanges running up to over 194 millions, and the business at the Clearing House indicating that most of the city banks had large sums to their credit, the main exception having been the Bank of the Commonwealth, which was a debtor to an amount exceeding ten and a half millions. The balances were all promptly and satisfactorily adjusted, tending to add to the freedom of the loan movement. In the discount line, there has not been much activity, the demand for commercial paper having been on a restricted scale at a range of from 8@10 per cent. per annum on choice to good grades. Two or three mercantile failures have been reported within the week, the most important having been that of a produce house on Tuesday, also several Stock failures.

The specie reserve of the city banks is now $16,155,008, against $13,734,964 same time last year. The city bank deposits are now $175,150,589, against $177,742,853 week ending Nov. 9, 1867. The legal tender reserve amounts to $51,466,693, against $54,329,650 same time last year. The circulation now stands at $34,249,564, against $34,134,366 same time last year. The loans are now $249,119,539, against $256,612,191 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $134,636,424 a day, against a daily average of $146,095,267 the preceding week, and $134,908,757 the week ending with Oct. 29, 1868. The current week's exchanges average about $185,796,500 a day. The city banks, last week, lost $291,733 of specie, and $406,129 of deposits, while they gained $4,299,486 of legal tender notes. They reduced their loans, $7,492,652; and their circulation, $104,073.

The New York Gold Exchange Bank reports for the week ending Saturday, the 14th day of November, 1868, the average amount of loans and discounts as $1,449,929; average amount of specie, $466,517; average amount of deposits, $1,263,880.

National Bank notes to the amount of $113,400 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,604,276, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,655,351, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,948,925. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,514,600; and for the public deposits, $38,106,350—making a total of $379,620,950. The Treasury Department last week redeemed and destroyed $486,700 of worn and mutilated fractional currency, and issued $456,117 of new. The outstanding amount of fractional currency on the 1st of November, was $33,413,985, against $32,933,614 on the 1st of October, 1868.

The U. S. Sub-Treasury receipts, week ending with Nov. 14, were $9,012,521, including $1,655,204 from customs duties; payments, $8,645,904, including $2,668,000 of coin interest; balance at the close of the week, $82,730,280, against $82,363,664, at the close of the preceding week, showing an increase of $366,617. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,986,572 including $278,000 from customs; and payments, $1,113,528, including $210,000 of coin interest; on Tuesday, receipts, $2,720,655 including $312,000 from customs, and payments, $2,665,273, including $280,000 of coin interest. The

balance at the close of business on Tuesday stood at $83,658,776, against $82,237,998 a week previous; and $83,216,312, on Oct. 28, 1868. The aggregate receipts of the office from all sources in October, were $56,749,293; aggregate payments, $59,249,680. The balance on the 1st of November was $91,999,615, or about 2½ millions more than on the 1st of October, which amounted to $94,499,990.

The outstanding amount of coin certificates on the 1st of Nov., was $19,716,840, against $20,236,400 on the 1st of Nov., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,178,000, and retired $1,575,203 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during October, reached $5,208,560.

Government revenues have not yielded very satisfactorily, since our last, in either of the leading forms of income. The excises, last week, yielded about three millions; customs at the port of New York, $1,655,204, and at the outports about $550,000 (in coin) more, making the grand total income for the week equal to about $6,977,025 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $88,000,000.

Gold has been much more extensively dealt in, chiefly on speculative account, and the fluctuations in prices have been more frequent, the extremes of the week having been from 137@133¾, and the closing quotation 135. Government was a seller of gold on Tuesday and Wednesday to a moderate extent, which circumstance operated to depress the premium. The customs and export drain was limited.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,510,225, against $2,892,411 same time last year. The customs demand for Gold last week, averaged $275,867 a day; thus far, this week, it has been equal to $295,000 a day, or equal to a weekly aggregate of $1,770,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $23,506 and from California, $659,088 The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $105,968,433, against $108,516,166 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $33,289,318, against $25,302,796 in 1867, showing an increase thus far in 1868, of $7,986,522. The exports of specie, from this port, last week, were $252,050, against $242,285 same week last year; total, since Jan. 1, 1868, $68,459,488, against $44,273,600 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,668,000; since Jan. 1, 1868, $77,245,609, against $56,980,981 same time in 1867. The specie exports from San Francisco, from Jan. 1, to Oct. 28, were $30,041,657, against $34,197,761 same time last year.

Foreign Exchange advanced a fraction during the week, on a more active inquiry, but closed dull, with a downward tendency, on more liberal offerings. Bankers' prime sixty day bills on London closed on Wednesday at 108¾@109¼, and on Paris to 5.21¼c.@5.17½; sight bills on London to 109⅜@100⅜, and on Paris to 5.15c.@5.15¼. The offering of produce bills has been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,775,896, against $5,137,914, same week last year; total, since Jan. 1, 1868, $145,340,173, against $166,609,530 in 1867.

Government securities have been in quite active demand at, however, variable prices. The dealings on Tuesday and Wednesday were extensive; and on the whole, indicative of a strong and buoyant market. The investment inquiry has become more general. The offerings of bonds, even on speculative account, have been less liberal.

U. S. sixes of 1881 closed here on Wednesday at 114¼@114½; U. S. Five-twenties of 1862, (ex Nov. coupons) 107⅞@110; U. S. Five-twenties of 1864 at 107@107¼; U. S. Five-twenties of 1865 at 107⅛@107⅜; U.S. Five-twenties of 1865, consolidated, 109⅞@110; U. S. Five-twenties of 1867, 110⅛@110¼; U. S. Five-twenties of 1868, 110¼@110⅜; U. S. Ten-forties at 105@105¼; U. S. Six per cent. currency bonds, 99@99¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 4.	Nov. 11.	Nov. 18.
Consols	94⅜	94⅜	94⅛
U.S. 5-20's of 1862	74⅞	74¼	74⅛
Erie	28	27	31½
Ill. Central	97¼	96½	96

General business has been on a restricted scale at generally yielding prices for domestic produce. Middling upland cotton closed tamely on Wednesday at 24@24¼ cents per lb. The stock of cotton now here is estimated at about 32,500 bales. The receipts at the port this week, have averaged about 5,000 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 452,000 bales, against 281,000 bales same time last year; exports, same time 163,000 bales, against 102,000 bales same time last year; stock on hand at latest dates, 190,000 bales, against 170,000 bales same date last year. Total crops of 1867-'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 21,838 pkgs., against 10,511 pkgs., same time last year. At the Live Stock market, this week, Beeves have been in light demand at from 10@16c. per lb.; week's receipts, 6,243. Veal calves in fair request and firmer at from 8@14c. per lb.; receipts, 1,066. Sheep and lambs moderately sought after at 4½@6⅞c., and 6½@7¾c. respectively; per lb., receipts, 34,611. Swine in more request and quoted up to 8⅝@9¼c. per lb., all live weight; receipts, 19,241. Foreign merchandise has been in less demand and less buoyant in price. The total imports of foreign dry goods, last week, were $1,191,268, and the total amount marketed $1,196,090. The value of foreign merchandise imported last week, was $2,403,256—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $3,594,522, against $3,649,482 same week last year; from Jan. 1, 1868, $219,853,931, against $229,301,787 same time in 1867. The ocean freight market has been moderately active and steady. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. 3d. @8s. 6d. by steamer, per bbl.; grain at 7d. by sail, and 7½@8d. by steamer, per bushel; cotton at ¼d. by sail, and ⅜@½d. by steamer, per lb.; and heavy goods 22s. 6d.@30s. by sail, and 30s.@45s. steamer, per ton. Total number of vessels in port on Wednesday, 490.

The New York exports, exclusive of specie, for the week ending Nov. 17, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$5,137,914	$3,775,896
Prev. reported	161,471,616	141,564,277
Since January 1	$166,609,530	$145,340,173

The imports for the week ending November 14, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,008,189	$1,191,268
Gen. merchandise	2,641,293	2,403,256
Total for the week	$3,649,482	$3,594,524
Previously reported	214,826,880	215,530,745
Since January 1	$218,476,362	$219,125,269

The balance in the Sub-Treasury on Wednesday was $83,602,059 20.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ THE CENTRAL PACIFIC RAILROAD, connecting San Francisco and the Pacific Coast with the Atlantic lines, now nearly completed and doing a large and remunerative way business, must speedily become one of the most important and valuable lines of through traffic on the continent.

The First Mortgage Bonds issued thereon, having a lien superior to that of the United States, are now widely known and esteemed as among the safest, best and most profitable corporate securities for investment. A limited quantity will be sold at 103 and accrued interest, in currency. Principal and six per cent. interest payable in gold. Government bonds received in exchange at full market rates, allowing the difference in cash. FISK & HATCH,

Bankers, &c., No. 5 Nassau st., New York.

Railroads in Peru.

A correspondent of the *N. Y. Times*, writing from Lima, Peru, under date October 28, 1868, says: A new contract has just been entered into to-day for a new railroad from Lima to the interior silver mines, and an American gentleman, resident in Callao, has taken the contract. A petition has also been presented to Government, asking for the construction of a new railroad from Lima to Jauja, which, it is estimated, will, when completed, cost 18,000,000 *soles;* 6,000,000 *soles* of this amount is to be lent by Government. The new railroad under contract to Harry Meiggs, from Islay to Arequipa, progresses rapidly. Mr. Meiggs has already repaired the injuries done to the line by the late earthquakes. It will probably be completed long before the old fallen City of Arequipa has arisen, like a second Phenix, from its ashes, and will greatly facilitate the conveyance of lumber, building materials, &c., wherewith to construct a new city. The road from the refining houses to the mines of Pasco will also shortly be completed, and work is advancing rapidly on the new lines from Lima to Huacho, Pisco to Ica, &c.

Blue Ridge Railroad.

The Governor of South Carolina, accompanied by several prominent citizens, is now at the north, for the purpose of advancing the financial interests of the State, and enlisting Northern capital to secure the speedy completion of the Blue Ridge Railroad, which is the missing link in a continuous railway line between Charleston and Cincinnati. The Governor believes that, owing to the small debt of the State, in comparison with the liabilities of others, with a successful administration of the State Government and acquiescence and harmony among the people, South Carolina, by internal improvements and otherwise, must in a short time become financially one of the foremost States of the Union, as she is already, from her climate and geographical position, one of the most attractive. He thinks that the Blue Ridge Railroad—an enterprise of so much importance both to the North and South—cannot fail to command the attention of railroad men and capitalists of the North, destined, as he believes it is, to be a great connecting link of the line of railroad across the continent, from the Atlantic to the Pacific coast.

Port Deposit and Columbia Railroad.

The track of this road has been laid more than half way to Rowlandsville. In about two weeks the entire track will be laid to Octoraro Creek Junction. The Philadelphia and Baltimore Central Company expects to have the deep cut at Rowlandsville completed in three weeks. After that time the road from Philadelphia to Baltimore will be opened through by this route.

☞ The following gentlemen have been elected directors of the Marietta and Cincinnati Railroad Company for the ensuing year: John King, Jr., C. Oliver O'Donnell, of Baltimore; H. C. Lord, Kenner Garrard, John Donnell Smith, of Cincinnati; W. H. Oldham, of Marietta; Wm. F. McClintock, of Chillicothe. The directors elected John King, Jr., of Baltimore, President; S. W. Kilvert, Jr., Secretary; John Donnell Smith, Treasurer; John Waddell, Chief Engineer.

☞ The people of Frederick city and county, says the *Republican*, will be happy to learn that President Loats and a number of the Board of Directors of the Frederick and Pennsylvania Line Railroad, with Mr. Haydon as civil engineer, started out on Tuesday for the purpose of making a primary observation for a survey of the route and placing it under contract as speedily as possible.

☞ The Memphis *Appeal* learns from competent authority that considerable progress has been made of late in the construction of the Memphis and Little Rock Railroad. Fourteen miles of grading has been completed the other side of the St. Francis river, and the bridge over that stream and iron for the graded portion has been provided for.

☞ We understand that arrangements are being made to effect a preliminary survey of the Chesapeake and Lake Erie Railroad. Middletown, it is said, has subscribed $400 for this purpose, and subscriptions are being taken up at various other places along the proposed route.

☞ The following gentlemen have been elected directors of the Pacific Mail Steamship Company: Allan McLane, William Dennistoun, James M. Brown, Howard Potter, Abiel A. Low, Francis Skiddy, Jonathan Thorne, William H. Webb, Sidney Mason.

☞ The earnings of the Atlantic and Great Railway from 1st April, 1868, (the commencement of the receiver's fiscal year,) to 30th Sept., 1868, were $2,340,332 40; for the same period last year, $2,601,121 75—decrease, $260,789 35.

☞ Geo. T. M. Davis, 47 Exchange Place, this city, has for sale 2,000 tons of English rails, 56 lbs. per yard, finished for fish plates. See Advertisement.

Journal of Railroad Law.

TRANSPORTATION BY EXPRESS—AUTHORITY TO SIGN RECEIPTS—LIMITATION OF LIABILITY—THE PERSON DELIVERING GOODS TO RAILROAD OR EXPRESS COMPANIES MAY BRING ACTION FOR THEM.

The facts in the late case of Moriarty *vs.* Harnden's Express (1 Daly, N. Y., 227,) were as follows: The plaintiffs delivered to the defendants, as common carriers, two boxes of goods to be carried from New York to Selma, Alabama. The defendants delivered the boxes at Selma, but as the plaintiffs claimed, so negligently conducted themselves in and about the transportation of the goods, and the taking care thereof, that a part thereof, two pieces of silk, one box of hosiery, and box of pins, of the value of three hundred dollars were wholly lost.

The proof on the part of the plaintiff showed that Emanuel & Co., merchants in the city of New York, on the order of Meyer & Co., purchased the contents of the boxes in question, and had them packed in Emanuel & Co.'s store. Meyer & Co., ordered Emanuel & Co., to forward the goods by Harnden's Express; Emanuel & Co., kept in their office a book of the blank bills of lading used by all the express companies; they sent for defendants' wagon, filled up one of the bills of lading, and had it signed by the defendants, and returned to Emanuel & Co. The bill of lading stated that Emanuel & Co., had delivered to defendants two cases, marked M. and E. Meyer & Co., to be forwarded to Selma, Alabama, and stipulated that the defendants were not to be responsible for any loss or damage arising from the dangers of railroad, steam, or river navigation, leakage, fire, or from any cause whatever, unless the *same be proved to have occurred from the fraud or gross negligence* of the defendants, their agents or servants. The bill of lading further stated, that goods carried were valued under fifty dollars, unless otherwise stated. This bill of lading was read in evidence by plaintiffs. The plaintiffs gave evidence showing that two pieces of silk were in the boxes when delivered to the defendants, and that the same were missing when the boxes were received from the defendants at Selma.

The Judge charged the jury among other things, as follows:

"It is for you to say with whom the contract was made—whether with Emanuel & Co., or with the plaintiffs. If you conclude that it was made with Emanuel & Co., on the plaintiffs' behalf, then, unless Emanuel & Co., had authority to make such a contract, the plaintiffs are not bound by any such condition in the receipt, in respect to the defendants' liability only in the event of fraud or gross negligence."

The jury rendered a verdict for plaintiffs, and judgment was entered against the defendants. The defendants then appealed to the General Term.

The opinion of the Court was delivered by BRADY, J.—The defendants agreed to carry from this city to Selma, Alabama, two cases of goods marked M. & E. Meyer & Co. At the time the goods were delivered a receipt "was filled up" by J. Emanuel & Co., who were acting for the plaintiffs in forwarding the goods, and given to the defendants' driver who signed it. That receipt was produced and put in evidence by the plaintiffs after they had rested and a motion for non-suit had been made on the ground that it appeared from the evidence that there was a written contract which the plaintiffs had not produced. After its introduction the witness who had identified it was asked this question, "Was your attention ever called to the printed matter of this receipt?" The question was objected to, but allowed, and an exception was taken. The witness was the book-keeper of J. Emanuel & Co., and it was wholly immaterial whether his attention had been called to the printed matter or not. The evidence had disclosed the fact that Emanuel & Co., had a receipt book of the defendants' in their store, from which the receipt in question was adopted by them, and without any application on the part of the defendants. It was filled up and given to the driver of the defendants, and signed by him. The witness was also asked, "What authority had you from Meyer & Co., relative to the shipping of the goods?" and the question was allowed, although objected to. The answer was, "Our directions were to ship the goods by Harnden's Express; we had no other authority or direction from the plaintiffs in respect to the shipment." Upon this evidence the presiding Judge charged the jury as follows: "If you find that J. Emanuel & Co., had no other authority or direction in regard to the goods than to merely purchase and ship them *in the ordinary way*, then no contract existed between the plaintiffs and defendants limiting the liability which the law imposes upon common carriers in case of non-performance of their agreement to deliver property in a safe condition." And further, "that unless Emanuel & Co., had authority to make such a contract the plaintiffs are not bound by any such condition in respect to the defendants' liability in the event of fraud or gross negligence." This was substantially telling the jury that unless Emanuel & Co., had the power to make the contract contained in the receipt, the defendants were liable. The charge was erroneous. The right of the carrier to limit his liability is no longer subject to discussion. Dorr *vs.* Steam Nav. Co., 1 Kernan, 490; Wells *vs.* Steam Nav. Co., 4 Selden, 381; and when a special contract is made the relations of the parties are changed, and the carrier becomes as to that transaction an ordinary bailee and private carrier for hire, PARKER, J.—in Dorr *sv.* Steam Nav. Co., *supra*. The directions given by the plaintiffs to ship goods by Harnden's Express, authorized Emanuel & Co., so far at least as the defendants are concerned, to make any contract which the defendants insisted upon. If the agents transcended their power, the innocent party should not suffer. There was nothing in the case to call upon the defendants for an examination or investigation of the authority of Emanuel & Co. It was enough that they delivered the goods to them and asked for their carriage; but in this they did more, they drew the contract and presented it for signature. It would virtually destroy the liability of the express business, which has become a very important part of our commercial system, to hold that when goods are delivered the carrier who chooses to limit his responsibility should stop to examine the authority of the person presenting the goods to make the contract which he exacts. It would, in this case, in my judgment, be erroneous to sustain the proposition that Emanuel & Co., had not authority to make this contract. They had possession of the goods and delivered them for carriage. The possession was a lawful one, and the person selected to transport them, in accordance with the instructions received; not only that, but the plaintiffs introduced the contract to sustain their case, and then sought to avoid it by proving instructions in relation to the carriage, by the book-keeper of Emanuel & Co. If the doctrine be tolerated, then in cases similar to this, the contract can be avoided for want of power to make it, the proof on the part of the plaintiff should be ample. I think the rule is not a sound one, and that its annunciation was error.

The judgment should be reversed.

Commerce of New York.

The foreign imports at New York for the month of October, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$10,224,405	$11,294,439
Do. for warehousing....	7,096,411	6,850,498
Free goods	754,881	1,294,991
Specie and bullion	362,789	554,862
Total entered at port...	$18,438,486	$19,994,790
Withdrawn fr. wareh'use	7,728,761	8,892,665

The foreign imports at New York for the ten months from January 1st, were:

	1867.	1868.
Entered for consumpt'n.	$112,931,660	$110,570,527
Do. for warehousing...	98,411,215	92,231,894
Free goods	9,197,009	9,593,423
Specie and bullion.....	2,862,004	6,473,583
Total entered at port..	$223,401,888	$218,869,427
Withdrawn fr. wareh'se	95,195,569	88,256,992

The revenue from customs at New York, were:

	1867.	1868.
1st quarter	$32,916,085 09	$28.026,042 14
2d quarter..... ..	26,438,603 81	27,424,706 51
3d quarter..... ..	33,840,898 17	34,150,298 97
In Oct.	8,682,889 05	10,059,277 34
Total 10 months.	$101,878,476 12	$99,660,324 96

The exports from New York to foreign ports in the month of October, were:

	1867.	1868.
Domestic produce.....	$16,679,540	$13,954,602
Foreign free goods.....	4,446	10,822
Do. dutiable.....	797,285	740,477
Specie and bullion.....	1,182,031	1,608,739
Total exports	$18,663,252	$16,314,640
Do. exclusive of specie.	17,481,221	14,705,901

The exports from New York to foreign ports for ten months from January 1st, were:

	1867.	1868.
Domestic produce.....	$144,711,692	$127,662,172
Foreign free goods....	345,446	551,831
Do. dutiable	6,999,386	6,456,018
Specie and bullion.....	43,214,139	67,942,609
Total exports	$195,270,663	$202,612,630
Do. exclusive of specie	152,056,524	134,670,021

☞ It is expected that the Albany and Susquehanna Railroad will be completed to Binghamton before winter sets in.

☞ A survey of a route for a railroad from Amherst Station to King's Mill, in New Boston, is being made.

☞ The cars are now running regularly to Belmont, on the Platteville and Calamine Railroad.

☞ The building of the Indianola Railroad, which is to run through the heart of Western Texas, has been commenced.

Union Pacific Railroad.

The Salt Lake *Reporter* notices the arrival there of the following distingnished gentlemen: Gen. D. C. McCallum, formerly Superintendent of the Erie Railway, and Military Director of Government railroads during the war; Col. Silas Seymour, formerly State Engineer of the State of New York, and at present Consulting Engineer of the Union Pacific Railroad; Gen. C. K. Warren, Major General of Volunteers and commander of the Fifth Army Corps during the war, at present attached to the Engineer Corps of the United States; Judge W. T. Otto, Assistant Secretary of the Interior; Mons. P. Pichot, from Paris, traveling on a scientific mission; and Jacob Blikensderker, Jr., Division Engineer, in charge of the locating parties of the Union Pacific Railroad.

A commission has been appointed by the President of the United States, consisting of Gen. Warren, Mr. Blikensderker and Gen. Barnes, of Massachusetts, to examine the Union Pacific and some of the other railroads receiving government subsidy, to ascertain and report to the Secretary of the Interior if these roads are being constructed in the manner prescribed by Congress. Judge Otto will go over the road with the commission for the purpose of seeing for himself the condition of the road and the manner of construction. Col. Seymour has been detailed by Mr. T. C. Durant, Vice President, and General Agent of the Union Pacific Railroad, to accompany the commission and report to the railroad company. Gen. Mc Callum is one of the most competent railroad men in the United States, and his opinion will be entitled to great weight. He will look more particularly into the manner of running and operating the road. In this department he has no superior in the country. He had charge of all the government railroads during the war and was breveted by Secretary Stanton as a compliment for his superior skill and energy.

Evansville, Henderson and Nashville R.R.

Mr. Hanson, one of the contractors on the E., H. and N. Railroad, was in the city yesterday. From him we learn that the bridge across Dear creek was finished on Tuesday, and that to-day they will commence laying the track on the further side of Deer creek, where they have six miles of the road-bed ready for the superstructure, and another four miles that will be ready for the rails within two weeks. This will carry the road to within eight miles of Madisonville, and on this eight miles a large amount of grading has been done. It is confidently expected that the road will be completed and the cars running to Madironville before the end of the year. About two hundred hands are employed on the work.—*Evansville Journal*, Oct. 29.

Union Pacific Railroad.

The track of the Union Pacific Railroad is being pushed to the west with a celerity that is truly wonderful. It is now far to the west of Bryan, indeed, it is almost at Bridger, and by the middle of November it will be at Bear River, east, which is only seventy-five miles east of Salt Lake, or to speak more correctly, the mouth of the Weber where the road turns to the north to go round the lake. At five miles per day, which we understand is the minimum rate of track-laying recently fixed by Vice President Durant, who is on the ground himself doing all he can to facilitate the work, those seventy-five mile would be laid down in fifteen days. But allowing for delays on account of heavy work on the Summit, and in the canons, two and a half miles per day on an average at least will be laid, and that would complete the seventy-five miles in thirty days, that is by the 15th of December. The public need not, therefore, be astonished any day to hear that the Union Pacific Railroad Company has laid out a town samewhere near the mouth of Weber, and is offering lots for sale.—*Salt Lake Reporter.*

Western Union Railroad.

The annual meeting of the stockholders of this company, was held at Racine, Wis., on the 14th ult. The Directors for the ensuing year are as follows: Richard Irvin, S. P. Nash, R. G. Rolston, Jacob S. Wetmore, New York; Geo. A. Thomson, Henry T. Fuller, John Wilson, Darwin Andrews, Racine; Wm. Shannon, E. Northey, Shannon, Ill.; D. W. Dame, Lanark, Ills.; H. A. Mills, Mt. Carroll, Ills.; Edward P. Barton, Freeport, Ills. At a meeting of the new Board of Directors, the officers of the previous year were unanimously elected, viz: G. Thomson, President; H. T. Fuller, Vice President; W. V. Baker, Secretary and Treasurer.

Atlantic and Great Western Railway.

Five new directors have been officially appointed in addition to Mr. Satterthwaite, who has held office since January last. Advices received from America state that the receiver is disposed to act harmoniously with the Board, and will not only offer no opposition to the restoration of the road to the Board, but will facilitate it as much as possible. A main difficulty is the Chancery suits pending on this side about the debentures. All parties should combine to obtain the release of the railway, for until this be done the direction is embarrassed and unable to bring about that resuscitation of the company's affairs, which it must be their chief object, for the present, to accomplish. The London Board will consist of the following:

Mr. Sam. Laing, M. P., Chairman; Sir W. Russell, Bart., M. P.; Mr. Fildes, M. P., Mr. Satterthwaite, Mr. E. L. S. Ridsdale, Mr. F. W. Oewel.—*Herapath.*

☞ The Richmond *Enquirer* says that the Richmond and York River Railroad Company have commenced the completion of their road to West Point, Va., and the track will be relaid the entire distance probably by the first of next January. No contract for the work has been made, but operations are carried on under the superintendence of the company's engineers.

☞ Plans and specifications of 3 sections of the Intercolonial Railway, in each Province of Quebec, New Brunswick and Nova Scotia are now open for inspection at Ottawa, Rimouski, Dalhousie, St. John and Halifax. The sections contracted for in Nova Scotia are 53 miles, in New Brunswick 32 miles, and in Quebec 66 miles.

☞ The work on the extension of the Orange, Alexandria and Manassas Railroad to Harrisonburg, Va., is rapidly drawing to completion. The track is now laid to within a distance of seven miles of that place, and by the first of next month trains will be running to the town. The depot buildings in Harrisonburg are more than half finished, and will be ready by the time they are required.

☞ Five car loads of cotton reached Charleston, S. C. on the 11th inst., from Selma, Ala., passing over the Selma, Rome and Dalton Railroad, and connecting road, without breaking bulk —a total distance of 606 miles.

☞ Ten hundred and fifty tons of railroad iron for "Western Extension," arrived at St. John, N. B., on the 8th inst., from Newport, Wales.

Railroads in Oregon.

There are now six different railroads in progress of construction in Oregon, viz: the Salt Lake and Columbia River Railroad, connecting the Union Pacific Railroad with the navigable waters of the Columbia River; the Oregon branch of the Central Pacific Railroad, running through the Rogue River, Umpqua and Willamet Valleys to the Columbia River and Puget Sound; the Oregon Central Railroad (west side); the Oregon Central Railroad (east side); the Salem and McMinville Railroad, and the St. Helens and Hillsboro Railroad, all of which are of great importance to the people of the State.

☞ SEVEN PER CENT. IN GOLD. FIRST MORTGAGE 20 YEARS' 7 PER CENT. BONDS OF THE CALIFORNIA PACIFIC RAILROAD COMPANY, Principal and Interest payable in GOLD COIN at the National Park Bank of the City of New York. Coupons due first of January and July.

The entire line of road constructed, and to be constructed is, from Vallejo to Sacramento, 60 miles, (forming the only direct connection between the Union Pacific and Central Pacific Railroads with the waters of the Bay of San Francisco,) and from Davis' Junction to Marysville, 45 miles, making a total of 105 miles. The road is finished to within seven miles of Sacramento, and will be in operation to that city next month. The Marysville Branch, 45 miles, is in process of construction, the grading nearly completed, with one-hird of the iron on hand, a nd the balance purchased and on the way, and will be laid, and the whole road completed early the coming Spring.

The road is fully equipped with first class rolling stock.

The earnings for the month of September on 46½ miles then in operation was $17,500, gold, exclusive of all construction traffic.

The total amount of bonds authorized to be issued is $2,250,000, or less than $22,000 per mile. The net receipts now are more than double the interest on the whole issue of bonds, and when the road is completed it is estimated they will reach $125,000, gold, per month. These bonds are secured by a first mortgage on the entire property of the company, including the lands at Vallejo, which are very valuable.

We offer a limited amount of these bonds at par and accrued interest in currency.

Government and other securities receive in exchange at market rates.

TURNER BROTHERS, Bankers, No. 14 Nassau street.

☞ An election is to be held in Augusta County, Va., on the 5th of December "to take the sense of the voters of the county upon the question whether the County Court shall subscribe the sum of $300,000 to the stock of the Valley Railroad Company."

☞ The citizens of Madison county, Ky., were to have had a grand celebration on the 17th inst., in honor of the completion of the branch railroad to Richmond.

☞ A meeting of the corporators of the new Barren County Railroad was held at the Court House in Glasgow, Ky., on the 28th ult. Joseph R. Garnett, Esq., was elected President.

☞ The towns of Farnworth and Moultenboro', N. H., have each voted to subscribe five per cent. of their valuation to the capital stock of the New Hampshire Central Railroad.

Pennsylvania Coal Trade.

The anthracite coal trade continues very heavy. The Reading railroad brought down for the week, to Thursday last, (Nov. 12,) 108,244 tons, and for the year 3,317,013 tons, against 3,271,098 tons to same date last year. The shipments by the canal were for the week 35,483 tons, and for the season 878,460 tons, against 919,576 tons to the same time last year, showing an increase of tonnage from the Schuylkill region by both road and canal of 87,031 tons. The entire coal tonnage of all the anthracite regions in the State for the week is 380,782 tons, and for the year 12,190,406 tons, against 11,301,124 tons to same date in 1867, an increase of 899,282 tons.—*Phila. Ledger.*

Third Avenue Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Robert Squires, William Remsen, William A. Darling, Henry R. Remsen, Henry Hart, Wilson G. Hunt, Maltby G. Lane, Clarkson N. Potter, Peter McMartin, John B. Hobby, William J. Valentine, Sylvanus S. Riker, Sylvanus R. Comstock. Twenty-two millions of passengers have been carried during the past year, an increase of two millions over 1867; the company employs 1,475 horses and 186 cars, running at intervals of one minute during the day; it uses 475 bushels of corn and ten tons of hay per diem; grinding and cutting the whole upon its premises; it has recently purchased the block bounded by Third-avenue, Sixty-sixth and Sixty-seventh streets, for increased stable facilities.

☞ The Monroe (Mich.) *Monitor* says that 150 men are employed on the line of the Toledo, Monroe and Saginaw Railroad, between Monroe and Holly, and of this number a large force is now in Monroe County approaching the city rapidly, while the extension of the road to Toledo is undergoing a preliminary survey of the route, by men of means sufficient to secure its completion; thus forming almost an air-line road from Cincinnati to the Saginaw Valley.

☞ The Town Council of Sherbrooke, Ca., have passed a resolution to the effect that should the proposed Wooden Railway running Easterly from the Grand Trunk Railway, start from Sherbrooke, the Council are in favor of subscribing $25,000 in stock towards the enterprise. We understand that steps are being taken to ascertain whether a favorable route can be obtained from the East side of the St. Francis in that town in direct line to Ascot Corner, and following up the St. Francis River to such a point as may best accommodate the Townships South and East of the river, and also on the Northerly and Westerly side.

☞ Passengers and mails by the Central Pacific Railroad are now carried to Argenta, Nev., 385 miles east of Sacramento. Track is laid sixty-five miles further east. The earnings for October exceeded $300,000.

☞ The receipts of the Alexandria, Loudoun and Hampshire Railroad for the past year were $71,757 98, and the expenditures $50,047 72, leaving a net balance of $21,709 26. This is one hundred per cent. increase over the previous year.

☞ The Supreme Court of Missouri has decided that shares of national banks are taxable, like those of other moneyed corporations.

☞ The extension of the Selma, Rome and Dalton Railroad to Rome, Ga., where it connects with the lines of railroad to the North and to Charleston and Savannah, was completed on the 31st of October, and cotton is now forwarded direct from Selma, Ala., to New York, by way of Charleston, and comes through in eight days, diminishing by about one-half the time previously required.

☞ The Pensacola, Florida, *Observer* says that the iron for rebuilding the railroad which ran from that town to Pollard previous to the war has arrived, and that the first rail was laid on the 19th ult.

FOR SALE.

2,000 TONS ENGLISH RAILS, 56 lbs. to the lineal yard, finished for Fish Plates. Apply to

GEO. T. M. DAVIS,

WILLIAMS, PAGE & CO.'S

PASSENGER CAR LAMPS

FOR KEROSENE OR COAL OILS.

Centre Lamps for High Roof Cars.

SIDE LAMPS AND SALOON LAMPS.

THESE Lamps, now in use on a large number of Railroads are very neat and ornamental, and being enclosed in a Brass Case which is firmly secured to the car, **entirely avoid the dripping of oil on Passengers and Car Cushions.**

The Light is very strong and brilliant, **lighting up the Cars so as to give them that bright and cheerful appearance so much desired by roads for the pleasure and comfort of their Passengers.** These Lamps are strong and durable, and are as easily taken care of as any in use. A full sized drawing sent when requested.

The Saloon and Water Closet Lamp is the same form as the Side Lamp, but about half the size.

Manufactured and for sale by

WILLIAMS, PAGE & CO.,
91 Water St., Boston, Mass.

ONE OF THE

BEST INVESTMENTS.

THE

First Mortgage Bonds

OF THE

UNION PACIFIC

RAILROAD COMPANY.

900 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value.

3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of less than $30,000 per mile.

4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the Trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.

6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it.

7. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

9. The bonds pay six per cent. in gold, and the principal is also payable in gold.

10. The earnings from the local or way business were over FOUR MILLION DOLLARS last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.

12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent. premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure.

13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds *will find it to their advantage to do so at once.*

The price for the present is 102 and accrued interest at 6 per cent., from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
Nov. 1, 1868.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

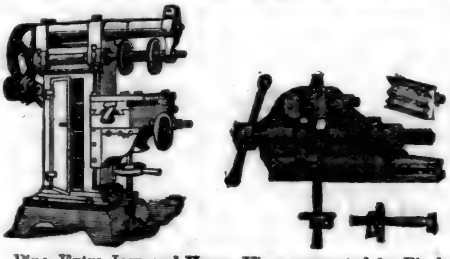
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,

Important to Railroad Managers.

We have, several times during the past four years, called the attention of railroad managers to the passenger car improvements invented and successfully introduced into practical use by Colonel EZRA MILLER, of No. 231 Broadway in this city.

These improvements are an artistic combination of mechanical laws to effect, as nearly as possible, a perfect and permanent system of making up and running passenger trains.

Railroad men have for a long time felt the necessity of such a system, particularly whenever the old system has occasioned provoking inconveniences, or severe *losses* of *property* and *life*. This system, of Col. MILLER's, we say has been fully tested and found to be all that is desired, *in these particulars*, viz: A perfect, safe and reliable "Trussed Platform," that will not, even in the severest accidents, break down nor permit cars to *telescope;* an automatic coupling, dispensing with shackles or links and pins, and always reliable, requiring no one to go between cars to couple them; a compression Buffing apparatus, permitting the platform to be brought so close together that an infant could not fall between them, and by *compression*, preventing all jerking at starting and stopping the train and keeping the cars steady while running.

We have witnessed the workings of these improvements for more than three years on the Erie and other roads, and we feel so deeply impressed with their great value as a safeguard against loss of life and destruction of cars, and as an every day valuable economy that we cannot refrain from expressing the hope that no passenger cars will hereafter be built without them, and that, as soon as possible, *all* passenger cars, old and new, will be supplied with them.

J. S. Kennedy & Co.

Messrs. J. S. KENNEDY & Co., 57 Broadway, N. Y., dealers in iron and steel rails, etc., are sole agents in this country for the "Bowling Iron Co.," manufacturers of iron and steel tyres, axles, boiler plates, etc. They are also sole agents in the U. S. for the "West Cumberland Hematite Iron Co.," manufacturers of Bessemer pig iron, and foundry and forge iron. Railroad companies and contractors furnished with supplies and materials. Stocks, bonds, etc., bought and sold. Advances made on consignments. See Advertisement.

Great Western Railway of Canada.

This company have commenced the publication of comparative monthly statements of earnings and expenses. Those for August and September, 1867 and 1868, are as follows:

August:	1867.	1868.
Gross earnings	$298,871 40	$298,810 53
Working expenses, including renewals	151,468 79	156,059 31
Net earnings	$147,402 61	$142,751 22

This shows a decrease in earnings of $60 87, with an increase in expenses of $4,590 52—making the decrease in net earnings of $4,651 39. Percentage of expenses: in 1867, 50.68; in 1868, 52.22.

September:	1867.	1868.
Gross earnings	$355,253 08	$386,898 84
Working expenses, including renewals	162 856 00	161,092 13
Net earnings	$192,897 08	$225,806 71

This shows an increase in earnings of $31,645 78, with a decrease in expenses of $1,264 13—making the increase in net earnings, $32,909 62. Percentage of expenses: in 1867, 45.70; in 1868, 41.64.

Chesapeake and Ohio Railroad.

REPORT OF THE PRESIDENT.

The corporate title of "Virginia Central Railroad Company" under which the stockholders of this company have annually assembled for so many years, and in which name so many difficulties have been met and overcome in prosecuting our work to its western terminus, has no longer any legal existence. Memory will, however, recall some very pleasant recollections with the old title of "Virginia Central;" and doubtless there are some stockholders who feel a little sadness that the name under which they have been so long associated has only to be remembered as something in the past. But whilst *this* feeling of regret may be to some extent indulged, yet it must be recollected that the name and style of our corporation only has been changed; the great purposes of the company will still be to promote Virginia interests whilst the objects and designs of the company are vastly enlarged with the acquisition of very valuable rights and privileges. We are about to accomplish, as your Board believe, what has engaged the attention of patriots and statesmen for more than half a century. We are about to open a direct communication between the waters of the Chesapeake and the Mississippi Valley, bringing the Western and Northwestern States into connection with Atlantic cities by the cheapest and most direct route on this continent.

By the Acts of the Legislature of Virginia and West Virginia, passed in 1867, to "complete a line or lines of railway between the waters of the Chesapeake and the Ohio River," it is provided as follows in the 15th section of the Virginia Act and the 14th of West Virginia, viz:

The Virginia Central Railroad Company may contract with the Covington and Ohio Railroad commissioners for the construction of the railroad from Covington to the Ohio River; and in the event such contract be made, the said Virginia Central Railroad Company shall be known as "The Chesapeake and Ohio Railroad Company;" and shall be entitled to all the benefits of the charter of the Covington and Ohio Railroad, and to all the rights, interests and privileges which by

this act are conferred upon the Chesapeake and Ohio Railroad Company when organized.

The stockholders of the Virginia Central Railroad Company at the called meeting in May, 1867, passed resolutions as follows, viz:

"*Resolved*, That the Board of Directors of this company be instructed to offer to contract with the Commissioners of Virginia and West Virginia to construct the Covington and Ohio Railroad on the following terms and conditions:

1st. That if the amount of money (required to put the road in operation from Covington to steamboat navigation on the Kanawha River with the necessary buildings and equipments, not less than five millions of dollars,) be not raised within six months from the date of the contract by subscriptions of stock, which the Board of Directors believe are available, and they are willing to receive as cash, then and in that case this company shall be released from the contract, if they desire it.

2d. This company will guarantee to those stockholders who furnish the funds to construct and equip the road to steamboat navigation on the Kanawha, and on any such additional stock thereafter subscribed, four per centum (semi-annually) as preferred dividend, on all the stock fully paid, after the road is complete to the Ohio River.

Immediately after the adjournment of the meeting of stockholders, a contract was entered into with the commissioners appointed under Acts of Virginia and West Virginia, passed in 1866, by which the Virginia Central Company undertook, conditionally, to construct the Covington and Ohio Railroad; but the five millions of dollars required by the resolutions of the called meeting in May not having been obtained, at the annual meeting in 1867, the resolutions of the called meeting in May, 1867, were modified as follows, viz:

Resolved, That the Board of Directors be instructed to enter into a new contract with the Commissioners of Virginia and West Virginia for the construction of the Covington and Ohio Railroad, with the following stipulations:

1. The work to be commenced and completed in the time and manner provided in the charter.

2. The company to guarantee four per cent. semi-annual dividends upon any stock which may be subscribed for the construction of said road after the completion of the road to the Ohio river, and, in the meantime, said stock shall be preferred in any dividends which shall be declared by the company to an extent not exceeding four per cent. semi-annually.

3. The company to borrow such sums of money, at a rate of interest not exceeding eight per cent. per annum, as may be necessary, in addition to the funds arising from stock subscriptions for the completion of said road, and to execute a lien on its property and revenues to secure the payment of the principal and interest of such loans: *Provided*, That no portion of the work on the Covington and Ohio Railroad shall be put under contract until three and a half millions of dollars of stock, applicable to a continuous line to the Ohio River, shall have been subscribed: *Provided further*, That subscriptions may be received to be applied to the construction of the work continuously from either end of the line.

Resolved, That the company may guarantee the payment of principal and interest of bonds of cities and counties receivable in payment of subscription to stock.

Resolved, That the bonds of cities and counties at ninety cents in the dollar, and bearing eight per cent. per annum interest, convertible into preferred stock, be received in payment of subscriptions of stock.

Resolved, That nothing contained in any contract made by this company shall have the effect to deprive the present creditors of the company of their claims for satisfaction out of the present property of the company. And it shall be the duty of the President and Directors, before executing any further lien on the present property of this company, to secure by mortgage any portion of the funded or floating debt, not heretofore so secured, that cannot promptly be paid off in the ordinary administration of the affairs of the company.

The Acts of Virginia and West Virginia authorized a contract to be made with any party which could give satisfactory assurance of being able to complete the Covington and Ohio road, being as you understand that portion of the line between Covington, the terminus of the Central road, and the Ohio River, provided capital to the amount of $3,000,000 was raised by the contracting party.

Under these several acts a contract was made on the 31st day of August last, by the Virginia Central Railroad Company to complete the Covington and Ohio road, a copy of which will be found in the appendix, and from that date in conformity with provisions of law, the stockholders of this company ceased to be known as the *Virginia Central Railroad Company*, and assumed the corporate title of "THE CHESAPEAKE AND OHIO RAILROAD COMPANY."

The construction of the road from Covington to the Ohio River was undertaken by the commonwealth of Virginia in the year 1855, entirely on State account and was prosecuted by means of appropriations under several acts of the Legislature, until the work was arrested by the occurrence of the war in 1861. Up to that date in round numbers the sum of $3,000,000 had been expended on the line terminating at the mouth of Big Sandy River, that being then the dividing line between Virginia and Kentucky, now the line between West Virginia and Kentucky.

The estimate of cost for completing and equipping the road from Covington to the mouth of Big Sandy, with buildings, rolling stock and machinery, made by the late Charles B. Fisk, the engineer in charge of the work, for double track tunnels, bridges, and masonry in round numbers was $13,000,000. Deducting from this sum the amount expended on the work $3,000,000, leaving $10,000,000 as the balance required by Mr. Fisk's estimate to complete the work.

MEANS RELIED ON FOR COMPLETING THE WORK.

Before going into the statement of resources it is proper to remark that Mr. Fisk was proverbial for the liberal allowances he made for all kinds of work and for expenditures more than necessary to secure strength and durability.

A subscription of stock has been obtained to the amount of $3,599,909, consisting of $2,200,000 subscribed by the City of Richmond and Counties in Virginia, payable in bonds bearing 8 per cent. interest, at 90 cents in the dollar, $700,000 by counties in West Virginia on the same terms, $320,000 payable in work and iron material for the road, and $379,909 payable in land received at present value.

The $2,900,000 of city and county subscription payable in bonds at 90 per cent. will require $3,222,222 22 of bonds to discharge the subscription.

In conformity with the directions of the stockholders a mortgage has been executed on all the property and revenues of the company, to secure the payment of ten millions of dollars of bonds, on which the funds will be raised to construct the road. Although a portion of these bonds may be sold at a discount when they are first put on the market, your Board has the opinion of their financial agent, and the experience of other companies with their securities, that they will soon advance to their par value and they therefore feel assured that the aggregate receipts from *their bonds*, the county bonds, proceeds of land sales and the net revenues of the company will complete the road.

The Engineer of the company thinks that by the use of temporary tracks at some difficult points, the road may be brought into operation for efficient use, and at a cost greatly below Mr. Fisk's estimate. It is designed to get the western section of the road into operation before it is completed through from the east. Revenue will be derived from the road brought into use with temporary tracks to aid in its full and final completion. The road from Covington to the Greenbrier River, and from the Ohio eastward as far as the falls of Kanawha may be put in operation for a sum not exceeding the city and county bonds.

The interest on these bonds and the surplus revenues of the road, will more than pay the interest on the cost of constructing these sections: when they are in operation the additional revenues received, the proceeds of sales of lands, and interest on city and county bonds ought to pay interest on a sum sufficient to carry the middle section through and finish the road, with rigid economy.

If nothing unfavorable to the sale of the bonds occurs, the work will be prosecuted vigorously. The purposes of the Board may be understood from the following resolutions adopted at their first meeting after the contract was made to complete the Covington and Ohio Railroad.

Resolved, That the Chief Engineer cause the line to Greenbrier River to be located immediately, and prepared for putting under contract as soon as the funds may be secured.

Resolved, That the Chief Engineer locate the western portion of the road as soon as is practicable, and have the more difficult portions ready to put under contract as soon as the funds may be considered as secured, so as to have the work completed between Charleston and the Ohio river in eighteen months from January 1st, 1869.

RECEIPTS AND EXPENDITURES.

The receipts of the Virginia Central Railroad Company for 11 months, viz: Up to the first of Sept. were		$523,029 08
Rent of real estate for the same time.		1,310 18
		$524,339 26
Receipts of the Chesapeake and Ohio Railroad Company for the month of September	$74,691 57	
Rent of real estate for the same time	323 23	
		75,014 80
		$599,354 06
Receipts of the previous year		554,510 64
Increase of receipts for the year		$44,843 42
Expenses of administration for 11 months, viz: to 1st of Sept		$393,900 06
Expenses of administration for the month of September		42,748 43
		$436,648 49
Expense of administration the previous year		418,862 90
Increase over last year		$17,785 59

As an offset for this increase of expenditure

much has been done for the improvement of the road, viz: In the laying of new rails, putting in additional siding, ballasting the track, more thorough draining and renewals of depots.

The gross revenue for the year ending Sept. 30, 1868	$599,354 06
Total expenses for the year ending Sept. 30, 1868	436,648 49
Excess of rceipts over expenditures in 1868	$162,705 57
Excess of receipts over expenditures last year, 1867	135,647 74

Deducting the increase of expenditure $17,585 59, from the increase of receipts $44,843 42, there is still a gain in the result of the year's operations over those of the last year amounting to $27,057, 83.

CONDITION OF THE DEBT OF THE COMPANY.

1868, Sept. 30—Bonds secured by mortgage, viz:

Coupon b'ds due in 1872	$199,000 00	
Registered "	7,500 00	
		206,500 00
Bonds guaranteed by the State, due in 1880		100,000 00
Coupon b'ds due in 1884	$966,000 00	
Registered b'ds "	17,000 00	
		983,000 00
Due to the Commonwealth on account of loan authorized by the Legislature		210,000 00
Eight per cent. coupon bonds due in 1876		300,000 00
		$1,799,500 00
Deduct investments on account of sinking fund		110,743 04
Leaving balance of mortgage debt		$1,688,756 96
Eight per cent. coupon b'ds, issued for funded interest, due in 1877	$160,500 00	
Eight per ct. registered b'ds issued for funded interest, due in 1870	47,361 22	
		207,861 22
Divid'd b'ds due in 1866	$19,491 00	
" 1875	82,550 00	
" 1865	13,161 00	
		115,203 00
Floating debt		254,095 86
		$2,265,917 04

Deduct debts due to the company 30th of September, 1868, embracing all accounts of the Virginia Central Railroad Company, viz:

B'ds of the State of Va.	$1,800 00	
Bills receivable	7,816 87	
Open accounts	106,955 58	
	$116,572 45	
Cash on hand 30th Sept., 1868	14,633 92	
		131,206 37
Total indebtedness of the company 30th Sept., 1868		$2,134,710 67
Do. 30th Sept., 1867		2,059,934 92
Increase		$74,776 05

The principal items constituting the above sum designated as increase of debt are, $25,471 30, due the State for the use of Blue Ridge Railroad, $7,537 13 paid for lots in Richmond and on account of the construction of the road from Jackson's River to Covington, $13,806 83 on account of extension from Covington to the Ohio River, and $22,772 44 bonds issued for interest due—this last being only a change of the form of liability, and $21,443 90, as above stated, being investment in property, making an aggregate of $44,216 40, which is not of the character of debt.

INCREASE OF TONNAGE AND TRAVEL.

There has been an increase in the number of passengers carried over the road during the last fiscal year as compared with the previous one, and an increase in receipts from that source, but not in proportion to the increased travel. This will be explained by the fact as stated below, that the large addition to the travel was west of Staunton, and therefore the transportation was for short distances.

Number of passengers carried between Richmond and Gordonsville inclusive, increased	13 p. c.
Between Lindsay's and Staunton	9 "
Between Staunton and Covington	63½ "
The tonnage transported the last fiscal year between Richmond and Gordonsville was greater than the year previous by	23 "
Between Lindsay's and Staunton	36.6 "
West of Staunton	56 "
Taking the whole road together the increase is	30 "

The above statements of the increase in tonnage and travel are very encouraging in our enterprise of extending the road westward. The results show that before the road reaches the Ohio River, where a through traffic will be commanded, it is developing the resources of the country. It is animating the dormant energies and stimulating the enterprise of the people in the country which was without any facilities of transportation until a few years ago. This will be more strikingly realized when the road crosses the Allegheny mountains and enters the fine counties of Greenbrier and Monroe.

PROBABLE RECEIPTS OF THE YEAR, COMMENCING OCTOBER 1, 1868.

The revenue of the company having in round numbers reached $600,000, under the adverse circumstances of a disastrous failure in the wheat crop in the country generally, east of the Blue Ridge, with the expectation of opening the road to the White Sulphur Springs by the first of June 1869, the revenues may be expected to run up to $700,000. There has been 22 per cent. of plaster, and 75 per cent. of other fertilizers carried over the road during the summer and fall more than was transported last year; we may therefore expect a much larger wheat crop. Richmond ought to be the best wheat market in the United States, as before the war the mills here had established the highest reputation for manufacturing flour, especially in reference to its capacity to keep sound in all hot climates. Coffee was brought here in large quantities as return cargoes from South America, and the merchants of Northern cities were attracted to Richmond as a coffee market.

The millers of this city are making efforts to regain the flour, coffee and hide trade, and if they succeed we may expect a larger portion of the wheat crop of the Valley to come here next year, than for several years past. Richmond will then have resumed her ascendancy as a wheat market. From all these sources of revenue, it is but a reasonable estimate to put the receipts of next year at $700,000.

NEW FREIGHT HOUSES AND CARS.

Thirty-eight new freight cars have been built in the company's shops during the year, besides covering forty with tin, or other permanent roofing.

New Freight Houses have been built at Hanover Courthouse, Louisa Courthouse, Afton, Waynesboro and Fishersville, and the Charlottesville depot enlarged and reconstructed, with other valuable and expensive improvements connected with it.

All the Freight Houses are now restored with the exception of the small building at Hanover Junction.

CONDITION OF THE ROAD BED AND ROLLING STOCK.

More expense has been incurred in improving the condition of the road than there was last year; the new iron laid, ballasting a considerable extent of track, with a large number of ties put in and the better draining of the cuts, justifies the opinion that the road is in better order than it has been for many years. I understand from the General Superintendent that the machinery and rolling stock is in excellent condition. It is gratifying to know that these statements are attested by the fact, that the road has been almost wholly free from accident during the year. *There has been none caused by a defect in the track.* For this favorable condition of the road, the superintendent, road master, and division masters deserve our commendation, and we cheerfully make the same remark as to the other officers in their department.

By order of the Board,

E. FONTAINE, *President.*

Vineland (N. J.) Railroad.

The charter of this company calls for a railroad from the Delaware Bay to Bordentown, on the Camden and Amboy Railroad. It will cross the West Jersey Railroad about one mile north of Bridgton, the Millville and Glassboro' Railroad at Vineland, the Camden and Atlantic Railroad at Winslow, and the Raritan and Delaware Bay Railroad near Atsion. C. K. Landis, Esq., is President of the company. We learn from the New Jersey *Patriot*, published at Bridgton, that Mr. A. M. Farwell, contractor for building the road, has let a heavy portion of the grading and bridging at that end to Messrs. Pratt & Kimble of Philadelphia, who will push it forward vigorously, and that they are in want of 100 laborers.

Erie and Niagara Railway.

At a meeting of the provisional directors of the Erie and Niagara Extension Railway Company at St. Thomas on the 10th inst., the following officers were elected: W. A. Thompson, President; T. M. Nairn, Vice President; R. Kingsmill, Secretary and Treasurer; Crooks, Kingsmill and Cattanach, Solicitors; Ontario Bank, Bankers. Resolutions were passed ordering the immediate opening of stock books, and calling a meeting for the reception of stock, on the 16th of December, at Fort Erie. Also, that application should be made to the municipalities benefitted by the road to grant the right of way. The meeting was adjourned to the 16th of December, at Fort Erie.

☞ The public debt of the State of Ohio outstanding on the 15th inst., the close of the fiscal year, was $10,532,675. Within the past six years the debt has been reduced over four millions of dollars.

☞ Patrick county, Va., has voted in favor of subscribing $200,000 to the stock of the Norfolk and Great Western Railway.

Hudson's Bay—Past, Present and Future.

The following history, alike concise and complete of the property and affairs of this company and its territory, is taken from the admirable work of Mr. Thomas Rawlings, on the Confederation of the British North American Provinces:

The Hudson's Bay Company was orginally established in the year 1670, by a royal charter in the reign of Charles II., and was defined to include all territories within the limits watered by rivers falling into Hudson's Bay; "together with all the lands and territories upon the countries, coasts, and confines of the seas, bays, lakes, rivers, creeks, and sounds aforesaid, that are not already actually possessed by the subjects of any other Christian prince or State, with the fishing of all sorts of fish, whales, sturgeons, and all other royal fishes in the seas, bays, inlets, and rivers within the premises, and the fish therein taken, together with the royalty of the sea upon the coasts within the limits aforesaid, and all mines royal, as well discovered as not discovered, of gold, silver, gems, and precious stones, to be found or discovered within the territories, limits, and places aforesaid; and that the same land be from henceforth reckoned and reputed as one of our plantations or colonies in America called Rupert's Land."

The great object in view was not, however, the fisheries, but the fur-bearing animals which swarmed through all the plains to the Rocky Mountains.

The grant, however, of King Charles gave the company a complete and arbitrary control over a country described in the 3d clause as follows:—"And furthermore, we do grant unto the said governor and company, and their successors, that they and their successors, and their factors, servants, and agents, for them and on their behalf, and not otherwise, shall for ever hereafter have, use, and enjoy, not only the whole, entire, and only liberty, use, and privilege of trading and trafficking to and from the territory, limits, and places aforesaid, but also the whole and entire trade and traffic to and from all havens, bays, creeks, rivers, lakes, and seas, into which they shall find entrance or passage by water or land out of the territories, limits, or places aforesaid; and too and with all the nations and people inhabiting, or which shall inhabit, within the territories, limits, and places aforesaid; and to and with all other nations inhabiting any of the coasts adjacent to the said territories, limits, and places aforesaid; and to and with all other nations inhabiting any of the coasts adjacent to the said territories, limits, and places which are not already possessed as aforesaid, or whereof the sole liberty, or privilege, or traffic is not yet granted to any other of our subjects."

Armed with such complete power, it is not to be supposed that any body of men who had obtained fairly the right to govern such a territory would easily forego that right. For nearly two centuries their agents have continued to extend their influence; and, though it is claimed they have misrepresented its natural advantages as a basis for future colonies, that they have governed arbitrarily and selfishly, and that they have assumed a despotic sway from the coast of Labrador to the Pacific, we must certainly do them the credit to say that, were it not for the judicious manner in which they have conducted their affairs, we should not now hold such a claim on this extensive territory. During all that period of time between 1670 to the present, we perceive that, while the United States has been at continual war with the Indians as their pioneers advanced westward, the few inhabitants which have occupied the trading posts, scattered hundreds of miles apart, have conducted their fur operations with the Indians with hardly a cessation of peaceful relationship. Year after year the products have increased in value, and though, during the time of long continued warfare between the French and the English, they lost in the attacks upon their establishments over 100,000*l.*, yet they were enabled to pay a dividend in 1684 of 50 per cent.; in 1688, another dividend of 50 per cent.; in 1689, 25 per cent.; between 1690, and 1800, a period of 110 years, they paid between 60 and 70 per cent. per annum.

For some years after this they had a serious difficulty, and found a dangerous opponent and formidable rival in the North West Company; but after several years' warfare they absorbed that company by consolidation. In 1837 they paid a dividend of five per cent., with a bonus of 6 per cent. In 1849, 10 per cent. In 1850, 20 per cent. In 1856 the dividend was 10 per cent.; but 268 proprietors had paid 220 to 240 per cent. for their stock.

The value of the furs alone which are purchased, and their number, can only be properly conveyed by a statistical table.

From September 1856 to September 1857 (considered a bad year), the total number of furs, excluding buffalo robes, was as follows:

	Hudson's Bay.	United States.
Muskrat	302,131	862,330
Beaver	90,604	8,594
Otter	11,573	4,368
Fisher	5,561	4,025
Silver fox	7,071	477
Cross fox	3,143	1,608
Red fox	10,498	44,558
White fox	4,940	1,657
Kitt fox	5,776	5,366
Marten	170,956	15,399
Mink	45,091	88,510
Sea otter	188	167
Lynx	23,341	824
Black bear	7,483	3,313
Brown bear	942	116
Grey white bear	769	476,022
Racoon	1,894	41
Wolf	9,831	25
Wolverin	916	209
Skunk	7,740	6,973
Wild cat	184	6,673

It will be perceived that the majority of all the valuable furs came from Hudson's Bay Territory, by the following table of valuation:—Price of beaver, 9s. 3d. each; badger, 1s. 8d.; bear, 34s.; fisher, 28s. 8d.; silver fox, 153s. 5d.; cross fox, 46s. 2d.; red fox, 11s.; lynx and cat, 10s 8d.; marten, 13s. 11d.; mink, 4s. 8d.; musquash, 11¼.; otter, 7s. 9d.; sea otter, 373s. 7d.; racoon, 2s. 7d.; seal hair, 3s. 11d.; wolf, 5s. 8d.; wolverin, 12s. 6d.

Furs have increased greatly in their value since that time, the silver fox being worth 50*l.* per skin at the present period.

Capt. Blakiston, R. E., who accompanied the Palisser expedition, says, in respect to buffalo—"Having taken some trouble to obtain the most reliable data in respect of the numbers annually killed, in which I have been aided by gentlemen in the fur trade, I consider, since 1842, when the Hudson's Bay first commenced to trade to any great extent in robes, there have been no less than 145,000 buffalo annually killed in British territory; while on the great prairies on the American side, where the trade has been carried on to a far greater extent, the amount annually slaughtered at the early part of the period mentioned was upwards of 1,000,000*l.* In 1855, on the British side alone, there were 2,000 robes and skins received at York Factory, on Hudson's Bay, which, making all allowances, would give about 230,000 slaughtered the previous year. This, in a civilised country, allowing 2lb. per head per diem—a very liberal allowance—would have served to sustain a population of 250,000, while probably 30,000 only profited by the slaughter."

The Commissioner of Statistics for the United States for 1860 says—"The entire imports of the company for the supply of the trading posts east of the Rocky Mountains, and mainly tributary to Minnesota, was stated by Sir George Simpson, in 1857, at $200,000, $100,000 going to the supply of the Indians west of the Rocky Mountains." According to an English authority, the gross value of the furs and skins exported to England, in return for the annual outfit, varies from $1,000,000 to $2,500,000. At the half-yearly sale in April 1857, held in London, the proceeds of the trade were stated to be $1,150,000. In March 1853 the trade sales amounted to nearly $2,500,000. They sold then 80,000 buffalo robes at $12 each. The average annual export may be fairly stated, then, at $1,500,000, showing a return of 500 per cent. on the imports. One million dollars of this is the product of Rupert's Land, having its outlet through Minnesota.

In 1864 the sales of Hudson Bay furs amounted to ever 200,000*l.*, and for 1865 it was computed they would reach 240 000*l.*

Since the new change of government, the Hudson's Bay Company's power is restricted to Rupert's Land, or east of the Rocky Mountains; but previous to the new organization, the extent of territory controlled by them exceeded 4,500,000 square miles, and extended into the United States and Russian America. The whole territory was divided into five departments, in each of which were established certain trading posts:

Departments.	Depots.	No. of Posts.
1. Northern	York Factory, Hudson's Bay	69
2. Southern	Moose Factory	42
3. Montreal	Lachine	22
4. Oregon	Fort Vancouver, W. T	16
5. Western	Victoria, V. I	15

The northern department is under the command of a chief pastor, and he is responsible for the districts into which his department is divided. The trading posts are separated hundreds of miles apart, and the furs collected here are transported for thosands of miles in barges and canoes, through the lakes and rivers of the Artic water system, and down the Saskatchewan to Lake Winnipeg, whence, till recently, they have been carried through the precipitous rivers which debouch into Hudson's Bay at Fort York.

At Norway House, at the north end of Lake Winnipeg, early in the summer, a meeting takes place between the Chief Commissioners and the Governor of the territories; the number and value of the furs are considered; the several proportions of earnings are allotted; various promotions are made; the various supplies are given out, such as blankets, materials for and articles of wearing apparel of woollen and cotton manufacture; hardware and earthenware, beads, ribbons, pipes, fire-steels, and other miscellaneous articles; also, tea, coffee, sugar, rice, raisins, wine, tobacco, salt, flour, gunpowder, shot, ball, fire-arms, &c.

Having perfected their business, and spent a few days in the mutual enjoyment of relating their experiences, they set out upon their return voyages to their homes. Of course their arrival is looked for with much anxiety; for they bring a whole year's news from the Old World. Then the various presents are carefully examined and mutually prized; and in the evening, the valley or the plain echoes with merriment, as the men and maidens dance, sing, and regale on the festive occasion.

Then come the preparations for winter. Fisheries are established, the various parties scatter to their posts, the Indians receive advances of supplies for the coming furs, boats are mended, tools and guns put in order, pemmican from buffalo meat is made, and fish are dried and salted. In the spring the hunting commences—furs are pressed and packed; and when the "up river" boat arrives, they are prepared to start for the annual meeting again.

The total number in the employ of the Hudson's Bay is 3,000, including agents, voyagers, traders, and servants, and about 100,000 Indian hunters.

Captain Blakiston, R. E., in speaking of the physical features of the interior of British North America, divides them as follows.—"1. The northern or Arctic basin. 2. Hudson's Bay. 3. The Central Plains. 4. The Rock Mountains. 5. The Pacific slope, and (if Canada were included it would be a sixth) the St. Lawrence basin.'

The northern or Arctic basin "extends from the northern part of Canada East, skirting the upper great lakes, curving round to Lake Winni-

peg, and thence taking a north-easterly direction, reaching the Arctic Sea in the region between the Coppermine and Back's Great Fish River. This great belt extends for 150 to 200 miles in width, and is extremely rocky—in fact, the whole region is most inhospitable except for the hunter and the fur trapper."

The region around Hudson's Bay is generally of much the same character as the wooded portion of the Arctic regions, and the extent to which the country is annually submerged is described as almost incredible. The Arctic regions and central plains are alike cheerless, unfit for pasturage, and worthless for agriculture.

Between the Rocky Mountains, Lake Winnipeg, the Lake of the Woods, and the 49th parallel, we have a country entirely distinct from the rest of Rupert's Land. It is variously denominated the "Valley of the Saskatchewan," the "Basin of Winnipeg," and the "High Central Plains." This district contains about 380,000 square miles, with a width of 750 miles.

A prominent feature in the commercial physics of this north-western country is the extent of its navigable water line, which may be taken as the natural exponent of the commercial value of its resources.

In the following table we give what is known of the continuous distances capable of steamboat navigation on the rivers which interlock in Lake Winnipeg.

	Water Line.	Shore Line.
Red River fr. Breckinridge	Miles.	Miles.
Mouth of Sioux Wood to Lake Winnipeg	531	1,062
Tributaries of Red River—		
Red Lake River, Minnesota	100	200
Assiniboine, British Ter.—		
Navigation uncertain	200	400
Lake Winnipeg	264	782
Lakes Manitoba and Winnipegoos	220	660
Saskatchewan River—		
From Lake Winnipeg to junction	422	844
North Branch to Edmonton	540	1,080
South Branch to Chesterfield House	480	960
Total	2,757	5,988

Captain Blakiston says—"Taking either branch of the Saskatchewan River, it is navigable for boats from Lake Winnipeg to near the base of the Rocky Mountains, a distance of 1,200 miles. I am glad to say I was fortunate enough to travel on it from its mouth to Fort Edmonton, 1,000 miles up, at a time of year when I saw the water at its lowest."

The valley of the Saskatchewan contains an extended belt of land, called the "Fertile Belt," which is unsurpassed for the richness of its soil and its adaptability for agricultural purposes. The explorations of Simpson, Hind, Pallisser, Hector, Sullivan and Blakiston, all serve to prove that within British territory the most fertile soil west of the Mississippi exists—and that so vast, so rich is this great valley that it is capable of subsisting 20,000,000 people.

Captain Pallisser describes the region drained by the Saskatchewan in the following words:—"The extent of surface drained by the Saskatchewan, and other tributaries to Lake Winnepeg, which we had an opportunity of examining, amounts in round numbers to 150,000 square miles. This region is bounded to the north by what is known as the 'strong woods,' or the southern limit of the great circum-Arctic zone of forest which occupies these latitudes in the northern hemisphere. This line, which is indicated in the map, sweeps to the northwest from the shore of Lake Winnepeg, and reaches its most northerly limit about 54 deg. 30 min. N. and longitude 119 deg. W., from whence it again passes to southwest, meeting the Rocky Mountains in latitude 51 deg. N., longitude 115 deg. W. Between this line of the 'strong woods' and the northern limit of the true prairie country, there is a belt of land varying in width, which at one period must have been covered by an extension of the northern forests, but which has been gradually cleared by successive fires.

"It is now a partially wooded country, abounding in lakes and rich natural pasturage, in some parts rivalling the finest park scenery of our own country. Throughout this region of country the climate seems to preserve the same character, although it passes through very different latitudes, its form being doubtless determined by the curves of the isothermal line. Its superficial extent embraces about 65,000 square miles, or 40,000,000 acres, of which more than one-third may be considered as at once available for the purposes of the agriculturist. Its elevation increases from 700 to 4,000 feet as we approach the Rocky Mountains; consequently, it is not equally adapted throughout to the cultivation of any one crop; nevertheless, at Fort Edmonton, which has an altitude of 3,000 feet, even wheat is sometimes cultivated with success."

Mons. E. Bourgeau, who accompanied Palliser in his explorations, addressed the following remarks to Sir William Hooker, in reference to Hudson's Bay Territory:—"But it remains for me to call the attention of the English Government to the advantage there would be in establishing agricultural districts in the vast plains of Rupert's Land, and particularly in the Saskatchewan, in the neighborhood of Fort Carlton. This district is much more adapted to the culture of staple crops of temperate climates, wheat, rye, barley, oats, &c., than one would have been inclined to believe from this high latitude. In effect the few attempts at cereal culture already made in the vicinity of the Hudson's Bay posts demonstrate by their success how easy it would be to obtain products sufficiently abundant largely to remunerate the efforts of the agriculturist. There, in order to put the land under cultivation, it would be necessary only to till the better portions of the soil. The prairies offer natural pasturage as favorable for the maintenance of numerous herds as if they had been artificially created. The construction of houses for habitation and for pioneer development would involve but little expense, because in many parts of the country, independent of wood, one would find fitting stones for building purposes, and in others clay to make bricks. In the latter district extend rich and vast prairies, interspersed with wood and forests, where thick-wood plants furnish excellent pasturage for domestic animals. The vetches found here are as fitting for the nourishment of cattle as the clover of European pasturage. The abundance of buffaloes, and the facility with which the herds of horses and oxen increase, demonstrate that it would be enough to shelter animals in winter, and to feed them in the shelters with hay collected in advance. The harvest could in general be commenced by the end of August or the first week in September, which is a season in which the temperature is sufficiently high and rain is rare.

"In the gardens of the Hudson's Bay posts—but more particularly in those of the different missions, succulent vegetables of the leguminous family, such as beans, peas, and French beans, have been successfully cultivated; also cabbages, turnips, carrots, rhubarb, and currants. Different species of gooseberries, with edible fruits, as well as raspberries, grow wild here."

It was supposed that the valleys of the Mississippi and the St. Lawrence Rivers exhausted the northern and central areas which are available for agriculture. A report to the New York Chamber of Commerce very soon corrected the erroneous impression. "There is in the heart of North America," said the report, "a distinct subdivision, of which Lake Winnipeg may be regarded as the centre. This subdivision, like the valley of the Mississippi, is distinguished for the fertility of its soil, and for the extent and gentle slope of its great plains, watered by rivers of great length, and admirably adapted for steam navigation. It has a climate not exceeding in severity that of many portions of Canada and the Eastern States. It will, in all respects, compare favorably with some of the most densely peopled portions of the continent of Europe. In other words, it is admirably adapted to become the seat of a numerous, hardy, and prosperous community. It has an area equal to eight or ten first class American States. Its great river, the Saskatchewan, carries a navigable water line to the very base of the Rocky Mountains. It is not at all improbable that the valley of this river may yet offer the best route for a railroad to the Pacific. The navigable waters of this great subdivision interlock with those of the Mississippi."

The Red River of the north, in connection with Lake Winnipeg, into which it falls, forms a navigable water line, extending directly north and south 800 miles. The Red River is one of the best adapted to the use of steam in the world, and waters one of the finest regions on the continent. Between the highest point at which it is navigable, and St. Paul, on the Mississippi, a railroad is in process of construction; and when this road is completed, another grand division of the continent, comprising 500,000 square miles, will be open to settlement.

Sir George Simpson, speaking of the land which is drained by the Red Deer and Swan Rivers, which drain a country of rare beauty and fertility, and which lies west of Lake Winnipeg, draws the following glowing picture:

"In this part of the country we saw many sorts of birds, geese, loons, pelicans, ducks, cranes, two kinds of snipe, hawks, owls, and gulls; but they were all so remarkably shy, that we were constrained to admire them from a distance. In the afternoon we traversed a beautiful country with lofty hills and long valleys, full of sylvan lakes; while the bright green of the surface, as far as the eye could reach, assumed a foreign tinge, under an uninterrupted profusion of roses and blue-bells. On the summit of one of these hills we commanded one of the few extensive prospects we had of late enjoyed. One range of heights rose behind another, each becoming fainter as it receded from the eye, till the farthest was blended in almost undistinguishable confusion with the clouds; while the softest vales spread a panorama of hanging copses and glittering lakes at our feet."

A writer in the *New York Knickerbocker Magazine* for October, 1858, thus expresses himself: "Here is the great fact of the north-western area of this continent—an area not inferior in size to the whole United States east of the Mississippi—which is perfectly adapted to the fullest occupation by cultivated nations, yet is almost wholly unoccupied, lies west of the 98th meridian, and above the 43d parallel—that is, north of the latitude of Milwaukee, and west of the longitude of Red River, Fort Kearney, and Corpus Christi; or, to state the fact in another way, east of the Rocky Mountains, and west of the 98th meridian, and between the 43d and 60th parallels, there is a productive cultivable area of 500,000 square miles. West of the Rocky Mountains, and between the same parallels, there is an area of 300,000 square miles."

(*To be Continued.*)

☞ The formal commencement of work on the Indianapolis, Crawfordsville and Danville R. R. took place at Crawfordsville, Ind., on the 12th inst. This road will run in a northwesterly direction from Indianapolis, *via* Crawfordsville and Covington, Indiana, to Danville, Illinois, and in the same general direction, *via* Urbana and Bloomington to Peoria, and so on pointing towards a Pacific Railroad connection at Omaha.

☞ The Frederick and Pennsylvania Line Railroad, designed to connect with the Hanover Branch road, crossing in its route the "Western Maryland," near the mouth of Double-Pipe creek, is about to be located. The engineer will commence the work immediately.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 28, 1868.

Stock Exchange and Money Market.

There has been a marked increase in the supply of Money available to responsible borrowers since our last. The banks as well as private lenders have added largely to their reserves. The U. S. Sub Treasury has also augmented its cash balances considerably. The demand from speculative sources has been less urgent, and has been readily responded to at from 5@7, generally at 5@6 per cent. There has been more call for choice to good business paper within a range of from 7@10 per cent. per annum. The city banks this week have reported a gain of $12,133,251 of legal tender notes, $8,959,751 in deposits, and $4,178,145 in specie, with an increase of $2,971,521 in the loan and discount average, with a reduction of $54,406 in the circulation. This is the most favorable showing for some time past. The U. S. Sub Treasury has gained about three millions of coin and currency, within the week. It derives a considerable portion of the daily increase from its daily sales of gold. The tendency toward the close was to greater ease. The report that Secretary McCulloch contemplates making no further sales of bonds, through any channel, during the remaining portion of his term of office, tends to strengthen popular confidence in an easy movement in the way of money, and in the stability, if not buoyancy, of financial and commercial values.

The specie reserve of the city banks is now $17,333,153, against $15,499,110 same time last year. The city bank deposits are now $184,110,340, against $174,721,683 week ending Nov. 16, 1867. The legal tender reserve amounts to $63,599,944, against $51,121,911 same time last year. The circulation now stands at $34,195,068, against $34,129,911 same time last year. The loans are now $251,091,063, against $249,343,649 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $144,185,333 a day, against a daily average of $134,636,424 the preceding week, and $146,095,267 the week ending with Nov. 5, 1868. The current week's exchanges average about $92,500,000 a day. The city banks, last week, gained $1,178,145 of specie, $8,959,751 of deposits, and $12,133,251 of legal tender notes. They increased their loans $1,971,524; and reduced their circulation, $54,496.

The New York Gold Exchange Bank reports for the week ending Saturday, the 21st day of November, 1868, the average amount of loans and discounts as $1,376,856; average amount of specie, $1,142,854; average amount of deposits, $1,743,798.

National Bank notes to the amount of $159,300 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,723,296, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $10,821,907, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,901,389. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,566,604; and for the public deposits, $38,073,050—making a total of $379,639,654. The Treasury Department last week redeemed and destroyed $500,300 of worn and mutilated fractional currency, and issued $665,368 of new. The outstanding amount of fractional currency on the 1st of November, was $33,413,985, against $32,933,614 on the 1st of October, 1868.

The U. S. Sub-Treasury receipts, week ending with Nov. 21, were $13,852,092, including $1,779,309 from customs duties; payments, $10,012,549, including $1,377,000 of coin interest; balance at the close of the week, $86,569,823, against $82,730,280, at the close of the preceding week, showing an increase of $3,839,543. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,587,770 including $434,064 from customs; and payments, $1,651,161, including $368,000 of coin interest; on Tuesday, receipts, $1,577,920 including $373,615 from customs, and payments, $2,824,687, including $433,529 of coin interest. The balance at the close of business on Tuesday stood at $86,259,666, against $83,658,776 a week previous; and $82,237,998, on Nov. 4, 1868. The aggregate receipts of the office from all sources in October, were $56,749,293; aggregate payments, $59,249,680. The balance on the 1st of

November was $91,999,615, or about 2½ millions more than on the 1st of October, which amounted to $94,499,990.

The outstanding amount of coin certificates on the 1st of Nov., was $19,716,840, against $20,236,400 on the 1st of Oct., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,443,000, and retired $1,676,308 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during October, reached $5,208,560.

Government revenues have been very limited in the excise line of late, and moderate in the customs form. The excises, last week, yielded about $1,800,000; customs at the port of New York, $1,779,309, and at the outport about $600,000 (in coin) more, making the grand total income for the week equal to abou. $5,012,055 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $58,000,000, according to the latest Washington advices.

Gold has been less freely dealt in, since our last, within a range of from 134 to 135⅝, closing at 135⅛. The speculative demand has been kept in check by the Government sales. The customs' inquiry has been light. There is not much call from shippers. The government award on Monday of $500,000 was made at from 133 89 to 134 09. The aggregate of the bid was $1,606,000; and the range from 133 77 to 134 09. The Government award on Tuesday of $560,000 of gold was made at from 134 55 to 134 60. The range of the proposals from 134¼ to 134 60; and the aggregate of the bids, $2,860,000. The European steamer of Tuesday carried out $250,000 in specie. The award of the $500,000 of Government gold on Wednesday was made at 134$\frac{85}{100}$. The aggregate of the bids on that day, was $2,710,000. The *Scotia* took out no specie on Wednesday.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,576,979, against $2,938,405 same time last year. The customs demand for Gold last week, averaged $296,551 a day; thus far, this week, it has been equal to $333,898 a day, or equal to a weekly aggregate of $2,002,388. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $66,754 and from California, $294,722. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $107,809,433, against $110,035,166 same time in 1867.

The total receipts of California gold at this port, since Jan. 1, 1868, have been $33,584,039, against $25,490,634 in 1867, showing an increase thus far in 1868, of $8,093,405. The exports of specie, from this port, last week, were $22,100, against $364,075 same week last year; total, since Jan. 1, 1868, $68,481,580, against $44,723,804 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,377,000; since Jan. 1, 1868, $78,622,609, against $59,027,981 same time in 1867. The specie exports from San Francisco, from Jan. 1, to Nov. 5, were $31,239,951, against $34,766,342 same time last year.

Foreign Exchange has been in more demand and quoted firmer on a lighter offering of prime drafts. Bankers' prime sixty day bills on London closed on Wednesday at 109⅜@109⅝, and on Paris to 5.20c.@5.16¼; sight bills on London to 109⅞@110¼, and on Paris to 5.14⅜c.@5.13⅛. The offering of produce bills has been more fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,261,984, against $4,484,083, same week last year; total, since Jan. 1, 1868, $148,602,157, against $171,093,613 in 1867.

Government securities have been in much better demand for home and foreign account at a sharp rise in prices, on a materially reduced offering of bonds, particularly the more active issues of the Five-Twenties, such as those of 1862, 1865 and 1867, in which the dealings have been particularly brisk. The market closed strong and buoyant on all issues.

The Government and Stock Boards adjourned at an early hour on Wednesday, till Friday forenoon.

U. S. sixes of 1881 closed here on Wednesday at 115⅜@115½; U. S. Five-twenties of 1862, (ex Nov. coupons) 113¼@113⅜; U. S. Five twenties of 1864 at 109@109⅛; U. S. Five-twenties of 1865 at 108⅝@105⅞; U.S. Five-twenties of 1865, consolidated, 110¾@111; U. S. Five-twenties of 1867, 111@111⅛; U. S. Five-twenties of 1868, 111@111¼; U. S. Ten-forties at 106¼@106½; U. S. Six per cent. currency bonds, 99@99½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 11.	Nov. 18.	Nov. 25.
Consols	94⅜	94⅛	94⅜
U.S. 5-20's of 1862	74¼	74⅛	75
Erie	27	31½	26¾
Ill. Central	96½	96	96

Railway and miscellaneous stocks have been less freely dealt in, during the week, and prices have been quite unsettled. The later transactions indicated reviving firmness on a moderate volume of business. The legal contest about the Erie property has seriously disturbed confidence in the clique stocks.

At the regular monthly sale of Scranton coal on Wednesday, the bidding was less animated, and prices were much lower. There were 70,000 tons disposed of at from $5.35@$5.60 for lump, to $7.82½@$8.50 for stove, as against a range of from $5.67½@$9.20, last month, per ton of 2,240 lbs., deliverable at Elizabethtown, N. J.

General business has shown more animation in nearly all branches. Produce has been in more request, but irregular in prices. Breadstuffs and provisions have declined, in most instances. Middling upland cotton closed buoyantly on Wednesday at 25¼@25½ cents per lb. The stock of cotton now here is estimated at about 24,500 bales. The receipts at the port this week, have averaged about 4,200 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 502,500 bales, against 337,000 bales same time last year; exports, same time 203,000 bales, against 131,000 bales same time last year; stock on hand at latest dates, 185,000 bales, against 163,500 bales same date last year. Total crops of 1867-'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 21,937 pkgs., against 11,698 pkgs., same time last year. At the Live Stock market, this week, Beeves have been more active at from 10@16½c. per lb.; week's receipts, 5,326. Veal calves in fair request at from 9@14c. per lb.; receipts, 848. Sheep and lambs, in moderate demand, at 3¾@6½c., and 6½@7½c. per lb.; receipts, 41,682. Swine, less sought after at 7⅞@8⅞c. per lb.; receipts, 36,822. Foreign merchandise has been more sought after, and quoted steady, as a rule. The Dry Goods trade exhibits a little more animation, but without any noticeable change in price. At the few auction sales really desirable fabrics found ready buyers at generally satisfactory rates. The total imports of foreign dry goods, last week, were $959,962, and the total amount marketed $862,652. The value of foreign merchandise imported last week, was $2,697,663—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $3,657,355, against $3,197,684 same week last year; from Jan. 1, 1868, $222,782,624, against $221,674,046 same time in 1867. The ocean freight market has been more active and firmer. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. 3d.@3s. 6d. by steamer, per bbl.; grain at 7d. by sail, and 8d. by steamer, per bushel; cotton at ¼d.@$\frac{5}{16}$d. by sail, and ½@⅝d. by steamer, per lb.; and heavy goods 25s.@35s. by sail, and 32s. 6d.@50s. steamer, per ton. Total number of vessels in port on Wednesday, 516.

The New York exports, exclusive of specie, for the week ending Nov. 24, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,484,083	$3,261,984
Prev. reported	166,609,530	145,840,173
Since January 1	$171,093,613	$148,602,157

The imports for the week ending November 21, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$831,595	$959,692
Gen. merchandise	2,366,089	2,697,663
Total for the week	$3,197,684	$3,657,355
Previously reported	218,476,362	219,125,269
Since January 1	$221,674,046	$222,782,624

The balance in the Sub-Treasury on Tuesday was $86,259,665 93.

☞ NEARLY FIVE HUNDRED MILES COMPLETED.—The Central Pacific Railroad Company have added 300 miles to their line during the current year, while doing a large local passenger and freight business. The through connection will be completed next summer, when the through traffic will be multiplied.

A limited portion of the popular First Mortgage Loan, secured by the prior claim upon this valuable and productive property is offered at the Company's price—103 *per cent. and accrued interest, in currency.* Bonds of $1,000 each. Particulars of

FISK & HATCH,
Bankers and dealers in government securities,
No. 5 Nassau street.

Lindsay, Walton & Co.

We would respectfully call especial attention to the advertisement of Messrs. LINDSAY, WALTON & Co., on outside page.

This new firm succeeds the old house of Waltons & Leonard, so well and favorably known to railroad men throughout the country. The energy and talent connected with this new firm, and their thorough knowledge of the supply business in all its details, commends them to favorable consideration by our railroad companies.

☞ From official reports it appears that the amount of railroad iron exported from England during the month of September, 1866, was 7,599 tons shipped to the United States; in the same month, 1867, 12,333 tons, and during last September 20,638 tons. The same table also shows the amount imported for the nine months ending September, for the same years. In 1866 there were 70,405 tons; in 1867, 137,884 tons; in 1868, 209,868 tons.

☞ SEVEN PER CENT. INTEREST IN GOLD.—The First Mortgage Seven per Cent. Sinking Fund Bonds of the Rockford, Rock Island and St. Louis Railroad Company, pay both Principal and Interest in GOLD COIN, FREE OF GOVERNMENT TAX.

Each Bond is for $1000 or $200 Sterling, and is convertible into stock at the option of the holder. The coupons are payable Feb. 1st and Aug. 1st, in New York or London, at the option of the holder.

The Road runs from Rockford in Northern Illinois to St. Louis, a distance including tracks to Coal Mines, &c., of about 400 miles, and traverses the finest district of Illinois.

The Bonds have 50 years to run, and are a lien of $21,000 per mile upon the Company's railroad franchises, its coal lands—of which it has 20,000 acres containing A HUNDRED MILLION TONS OF COAL—its rolling stock, and property of every sort.

A Subscription of $8,800,000, at par, to the Capital Stock of the Company, furnishes a large part of the means required to construct and equip the road.

Nearly half the entire length of the road is graded and substantially ready for the iron; the rails are now arriving upon the line. The first division, giving an outlet to the coal, will be in operation in 60 days, and track-laying will from this time be prosecuted with the utmost energy till the last rail is in position. The Company intend to have the whole road in readiness for the Autumn business of 1869.

The Bonds are for sale at 97½ and accrued interest in currency, and may be obtained through bankers and brokers throughout the country, or at the office of the Company, 12 WALL STREET, New York.

Governments and other securities received in exchange at market rates.

The Trustees for the Bondholders is the UNION TRUST COMPANY of New York.

Pamphlets giving full information sent on application.

H. H. BOODY, Treasurer.

Union Pacific Railroad.

The Secretary of the Interior on the 19th inst. received a report from the government commissioners of the Pacific Railroad on the thirtieth section of twenty miles of the road and telegraph line of the Union Pacific Railroad Company, which completes the road to a point 820 miles west of the eastern terminus on the Missouri river, near Omaha, Nebraska. The commissioners report the section as ready for immediate service, and equipped as a first class railroad, and recommend that the same be accepted. The President has accepted the section and ordered the issue of the bonds and patents due the company.

☞ The Board of Directors of the Chesapeake and Ohio Canal, at their last meeting, decided to order the water to be turned off on the 10th of December. This was the time set last year, but was postponed afterwards to the 15th, and again to the 21st.

☞ The project of constructing a canal from Camden, N. J., to some eligible point on the Mullicas, river, near Batsto or Tuckerton, is again being agitated. Application is to be made to th Legislature for a charter the coming winter.

Journal of Railroad Law.

CONSTRUCTION OF A PASSENGER'S TICKET.—RESPONSIBILITY OF COMMON CARRIERS FOR TRUNKS.—WHEN AND WHERE TO BE DELIVERED—DEMAND FOR BAGGAGE TO BE MADE WITHIN A REASONABLE TIME.

The facts in the late case of Gilhooly *vs.* The New York and Savannah Steam Nav. Co. [1 Daly (N. Y.) 197], were as follows:

The plaintiff took passage in the defendants' steamship at Savannah, Ga., for the city of New York. The receipt given at the time he purchased his ticket is as follows:

"Steamship Alabama, Sav., Sept. 13, 1858.

Received fifteen dollars for the passage of Thomas Gilhooly from Savannah to New York, per Steamship Alabama, to sail (unless prevented by some unforeseen occurrence), on Saturday, the 15th day of September, 1858, at 4 o'clock, P. M.

J. B. RIPLEY, for Agents.

This receipt must be given up when called for by the clerk. Boxes or trunks not allowed in the cabins or staterooms. Baggage should be marked with the number of the passenger's room. If valuable packages are sent on board, the value must be declared and paid for accordingly. The ship will not be accountable for baggage or goods unless bills of lading are regularly signed. Dogs will be charged five dollars each, and in no case allowed in the cabin or state rooms.

GEORGE MITCHELL."

When the vessel reached the quarantine in the harbor of New York, the plaintiff, being ill, was ordered ashore by the quarantine officers, where he remained for three days. On reaching New York city, he went to the office of the steamer for his trunk, containing his wearing apparel; the officer in charge said he knew nothing of it. The plaintiff then waited several days until the vessel returned to New York, and made further inquiries. He then brought his action to recover the value of his trunk.

Judgment was rendered for the plaintiff, and the defendants' appealed to this court. The opinion of the court was delivered by BRADY, J.—The plaintiff took passage on the defendants' steamer Alabama, from Savannah to New York, and left the former place on the 15th September, 1858. He was sick and put ashore at quarantine when the vessel reached that place. His trunk was taken to New York and never delivered to him. The defendants set up that it was delivered to him at New York, but gave no evidence to establish the truth of that allegation, and proved nothing to relieve themselves from liability. They were bound to deliver to the plaintiff his trunk at the end of the journey. They failed to do so. If the voyage ended at quarantine, then they were bound to deliver the trunk to the plaintiff when put ashore at that point. If they had offered to deliver it there, and the plaintiff had refused to take it, it might be regarded as carried from that place at the risk of the owner, their duty having been performed. There was no evidence, however, showing that the plaintiff knew or was advised that the voyage of the defendant's steamer had ended at quarantine during the season of the year in which he traveled in one of them. The evidence, on the contrary, shows that he paid for a passage to the city of New York, and to that place the defendants' were bound to take him and and his baggage, unless excused by the health laws regulating their intercourse with that city. The omission of the plaintiff to call for his trunk for several days after the steamer arrived, did not release the defendants from their obligation to deliver it to him. The defendants were bound to deliver, and the whole duty rested on them. Hollister *vs.* Nowlen, 19 Wend. 234; Bowman *vs.* Teal, 23 Wend. 306; Cole *vs.* Goodwin, 19 Wend. 251.

The arrival of the steamer at its place of destination with the luggage will not discharge the carrier until its delivery to the owner. It must be demanded, however, within a reasonable time. Powell *vs.* Myers, 26 Wend. 591. What is a reasonable time is, in all cases, a question of fact, and the finding on that question in favor of the plaintiff cannot be disturbed.

The judgment should be affirmed.

Virginia and Tennessee Railroad.

The report of this company for the year ending September 30, 1868, presented at the recent session of the stockholders in Lynchburg, Va., shows the immediate liabilities of the road to be $461,649, with $313,000 additional on account of interest upon past due coupons, certificates and bonds. The assets of the company, including open accounts, stores and cash in hand, amount to $227,074.

The funded debt of the company stands as follows:

1st mortgage bonds	$494,000 00
2d mortgage bonds	23,500 00
Enlarged bonds	990,000 00
Income bonds	138,500 00
Salt Works Branch bonds	9,500 00
8 per cent. bonds of the $1,000,000 so far issued	736,000 00
And in 8 per cent. registered certif's.	61,352 36

The revenue of the road for the fifteen months preceding the termination of the fiscal year, as now fixed was $1,108,537 01, and its current expenses for that period $933,710 27, in connection with which, however, it is but proper to remark that this charge to current expenses is rightfully entitled to a reduction, as near as can be ascertained, of at least $176,145 28, for payment made on account of transactions which belong to the previous fiscal years, and the current expenses would then appear to have actually been $757,564 99, from which it will be seen that the net revenue for this period may be stated at $350,972 02, a sum more than sufficient to discharge all current demands of interest, on account of the funded debt, for the same period, by an excess of over $125,000. The earnings for the months of September and October, 1868, amount respectively in round numbers to the sums of $100,000 and $94,000.

Detroit and Milwaukee Railway.

We learn that the Seven Per Cent. Bonds of this company, issued for the second series of funded coupons, which expired on the 15th of November, 1868, are now in course of extension to May 15th, 1875. These bonds were given for the three half yearly interest coupons of the ordinary bonds of the company, which were payable prior to May 15th, 1864, amounting to, first mortgage coupons, $262,500, second mortgage coupons $129,000. The funded coupon bonds are secured by mortgage, preserving, however, intact, the priority of lien secured to the respective bonds from which the coupons had been detached, the coupons themselves being held uncancelled by the trustees in the mortgage deed.

Canada Railways.

The earnings of the Canadian Railways for the month of October, 1867 and 1868, were as follows:

	1867.	1868.
Great Western Railway	$438,759	$442,483
Grand Trunk Railway	762,974	826,553
London & Port Stanley R.W.	5,942	4,995
Welland Railway	16,792	11,383
Northern Railway	75,641	68,974
Brockville and Ottawa R. W.	17,750	21,861
St. Lawrence & Ottawa R. W.	11,546	12,234
St. Lawrence and Industry Railway	1,884	1,429
European and North American Railway	19,782	20,479
Total	$1,391,070	$1,410,391

The United States Bonds in Europe.

The *Echo de la Bourse*, published in Paris, has an interesting article on the operations in United States bonds in France and Germany. This journal states that of upwards of six hundred millions of dollars worth of American securities held in Europe, four-fifths, at least, are held in Germany. The daily sales of United States bonds at Frankfort, Hamburg, Bremen and Berlin will, it is asserted, compare favorably with the transactions in Wall street, and at Rotterdam and Vienna the sales are larger than in London. In Paris the purchases are small, and are principally effected by Americans residing in or passing through that city. The *Echo* states, however, that while the European securities have fluctuated greatly in value, the United States Bonds continue to advance steadily, and at present are quoted on the Bourse at a high figure. This appreciation of the high value of American securities is attributed to the *Monthly Circular*, issued by the Treasury Department, showing the financial condition of the country, and which is sent to all the bankers of Europe.

☞ The following gentlemen have been elected directors of the Eatonsville Passenger Railway Company for the ensuing year: John C. Holland, H. H. Graw, Benjamin Whiteley, Frank Frick, Jeremiah Storm, James W. Flack and Asa H. Smith. The new board have elected Col. John C. Holland, President, W. W. Orndorff Secretary, and H. H. Graw, Treasurer.

☞ The Rondout and Oswego Railroad Company will receive proposals at their office in Rondout, N. Y., until January 2, 1869, for the grading and masonry of the Mountain and Delaware Divisions of their road, extending from Phœnicia, in Ulster Co., to Harpersfield Centre, in Delaware Co., a distance of 52.85 miles. See Advertisement.

☞ Proposals will be received until the 3d of December, for the graduation, bridges and culvert masonry of fifty miles of the Elizabethtown and Paducah Railroad. Address Geo. Macleod, Chief Engineer, Elizabethtown, Hardin Co., Ky.

☞ The West Wisconsin Railroad was completed to the end of the 20th mile on the 12th inst., and was to have been finished to Black Rock on the 24th.

☞ Rails are now being deposited along the line of the Metropolitan Branch of the Baltimore and Ohio Railroad, preparatory to going on with the work.

Railroads in Maine.

The following information in reference to the various railroad enterprises in Maine, now under way, has been supplied by Col. A. W. Wildes of the Board of Railroad Commissioners of that State:

The Bangor and Piscataquis Railroad which connects with the European and North American Railroad at Oldtown, and passes through the towns of Alton, Lagrange and Orneville to a point in Milo, within four miles of the Brownville slate quarries, and fifteen miles from the Katahdin Iron Works, and thence up the delightful valley of the Piscataquis to Dover and Foxcroft, is progressing finely. It is forty miles in length. Three thousand eight hundred tons of iron have been bought for the road, to be delivered May 1, of next year. The road, exclusive of rolling stock, will cost $19,800 per mile. Although the road was not located until the 24th of last June, since then work has progressed with such rapidity that twenty-eighty miles are now completed, and it is confidently expected that the entire road will be completed and open for traffic Nov. 1, 1869.

The Dexter and Newport Railroad has been pushed with such energy that the road is ready to be delivered to the Maine Central, with which it forms a connection, and which has leased it for thirty years, paying six per cent. on its cost, annually. It is expected that it will be open for travel next week. It is fourteen miles in length.

The Belfast and Moosehead Lake Railroad is nearly forty miles in length, and connects with Maine Central at Newport. A force of 300 men are employed on the first ten miles this side of Belfast, the heaviest portion of the road, which will be completed this winter, and the entire road, it is believed, will be constructed by next summer.

The Somerset Railroad runs from West Waterville to Solon, about thirty-four miles; also located to Narridgewock, twelve miles. On that portion of the road under construction, the contractors are engaged in the work of grading and preparing stone for bridge masonry.

The proposed extension of the Maine Central road, from Danville Junction to Portland, a distance of twenty-seven miles, bids fair to be an accomplished fact. The line is being located with a view of entering upon the work of grading next spring. A branch line of this road has been surveyed from Pittsfield to St. Albans, twelve miles, the charter for which was obtained last winter. The people of St. Albans and Hartland have expressed an earnest determination to build this piece of road at an early day.

The European and North American Railroad is in operation as far as Oldtown, twelve miles from Bangor, and it is expected that some time next month the cars will be running as far as Passadumkeag, twenty miles from Bangor.

All the foregoing lines were surveyed by Col. Wildes, and their importance to the general interests of the State cannot be undervalued. Col. Wildes is also engaged in surveying a line from Skowhegan to Solon, with a view of extending the Somerset and Kennebec Railroad to that point, a distance of fourteen miles. He has also just finished a reconnoisance of a road from Bangor to Rockland, the charter for which was obtained last winter, and whose projectors are determined to make such an effort as will insure the building of the road at an early day.

Subscriptions for the construction of the Portland and Ogdensburg Railroad are being freely taken, and the prospect for the building of the road is very encouraging.

☞ The officers of the Danville, Urbana and Pekin Railroad Company are as follows: President, C. R. Griggs; Vice Pres't, T. Smith; Secretary and Treasurer, William J. Ermentrout; Engineer, Thos. King; Superintendent, Wm. H. Smith. The office of the company is at Urbana, Ohio.

Cooperstown and Susquehanna Valley R.R.

The Oneonta *Herald* says that the controversy between the town of Hartwick and the Cooperstown and Susquehanna Valley Railroad Company has been decided in favor of the town, by Judge Mason, the referee appointed to hear and determine the case. The referee's decision is, that the consent of the owners of a majority of the taxable property of the town was not obtained, and therefore that the bonding was illegal and unauthorized. The decission of the suit has given a new impulse to the project of continuing the railroad from Richfield Springs down the valley of the Otego creek to Oneonta. It is thought that a feasible route from Schuylers lake to Oneonta has been found, money has been raised for a survey and the engineers are expected to be on the ground during the coming week. The people of Oneonta, New Lisbon, Burlington and Laurens will subscribe liberally to the stock, if the Otego creek route is adopted.

Georgia Air Line Railroad.

The Atlanta (Ga.) City Council have pledged the city for $300,000 to the Georgia Air Line Railway, and thereby secure the early commencement and certain completion of the work. Colonel Buford, the President of the Company, is also President of the Richmond and Danville Railroad—a road 190 miles in length. He pledges his company to put in $100,000 immediately if the city and citizens would raise $400,000 additional, which amount is necessary to build the first twenty miles. The City Council heads the list with $300,000.

☞ The work of construction on the Massawippi Valley Railroad was formally commenced, at Lennoxville, on the 16th inst. This road will be about 30 miles in length, and will connect the Connecticut and Passumpsic Rivers Railroad with the Grand Trunk Railway. The contracts have been let, and work will commence at several points and continue all winter.

☞ At the annual meeting of the Hempfield Railroad Company at Washington, Pa., on the 16th inst., the following gentlemen were elected directors for the ensuing year; J. S. Clark, Greensburg, W. S. Workman, Charles Hays, Washington, Pa.; John Birch, Claysville, J.C. Acheson, S. Brady, A. J. Hannell, Wheeling, W. Va.

☞ The contractors of the Honduras Interoceanic Railway, Messrs. Waring Brothers, have made arrangements for the shipment of all the plant required for the first section of the railway from the harbor of Puerto Caballos on the Atlantic coast to the town of Santiago.

☞ Application will be made for a charter to build a roadway from some point on the Grand Trunk Railway, at or near Lennoxville, and, following up the valley of the St. Francis River, to terminate in the vicinity of Lake St. Francis.

☞ James Verner, James H. Wright, Alex. Speer, Richard Hays, and J. H. Jones have been elected directors of the Peoples' Passenger Railway, Pittsburg Pa.

☞ The work on the railroad bridge at Parkersburg, West Va., is progressing steadily.

☞ The surveyors of the Exeter (N. H.) Railway have reached Hampton Falls on their route.

Richmond, Fredericksburg and Potomac Railroad.

The annual meeting of this company was held in Richmond on the 18th inst. The annual report of the board of directors was read, giving a satisfactory view of the condition of the company. The receipts of the year were as follows: Through travel, $169,373 79; local travel, $46,285 83; United States mail, $13,019 25; United States transportation, $6,294 60; express, $15,745 40; through freight, $3,196 97; local freights, $40,623 61; rents, of real estate, $2,186 71—total, $296,726 16. Expenses of transportation, $193,984 07. Leaving the net earnings, $102,742 09. Of this sum $70,172 17 was absorbed in paying off interest on funded debt, Connection Company's stock, and dividend on guaranteed stock. The balance, of $32,559 93, carried to profit and loss.

On motion, P. V. Daniel, Jr., Esq., was unanimously re-elected president. Messrs. G. A. Myers, R. W. Haxall, C. S. Mills and Elihu Chauncey, were unanimously elected directors on the part of the stockholders, and Mr. Andrew Johnson announced as director on the part of the State.

Southern Maryland Railroad.

Commissioners are now engaged in surveying the route for the Southern Maryland Railroad, from Point Lookout to some point in Prince George's county, and have reached a point within eighteen miles of Washington. The Washington *Chronicle* says if encouragement was given them by the city council, they would, no doubt, survey this route to the city limits, which would give Washington an independent line of eighty-four miles to Point Lookout, sixty-four miles of which carries it to the mouth of the Patuxent river, through a country richly adapted to farming, grazing, and fruit raising. The mouth of the Patuxent is one of the finest harbors in that section of the country commanding an extensive oyster trade.

☞ The directors of the Pittsburg and Birmingham Railway are: W. M. Harsh, W. K. Nimick, M. W. Beltzhoover, B. F. Jones and John McD. Crossen. W. M. Hersh, Esq., was elected President, W. K. Nimick, Esq., Secretary, and James H. Wright, Esq., Treasurer of the Company.

☞ The directors of the Owensboro and Russellville, (Ky.,) Railroad Company are having three lines surveyed from Owensboro to intersect with the main line already surveyed to determine the most advantageous entrance and the most eligible locality for a depot.

☞ The directors of the Citizens Passenger Railway (Pittsburg) are as follows: James Verner, James Wright, Alexander Speer, Richard Hays and J. H. Jones. James Verner, President; D. D. Corwin, Secretary, and James H. Wright, Treasurer.

☞ A survey of a railroad route from Danforth's Corner, on the Nashua and Wilton Railroad, to Amherst, has been completed, and found to be a very favorable one.

☞ The Nashville and Decatur Railroad Company have resolved to extend their road to Montgomery.

☞ The Canal Commissioners have adopted a resolution to close the canals of this State on the 7th of December.

☞ The Port Tobacco (Md.) *Times* states that the commissioners appointed under the recent act of the Legislature for the survey of a route from Point Lookout, in St. Mary's County, to some point in Prince George's County, have reached Mount Pleasant, in the western section of Charles County. According to this survey the line of route will pass through that county a distance of about fifteen miles. The point at which it is proposed to connect the road with the Baltimore and Potomac road, in Prince George's Co., is as yet undetermined. The route, as far as the survey has progressed, is understood to be very level.

☞ At a recent meeting of the citizens of Minneapolis and St. Anthony, Minn., the Lake Superior, St. Anthony Falls and Minnesota River Air Line Railroad Company was organized, with a capital of $1,500,000. The proposed air line will run from a point near White Bear Lake to Shakopee, with a branch to St. Peter. A board of fifteen directors was selected, embracing some of the leading men of Minneapolis, St. Anthony, St. Peter, &c.

☞ Bids have been received, opened and examined for the construction of that portion of the New York and Oswego Midland Railroad, extending from Sidney to Walton, and the branch from that place to Delhi, and the company only await the procuring of the right of way thereon before awarding and proceeding with the work.

☞ The receipts into the Treasury of Kentucky from January 6, 1868, to October 10, 1868, were $3,816,508 38, and the disbursements, $2,068,009 81, leaving a balance in the Treasury of $748,128 57. The balance to credit of sinking fund was $587,199 68; and the balance to credit of school fund, $31,996 50.

☞ The contract for grading four miles of the Shamokin and Treverton Pa., Railroad, beginning at the Gap and extending West, has been let to Messrs. King and Bradley. They expect to commence work shortly, and we learn intend prosecuting it vigorously. They advertise for 200 men.

☞ Col. Sledge, President of the Buffalo Bayou, Brazos and Colorado Railroad Company, is about to survey the route from Columbus to San Antonio, Texas.

To all connected with Railroads.

Notice to Contractors.

GENERAL OFFICE OF THE RONDOUT AND OSWEGO RAILROAD COMPANY, Rondout, N. Y., November 13th, 1868.

Proposals will be received at this office until January 2d, 1869, for the Grading and Masonry of the Mountain and Delaware Divisions of this Road. The Mountain Division consists of 23 sections containing 23 miles, commencing at Phœnicia, in Ulster County, and extending to Margaretville, in Delaware County. The Delaware Division consists of 29 sections, containing 29 85-100 miles, commencing at Margaretville, in Delaware County, and extending to Harpersfield Centre, in Delaware County. Map, plans, and specifications will be furnished on and after December 1st 1868, at the Chief Engineer's Office in Rondout. All other information furnished at this office.

6t48 THOMAS CORNELL, President.

SALE OF THE UNITED STATES MILITARY ROLLING MILL at Chattanooga, Tennessee.—The Directors of the South-Western Iron Company will receive proposals for the purchase of their Rolling Mill at Chattanooga, Tennessee, erected by the United States authorities, and greatly enlarged and improved since it became private property. The land (comprising 150 acres) and the railroad are now held in fee simple, with brick works, saw-mill, dwellings, and all the appurtenances required for the production of 300 tons of railroad iron per week. The superior character of the works and their admirable location are well known, but a detailed description can be had on application to the undersigned.

The proposals will be opened on the 31st day of December, 1868, and if none satisfactory to the Directors are received, the property will then be sold at public auction, in the City of New York, on WEDENSDAY, the 3d day of February, A. D. 1869, to the highest bidder.

Parties desirous of examining the works will apply to GUSTAVUS W. SMITH, General Manager of the Works, at Chattanooga, and further information may be had on application to the undersigned, at No. 17 Burling-slip, New York.

ABRAM S. HEWITT, Treasurer.
6t48 EDWIN F. BEDELL, Secretary.

To All Whom it may Concern.

Notice is hereby given that the Mead Rubber Company of the City of New York, a corporation duly organized, under and in pursuance of an act of the Legislature of the State of New York entitled: "An Act to authorize the formation of corporations for Manufacturing, Mining, Mechanical, or Chemical purposes," passed February 17th 1848, and the several acts amendatory thereto, will apply to the Legislature of said State, at the next session thereof, for a special act of said Legislature, altering or amending the charter of said corporation, by changing the name of said Company from the "Mead Rubber Company," to the "Star Rubber Company."

Dated New York, November 4th, 1868.

For the Company,
JOSIAH J. BURGESS, President.
W. W. WARD, Secretary. 6t48

and by Corn & Aufermann, 30 Broad street, N. Y.

ONE OF THE

BEST INVESTMENTS.

THE

First Mortgage Bonds

OF THE

UNION PACIFIC

RAILROAD COMPANY.

900 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the public, as one of the safest and most profitable investments.

1. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value.

3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of less than $30,000 per mile.

4. Hon. E. D. Morgan, of the United States Senate, and Hon. Oakes Ames, of the United States House of Representatives, are the Trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs.

6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it.

7. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

9. The bonds pay six per cent. in gold, and the principal is also payable in gold.

10. The earnings from the local or way business were over FOUR MILLION DOLLARS last year, which, after paying operating expenses, was much more than sufficient to pay the interest. These earnings will be vastly increased on the completion of the entire line in 1869.

12. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent. premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices. No other corporate bonds are made so secure.

13. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest in their bonds *will find it to their advantage to do so at once.*

The price for the present is 102 and accrued interest at 6 per cent., from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.

Nov. 1, 1868.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

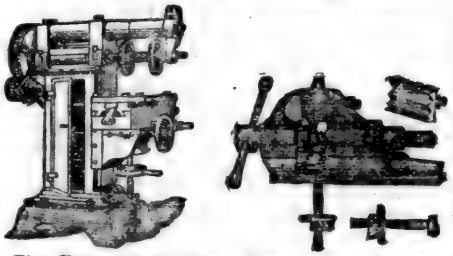
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

Chesapeake and Ohio Railroad.

The annual meeting of the stockholders of the Chesapeake and Ohio (late Virginia Central) Railroad Company was held in Richmond on the 28th ult. Gen'l Williams C. Wickham, of Hanover, was elected President by a majority of 31,104 over Col. Fontaine, who has long held the position. The whole number of votes cast was 63,884, viz:

	Wickham.	Fontaine.
Private stockholders	203	4,642
Individual proxies.....	1,901	9,498
County and City proxies....	25,000	2,000
State proxies.....	20,140	.....
Total	47,244	16,140
Majority for Wickham.....	31,104	.....

On the announcement being made, Gen'l Wickham thanked the friends who had supported him, and promised to do all in his power to advance the interests of the road. The Richmond *Dispatch* says that the new President "is a gentlemen of education and talent. He has energy and strong practical sense, and combines with these qualities that physical strength and capacity and endurance of labor and fatigue which are so highly important in his relation to the great work now entrusted to him." The *Dispatch* also says that "the friends of General Wickham, in pressing the change by which the Chesapeake and Ohio Railroad has been placed under his chief direction, averred with great positiveness that under his management the money to build the road would be promptly obtained, and that the work would be finished in a short time—as, indeed, it may with the money at command."

Gen'l Wickham, after being elected, offered the following resolutions, which were adopted:

Resolved, That the mortgage executed by the President and Treasurer of the company on the 1st day of October, 1868, under instructions from the board of directors, for the purpose of securing a loan of $10,000,000 (or two million pounds British sterling,) be and the same is hereby approved and ratified.

Resolved, That the contract entered into on the 31st day of August, 1868, between the Virginia Central Railroad Company and the commissioners of Virginia and West Virginia, for the construction of the railroad from Covington to the Ohio River, be and the same is hereby ratified.

The following gentlemen were elected directors of the company.

H. C. Cabell, Franklin Stearns, Horace L. Kent, John S. Mulford, Dr. Alexander Sharp and Chas. T. Wortham, of Richmond; John Wood, Jr., of Albemarle; John Echols, of Augusta; James G. Paxton, of Rockbridge; Dr. John G. Hunter, of Greenbrier, W. Va.; Alexander R. Humphries, of Monroe, W. Va.; John Slack, Jr., of Kanawha, W. Va.; H. C. Parsons, of Putnam, W. Va.; Jno. S. Witcher, of Lincoln, W. Va.

Pennsylvania Coal Trade.

The quantity of coal brought down by the Philadelphia and Reading Railroad for the week ending Nov. 30, amounted to 102,354 tons, and for the season 3,523,099, against 3,415,747 tons in the same time last year. The Schuylkill Navigation shipped for the week 33,299 tons, and for the season 946,615 tons, against 985,585 tons to the same time last year. The increased tonnage over the road is 107,352 tons, and the decrease of shipments by canal is 46,320 tons—giving a net increase from the region for the year of 61,032 tons. The entire coal tonnage from all the coal regions in the State during the week was 386,191 tons, and for year 12,954,136 tons, against 11,917,443 tons to the same date in 1867—an increase of 1,036,693 tons.

☞ SEVEN PER CENT. INTEREST IN GOLD.—The First Mortgage Seven per Cent. Sinking Fund Bonds of the Rockford, Rock Island and St. Louis Railroad Company, pay both Principal and Interest in GOLD COIN, FREE OF GOVERNMENT TAX.

Each Bond is for $1000 or $200 Sterling, and is convertible into stock at the option of the holder. The coupons are payable Feb. 1st and Aug. 1st, in New York or London, at the option of the holder.

The Road runs from Rockford in Northern Illinois to St. Louis, a distance including tracks to Coal Mines, &c., of about 400 miles, and traverses the finest district of Illinois.

The Bonds have 50 years to run, and are a lien of $21,000 per mile upon the Company's railroad franchises, its coal lands—of which it has 20,000 acres containing A HUNDRED MILLION TONS OF COAL—its rolling stock, and property of every sort.

A Subscription of $8,800,000, at par, to the Capital Stock of the Company, furnishes a large part of the means required to construct and equip the road.

Nearly half the entire length of the road is graded and substantially ready for the iron; the rails are now arriving upon the line. The first division, giving an outlet to the coal, will be in operation in 60 days, and track-laying will from this time be prosecuted with the utmost energy till the last rail is in position. The Company intend to have the whole road in readiness for the Autumn business of 1869.

The Bonds are for sale at 97½ and accrued interest in currency, and may be obtained through bankers and brokers throughout the country, or at the office of the Company, 12 WALL STREET, New York.

Governments and other securities received in exchange at market rates.

The Trustees for the Bondholders is the UNION TRUST COMPANY of New York.

Pamphlets giving full information sent on application.

H. H. BOODY, Treasurer.

☞ It is said by the officers of the company that the Manassas Railroad will be finished to Harrisonburg, Va., by the 7th of December.

Southwestern (Ga.) Railroad.

The earnings of this road for the year ending August 1, 1868, were from the following sources, viz:

Up freight through	$243,915 16
" way	195,643 15
Down freight through	129,369 38
" way	127,795 75
Up passage through	25,141 67
" way	18,153 63
Down passage through	88,605 83
" way	89,789 12
United States mail	2,130 60
	$920,544 29

Expenses, viz:

Repairs of road	$153,263 39	
" buildings	26,614 66	
Fuel and water	28,059 75	
Maintenance of motive power	111,369 59	
Maintenance of cars	89,982 68	
Transportation exp.	153,922 32	
Incidental expenses	13,345 43	
Annuity to City of Macon	1,250 00	
		577,807 82
Leaving net sum of		$342,836 47

Disposed of as follows:

Dividend 4 per cent. Feb. 13, 1868	$128,156 00
Interest on bonds	81,570 00
Tools and machinery	4,094 10
Macon depot	200 00
Construction	350 00
Appropriated for iron	35,000 00
Dividend 4 per cent. Aug. 13, 1868	128,436 00
Appropriated for revenue tax	6,759 79
Surplus	8,170 58
Total, as above	$342,736 47

Included in the above expenses are the following expenditures:

New cars purchased and built	$54,220 70
New freight locomotives	29,091 00
New brick warehouses at Fort Valley and Butler, and addition to office in Macon including fixtures for same	21,849 00
New iron cistern, stationary engine, etc.	3,350 00
	$108,510 70

This amount might very properly have been charged to motive power, cars and construction accounts, as these expenditures were for additional rolling stock, and permanent improvements, and is that much added to the value of the company's property; the actual current expenses would then amount to $469,297 12, and the net earnings of the company over actual current expenses would stand at $451,247 17, or about 49 per cent. of gross earnings.

A comparison of the earnings with those of the preceding year shows an increase in up freight of $118,371 20, with a decrease in down freight of $112,664 12, and a decrease in passage, mail, etc., of $92,115 99—making the total decrease in earnings, $86,408 91.

The number of miles of road in use during the year (being total length of road,) was 207½, against an average of 193 miles in the preceding year. The earnings per mile were: passenger and mails, $1,078 66; freight and miscellaneous, $3,357 70—total, $4,436 36. The current expenses per mile were $2,261 67, and the net earnings $2,174 69. Including permanent expenditures, the expenses were $2,784 62 per mile, and net earnings, $1,651 74. The gross earnings per mile run by engines, were $2 76.2; current expenses, $1 40.8; net earnings, $1 35.4. Including permanent expenses, $1 73.3, net earnings, $1 02.9.

The total number of bales of cotton transported during the year, was 232,343, of which 131,598 bales were from the South Western Railroad proper, and 100,745 from stations on Muscogee Railroad, Columbus and beyond. The number transported in 1867, was 137,696—a total increase of 94,647 bales. From the South Western Railroad to Macon there were 34,919 bales; from Columbus and Muscogee Railroad to Macon, 442 bales—total to Macon, 35,361, an increase of 11,110 bales.

The number of through passengers for the year was 9,853; way passengers, 85,021—total, 94,874, being an average per day of 268, against 300 in 1867, and 317 in 1866. Total number of passengers carried over the road since it was opened in July, 1851, 2,225,618.

The company have 26 locomotives, of which 18 are in good order, 2 want repairs, 2 want new tire, 2 are in shop for repairs, and 2 have been condemned. Since August, 1867, four new first class freight locomotives have been purchased—two from the Rogers Locomotive and Machine Works, Paterson, N. J., and two from M. Baird & Co., Philadelphia. These engines are now on the road and are doing good service.

There have been received during the year 756 tons of T rail, weighing 43 lbs. per yard, purchased in England through Messrs. Paddelford & Cope, of Savannah. 600 tons were received in August, 1867, of which 200 tons were sold to the Central road, and 100 tons to the Muscogee road; and in May, 1868, 756 tons, of which 300 tons were sold to the Central road—leaving this company from both lots, 756 tons, or about 11 miles, most of which has been laid in the road.

There have been added to the rolling stock during the year, 18 box, 4 stock and 46 platform cars. The company now have 13 first class and 7 second class passenger and baggage cars, 5 baggage and mail, 1 express, 4 pay, 9 conductors, 188 box, 118 platform and 8 stock cars.

The number of miles run by passenger and mail trains, was 173,621; by freight and other trains, 159,681—total, 333,302 miles, an increase over the previous year of 26,967.

There have been built two commodious warehouses, one at Fort Valley, 40×125, at a cost of $9,241, and one at Butler, 35×85, at a cost of $6,391; also an andition of 32 feet to offices in Macon at a cost of $6,217. The warehouse at Butler has since been destroyed by fire, and about $3,000 will be required to rebuild it.

The road is represented by the Superintendent as being in fine order, as good as it ever was, except the iron, which of course is more worn than it was in 1860, and will require larger outlay for iron for renewal now than then. The President in his report says:

By an examination of the balance sheet of the Treasurer, you will find the bond account of the company amounting to $430,000. This is a decrease from last year of $7,000, owing to a conversion of that amount of bonds into the general stock of the company. The outstanding bonds of this company are convertible on their face, with the exception of $45,000, and as they only bear 7 per cent. interest, and the stock paying at least 8 per centum, it is reasonable to conclude that many others will be converted.

I regret to say that I cannot congratulate the planters of South Western Georgia on as flattering a prospect of cereal crops this year as last. The long and continued drought of about two months in many localities, has cut the crops of corn short, from one-third to one-half, and although at least twenty per cent. has been added to that particular crop in breadth of land, I doubt very much whether a sufficient quantity will be gathered for home consumption. The crop of cotton is liable to so many casualties, that we cannot speak or predict with any certainty, with regard to its yield, at the present writing. The area of land planted along the line of road, from the best information that we can obtain, is about twenty-five per cent. less this year than last; and notwithstanding the weed is of sufficient size, healthful looking and strong, should the incessant rains continue much longer, it will cast its forms and fruit, even should the worms not appear, that are so destructive in their operations.

In October last, a meeting of the stockholders of this company was called, in accordance with the charter of said company, for the purpose of considering the propriety of amalgamating the Muscogee and South Western roads, as provided for by an Act of the General Assembly of this State, approved March 4th, 1856. That Act requires two-thirds in amount of stock to form the union and consolidation of the two roads. As there was not a sufficient amount of stock represented at that meeting to form a quorum, no direct action was taken by the stockholders. A report was read, showing the condition of the Muscogee Railroad Company at that time, and alluded to an unsettled claim against said company, growing out of a disaster that happened at Randall's Creek, prior to the war, by which several persons were unfortunately drowned. There was also another account unsettled, between the City of Columbus and said company, with regard to the crossings of the river and making connections through said city.

Since that meeting these accounts have been adjusted, and your board after mature deliberation, believing it to be not only desirable, but to your interest, that the amalgamation should be effected on a just and equitable basis, and with as little delay as is practicable, has unanimously agreed to assume the liabilities of the Muscogee Rail-oad, receive all of its assets, and give its stockholders scrip of this company amounting to eighty-seven dollars and fifty cents per share, rating each share of the Muscogee Railroad Company at one hundred dollars per share—subject to your approval and concurrence. Knowing the difficulties that may intervene at a second called meeting, prohibiting a sufficient representation of stock, your board has deemed it practicable to issue circular letters addressed to the stockholders, setting forth their views in the premises, and asking their consideration of the subject. Should the action of the board meet your approval, you are requested to sign a response to said circular letter, and return the same to this office, to be used as an affirmative proxy at said meeting.

During the past winter an association was formed between the Atlantic and Gulf Railroad Company and a line of boats known as the Barnett Line, plying the Chattahoochee and Flint Rivers. In order to secure the business and transport the cotton, merchandise, etc., over that line, to and from Savannah, overtures were made to the merchants and citizens of Eufaula, Fort Gaines, etc., to reduce the price twenty-five per cent. less than was then charged by this company. As we had extended our road to the points above mentioned, we regarded the business of those places as belonging to us regularly and legitimately, and of course could not yield it without a struggle, basing our prices upon those of our competitors. Seeing and knowing the evil consequences that must result from such a policy, a conference was held in Savannah, on the 20th of January last, and an agreement entered into between all parties concerned, and stipulated rates of freight agreed upon. One clause in that agreement gave each party the privilege of annulling the contract by

giving the others thirty days' notice. During the following month notice was given this company by the Atlantic and Gulf Railroad Company, that at the end of thirty days we might consider the contract abrogated. Having no means of checkmating the operations of this line of boats along the lines of the two rivers, an agreement was consummated with Capt. Whitesides, the owner of two small steamers plying the Chattahoochee River, to run in connection with our road, which he has performed satisfactorily to us.

For the future protection of your interest, this company and the Central Railroad Company have agreed and purchased two first class river steamers, with iron hulls; and I am gratified to be able to state that they have arrived at Apalachicola without accident, and will be in readiness for the Fall trade. The cost of these two steamers delivered at Savannah, was fifty thousand dollars.

The following is a statement of receipts and disbursements of the funds of the South Western Railroad Company, to August 1st, 1868:

Receipts:

Received for capital stock, 32,109 shares		$3,210,900 00
Bond account issued for 20 years		324,000 00
Bond account issued for 10 years		55,000 00
Bond account issued for 20 years, endorsed		51,000 00
Fare tickets issued		4,337 50
Freight earnings since Aug. 1, 1867		715,882 10

Washington and its Railroad Facilities.

A correspondent of the N. Y. *Herald* reports a conversation recently had with Senator Sherman in reference to the removal of the National Capital from Washington owing to the inaccessibleness of that city by railroad. Mr. Sherman remarked—

"Yes; it is a matter of railroads. Washington is inaccessible through the action of the Baltimore and Ohio Railroad, which is a close monopoly. It is inconvenient and sometimes dangerous to get there, and unless the arrangement that enables the Baltimore and Ohio Railroad to make Washington a mere suburb of Baltimore is broken up, the Capital will be removed within five years. My own opinion is that Congress has power to regulate railroad lines above all State power. It is in the power given over commerce. 'Congress shall have power to regulate commerce with foreign nations and among the several States.' This is an important power, for the railroads are to be a wonderful element in our development. Already the value of the railroads in the United States is $1,600,000,000—sixteen hundred millions—but little less than the national debt, and their receipts are three times the interest of the debt. Any one of the four leading railroads transports property worth $150,000,000 per year. If it is doubtful whether Congress has the power to build new railroads, its authority to regulate those already built is clear. In taking hold of matters like this we must move cautiously, and with good precedent in view, though the tendency of the times is to a stronger central nationality. Unless Congress has this power there will be trouble about it by and by. Suppose, for instance, that Ohio should do what New Jersey actually does—declare that only one railroad shall cross her territory—she could dissolve the Union with this power, for all communication between the East and the West lies across her territory; to the South you must go to Kentucky, where there is a range of mountains that cannot be passed by a railroad, and to the North you must go to the lakes and take the chances of the water. This is too much power for any State to possess."

Lebanon Springs Railroad.

This railroad is now open from Bennington, Vt., to North Chatham, eight and a half miles from Chatham Four Corners. The road, when completed to Chatham Four Corners, will connect the Rutland and Burlington and Western Vermont railroads directly with the New York and Harlem railroad, thus forming a direct line to Lebanon, N. Y., Manchester, Vt., Burlington and Montreal.

☞ The South Side (L. I.) Railroad is now finished to Sayville, and trains will run through to that point hereafter. It is hoped before winter sets in that the road will be finished to Patchogue.

Morris and Essex Railroad.

We learn from the Newark (N. J.) papers that the negotiations which have for some time past been pending have finally culminated in an agreement of the proper authorities by which the Morris and Essex Railroad is to be leased in perpetuity to the Delaware, Lackawanna and Western Railroad Company. In taking the Morris and Essex Railroad, it is said, the Delaware, Lackawanna and Western Railroad Company agree to pay to its stockholders dividends of seven per cent. for five years, after which time eight per cent. will be paid, and still more if the gross earnings of the roads reach a figure that the management think can easily be attained. The Newark *Journal* says—this will "settle the difficulties with the Sussex road on account of its drawback; as the Delaware and Lackawanna directors own that road also, and are making additions to it of much importance. It is expected that the transfer will take place on the first of January. This will make necessary the completion of the double track to Easton and the laying of an additional rail to accommodate the six foot gauge of the Delaware, Lackawanna and Western, which will join the Morris and Essex at Washington, in Warren County, or near there." The *Advertiser* says—the Delaware, Lackawanna and Western "is now a powerful company, owning large tracts of coal lands as well as railways, and holds a controlling influence in the anthracite coal business. It is managed by the most sagacious and successful financial men of New York. Their present outlet in this direction is by way of the New Jersey Central road to Elizabethport. By the new arrangement they will have a terminus on the Hudson River at Hoboken, immediately under their own control; and Newark, which is one of the largest coal consuming cities in the country, will have all the advantages that may arise from being directly on the line of transportation."

Rutland and Burlington Railroad First Mortgage Bonds.

The first hearing in the case of Cheever & Hart *vs.* Brichard & Page, for the foreclosure of the first mortgage on the Rutland and Burlington Railroad, took place last week before Chancellor Pierpont of Vermont, the testimony having previously been taken before a Master in Chancery. At the opening a motion to refer the whole matter to a Master in Chancery was denied, and it went to trial on its merits. The trial will occupy about a fortnight, and is considered one of the most important ever entered in the courts of Vermont. There are nineteen lawyers engaged in the case, among whom are Geo. W. Baldwin, John S. Eldredge and George O. Shattuck of Boston.

☞ The survey of the Frederick and Pennsylvania Line Railroad has just been finished, and the road will be put under contract immediately. A preliminary survey of the Frederick and Williamsport Railroad is also about to be made.

☞ Simsbury, Ct., has voted, in town meeting, to subscribe five per cent. on its "grand list" to the stock of the Connecticut Western Railroad, about $50,000.

☞ The trains on the European and North American Railway have begun to make regular trips as far as Olamon.

Hudson's Bay—Past, Present and Future.

We continue, from page 1173, our extracts from the work of Mr. Thomas Rawlings on the position and prospect of this undertaking:

Father De Smet, a devoted Jesuit missionary to the Indians of Oregon (mentioned by Governor Stevens in an address before the New York Geographical Society, as "a man whose name is a tower of strength and faith,") thus describes what he calls "the vast plain—the ocean of prairies:"

"The entire region in the vicinity of the eastern chain of the Rocky Mountains, serving as their base for thirty or sixty miles, is extremely fertile, abounding in forests, plains, prairies, lakes, streams, and mineral springs. The rivers and streams are innumerable, and on every side offer situations favorable for the construction of mills. The northern and southern branches of the Saskatchewan water the district I have traversed for a distance of about 300 miles. Forests of pine, cypress, thorn, poplar, and aspen trees, as well as others of different kinds, occupy a large portion of it, covering the declivities of the mountains and banks of the rivers. These originally take their rise in the highest chains, whence they issue in every direction, like so many veins. The beds and sides of these rivers are pebbly, and their course rapid, but as they recede from the mountains they widen, and the currents lose something of their impetuosity. Their waters are usually very clear. The country would be capable of supporting a large population, and the soil is favorable for the production of barley, corn, potatoes, and beans, which grow here as well as in the more southern countries. Are these vast and innumerable fields of hay for ever destined to be consumed by fire or perish in the autumnal snows? How long shall these superb forests be the haunts of wild beasts? And these inexhaustible quarries—these abundant mines of coal, lead, sulphur, iron, copper, and saltpetre—can it be that they are doomed to remain for ever inactive? Not so. The day will come when some laboring hand will give them value; a strong, active, and enterprising people are destined to fill this spacious void. The wild beasts will, ere long, give place to our domestic animals; flocks and herds will graze in the beautiful meadows that border the numberless mountains, hills, valleys, and plains of this extensive region."

Professor Henry Youle Hind, in speaking of the natural advantages of the basin of Lake Winnipeg for a route across the continent, says—"It is impossible to examine a correct map of the North American continent without being impressed with the remarkable influence which the Great American Desert must exercise upon the future of the United States and British North America. The general character of this desert south of the forty-ninth parallel is described elsewhere, and the important fact has been noticed that any railroad constructed within the limits of the United States must pass for a distance of 1,200 miles west of the Mississippi through uncultivable land, or, in other words, a comparative desert. Along the thirty-second parallel the breadth of this desert is least, and the detached areas of fertile soil greatest in quantity; but the aggregate number of square miles of cultivable land amounts only to 2,300 in a distance of 1,210 miles. The northern limit of the Great American Desert is an imaginary line drawn from the Touchwood Hills to the Moose Woods on the south branch, then south of Battle River as far as longitude 112 deg., when, turning south, it sweeps along the flanks of the Rocky Mountains in longitude 115 deg. North of this limit of the Great American Desert there is a broad strip of fertile country, rich in water, woods, and pasturage, drained by the North Saskatchewan and some of its affluents, and being a continuation of the fertile prairies of Red River, the eastern watershed of the Assiniboine and Red Deer River, with the outlying patches called the Touchwood Hills, File Hill, &c.

"It is a physical reality of the highest importance to the interests of British North America, that this continuous belt can be settled and cultivated from a few miles west of the Lake of the Woods to the passes of the Rocky Mountains, and any line of communication, whether by wagon road or railroad, passing through it will eventually enjoy the great advantage of being fed by an agricultural population from one extremity to the other."

We have been particular to quote the descriptions of this "Fertile Belt," because when we come to the consideration of a railroad from the Atlantic to the Pacific Oceans, the importance of this testimony in relation to this magnificent country will then be perceived.

Gold has of late been discovered in the banks of the River Saskatchewan, near the foot of the Rocky Mountains. News received as late as December, 1864, states men are gathering as much as 4*l.* per day. Copper and malachite exist in the region of Coppermine River; plumbago, iron, and mineral pitch have been found on Lake Athabasca; salt has been found in a very pure state near Great Slave Lake, as well as salt springs on the borders of Lake Manitoba and Winnipegosis; limestone occurs at Red River and Lake Winnipeg; granite is found in inexhaustible quantities between Lake Winnipeg, Lake Superior, and Hudson's Bay; coal has been discovered on the Assouri River, near Edmonton, and also on Red Deer River.

The principal trees which abound are the balsam, the poplar, and the aspen, and are the common trees of the plain country; there is also, in limited quantities, the white spruce, the American larch, the fir, bank pine, white or bass wood, the sugar maple, spruce tree, the ash, the oak, as far as Red River and Lake Manitobas. But the Rocky Mountains are covered with a luxury and splendor of timber growth sufficient to supply the wants of the valleys at her feet for centuries. If the vast tracts of prairie land teem with verdant grasses which preclude the forest's growth, the watercourses can carry into all its river ramifications timber of every variety.

Grass is everywhere, spreading in fields of natural verdure that would gladden the eye of any agriculturist. When we think of the millions of buffaloes that year after year find pasture sufficient for their wants, we may imagine what herds of cattle and horses could subsist upon the nutritious grasses and vetches that abound on the plains and the numerous swamps.

Berries and roots are abundant and various, and include the cranberry, sasketoom, pembina, currant (black and red), gooseberry, raspberry, and strawberry. Wild rice is plentiful, the prairie turnip peculiar to Hudson's Bay, besides numerous roots used for medicinal and dyeing purposes.

The various fur-bearing animals we have previously specified, and will therefore add those which are used for purposes of food and usefulness: The bear, reindeer, moose, muskrat, porcupine, beaver, hare, musk ox, buffalo, antelope, big horn, and mountain goat, and the wapeti.

The principal fish are the white fish (a delicious fish, and found in all the lakes,) the sturgeon, pike, gold-eyes, trout, cat-fish, suckers, &c.

The seal, the waburs, the white bear, and the white tortoise, called the "white whale," frequent Hudson's Bay and Straits.

The Red River settlement was originally projected by Lord Selkirk, a Scottish nobleman largely interested in the Hudson's Bay Company, who held a vast extent of land by charter from the British Crown. Of the company he made an extensive purchase, and brought over his first colonists in 1813, and remained with them twelve months. Another accession was made in 1817, and another in 1828; and they now number, in Europeans, French Canadians, and half breeds, about 10,000 souls. One-half the population are hunters, and the other half farmers. The main settlement, known as "Red River," is about 60 miles north of Pembina, or down the river, and is on an extensive plain, which extends, somewhat broken and interspersed with timber, east to Lake Winnipeg. The hunters, mostly half breeds, do nothing but hunt buffalo. They make two grand excursions each year; one commencing on 20th June, and lasting two months, and the other on 10th September, and lasting till 10th November. The hunters lead a free, happy, wild, romantic life, and are, when in the settlement, temperate and well-behaved.

The farmers raise wheat, oats, barley, potatoes, cattle, and sheep. Turnips, onions, peas, cabbage, rhubarb, radishes, mangel, hops, pumpkins, and melons grow in abundance. In 1856 there were 922 houses, 1,232 stables, 899 barns, 1,503 horses, 1,296 mares, 2,796 oxen, 290 bulls, 3,593 cows, 2,644 calves, 4,674 pigs, 2,429 sheep, 585 ploughs, 730 harrows, 2,045 carts, 522 canoes, 55 boats, 8,347 acres of cultivated land; number of acres in 1864, 22,000.

Oxen are worth from $60 to $100 a yoke; cows from $15 to $20; a good cart-horse, $80; and a horse trained to hunt buffalo will bring $150 to $200.

Their wheat is equal to any in the world, weighing from 65lb. to 70lb. to the bushel; barley and oats are also heavy, and potatoes and all kinds of garden vegetables grow luxuriantly. The land is never manured. From 3½ to 4 feet of snow falls in winter, and rain is unknown from November to April.

They originally received their supplies of merchandise from York Factory, a store of the Hudson's Bay, 700 miles from Red River. It required two months to make the journey, and there were thirty-six portages (carrying places) to be made in going that distance. The title of the settlement is "The Red River Colony," and it is ruled by a Governor appointed by the Queen. The magistrates, councillors, and officers receive their commissions from the committee of the Hudson's Bay. The jurisdiction of the Governor extends 100 miles in all directions from Fort Garry, except over the American line.

The census of 1856 shows the fruit of its recent intercourse with the new American settlements in Minnesota, in the introduction of new agricultural machinery: 8 thrashing machines, 3 steam saw mills, 2 reaping machines, 1 carding machine, 800 harrows, 2,000 carts, 500 ploughs, 2 steam ploughs, and 56 merchant shops. Its rapidly increasing intercourse with an American market has developed a spirit of enterprise among the people, new forms of industry, and a growing demand for American commodities.

Trade must find its natural outlet and agriculture demands its most advantageous markets. We cannot well force commerce through unnatural currents, and we cannot for ever shut out the solid cohorts of advancing emigrants when they are thundering at our gates for a passage to lands inviting them by their extent, their accessibility, and their richness. It is better to open the gates willingly—better to guide than to be jostled by the throng. The splendid landscapes of the Assiniboine that adorn the great picture gallery of nature cannot be closed for ever. The measureless prairies that stretch in vast waves of beauty from the Lake of the Woods to the base of the Rocky Mountains, redolent and gorgeous with the richest profusion of rose bushes, bluebells, woodbine, convolvulus, helianthii, and thousands of nameless and delicate flowers, tell the beholder the wealth of soil that supports them in their entangled and untrained luxuriance of variety and numbers. The thousands of small lakes—sweet eyes of earth—that dot the valleys, invite him with their clear waters and fisheries; the rivers that spread, interlace, and ramify for thousands of miles, tell of a well-watered soil. The yellow sand of the Saskatchewan, made brilliant by the noonday sun, flashes and sparkles with auriferous wealth; the dark black seams that crumble beneath his tread are signs of coal that tell him his hearth shall glow with a genial warmth that shall bid defiance to the external frost. The stately elms, the graceful ash and bending willow, the grand spreading oak, and the ever-verdant pine, that fringe the prairies, gather in assemblies, and crowd so close upon the mountains that their leaves, limbs, and trunks shoulder and jostle each other in progressive development, tell him there

is labor for the forester, the lumberer, and the builder. Granite, as compact and strong as that on which the pyramids of Egypt rest, is scattered in numerous quarries throughout this great province. Game, such as the buffalo, swarm over the plains, while the stately cariboo, the prowling bear, the wily fox, the pretty mink, the busy otter, the nimble squirrel, and the scented rat are swarming through the forest, and by lake and river. Of birds, there is the majestic eagle and the blue-winged jay, the murderous hawk, and the little jewelled humming-bird; together with duck and pigeon, sandpiper and cherry bird, loom and partridge, magpie and blackcap, nightingale and swallow, grouse and snipe, kingfisher and plover. Here experiments have been carried on for fifty years, and here we find corn, and wheat, and fruit, and vegetable thrive in a remarkable manner, and where wheat can be grown "for twenty years in succession." But all this land has been shut from the knowledge of the world. A new era is at hand. The people of the Atlantic are wooing the people of the Pacific; they would be united by an iron band. The great North-east invites British Columbia to share her future with her, and to march forward hand in hand with her; to send her the tributes of the Pacific—the gold of Vancouver, Australia, California and Columbia—and the spices, silks, and teas of India, China and Japan; while from across the Atlantic will come an endless variety of exchanges.

Gentlemen of the Hudson's Bay, you have possessed for two centuries a splendid monopoly. We are not of those who wholly condemn the manner in which you have administered the power delegated to you; on the contrary, a careful knowledge of the history and results of your rule prove, that your affairs have been administered with much ability, discretion, and judgment. Your labors have been prosperous to an unparalleled degree, and the amicable manner in which you, and those under your authority, have conducted your relations with the Indians, and to which they bear testimony, for so lengthened a period, certainly is in the highest degree creditable to you when contrasted with the exterminating warfare which has characterised the relations of the United States Government with them. It cannot be expected that a monopoly so entire should be carried on without producing many animosities, and that acts have not been committed which appear unwise, impolitic, and arbitrary. It would be unreasonable to suppose that you are so devoid of self-interest as to be willing to give up a power so long possessed and providing such a splendid interest on the capital employed, or that you are willing to forego any right you may possess for the general good. When merchants place their surplus profits in a joint stock company they do so for the purpose of securing continued and safe interest. Now, the cry against the Hudson's Bay is, that locked in the valleys of the Assiniboine, and Saskatchewan, there is 65,000 square miles of cultivable land, of which 27,000 square miles, or 17,000,000 acres, is at once available for the agriculturist; and this land is black with richness. The whole of your land is 150,000 square miles. The principal means from which you derive your income at present is the fur trade. In the year 1864 the sales of furs in London amounted to 262,869*l.*; but the public believe that there are many other sources of supply to swell the dividends. As the operations of the company have not been published as widely as those of many joint-stock companies of London, we have taken the latest statement which we have received previous to the abridgement of the company's power over Vancouver's Island and British Columbia. On June 1, 1856, the capital of the Hudson's Bay was as follows:

Amount of assets	£1,468,301
Amount of liabilities	203,233
Capital	£1,265,067

Consisting of—

Stock standing in the names of the proprietors	£500,000
Valuation of the company's lands and buildings, exclusive of Vancover's Island and Oregon	318,884
Amount expended up to 16th September 1856 in sending miners and laborers to Vancouver's Island, in the coal mines, and other objects of colonisation, exclusive of the trading establishments of the company, and which amount will be repayable by Government, if possession of the island is resumed	87,071
Amount invested in Fort Victoria, and other establishments and posts in Vancouver's Island, estimated at	75,000
Amount paid to the Earl of Selkirk for Red River settlement	84,111
Property and investments in the territory of Orgeon, ceded to the United States by the treaty of 1846, and which are secured to the company as possessory rights under that treaty, $1,000,000	200,000
Total	£1,265,067

Now we must deduct all interests in Vancouver's Island which are in direct possession of the British Government.

Let us take away the whole of the 17,000,000 acres of available land; the fur trade would suffer but very little. Suppose that, instead of allowing the whole of the Indians to subsist by trapping and hunting, one-half were taught the first elements of agriculture and located at various points on a given line, which leads from Pembina to the Rocky Mountains. It is all nonesense to say we cannot civilise the savage. Give him the implements and the seeds, set over him or them an overseer to guide, direct, and teach them, and keep away the curse of rum, and there will be no difficulty in civilising them. They farm well enough at Red River, and, be assured, when they are convinced that by proper attention and a certain amount of labor they may provide comforts for the long winter, the revolution will be complete. For the other half there is employment beyond the prairies. The fur bearing animals are not found in great numbers or variety here; therefore we maintain that the cultivation of this district would not materially affect the fur trade. There are regions adapted for fur-bearing animals and not adaptable for purposes of agriculture; the land of the Ojibways east and north of Lake Winnipeg, Winnepeg River, and Rainy River, and away to Labrador and Hudson's Bay; all the land north of 55 deg; the land of the Black Foot Indians, a portion of the Assiniboine Indian's land, and the Rocky Mountains. "Give us a market for our cattle and we can raise incalculable numbers,"—so say the people of the Red River Settlement.

The *Nor'-Wester*, a newspaper published for the first time at the Red River Settlement on the 28th December 1859, mentions Mr. Gowler's success as an agriculturist in the following terms: "He sowed 63 bushels of wheat, 36 of barley, 24 of oats, and 101 of potatoes, and from these he realised 700 of wheat, 350 of barley, 480 of oats, and 2,100 of potatoes. The cost of the seed was 50*l.*; in preparing and tilling the soil about 25*l.* more were expended; and the cost of gathering in and threshing the crops is set down at 100*l.*—making a total expenditure of 175*l.* Place against that the sums representing the sale of wheat at 6s., and the barley at 3s. 9d., the oats at 2s. 6d., and the potatoes at 1s. 3d. per bushel (average price which the produce will easily command), and an argument more strong and convincing than could be wrought out by any other process of reasoning, stands stubbornly forth in favor of the claims of the settlement as being one of the best agricultural countries on the face of the globe. It should be added that Mr. Gowler's profit have already enabled him to enlarge the bounds of his estate to 600 acres, to stock it with a noble herd of cattle and horses, and to make the necessary preparations for erecting thereon, next summer, a snug and comfortable mansion."

Imagine the value of 20,000,000 acres of rich land ready for cultivation thrown into the market. When the lands in Connecticut and New York reached 10*l.* in value, the people moved westward to Michigan and Ohio; when, in a few years, lands which had cost 10s an acre increased to 10*l.*, they moved to Wisconsin and Illinois, and bought lands as low as 5s sterling an acre. Then lands increased here to 2,000 per cent. over their original price. Then Iowa and Minnesota soon came into the market, and these lands are being rapidly taken up, and their value has increased in marvellous ratio.

Westward is the movement towards the Pacific beyond the Mississippi; the arid districts of the Upper Missouri are barren tracts, wholly uncultivatable; the coming exodus of people will soon overrun Minnesota, and seek the rich lands of the "Fertile Belt." Who shall stop them? The splendid and complicated system of the Hudson's Bay is admirably adapted to map out this vast tract; the army of servants who obey their behests could soon survey every part. Before long, the rumbling of wheels, and the whistle of the advancing locomotive, will be heard at Pembina; the great bodies of emigrants who seek the gold-fields of the Pacific and the Saskatchewan are coming with their long trains. Surely it is time for the company to awake; the great modern revolutioniser is near them—the iron bands are waiting to span the prairies. But it is said the Rocky Mountains are an insuperable obstacles to a railroad.

Can it be supposed that a people who have tunnelled the Alps and the Thames; who have arched the Loire and the Seine a hundred times; who have united the shores of the St. Lawrence, and crossed its mighty current with two miles of iron tubing; who have leaped yawning chasms at a bound; who have, amidst discouragement, difficulty, doubt, and fatigue, but with iron will, constructed in this age 100,000 miles of railroads across prairies—by the side of yawning precipices—overlooking miles upon miles of cities and towns—ascending peak after peak, and descending awful slopes—now sweeping in graceful curves by the side of rushing rivers, then rumbling over the tops of houses whose dwellers lived in security—off again into the daisied and cowslipped fields—speeding through umbrageous forests that formed an avenue o'ertopped and arched with foilage—leaping rivers innumerable, on its iron supports—pushed beneath the hills, which towered above hundreds of feet—till once again the shrill whistle announced a stoppage to its progress; the people who have erected palaces of glass and iron; who have built ships as large as the ark; who can build ships impervious to cannon balls, and lay a cable beneath the ocean 3,000 miles wide, are not going to stop or halt at the oot of the Rocky Mountains because those mountains are tall. They are going over them, up them, or down them—around their sides, across their passes, or through them or under them'; but iron rails must be wedded to iron rails from one side of the slope to the other—and once wedded, there will be no divorce. Every nerve should be strained, every influence used, and every desire of the company should be, to open a track for the emigrant. The ultimate value of their possessions, once under the sway of agriculture, no figures could calculate.

☞ The Columbia and Augusta Railroad has been finished from Columbia to Graniteville, ten miles from Augusta, where it connects with the South Carolina Railroad. Trains ran through on the 30th ult.

☞ The Ninevah tunnel of the Albany and Susquehanna Railroad, a few miles northeast of Binghamton, is so far completed that a locomotive was run through it on the 30th ult. The track will soon be completed to Binghamton.

RAILROAD AND CANAL DIVIDEND STATEMENT.

American Railroad Journal.

Saturday, December 5, 1868.

Stock Exchange and Money Market.

The week has been characterized by general ease in the money line. There has been a steady influx of currency reported, which has made itself felt on the City bank and the Sub-Treasury weekly returns, both of which have been favorable, in so far as they have indicated an increase of the cash reserves at this point. The banks gained $3,308,495 in the deposit line, leading them into an expansion of $3,294,994 in their loan and discount averages. Their deposits are now up to $187,418,835, against $175,150,589 two weeks ago, showing an increase of about 12¼ millions. Their loan and discount averages are $254,386,057, against $249,119,539 on the 14th of November, showing an expansion of a little over four millions. The banks now hold $62,440,206 of legal tender, or $1,159,738 less than last week, and $15,786,277 of specie, against $17,333,153 last week, and $9,186,620 on the 17th of October, seven weeks ago. The U. S. Sub-Treasury added over 2½ millions to its cash balances last week, closing the month of November with a cash reserve of $86,077,866, against $91,999,615 at the close of October. The demand for accommodation from speculative sources all the week has been fairly active and has been readily met at from 4@7, generally at 6@7 per cent. on call. There has been more inquiry from mercantile borrowers, which has been responded to more promptly by the banks, as well as by private lenders, within a range of from 7@9 per cent. per annum, on prime to good business paper.

The specie reserve of the city banks is now $15,786,277, against $16,572,890 same time last year. The city bank deposits are now $187,418,835, against $175,686,233 week ending Nov. 23, 1867. The legal tender reserve amounts to $62,440,206, against $52,098,132 same time last year. The circulation now stands at $34,284,563, against $24,089,792 same time last year. The loans are now $254,386,057, against $247,815,509 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $102,590,560 a day, against a daily average of $144,185,333 the preceding week, and $134,636,424 the week ending with Nov. 12, 1868. The current week's exchanges average about $112,500,000 a day. The city banks, last week, lost $1,546,876 of specie, while they gained $3,308,495 of deposits, and lost $1,159,738 of legal tender notes. They increased their loans, $3,294,994; and their circulation, $89,495.

The New York Gold Exchange Bank reports for the week ending Saturday, the 28th day of November, 1868, the average amount of loans and discounts as $1,361,633; average amount of specie, $851,256; average amount of deposits, $1,726,752.

National Bank notes to the amount of $132,680 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $310,855,976, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $11,019,407, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,835,569. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $345,544,600; and for the public deposits, $37,948,350—making a total of $383,492,950. The Treasury Department last week redeemed and destroyed $269,000 of worn and mutilated fractional currency, and issued $454,589 of new. The outstanding amount of fractional currency on the 1st of November, was $33,413,985, against $32,933,614 on the 1st of October, 1868.

The U. S. Sub-Treasury receipts, week ending with Nov. 28, were $12,244,992, including $1,709,630 from customs duties; payments, $9,681,961, including $1,512,000 of coin interest; balance at the close of the week, $89,132,854, against $86,569,823, at the close of the preceding week, showing an increase of $2,563,030. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,913,504 including $278,817 from customs; and payments, $4,968,492, including $315,000 of coin interest; on Tuesday, receipts $2,298,287 including $271,000 from customs, and payments, $1,437,496, including $397,000 of coin interest. The balance at the close of business on Tuesday stood at $87,568,657, against $86,259,666 a week previous; and $83,658,776, on Nov. 11, 1868. The

aggregate receipts of the office from all sources in November, were $64,306,032; aggregate payments, $70,227,813. The balance on the 1st of December was $86,077,866, or nearly six millions less than on the 1st of November, which amounted to $91,999,615.

The outstanding amount of coin certificates on the 1st of Nov., was $19,716,840, against $20,236,400 on the 1st of Oct., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,842,000, and retired $1,607,620 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during November, reached $7,658,840.

Government revenues continue on a restricted scale. The excises are yielding very meagrely. The customs returns are up to a moderate average. The excises last week, yielded about $2,400,000; customs at the port of New York, $1,709,620, and at the outports about $580,000 (in coin) more, making the grand total income for the week equal to about $4,140,987 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $61,000,000, according to the latest Washington advices.

Gold has been moderately, during the week. The demand has been almost wholly speculative, the customs and export inquiry having been comparatively light. The range of the price has been from 134¾@135⅞, and the closing figures on Wednesday were 135⅛. Government completed the marketing of its previously advertised half a million a day, on Monday of the current week. On Tuesday, it commenced to sell a fresh lot of 1½ millions to the highest bidders at the rate of $300,000 a day. The first award of $300,000 made on Tuesday at $135\frac{05}{100}$@$135\frac{10}{100}$. The award on Wednesday was made at 134¾ net. On Tuesday, there were $48,000 of specie exported. On Wednesday, the exports were unimportant. The general market closed firmly, but with little animation.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,634,163, against $3,028,228 same time last year. The customs demand for Gold last week, averaged $341,924 a day; thus far, this week, it has been equal to $275,000 a day, or equal to a weekly aggregate of $1,650,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $57,184 and from California, $198,666. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $109,598,433, against $111,510,400 same time in 1867. At the port of San Francisco, $7,278,835, against $6,635,273 last year.

The total receipts of California gold at this port, since Jan. 1, 1868, have been $33,782,705, against $25,490,634 in 1867, showing an increase thus far in 1868, of $8,292,171. The exports of specie, from this port, last week, were $642,105, against $337,195 same week last year; total, since Jan. 1, 1868, $69,123,685, against $45,060,999 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,512,000; since Jan. 1, 1868, $80,134,609, against $60,432,595 same time in 1867. The specie exports from San Francisco, from Jan. 1, to Nov. 5, were $31,239,951, against $34,766,342 same time last year.

Customs duties at this port in November yielded $7,638,888; November, 1867, $7,302,934.

Foreign Exchange has been in very moderate demand, and quoted a fraction cheaper, closing tamely. Bankers' prime sixty day bills on London closed on Wednesday at 109⅛@109⅜, and on Paris to 5.20c.@5.16¼; sight bills on London to 109⅝@109⅞, and on Paris to 5.15c.@5.13⅛. The offering of produce bills has been more fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,269,207, against $3,957,208, same week last year; total, since Jan. 1, 1868, $152,871,364, against $175,050,821 in 1867.

Government securities have been in more demand on investment account, though less freely dealt in by speculative operators. The 1862 Five-twenties have been comparatively dull, since the subsidence of the excitement, growing out of the speculative transactions, referred to in our last. There has been a very respectable purchasing demand for U. S. Sixes of 1881, Five-Twenties of 1867, and Ten-forties, on Cuban account. The later issues of the Five-twenties have been in most request for home investment purposes, and prices of these have been very well supported, on much reduced offerings of bonds. Public confidence in the National funds has been steadily reviving since the greenback redemption theory was disposed of permanently at the November election. Congress, it is believed, will re-affirm in a formal way, the popular decision that all the funded obligations of the Government shall be liquidated, when they shall have matured, in coin, according to the repeated declarations of the several Secretaries of the Treasury, since the contraction of the debt. Foreign buyers as well as home purchasers are acting on this view of the financial situation, as far as relates to the public credit, and are taking the National bonds more confidently, for hoarding purposes. The general market closed firmly and buoyantly, as a rule.

U. S. sixes of 1881 closed here on Wednesday at 114⅝@114⅞; U. S. Five-twenties of 1862, 110¾@110⅞; U. S. Five twenties of 1864 at 107⅛@107¼; U. S. Five-twenties of 1865 at 107⅜@107⅝; U. S. Five-twenties of 1865, consolidated, 110⅛@110¼; U. S. Five-twenties of 1867, 110¼@110½; U. S. Five-twenties of 1868, 110½; U. S. Ten-forties at 105@105⅛; U. S. Six per cent. currency bonds, 99@99½.

The Stock Boards have adopted a new rule, whereby all dealings are to cease after the 30th of January, 1869—sixty days hence—in all Railway and other Stocks, not duly registered and countersigned by some respectable Trust Company or Banking concern in this city. The rule further requires that at least 30 days' public notice, or notice to the President of the Exchange Board, shall be given by railway or other corporations, of their intention to increase their Share Capital or their bonds convertible into such capital.

Railway and miscellaneous stocks have been much less active, less excited, and generally more uniform in price. The closing transactions indicated some revival of bouyancy, especially in New York Central, in anticipation of an early scrip dividend. Express stocks have been more variable in price, closing weak and irregular. A consolidation of the American and Merchants' Union Express Companies has been effected, the consolidated organization to be known as the American Merchants' Union Express Company, under the Presidency of Mr. Fargo, and with an aggregate capital of eighteen millions. The Merchants' Union stock was valued at the rate of two shares for one. An additional assessment it is said will be exacted of the Merchants' Union stockholders.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 18.	Nov. 25.	Dec. 2.
Consols	94⅛	94⅜	*92⅝
U. S. 5-20's of 1862	74⅛	75	74½
Erie	31½	26¾	27
Ill. Central	96	96	96

* Ex-dividend.

General business has been on a restricted scale in domestic produce at easier price for Breadstuffs and Provisions. Middling upland cotton however, closed buoyantly on Wednesday at 25¼@25½ cents per lb. The stock of cotton now here is estimated at about 27,500 bales. The receipts at the port this week, have averaged about 3,000 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 602,000 bales, against 443,000 bales same time last year; exports, same time 271,000 bales, against 187,000 bales same time last year; stock on hand at latest dates, 208,000 bales, against 221,000 bales same date last year. Total crops of 1867-'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 22,042 pkgs., against 12,039 pkgs., same time last year. At the Live Stock market, this week, Beeves have been fairly active at from 8@16½c. per lb.; week's receipts, 5,613. Veal calves at 9@12c. per lb.; receipts, 1,222. Sheep and lambs quiet at 4@6, and 6½@7½c. respectively, per lb.; receipts, 30,261. Swine dull and heavy at 7@7¾c. per lb.; all live weight; receipts, 24,352 Foreign merchandise has been less active and quoted less firm. The total imports of foreign dry goods, last week, were $1,244,543, and the total amount marketed $1,221,283. The value of foreign merchandise imported last week, was $4,075,950—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,320,493, against $2,404,701 same week last year; from Jan. 1, 1868, $228,103.117, against $224,078,747 same time in 1867. The ocean freight market has been less active lower and irregular. For Liverpool we quote flour at 2s. 3d.@2s. 6d. by sail, and 3s. 3d @3s. 9d. by steamer, per bbl.; grain at 6d. @6½d. by sail, and 6¾d.@8d. by steamer, per bushel; cotton at $\frac{5}{16}$d.@$\frac{3}{8}$d. by sail, and ½@¾d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 35s.@50s. steamer, per ton. Total number of vessels in port on Wednesday, 536.

The New York exports, exclusive of specie, for the week ending Dec. 1, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,957,208	$4,269,207
Prev. reported	171,093,613	148,602,157
Since January 1	$175,050,821	$152,871,364

The imports for the week ending November 28, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$703,761	$1,244,543
Gen. merchandise.....	1,700,940	4,075,950
Total for the week.....	$2,404,701	$5,320,493
Previously reported....	221,674,046	222,782,624
Since January 1.....	$224,078,747	$228,103,117

The balance in the Sub-Treasury on Wednesday was $87,989,772 83.

BANKING AND FINANCIAL.

☞ IMPORTANT TO CAPITALISTS, CORPORATIONS, &c.—Thirty-year SIX PER CENT. U. S. Currency Bonds.—These securities are the unconditional obligations of the Government, and constitute part of the funded debt of the United States. They have thirty years to run, and bear six per cent. interest, lawful money. The whole amount authorized by Act of Congress is sixty millions, whereof forty-four millions, ($44,140,000) have already been delivered to the Pacific Railroad Companies, and are mainly held for long investments by Trustees and Moneyed Corporations, and by the Banking Department of the Treasury as security for circulation. Only sixteen millions remain to be issued, and after these are absorbed and the loan closed, the bonds will rarely be offered in the market. As these will be the only six per cent. bonds of the Government, having more than twenty years to run, their prospective value is enhanced correspondingly. Banking, Savings, Insurance, and other Companies, and Trustees and Capitalists may secure a portion of the remainder of the Loan on favorable terms on application to

FISK & HATCH,
Bankers and dealers in Government Securities,
No. 5 Nassau street.

Vermont Central Railroad.

The adjourned meeting of the first mortgage bondholders was held in Boston on the 24th ult. The annual report of the Trustees, which was read, gives the receipts from the business of the road from May 31, 1867, to May 31, 1868, as $1,788,406 35; expenditures $1,275,100 33; net earnings $513,306 02. The receipts from all sources during the year amounted to $2,352,593 17; expenditures $2,155,659 86; cash on hand $196,933 31. About 36 miles of new iron have been laid during the year, and 10 miles of sidings, with about 130,000 cross-ties. The experiment of the use of steel rails has been tried to the extent of 100 tons and has resulted very satisfactorily, although the managers have not yet been convinced that with the present rates of gold they are economical when compared with iron. There have been added to the rolling stock, 5 locomotives, 6 passenger and 150 freight cars. The business of the road has steadily increased; the tonnage exceeding that of the previous year some 50,000 tons, and from May to November of the present year it has increased 40,000 tons. The affairs of the road are represented to be in a very satisfactory condition. Messrs. J. M. Pinkerton and Otis Drury were chosen from the first mortgage bondholders, and Mr. Wm. J. Caner, of Philadelphia, on the part of the second mortgage bondholders to form a Joint Advisory Committe

From the Portland Argus.

A Railroad to Ogdensburg.

The exact distance from Portland to Meredith village on the line of the Boston, Concord and Montreal Railroad is less than 60 miles. By the surveys which have just been completed, the distance will be 73 miles by rail, running by the way of Standish village, Steep Falls, to Cornish and through the Ossipee valley to the line of Tamworth and thence through Moultonboro and Center Harbor to Meredith village. If eight miles of the Portland and Rochester road are made use of as far as East Gorham, this will reduce the miles of line to be built to 65. The most expensive portion of the route is that from Meredith village to Tamworth, surveyed by Mr. Leonard is 1847, who surveyed the Conway and Meredith Railroad, the cost of which he estimated at $13,151 per mile, using a 50 pound rail valued at $60 per ton. A heavier iron would probably be required and the superstructure would cost $10,000 per mile in room of $6,017 59, which Mr. Leonard estimated as the cost of the superstructure per mile in 1847. His other prices are not much below the present prices paid for railroad work.

But if we assume the cost of the line at $20,000 per mile, it will cost us less than $1,500,000 of money to complete a chain of railroads from Portland to Ogdensburg.

A line is completed from Meredith to Wells river and the people of New Hampshire and Vermont are moving with vigor upon the construction of a line to Montpelier. The towns on its route, are Montpelier, East Montpelier, Plainfield, Marshfield, Groton, Ryegate and Newbury, all of which towns have authority to take stock eight times the grand list, which is one per cent. of the valuation.

The valuation of Montpelier is $1,294,115; of East Montpelier, $560,387; of Plainfield, $251,-886; of Marshfield, $302,367; of Groton, $236,-231; of Ryegate, $412,849; Newbury, $18,016,-168, making an aggregate of $4,073,903. Eight per cent. on this sum is $325,000 which with private subscriptions upon the route will enable the corporation to grade the road.

The Boston, Concord and Montreal Railroad have always favored the proposed line and will lay down the iron and operate the line in case the road bed is made. Montpelier the State capital, is full of rich men who look with favor upon this line to Portland, so that it is safe to assume that on the completion of the Portland and Rutland Railroad to Meredith the other line will be supplied, favorable connections formed and an unbroken line extending to Montpelier, Rouses' Point and Ogdensburg.

The vigor with which the towns on the route between Wells River and Montpelier have taken hold of the enterprise gives every assurance that the line will go through. Those of our people who are familiar with the railroads of New Hampshire know that the Boston, Concord and Montreal always professed friendship for the line from Meredith to Portland, in case the Montpelier connection should be completed. In point of fact, that corporation desired that a provision be inserted in some of the bills before the Legislature that "the Cross Line" charters should be dependent upon the completion of the link from Wells River to Montpelier.

The Vermont Central Railroad at one time proposed to take a lease of the proposed line from Montpelier to Portland by the way of St. Johnsbury. The refusal of the Montpelier people to favor that route defeated it, and forced St. Johnsbury to seek a route through the Lamoille Valley. A line from Swanton to St. Johnsbury, and thence down the Connecticut River to White River Junction, would be the most formidable rival possible of the Vermont Central Railroad, who decline all connections with the Lamoille Valley Railroad.

To avoid this dilemma the Messrs. Fairbanks and others, of St. Johnsbury sought a more northern connection, but in this they were defeated.

The Vermont Central Railroad favor a connection with Portland by the way of Montpelier and Meredith, and will co-operate with the Boston, Concord and Montreal Railroad of New Hampshire in laying the iron from Montpelier to Wells River, and in operating the line.

Governor Smith wants to share the carrying trade between Portland and Montreal in the winter. He was the active man in getting up the steamship company from Boston to Liverpool, so ignominiously abandoned by the Bostonians.

Both of those companies—the Boston, Concord and Montreal railroad and the Vermont Central road, now known as the Vermont and Canada Railroad, will favor the outlet from Meredith to Portland, while the Northern Railroad of New Hampshire stands ready to aid the construction of the link in the New Hampshire Central Railroad from Danbury to Meredith.

From White River Junction to Woodstock the line is to be run by the Northern Railroad of New Hampshire.

Between Woodstock and Rutland there is a valuation of $4,371,464 on the direct route, without counting in Woodstock, with a valuation of $2,620,141, heavily taxed to build it, 14 miles of road from White River Junction to Meredith village.

The whole aspect of the railroad question in Vermont has been changed since the project of the Ogdensburg line was started. The first suggestion of a through line from Ogdensburg to Portland was by the Montpelier people who allowed the St. Johnsbury people to take advantage of their project, and anticipate their movements in Portland and defeat their enabling act in the Legislature, by three votes in 1867. Montpelier this year took the lead, secured all their legislation at an early day, are now moving with that vigor and energy which always characterize the population of a State Capital whose people are better schooled than those of the other towns in the State, and so great is the confidence in their success, that the Boston, Concord and Montreal Railroad now make proposals, not only for impartial connecting, but to advance aid under the law of the last Legislature toward building the line from Meredith to Portland.

All the railroads of Northern New Hampshire and Vermont, as well as those lying in the valley of Lake Champlain and the Hudson look with certainty upon the completion of this due west line from Portland, as a fixed fact modifying all their views in the past.

All these Railroad Companies and the people interested in them, are seeking to reach Portland by the most direct route to secure an outlet for their winter trade, and the fact of lines of steamers between Portland and Europe in the winter months, has worked a complete revolution in the opinions of our western neighbors.

Why cannot the friends of the Rutland and Ogdensburg roads unite on a line to the Ossipee, and allow the three lines from Rutland to Portland, from Montpelier to Portland from Ogdensburg to Portland to work out their separate purposes as each shall find ability to do so, without in any way interfering with the particular plans of each company. A line from Portland to the mouth of Ossipee merely will not attract new business to Portland, but the concentration of the business of the other lines upon it, will make this section a paying road. And as soon as the railroad crosses the State line it will attract to Portland new business to be rapidly developed as soon as the necessary connections with the West are completed by the way of Ogdensburg, by the way of Montpelier and by the way of Rutland.

PORTLAND.

Wilmington and Manchester Railroad.

The annual meeting of the stockholders of this company was held in Wilmington, N. C., on the 17th ult. The meeting was called to order by the appointment of Col. W. S. Mullins as chairman, and Messrs. W. A. Walker and J. J. Ling, Secretaries. The number of shares of capital stock represented was as follows: in person, 3,765; by proxy, 4,297½—total, 8,062½. A majority of the capital stock being thus represented, the meeting was declared duly organized, and the President, W. B. Giles, Esq., proceeded to read the following Annual Report of the Directors:

PRESIDENT'S OFFICE W. & M. R. R. Co.
Wilmington, Nov. 17, 1868.

The President and Directors of the Wilmington and Manchester Railroad Company, in making this, their twenty-first annual report, can barely do more than present a history of the difficulties and troubles which have encompassed it during the year, and you cannot possibly realize their mortification and regret at the result, but they are fully conscious that all that anxiety, perseverance and energy could effect has been done to prevent disaster and promote the interests of the company under the peculiarly trying circumstances in which they have been placed.

Immediately after your last meeting, the most vigorous measures were adopted to reduce the expenses of the road, and to provide for the urgently pressing debts, viz: the pay-roll of laborers and mechanics unpaid for four or five months previous, a large debt very soon coming to judgment, the interest on our first preferred bonds due 1st December, monthly instalments guaranteed upon a large debt in New York, besides the large floating debt at home, and with but small means to meet it (much of that due the company proving unavailable), except the second mortgage bonds of the company; the difficulty alluded to in the report of last year in effecting a negotiation of these had increased to an impossibility on the then existing state of the bond market, we therefore proceeded North with the view of funding our floating debt there, and while engaged in that with flattering prospects of success, were shocked by the telegraph announcement that the first National Bank of this city had obtained a writ of injuction and sequestration against the company, and in addition had attached our funds at the principal points where our tickets were sold. The effect of this was not only to paralyze our efforts at further negotiations, but also to place in the hands of a Receiver all the earnings of the road, and to tie up the means which we had been husbanding to meet the interest due on bonds 1st December, and what it was absolutely necessary should be paid by the 1st of February to prevent the Trustees coming into possession of the road by the terms of the mortgage. Every effort was made to squash these proceedings by application both to civil and military tribunals, but without effect. Our credit, which before was poor enough, now received its death blow, and, after anxious consultation with eminent jurists, found that we were compelled to yield the road to the Trustee, under whose action another Receiver was appointed, who took possession on the first of March. We then by no means despaired of extricating ourselves, as the Trustee had promised that, upon our meeting the interest then due upon bonds, and showing a prospect of our ability to discharge that becoming due, the Receiver should be withdrawn and the road restored to us. With this hope and expectation we proceeded to fund, and otherwise liquidate, our floating debt, and it was not until we found from

the returns of the Receiver that the earnings of the road fell so far short of meeting the interest on its bonded debt, to say nothing of the amount necessary to place and keep in order, and provide necessary machinery, that our hopes sunk.

By the Receiver's returns the net earnings of the road were, for March and April, $12,129 per month; May and June, $11,808 per month; July and August, $14,564 per month; September and October, $17,016 per month. that is deducting only necessary operating expenses and exclusive of all extraordinary expenses for iron, machinery or repairs other than those done in its shops or any other extra expenditure.

Under all these unfavorable circumstances, we have applied towards funding our debt $121,000 of second mortgage bonds, and $11,937 49 scrip, convertible into these bonds, and have a guarantee from a party holding claims for over $40,000 that this shall be funded so soon as the road is restored to us—have collected all dues so far as it has been possible, and feeling that strict justice required that the working men, employes and laborers, from whom the necessities of the company had so long caused the withholding their dues, should receive a part at least of their hard earned wages, have so far as it has been in our power, preferred their claims in the disbursement of our collections.

In regard to the second preferred bonds, hypothecated in New York, say $503,000 in all—$100,000 of them have been sold at a price which covered the amount for which they were pledged; $190,000 have been bargained for at a sum sufficient to meet the debt for which they were pledged, and $213,000 were advertised for sale at auction on the 11th inst., by the Banking Company holding them, and we have been disappointed at not receiving the returns ere this. Of second mortgage bonds there are on hand $230,000, twelve of which will be required to redeem scrip given for amounts smaller than the denomination of the bonds. Since the appointment of the Receiver, the collection and arrangement of the debts of the company have devolved upon the President, who has appropriated towards the settlement of various claims $133,000 of second mortgage bonds and scrip, and $38 700 of such collections, &c., as have been made, leaving a balance in his hands, of $2,149 77 in cash, which is being appropriated towards the liquidation of the pay-roll for October and November 1867.

It is a matter of great regret and disappointment that the Secretary and Treasurer has not rendered statements of the affairs of the company in time for their incorporation in this repert, consequently they must be omitted..

In conclusion, the Board does not hesitate to express their firm conviction that had it not been for the destruction of the credit of the company, as heretofore detailed, such negotiations could have been effected as would, with the recuperation of the company, have placed the road upon a solid basis. Since, however, these untoward circumstances have thwarted the hopes and expectations entertained by us at your last meeting, and rendered futile all our anxious labors for your benefit, we are induced, most respectfully, to say that should you deem it advisable to place the future management of your interests in other hands, it will be entirely agreeable to us. All which is respectfully submitted.

W. B. Giles.

Hon. S. J. Person arose in allusion to that portion of the President's report attributing the disasters of the company for the past year to the suit entered by the First National Bank, resulting in the turning over the Road to a Receiver, thereby paralyzing the credit of the company, and commented upon the section of the President and Directors in this particular.

On motion, the report was accepted and referred to a committee of five, consisting of M. Cronly, Geo. R. French, J. C. Abbott, John Evans and J. M. Timmons. The meeting then took a recess until 2½ p. m.

At the appointed hour the meeting was called to order by the President, and the committee to whom was referred the report of the President and Directors submitted the following:

REPORT.

The committee to whom was referred the report of the President and Directors, respectfully submit the following report:

It appears from the report and the verbal statements accompanying it made by the President, that it has been impracticable to sumbit to this meeting a full and proper statement, showing in detail the present financial condition of the company, in consequence of the inability to prepare such statement of the person who acted as Treasurer of the company from the commencement of the last fiscal year up to March the 1st last, when the road and effects of the company went into the possession of a Receiver.

It is manifestly of the first importance to the stockholders, in view of the present general condition of this company, that they should have full information as to the debts and credits, the liabilities and the resources of the company; and the committee are of the opinion that in the absence of this information the stockholders should forbear to take any action in regard to the general affairs of the company, and that this meeting should forthwith adjourn to the earliest day at which it is believed the books of the company can be written up and the desired statement prepared.

The committee for the reason stated; submit the following resolutions:

Resolved, That the President and Directors without delay employ such suitable persons as may be deemed necessary to write up and thoroughly post the books of this company, and that a statement in detail, showing the debts and resources of this company of every kind whatever, and also that the resources of the company be prepared and submitted to the stockholders at an adjourned meeting to be held on the first Wednesday after the second Monday in January next.

Resoleed, That the President and Directors request the Receiver of the Company to place in their hands a statement of the affairs of the company up to the first of January next, or as near that date as practicable.

Mr. Wm. A. Walker here begged leave to call the attention of the stockholders to the fact that from May 12th to November 5th he was not the Treasurer of the company.

On motion, the resolutions accompanying the report regarding an adjournment was adopted.

On motion, the Secretary was directed to give proper notice of the time of holding the adjourned meeting.

The second resolution accompanying the report was also adopted; and the Chairman without further delay, declared the meeting adjourned until the first Wedeesday after the second Monday in January next.

☞ A meeting of the citizens of both Speonk and West Hampton was held last week, when the plans of the branch railroad between Sag Harbor and Yaphank were fully concurred in, and the necessary funds guaranteed.

☞ The Green Bay and Lake Pepin Railroad Co. propose to commence the construction of their road at an early day. Aid to the amount of $385,000 has already been voted them by towns and counties along the route.

☞ The new railroad from Collinsville to New Hartford, Ct., is now under contract. It is expected that the road will be completed next summer.

To the Editor of the Railroad Journal.

Chicago and Northwestern Railroad.

Sir:—As the report of this company for the year ending 31st May last, has just appeared in your columns, I will make a few remarks upon it.

The net earnings for the last year are stated to be $2,362,362, and the whole of the floating debt has been paid off out of these earnings.

The receipts for the current year will evidently be much greater than those of last year, probably nearly 3 millions greater, and the net earnings will consequently be sufficient for a 10 per cent. dividend, (payable in cash and not in stock,) to both classes of stockholders.

But the preference stockholders should bear in mind the terms of the agreement under which the second mortgage bonds were converted into preference stock.

The preference stock is entitled to 7 per cent. in full when the profits will admit, and the surplus, up to 7 per cent. to be divided amongst the common stock. If any surplus profit remain after such payments, then the preference stock is entitled to a further dividend of 3 per cent., making the dividend for that stock 10 per cent. for the year. And then, if the profits are sufficient, the common stock will also be entitled to a like increase of dividend, and as the profits continue to increase, the preference stock will be entitled to a further dividend of 4 per cent., bringing it up to 14 per cent., and so on.

But has the preference stock received its 7 per cent. in full before payment of a dividend to the common stock? The half year. December 1, 1866, to June 1, 1867, was passed without a dividend either in stock or money, so also was the half year June 1, 1865, to December, 1865; and yet there can be no pretext for saying that the dividend was not earned for those two half years, for the receipts of the railroad have been perpetually on the increase.

The Directors should rectify these errors.

They have by their skill and attention succeeded in making this railroad one of the first in the Union for prosperity and wonderful increase of traffic year by year, and it is to be hoped that they will so divide the profits as to avoid cause of complaint to any class of investors.

A Stockholder.

London, Nov. 14, 1868.

☞ The New Orleans, Mobile and Chattanooga Railroad Company, will receive proposals until the 20th of January next, for constructing the portion of the road between the cities of New Orleans and Mobile, embracing about 2,650,000 cubic yards of earth-work, the delivery of materials for and construction of 4,500 lineal feet of truss bridging, 25,000 lineal feet of pile and trestle bridging, and for delivery of 400,000 cross-ties and other materials. Address Henry Van Vleck, Chief Engineer, New Orleans, La.

☞ The total outstanding bonded debt of the State of Louisiana is $7,962,800, of which $3,414,000 were issued for levee purposes; of these $1,000,000 mature in 1886, and $2,414,000 in 1907. The railroad debt of the State is $2,553,000. The total amount of annual interest is $496,908.

☞ The October product of the Copper Falls Copper Mine was 61 tons. The Huron produced 90 tons, 1,857 lbs; the Quincy 75 tons, 380 lbs.

United States Supreme Court.

EQUITY—FINAL DECREE—IRREGULAR PROCEEDINGS—THE WESTERN RAILROAD LITIGATION.

Milwaukee and St. Paul Railroad Company *vs.* James T. Soutter, Survivor, &c., Trustee, and two other cases.—Appeals from the Circuit Court for the District of Wisconsin. These cases are branches of the noted litigation between the Milwaukee and St. Paul and the Milwaukee and Minnesota Railroad Companies, which so much engrossed the attention of the Court last winter.

Mr. Justice Nelson delivered the opinion of the Court:

These cases are appeals from decretal orders of the Circuit Court for the District of Wisconsin. The first was rendered on the 18th of July, 1865, directing the Milwaukee and St. Paul Company to pay to the receiver, in the case of Soutter *vs.* The La Crosse and Milwaukee Railroad Company, $237,338 78 for the use of the rolling stock on the western division of the road from 12th June, 1863, to 28th February, 1865.

The second is an appeal from a like decree by the same Court, ordering the payment of $81,106 08 for the use of the same rolling stock from the 28th February, 1865, to the 9th January, 1866. The third is an appeal from a decree of July 18, 1865, directing the Milwaukee and St. Paul Company to deliver possession of this stock to the Milwaukee and Minnesota Company. These orders were made upon the idea that the decree in the case of the Milwaukee and Minnesota Railroad Company *vs.* The Milwaukee and St. Paul Railroad Company, on the demurrer to the supplemental bill, was a final decree, and settled the title to the rolling stock, the subject of controversy, in favor of the claim of the eastern division, and hence that that division was afterward entitled to compensation for the use of the stock, whereas leave was given to the defendants to answer, and an answer put in and proofs taken preparatory to a final hearing on pleadings and proofs, so that the questions involved were left open and undetermined. It was wholly irregular, therefore, in this state of the cause, to institute proceedings and endeavor to recover compensation for the use of the property in controversy until the right to the same had been finally determined. The proceedings was not only destitute of any legal foundation, but involved an idle and useless litigation, upon an unwarranted assumption, as to the effect of the preliminary decision on the demurrer. The irregularity, as well as the awkwardness of the result from this inadvertent proceeding, is exemplified by the circumstance that the case has been heard on the pleadings and proofs at the present term, and the Court have determined, upon a full consideration, that the right to the use of the stock on the western division belonged to the Milwaukee and St. Paul Company, and hence it was not liable to the eastern division for the use of the same. It follows that the decrees in both cases are erroneous, and should be reversed. Cause remanded to Court below, with directions to enter decrees for the Milwaukee and St. Paul Company.

The third is a decree from the same Court, directing the Milwaukee and St. Paul Company to deliver this rolling stock into the possession of the Milwaukee and Minnesota Company, upon the idea already explained, that the decision on the demurrer to the supplemental bill had determined that the right belonged to the eastern division. For the reasons above stated this decree is erroneous, and should be reversed. Decree reversed. Cause remanded, and decree to be entered for Milwaukee and St. Paul Company.

Whitby and Port Perry Railway.

The Toronto *Globe* says that the contract for the building of the Whitby and Port Perry Railway has been given to Messrs. Kestevan & Starrat, their tender having been regarded as the most favorable of about half a dozen tenders which were received. The contractors agree "to construct and equip the road for the round sum of $330,000, and to accept in payment the $95,000, amount of the bonusses of Reach, and of the Town and Township of Whitby; $55,000, cash; to take $40,000 stock themselves, and the bonds of the company on the road for $140,000." The company, however, is to find the right of way. The railway is to be upon the broad or five feet six in. gauge. The subsidies from the municipalities were voted some time since, and the directors have about $75,000 in stock to raise. The Whitby Harbor Company has agreed to return as a bonus to the company one-fourth of all the tolls collected on manufactured lumber from the North, coming over the road for ten years. A preliminary survey has been completed, which makes the distance from Port Perry to Whitby Harbor 20½ miles. It is expected that the railway will be constructed by the first of August next.

Journal of Railroad Law.

CONVERSION OF RAILROAD BONDS—TRUSTEES OF BONDS ESTOPPED FROM DENYING THEIR VALIDITY—MEASURE OF DAMAGES.

The case of The Toledo, Logansport and Northern Indiana Railroad Company *vs.* Hawkes, which was recently decided in the New York Courts, will be found to be of great interest as showing the danger which attends upon the improper use of trust funds. We shall print the case more at length hereafter. The facts were briefly as follows: This was an action to recover damages against the defendant for the wrongful conversion of $50,000 of first mortgage bonds of the Toledo, Logansport and Northern Indiana Railroad Company, of which defendant was trustee for the bondholders. The plaintiffs claimed and gave evidence to show that the entire issue of mortgage bonds, being 1,500 bonds of $1,000 each, were delivered to the defendant to countersign as trustee, to be returned by him to the company when countersigned; that he countersigned all the bonds and returned 1,300 of them to the President of the company, but retained 200 bonds as security for his compensation for services as trustee, but finally delivered up 150 of the 200, and alleged, in respect to the remaining 50, that they were in the possession of a third party, who claimed to hold them for value. The plaintiffs, after demanding the bonds, brought this action. The defendant, by his answer, denied the corporate existence of the plaintiffs and the validity of the mortgage bonds, and set up that he had delivered all the bonds to the company, or on their order. The Court held, as a matter of law, that the defendant was estopped from denying the validity of the bonds, he having assumed to act as trustee, and there being no evidence of any delivery of the fifty bonds to the company or its officers, or any act or assent of the company to their delivery to any other person, the Court further held that the defendant was liable in this action, and that the measure of damages was the face of the bonds. Evidence was offered by the defendant to show that the bonds had little or no market value, which was excluded by the Court, on the ground that as they were outstanding, valid, negotiable obligations of the company, the defendant was liable on a wrongful conversion of them in the whole amount which they represented, and accordingly directed a verdict for the plaintiffs in the sum of $50,000.

☞ The lessees of the Mississippi Central Railroad, H. S. McComb, Sam Tate, H. D. Newcomb and others, have proposed to the City Council of Memphis to purchase their controlling interest in the Memphis and Grenada Railroad. They pledge themselves to construct a direct route from Memphis to Troy, making the shortest through line from New Orleans to New York *via* Memphis, Paducah and Vincennes. The committee of the Council have the matter under consideration.

☞ The "Lake Superior, St. Anthony Falls and Minnesota River Air Line Railroad Company," has been organized at Minneapolis, and a board of fifteen directors elected. The proposed road will connect the Lake Superior road at a point near White Bear Lake, in Ramsey county, with the Minnesota Valley road at Shakopee, in Scott county. It is claimed that ten miles in distance will be saved.

☞ The capital stock of the Hudson River Railroad Company has been increased $2,100,000, the same to be apportioned pro rata among the stockholders at par, if taken on or before the 20th of January next. The stock transfer books will be closed from the 11th to the 20th of January, inclusive.

☞ The *Eastern Shoreman* says that two routes have been surveyed for the extension of the Wicomico and Pocomoke Railroad from its present terminus to the Wicomico River—one, about a mile in length, is estimated to cost about $10,300; the other, 300 yards shorter, $8,700. Over $3,000 have been subscribed for the prosecution of the work.

☞ The Vermont Legislature has granted a charter to the Bennington and Rutland Railroad Company to extend its road to the marble quarries at West Rutland.

☞ The survey of the Belden's Falls (Vt.) Railroad has begun; it will terminate near East Middlebury, in Addison Co.

☞ The track of the Evansville, Henderson and Nashville Railroad has been laid to Slaughtersville, in Hopkins Co., Ky., a distance of 25 miles from Henderson.

☞ The Jonesboro (Tenn.) *Flag* says that work on the East Tennessee and West North Carolina Railroad is progressing rapidly, and that the road bed will soon be graded to Elizabethtown.

Notice to Contractors.

GENERAL OFFICE OF THE RONDOUT AND OSWEGO RAILROAD COMPANY, Rondout, N. Y., November 13th, 1868.

Proposals will be received at this office until January 2d, 1869, for the Grading and Masonry of the Mountain and Delaware Divisions of this Road. The Mountain Division consists of 23 sections containing 23 miles, commencing at Phœnicia, in Ulster County, and extending to Margaretville, in Delaware County. The Delaware Division consists of 29 sections, containing 29 85-100 miles, commencing at Margaretville, in Delaware County, and extending to Harpersfield Centre, in Delaware County. Map, plans, and specifications will be furnished on and after December 1st 1868, at the Chief Engineer's Office in Rondout. All other information furnished at this office.

6t48 THOMAS CORNELL, President.

SALE OF THE UNITED STATES MILITARY ROLLING MILL at Chattanooga, Tennessee.—The Directors of the South-Western Iron Company will receive proposals for the purchase of their Rolling Mill at Chattanooga, Tennessee, erected by the United States authorities, and greatly enlarged and improved since it became private property. The land (comprising 150 acres) and the railroad are now held in fee simple, with brick works, saw-mill, dwellings, and all the appurtenances required for the production of 300 tons of railroad iron per week. The superior character of the works and their admirable location are well known, but a detailed description can be had on application to the undersigned.

The proposals will be opened on the 31st day of December, 1868, and if none satisfactory to the Directors are received, the property will then be sold at public auction, in the City of New York, on WEDENSDAY, the 3d day of February, A. D. 1869, to the highest bidder.

Parties desirous of examining the works will apply to GUSTAVUS W. SMITH, General Manager of the Works, at Chattanooga, and further information may be had on application to the undersigned, at No. 17 Burling-slip, New York. ABRAM S. HEWITT, Treasurer.

6t48 EDWIN F. BEDELL, Secretary.

To All Whom it may Concern.

Notice is hereby given that the Mead Rubber Company of the City of New York, a corporation duly organized, under and in pursuance of an act of the Legislature of the State of New York entitled: "An Act to authorize the formation of corporations for Manufacturing, Mining, Mechanical, or Chemical purposes," passed February 17th 1848, and the several acts amendatory thereto, will apply to the Legislature of said State, at the next session thereof, for a special act of said Legislature, altering or amending the charter of said corporation, by changing the name of said Company from the "Mead Rubber Company," to the "Star Rubber Company."

Dated New York, November 4th, 1868.

For the Company,
JOSIAH J. BURGESS, President.

W. W. WARD, Secretary. 6t48

TESTIMONIAL.
Baltimore, Md., April 16, 1868.

We have used, on the Baltimore and Ohio Railroad, during the past year, about 13,000 lbs. of India Rubber Car Springs, manufactured by the Hamilton Square Rubber Works, Trenton, N. J., (C. V. Mead & Co.,) and have found them equal to, if not superior to any we have used in past time, and on much more reasonable terms.
JOHN OLIVER,
Purchasing Agent Baltimore and Ohio Railroad.

CAUTION.—The above firm are not connected with any other Manufacturers using the name of Mr. Mead.
Mead's Springs are stamped Hamilton Square Rubber Works, Trenton N. J.

New York Saturday, December 12, 1868.

Union Pacific Railroad.

The vice-president, T. C. Durant, and the consulting engineer, S. Seymour, of the Union Pacific Railroad, have filed a reply to the report made by the special commission appointed to examine that road, of which the following is an abstract:

The special commission upon the Union Pacific Railroad have estimated "that the expenditures that will be required in order that the road so far as built may be rendered equal to a fully complete first class railroad," will aggregate $6,489,550; but, they add, "no allowance is made for works in progress or for material and equipments ordered or in transit." The company, in answer, review these questions in detail. The special commissioners estimate that on the completion of the line for through travel the cost of additional equipments will amount to $2,603,000. This should be struck out because the equipment of the road is adequate for its present business. They say they have forty-five new locomotives now building, in addition to 117 now in use, and have 400 cars now east of the Missouri river and 300 more in process of construction in private establishments, besides turning out three cars per day from their own shops. They say that the other items making up this amount, including stations, fences, &c., have been provided for and will all be in their places when needed.

The commissioners recommend the expenditure of $1,546,550 for reconstruction of bridges and stone piers. The company have already expended $500,000 for materials for this purpose, and admit that $400,000 more is necessary to complete all bridges of eighty feet span and upward on the Howe truss plan. A large force is now engaged in substituting these structures.

The commissioners recommend new ballast for the track amounting to $910,000. The company replies that except 250 miles in the Platte Valley the road is ballasted as well as any Western road in the United States, but agrees to expend about $250,000 in this way.

The commissioners estimate $240,000 for completing embankments. The company allege that $100,000 is ample for this purpose, and that the work is now being done.

The Commissioners estimate $525,000 to replace 525,000 cross-ties. The company say they have 400,000 ties on hand, which they claim is more than is necessary.

The Commissioners estimate for additional water ways $100,000. The company say that engineers who have been on the road for years say that it has double the drainage required.

The Commissioners estimate for changing location $200,000. The company claim that the present location is entirely within the requirements of the charter.

The Commissioners estimate for reducing grades near Omaha $245,000. The company say that arrangements have been made for crossing the Missouri river at a point which will render this reduction unnecessary.

The Commissioners recommend $235,000 for water stations, station houses, snow and cattle fences. The company say that they have these in progress of construction as rapidly as needed.

The Commissioners say in conclusion:

"That taken as a whole, the Union Pacific Railroad has been well constructed and the route exceedingly well selected, and that the deficiencies are those incident to all new roads."

The company closes with the following:

The company have, at this date, completed sixty miles of the track in addition to the 890 miles reported upon by the Commissioners. The grading is nearly completed for a distance of 120 miles in advance of the track, upon a large portion of which the cross ties are delivered and distributed.

Grading has also been commenced, and a large force is now engaged in preparing the road-bed and procuring ties west of the 120 miles above referred to. One hundred and twenty miles of iron are now delivered west of the Missouri river, and 90 more are en route east of that point. The above items, together with the ties and lumber delivered for construction purposes, make up an amount of at least eight millions of dollars which the company have expended in advance of the road already completed.

The company have also contracted to construct an iron bridge over the Missouri river, at a cost of one and a half million dollars, all of which would serve to show that the company are acting in good faith towards the Government, and are constructing a good and substantial road.

It would also seem that the Government is amply secured in the issue and delivery of the Government bonds as fast as completed sections of the road are examined and accepted by the Commissioners appointed by the President under the charter of the company.

The company have never received a patent from the Government for one acre of the lands which were granted as a subsidy for building the road, and it has been thought that the retention of these lands, in the hands of the Government, would afford ample security for the performance of all that was required of the company by the terms of the charter.

(Signed) THOS. C. DURANT,
Vice President of U. P. R. R. Co.
S. Seymour, Consulting Engineer U. P. R.R. Co.

Honduras Railway.

In reference to this projected route between the Atlantic and Pacific, it is stated that the Government of Honduras in the autumn of 1867 raised a loan in London, Paris and Amsterdam, for the construction of the road. This loan, it is asserted, was taken in one day, and is now at a premium. The surveys made by the old Honduras Company, verified by a detachment of Royal English engineers, have again been tested and found to be correct. In addition to this, the "plant," material and men for building the first forty miles from Puerto Caballos to Santiago are now in Honduras, and the contractors, after personal inspection of the line, have undertaken to finish and equip the road before June 1st, 1871.

Internal Revenue.

EXTRACTS FROM THE REPORT OF THE COMMISSIONER.

The largest receipts of internal revenue were during the fiscal year 1866, when taxation had reached its highest limits. The estimates of the reductions since that period made from time to time, with reference to proposed legislation, were:

	Annually.
By statute of July 13, 1866	$65,000,000
By statute of March 2, 1867	40,000,000
By statute of February 3, 1868	23,000,000
By statute of March 31, 1868 } By statute July 20, 1868	45,000,000
Total	$173,000 00

The two statutes last named swept away the tax upon manufactures, mineral oils and petroleum, and the estimate is without reference to the reduction of rates upon distilled spirits.

The receipts for the last fiscal year were from the statutes existing July 1, 1867, modified by the act of March 31, 1868.

The statute of February relates to cotton, and relieved only that grown after the year 1867.

The aggregate receipts from internal revenue, exclusive of the direct tax upon lands and the duty upon the circulation and deposits of national banks, were for the year:

1866	$310,906,984
1867	265,920,475
1868	191,180,564

These amounts include drawback upon goods exported and sums refunded as erroneously assessed and collected.

The amounts of drawback and sums refunded were as follows:

	Drawback.	Amounts refunded.
1866	$798,867	$514,844
1867	1,864,682	706,582
1868	1,379,980	1,018,335

The increase of drawback in 1867 was due to the increased exportation of cotton goods and of spirits of turpentine, and the presentation of claims for taxes upon articles exported prior to June 30, 1864, which presentation was stimulated by the statute of limitations barring their payment unless presented before October, 1866. During the last year this large exportation continued; and claims were multiplied by a new statute of limitations. Since October 1, 1868, no drawback has been allowed except upon goods manufactured exclusively on tax paid cotton, upon beer, and proprietary articles to which stamps had been attached. About $300,000 of amounts refunded in 1867 and 1868, arose from the refunding to wholesale dealers, under direction of the act of July, 1866, so much of their license tax as was due to the excess of their estimated over their actual sales. In many districts railroads were taxed upon their gross receipts from freight long after the repeal of the law imposing such tax, and the amount has been refunded, as has been also the sum of $52,855 42, illegally assessed, in the opinion of the Attorney General, upon cotton grown on the Indian reservations.

RECEIPTS FROM BANKS, TRUST COMPANIES, AND SAVINGS INSTITUTIONS.

	1866.	1867.	1868.
Dividends and additions to surplus	$4,186,024	$3,774,975	$3,624,775
Circulation	990,328	208,276	26,902
Deposits	2,099,636	1,355,396	1,438,513
Capital	374,074	476,868	399,563

The reduction of receipts reported from capital and circulation is due to the conversion of State banks into National associations, and that from deposits is due to the same cause and to the relief by the act of July, 1866, to all sums of less than $500 deposited in the name of any one person in savings institutions having no capital stock.

RAILROADS.

	1866.	1867.	1868.
Dividends & profits	$2,205,804	$3,879,262	$2,630,174
Int. on bonds	1,255,917		1,259,156
Gross rec'pts	7,614,448	4,128,255	8,134,337

The collectors' monthly abstracts for 1867 did not give the receipts from interest upon bonds separate from those upon dividends and profits. During the fiscal year 1866, and two months of 1867, the tax collected was from assessments upon the gross receipts for the transportation of property as well as of persons.

INSURANCE COMPANIES.

	1866.	1867.	1868.
Dividends and additions to surplus	$767,231	$563,474	$605,490
Premiums and assessments	1,169,722	1,326,014	1,288,746

Dividends of insurance companies, railroads and banks have been taxed five per cent. during the three years, while the tax upon premiums and assessments has been one and a half per cent.

GROSS RECEIPTS OF TELEGRAPH COMPANIES.

1866	$308,437
1867	239,595
1868	214,699

The receipts of the fiscal year 1866 were from the tax of five per cent., as were those of the two months of 1867. After that time the rate was three per cent.

GROSS RECEIPTS OF EXPRESS COMPANIES.

1866	$645,769
1867	558,359
1868	671,950

The rate during the three years remained unchanged from three per cent.

REVENUE STAMPS.

1866	$15,044,373
1867	16,094,718
1868	14,852,252

LEGACIES AND SUCCESSIONS.

1866	$1,268,766
1867	1,861,429
1868	2,813,752

INCOME.

1866	$60,894,136
1867	57,040,641
1868	32,027,611

The amount collected in the fiscal year 1866, and four-fifths of that collected in 1867, were assessed at the highest war rates, and the increase of exemption appeared for the first time in the returns for 1868. The assessments on the incomes for the calendar year cannot all be collected in the same fiscal year, although great progress towards this end was made with the last annual list. The total amount thus far reported from the tax on incomes of the calendar year 1866 is $27,417,956 65, and from that of 1867 $22,236,381 79; of the former amount $9,778,858 were collected in the fiscal year 1867, and $17,644,098 in 1868. Of the tax on incomes of 1867 $14,389,781 were collected in the fiscal year 1868, and but $7,846,600 in 1869. There remain several districts from which full returns have not been received, and it is believed that the amount actually collected upon the incomes of 1867 exceeds $23,000,000. The number of persons assessed for an income tax on the annual list of 1866, before the increased exemption, was 460,170. In 1867 the number was 259,385, and in 1868 in 222 districts, from which reports have been received, the number was 232,775. In the 18 missing districts the number in 1867 was 20,948.

ARTICLES IN SCHEDULE A.

1866	$1,692,792
1867	2,116,495
1868	1,134,106

The change from May to March, in 1867, of the time for making the annual assessment of articles in schedule A, as in the case of income and special taxes, makes the collections of the fiscal year 1867 disproportionate to those of 1866 or 1868. The total receipts from the annual list of 1867 was $939,654 71, and the amount thus far reported from the list of 1868 is $804,437 92.

SPECIAL TAXES.

1866	$18,015,743
1867	18,103,616
1868	15,965,313

The reduction in the receipts of the last fiscal year is only apparent, and arises from the change of the tax upon wholesale dealers from an annual one collected at the beginning of the year to a monthly tax upon sales. The collections of special taxes, like those for income and articles named in schedule A, cannot all be made in the fiscal year of their assessment. The receipts from the assessment of 1867 were $14,136,459 18; those already reported from the assessment of 1868 are $10,779,599 08, which amount will be considerably increased when the collectors abstracts are all received.

Under the law existing prior to that of July, 1866, brewers paid an annual tax of $25, and when their product was more than 500 barrels per year $25 additional. By the act of July, 1866, this tax was doubled, as was that upon distillers of spirituous liquors. The act of July, 1868, will very largely increase the receipts from rectifiers and distillers.

COTTON.

1866	$18,409,655
1867	23,769,079
1868	25,500,948

During the fiscal year 1866 the tax was two cents per pound. From August 1, 1866, until September 1, 1867, it was three cents, and after that date two and a half cents per pound. As the removal of cotton from the districts of its growth is limited during the months of July and August, and the tax for ten months of the last fiscal year was at the reduced rate, it is evident that the amount brought to charge during that year was greater that in any year preceding, and considerably in excess of two millions of bales.

CIGARS, CIGARETTES AND CHEROOTS.

1866	$3,476,237
1867	3,661,984
1868	2,951,675

Since the act of 1862 the rate upon cigars has been frequently changed; but as their number has always been an element in determining the amount of tax it has been practicable every year to compute from the returns of the local officers the number of cigars upon which the tax has been collected.

From these it appears that the number in the fiscal years

1863 was	199,288,284
1864 was	492,780,700
1865 was	693,230,989
1866 was	847,443,894
1867 was	483,806,456
1868 was	590,335,052

During the fiscal year 1866 the tax upon cigars was $10 per thousand. From August 1, 1866, to March, 1867, the rate was partly specific and in part advalorem. After the last named date the tax was uniform, and at $5 per thousand.

CHEWING AND SMOKING TOBACCO.

1866	$12,339,922
1867	15,245,478
1868	14,947,108

The product brought to charge in 1866 was 35,748,351 pounds: in 1867, 45,635,581 pounds: in 1868, 44,900,880 pounds. The reduction of the consumption of tobacco during the past year is compensated by its increased use in the manufacture of cigars consequent upon their reduced taxation. The amount stored in bonded warehouse on the 1st day of July, 1866, was 4,123,631 pounds: 1867, 7,625,001 pounds: 1868, 8,280,253 pounds. The amount exported in bond during 1867 was 11,075,568 pounds: 1868, 11,962,670 pounds.

FERMENTED LIQUORS.

1866	$5,115,140
1867	5,819,346
1868	5,685,664

The tax at $1 per barrel has been uniform during the year.

DISTILLED SPIRITS AND BRANDY.

	Distilled spirits.	Brandy.
1866	$29,198,578	$283,500
1867	28,296,264	868,145
1868	13,419,093	871,688

The falling off of receipts in 1868 resulted in some degree from the general expectation that the tax would be reduced, and the consequent unwillingness to withdraw spirits from bond at the higher rate, but mainly from the frauds which made such reduction indispensably necessary. The above figures do not include the receipts from forfeitures.

The amount of spirits in bonded warehouse July 1, 1866, was 6,082 551 gallons; in 1867, 17,587,272 gallons; in 1868 27,278,420 gallons. The quantity out of warehouse under transportation bonds at the beginning of the fiscal year 1867 and of 1868 was at each date considerably in excess of 3,000,000 gallons. There was none at the commencement of 1869. The quantity exported in bond in 1867 was 4,654,816 gallons, and in 1868, 4,128,188 gallons. The number of gallons removed to "class 2 warehouses" in 1867, for the manufacture of cosmetics, medicines, cordials, &c., for exportation, was 892,727; while in 1868, allowed by law during only a portion of the time, it was 98,213 gallons.

EXPENSES OF COLLECTING THE REVENUE.

For the year 1866	$7,689,700
For the year 1867	8,982,686
For the year 1868	9,327,302

The increased cost for assessing for 1867 over that for 1866 arose from the increased number o collection districts in the South, and the employment of a larger number of officers. The excess of 1868 above the expenses of 1867 was occasioned mainly by the increase of the pay of assistant assessors from $4 to $5 per day. The number of assistant assessors in commission on the 1st day of November, 1867, was 3,180. This number, with the sources of revenue diminished by the act of March last, has been largely reduced, and on the first day of the present month but 2,284 were in service.

The receipts of internal revenue for the fiscal years 1866, 1867 and 1868, respectively, and the ratio thereto of the expenses during the same periods, were as follows:

Years.	Gross collections.	Refunded.	Drawback.
1866	$310,906,984	$514,844	$798,867
1867	265,920,475	706,582	1,864,632
1868	191,180,564	1,018,335	1,379,980

Years.	Net collections.	Expenses.	Per ct. gross collections.	Per ct. net collections.
1866	$309,593,273	$7,689,700	$2.47	$2.49
1867	263,349,261	8,982,686	3.38	3.41
1868	188,782,249	9,327,302	4.88	4.94

The ratio of costs to collections has increased, of course, with the reduction of the latter. It has required the same machinery and the same number of officers to collect taxes at two or three per centum as at five per centum, and until the passage of the statutes of the present calendar year it was necessary to keep the officers substantially to their maximum number.

PROBABLE RECEIPTS FOR THE PRESENT FISCAL YEAR.

It has always been difficult to make any accurate estimate of the receipts for the future from internal taxation. The frequent modifications of the laws themselves, the varying condition of different manufacturing interests, the shifting values consequent upon paper currency, together with other disturbing elements, have materially affected the worth of data collected at this office, from which otherwise the receipts for any fiscal year could be foreshadowed with considerable accuracy. The reduction of the sources of revenue has now, however, somewhat diminished these embarrassments, and the collections for the current year can be calculated with reasonable certainty.

The following tabular statement presents the aggregate of certificates of deposits by collectors received at this office during July, August, September, and October, for the fiscal year 1867, 1868, and 1869, respectively:

	1867.	1868.	1869.
July	$27,079,103	$24,734,656	$16,989,650
August	18,043,341	17,848,051	13,900,386
September	33,714,719	13,183,607	9,760,796
October	26,414,430	14,486,636	10,092,035

Of the amount collected in 1867 there was from income $43,463,655 45; in 1868, $17,733,714 04, and in 1869, $8,365,817 68.

I herewith present also the collections from the several sources of revenue during the first quarter of the present fiscal year in comparison with those of like character during the corresponding period of the fiscal year 1868.

The monthly abstract of the Collector of the Fifth District of North Carolina for August, 1868, and of the Collector of the Third District of Louisiana for September, have not been received, and the collections in their districts for the months stated are not included in the receipts for 1869.

	—July, August and September.— 1868.	1869.
Spirits	$5,293,921	$8,465,443
Tobacco	5,029,806	4,295,674
Fermented liquors	1,716,493	1,790,602
Gross receipts	1,576,214	1,514,756
Sales	924,203	1,739,513
Income	16,870,862	10,973,119
Banks and bankers, special tax, and tax on capital, circulation, & deposits	1,090,661	886,078
Other special taxes	4,053,222	2,969,427
Legacies	320,278	278,590

Gas	218,078	341,128
Sources not otherwise herein specially enumerated, including cotton and manufactured articles	11,866,928	874,431
Penalties, &c	250,151	306,402
Stamps, other than those for spirits, tobacco, and fermented liquors	3,122,970	3,393,472
Salaries of United States officers and employees	220,851	228,690
Grand total	$53,397,963	$38,620,899

The sum of $5,859,492 80 was received in fiscal year 1869 from the tax of 50 cents per gallon upon spirits in bond July 20, and withdrawn therefrom after that date. The sum of $662,186 34 was either collected prior to the act of July 20, 1868, and at the rate of $2 per gallon, or from spirits distilled after that date and removed from warehouse at 50 cents per gallon. Of the spirits in bond at the passage of the act in July last, 14,676,298 gallons were remaining on the 1st of November. This by the requirements of law must all be withdrawn on or before the 20th day of April next, and with the tax of 50 cents per gallon and $4 per barrel of forty proof gallons will yield a revenue of $8,805,779.

From a careful consideration of the above, and of other data which the proper limits of my report will not allow me to present, I confidently believe that the receipts for the present fiscal year will reach the sum of $145,000,000.

☞ It is expected that the cars will commence running on the Michigan Air Line Railroad between Ridgeway, on the Grand Trunk, and Romeo, Macomb County, Mich., by Jan. 1, 1869.

Chicago and Northwestern Railway.

The earnings of this road for the six months ending November 30, 1867 and 1868, were as follows:

	1867.	1868.
Passenger	$1,870,411 10	$2,157,505 83
Freight	4,757,134 26	5,242,731 33
Express	262,457 34	164,234 49
Mail	84,461 16	84,461 26
Miscellaneous	72,174 50	73,494 59
Total	$7,046,638 36	$8,722,427 50

This shows an increase in earnings from passengers of $287,094 73, from freight $485,597 07, from mail $10, and from miscellaneous, $1,320 09; with a decrease in earnings from express of $98,222 85—making the total increase of earnings, $675,789 14.

Richmond and Danville Railroad.

The earnings of this road for the year ending September 30, 1868, were $574,020 39; and the expenses, $354,929 69—leaving as net earnings, $219,090 70. The working expenses were 61.8 per cent., and the net earnings, 38.2 per cent. During the year new consolidated bonds to the amount of $700,500 were sold at rates averaging from 64@70 to enable the company to sink its floating debt to within $47,979. The arrearages of annuity to the State which the company have been unable heretofore to touch since the war, accumulated from the first day of January, 1865, to the first day of July, 1868, inclusive, amounted to $168,000; of which, during the present year up to the present time, $126,000 has been satisfied by payments from the business income of the company.

The funded debt of the company, including $1,700,000 first mortgage bonds, is $2,119,000; unfunded liabilities, $173,870—total, $2,292,870. The assets of the company, including 14,885 shares of the Piedmont Railroad Company, amount to $1,730,775. The report says the business of the road has steadily increased during the past three years. The wheat tonnage has materially increased during the past year; of which, however, a large part has been drawn from Southwest Virginia and Tennessee. In 1867 the entire wheat transportation, was 53,338 bushels, and during the past year 163,735 bushels.

The Piedmont road is continued to be operated under lease to this company, on the same terms as heretofore.

To Bridge Builders.

The Woodstock Railroad Company will receive proposals, until the 15th of December, for the construction of a Bridge, of wood, and also for the construction of an Iron Bridge, upon the Line of the Woodstock Railroad, across the Ottaquechee River; span about two hundred feet. The proposals must state the plan of the bridge, the kind and quality of material, the price per linear foot at which it will be completed, ready for the rails, and the number of pounds weight per linear foot which it will be warranted to bear. Address Hosea Doton, Engineer, Woodstock, Vt.

☞ The Richmond *Whig* of December 7th, says that the two per cent. interest due the 1st of July last on the State debt will be paid the 1st of January next. It is not expected that the two per cent. falling due the 1st of January will be paid.

From the Richmond State Journal, Dec. 1.

Liability of Railroads in Seceding States to Loyal Stockholders—De Facto Governments—Payments in Confederate Notes.

Among the most important cases decided at this term of the Circuit Court, was that in which the opinion printed below was given by Chief Justice CHASE. It establishes, as far as the judgment of that Court can establish it, the right of stockholders in loyal States to the dividends declared during the war upon the stock held by them in Southern railroads, notwithstanding the confiscation of such stock and dividends by the Confederate Government. It explains clearly what is meant by the term *de facto* Government. And it promulgates the rule that Confederate notes received in the rebel States on account of parties in loyal States, innocent of acts violating the interdict against commercial intercourse, must be accounted for in lawful money equal in value to the Confederate notes at the time of receipts.

The opinion of the Chief Justice, which we now give, states *the* facts clearly, and will be read with interest in and out of Virginia:

OPINION.

This is a suit by the administrators of a stockholder of the Petersburg Railroad Company, who was a citizen of Pennsylvania, and resided in the City of Philadelphia during the late rebellion, to compel that corporation, created by the statutes of Virginia and North Carolina, and having its principal office for business at Petersburg, to account for dividends declared by the company during 1861, and subsequently, before the filing of the bill on the 22d of November, 1866.

According to the statement of the answer, admitted to be true by written stipulation of counsel, Catharine C. Keppell, before the rebellion, was the owner of 203 shares of the company's stock, and subsequently, by further issues of stock, became entitled to 101 additional shares, making a total of 304 shares. After the secession of Virginia, and organization of the Southern Confederacy, the company submitted, without opposition, to the control of the Confederate Government set up over North Carolina and that part of Virginia in which the road lay, in hostile exclusion of the constitutional authority of the United States. Subsequently, on the 30th of August, 1861, the Confederate Congress passed an act for the sequestration or confiscation of all property found within the rebel States belonging to loyal citizens of the other States of the Union.

Under this act, such proceedings were had by a district judge holding a Court under the pretended authority of the Confederate Government, and by a receiver appointed by him, that 90 shares of Mrs. Keppell's stock were sold to sundry purchasers, and dividends were paid on the whole number of shares, partly to these purchasers and partly to the receiver. These dividends amounted to 109 per cent., and were paid at different times from July, 1861, to November, 1864, inclusive.

After the overthrow of the Confederacy the sales made by the receiver were treated as nullities by the railroad company. Scrip for the 101 additional shares was sent to the complainants, as administrators, and if dividends had been subsequently declared, payment would have been made to them on the whole 304 shares.

It appears from this statement that the company itself regarded the confiscation act as null and of no force so far as the sale of the ninety shares was concerned. That sale was treated as a nullity, and the title of the purchases under it are worthless.

But the company claims—first, that payments of dividends, made under the same act, to the receiver, and the purchasers, must be upheld as valid payments; and, secondly, if this claim be disallowed, then that the liability of the company was only to pay, on demand, the dividends of Mrs. Keppel, in such currency as was necessarily received, and no demand having been made except by the commencement of this suit after that currency had become wholly worthless, no decree can now be made against the company.

The first of these propositions rests upon the premises that the Confederate organization was a Government *de facto*, and that acts in obedience to its authority must be presumed to have been done under the compulsion of superior force, by reason of which the actors are discharged from all ulterior responsibility.

Of this it may be observed, in the first place, that the term *de facto*, as descriptive of a Government, has no fixed and definite sense. It is, perhaps, most correctly used as signifying a Government completely, though only temporarily, established in place of the lawful or regular Government, occupying its capital and exercising its power. Examples of this kind of *de facto* Governments are found in English history; some in the violent seizure and temporary possession of royal power, and one so conspicuous that the world can never lose the sense of it, in the establishment of the Commonwealth and the Protectorate in place of the monarchy. In this sense certainly, the rebel Government was never a *de facto* Government. It never held the national capital. It never asserted any authority to represent the nation. It was only what it professed to be a revolutionary organization, seeking to establish a confederacy of States, disconnected from the United States, and dependent wholly for success upon the success of the revolution.

The term, however, is often used, and perhaps more frequently in a sense less precise, as signifying any organized Government established for the time over a considerable territory, in exclusion of the regular Government. A *de facto* Government of this sort is not distinguishable in principle from other unlawful combinations. It is distinguishable in fact mainly by power, and in territorial control, and by the policy usually adopted in relation to it by the national Government. Treason in England is not committed against the lawful Government by acts of hostility done in support of a *de facto* Government, strictly so-called. This is the rule established by the statute, 11 Henry VII., passed with reference to the frequent changes in the royal authority during the civil wars of York and Lancaster. And the reason of the rule, doubtless, extended to acts done under the Parliament and the Protector, while in possession of the supreme authority in England, though the benefit of it was denied to many, and in a most conspicuous instance to Sir Henry Vane. And it may be well doubted whether in this country treason against the United States could be committed in obedience to a usurping President and Congress, exercising unconstitutional and unlawful power at the seat of the National Government. But it cannot be maintained that acts against the King, committed in obedience to a usurper temporarily in possession of a part of the kingdom, or that levying war against the United States by persons, however combined and confederated, (even though successful in establishing their actual authority in several States,) would not be treason here.

What effect, then, is to be given to acts done under the authority of an insurgent body, actually organized as a Government, and actually exercising the powers of a Government, within a large extent of territory, not merely in hostility to the regular and lawful Government, but in complete exclusion of it from the whole territory subject to the insurgent control?

It is not easy to give a general answer to this question. On the one hand it is clear that none of its acts in hostility to the regular Government can be recognized as lawful; on the other, it is equally clear that transactions between individuals, which would be legal and binding under ordinary circumstances, cannot be pronounced illegal and of no obligation, because done in conformity with laws enacted or directions given by the usurping power.

Between these extremes of lawful and unlawful, there is a large variety of transactions to which it is difficult to apply strictly any general rule; but it may be safely said that the transactions of the usurping authority, prejudicial to the interests of citizens of other States excluded by the insurrection and by the policy of the national Government from the care and oversight of their own interests within the States in rebellion, cannot be upheld in the Courts of that Government.

In the case beofre us, for example, Mrs. Keppell was the undoubted owner of 304 shares of the stock of the Petersburg Railroad Company, and was clearly entitled to her just proportion of its earnings. But she was denounced as an alien enemy by the Confederate Government. She was excluded from all control of her stock, and all receipt of dividends. And more than this, the stock was sequestered, or rather confiscated and partly sold and the dividends paid to the purchasers and to a person called a receiver, appointed under the rebel authority. Can it be maintained that her right to the dividends upon her stock was defeated by these transactions? We think not. We cannot regard the Confederate Government a sa *de facto* Government in any such sense that its acts are entitled to judicial recognition as valid. On the contrary, we are obliged to regard it as a combination or unlawful confederacy, organized for the overthrow of the national Government, and its acts, for the confiscation or sequestration of the private property of the citizens of the United States, and null and of no effect. The appointment of the receiver, the sale of the stock, the payment of dividends, must all be regarded as part of the process of sequestration or confiscation, and all as equally void.

But it is said, admitting the character of the Confederate Government, in view of the law, to be such as has been stated, that the company was compelled to pay the dividends to the parties who received them, and by this compulsory payment was discharged of responsibility to the lawful proprietor of the stock.

This proposition asserts the exemption of the company from liability on the principle of *vis major*; that there can be no responsibility where the loss is occasioned by irresistible force. And it may be admitted that if the dividends belonging to Mrs. Keppell had been set apart to her specially, and the money thus set apart had been taken from the officers of the company without consent on their part, by the application of force, either actual or menaced, under circumstances amounting to duress, the loss must have been borne by her. After such an appropriation of dividends, the company would have become, perhaps, the bailee of the stockholder for her proportion, and an excuse which would avail a carrier for hire for non-delivery, might excuse the company for non-payment.

But we cannot agree that this rule is fairly applicable to this case. It does not appear that there was any setting apart of dividends, or that any force was actually used or threatened. On the contrary, the action of the company in employing their railroad in the service of the Confederate Government, and the absence of any protest on the part of any of its officers, against the unlawful payment of the dividends, afford a reasonable inference that they were not involuntary accessories to the whole action of that government. No reasonable application of the principle relied upon, therefore, will excuse the company from its liability to its stockholders, and public policy clearly requires the protection of stockholders in the loyal States from any application of this principle not clearly demanded by the law. Mrs. Keppell was deprived of the immediate security afforded to her rights by the National Government, by the rebellion. It is the duty of that Government, since that rebellion is suppressed, to afford her, as far as practicable, ultimate security. On the other hand, it is the obvious dictate of sound policy that no encouragement should be

given to rebellion by relieving parties within rebel control of private responsibilities, except in very clear cases of compulsory force, without their direct or indirect consent.

We think the second claim of the company as to payment in Confederate notes equally untenable. The liability of the company to Mrs. Keppell for each dividend accrued when it was declared. At that moment the company became debtor and the stockholder creditor for the amount. It may have been the fault of neither that payment was not then made. It was not, certainly, the fault of the stockholder. It is no excuse to the company that the particular currency in which its income was received, and in which its dividends were paid to the stockholders, has since become worthless. The dividends were declared in dollars. The debt created by the dividend to the stockholder was in dollars. And in dollars only can it now be discharged.

But we are not more ready to say that it must now be discharged by dollars of greater value than those in which it was received, than to say that it may be discharged by dollars of no value at all.

At the time several of the dividends were declared, the chief currency, and when the others were declared, almost the entire currency of that part of the country in which the railroad was operated, was in Confederate notes; and whatever currency of bank notes there may have been in circulation was of no greater real value. This currency may fairly be said to have been imposed on the country by irresistible force. There was no other in which the current daily transactions of business could be carried on, and there could be no other while the rebel Government kept control of the rebel States. The necessity for using this currency was almost the same as the necessity to live. No protest, no resistance, no rejection, could avail anything. At the same time, this currency, though it depreciated rapidly, had a sort of value. Its redemption, though improbable, was not impossible, and, until the downfall of the Confederacy, it had a greater or less degree of purchasing power.

Under these circumstances, we cannot refuse to take notice of the fact that the dollars which the company received were not of either description of dollars recognized as lawful money by the laws of the United States; nor can we hold the officers of the company as incurring any liability to the stockholders by receiving the currency actually in circulation for its earnings, beyond that of prompt payment in like currency to such stockholders as were in a situation to receive such payment, and payment as soon as practicable in currency of equivalent value to such as were resident in States, intercourse with which was, at the time, not only cut off by the civil war, but was also interdicted by the Congress of the United States.

In the case of Shortridge *vs.* Macon, it was held that the accrual of interest upon a note for a certain sum and interest was not suspended by the rebellion. The dividends in the present case are in a different predicament. Dividends are only payable on demand, and it is agreed in this case that there was no demand until the filing of the bill. Interest, therefore, can only be allowed from that date.

We shall decree, therefore that the respondents pay to the complainants the dividends declared upon the stock of their intestate, with interest from Nov. 23, 1866. The amount of the several dividends at the several dates when made will be computed by deducting such per centage as will reduce them to equal value in lawful money, and interest on the aggregate amount will be cast from Nov. 23, 1866, to this date at six per cent. And decree will be entered for the sum thus ascertained. The computations may be made by the counsel or by a master, as they may prefer.

☞ The October product of the Hecla copper mine was 250 tons; of the Calumet, 162; of the Hancock, 20 tons, 69 lbs; of the Evergreen Bluff, 22 tons, 941 lbs; of the Knowlton, 20 tons, 1,396 lbs.

Allegheny Valley Railroad.

A special meeting of the stockholders of this company was held in Pittsburg on the 2d inst. Caleb Lee, Esq,. was appointed chairman, and Jacob Glosser, Esq., Secretary. After the reading of the minutes of the stockholders' meeting held May 21, 1867, Wm. Phillips, Esq., President of the company stated that the principal business of the meeting was to pass upon resolutions, which he proposed to offer, asking the authority of the stockholders to allow the cancellation of bonds issued in pursuance of the Act of Assembly increasing the capital stock of the company $2,000,000, which act was approved by the stockholders at their meeting on the above date.

The following are the resolutions referred to, which were ordered to be read by the Secretary, and were finally adopted by the meeting:

Resolved, That the action of the stockholders of this company at a former meeting, authorizing the subscription of forty thousand shares of increased capital stock be reconsidered, and that the Board of Managers be directed, with the consent of the subscribers to said stock, to cancel these subscriptions to the extent of the amount not paid on them, so that the company may perfect more efficient financial measures for the future operation and extension of its road.

Resolved, That the Board of Managers be directed to ask the Legislature for such modification of the Act of the Legislature, approved April 11, 1867, as may be necessary to fully complete and equip its present road, pay off its floating debt and extend and equip the line from the mouth of the Mahoning, to the Senimahoning, and that such action be taken by the Board of Managers as will enable the company to prosecute with vigor the work on the line eastward from the mouth of the Mahoning.

Finances of the United States.

According to the Report of the Secretary of the Treasury, it appears that the debt bearing coin interest on the 1st of July, 1868, was $2,083,003,641 80; debt bearing currency interest, $126,228,790; matured debt not presented for payment, $20,527,302 64; debt bearing no interest, $406,447,314 75—total, $2,636,207,049 19. The amount of cash in the Treasury was $131,006,532 25—leaving amount of debt less cash in the Treasury at that date $2,505,200,816 94.

The following is a statement of receipts and expenditures for the fiscal year ending June 30, 1868:

Receipts from customs	$164,464,599 56
Receipts from lands	1,348,715 41
Receipts from direct tax	1,788,145 85
Receipts from internal revenue	191,087,589 41
Receipts from miscellan's sources, (of which amount there was received for premium on bonds sold to redeem Treasury notes, the sum of $7,078,203 42)	46,949,033 09
Total receipts, exclusive of loans	$405,638,083 32
Expenditures for the civil service, of which amount there was paid for premium on purchase of Treasury notes prior to maturity, $7,001,151 04)	$60,011,018 71
Expenditures for pensions and Indians	27,883,069 10
Expenditures by War Department	123,246,648 62
Expenditures by Navy Depart	25,775,502 72
Expenditures for interest on the public debt	140,424,045 71
Total expenditures, exclusive of principal of public debt	$377,349,284 86

The following is a statement of receipts and expenditures for the quarter ending Sept. 30, 1868:

The receipts from customs	$49,676,594 67
The receipts from lands	714,895 03
The receipts from direct tax	15,536 02
The receipts from internal revenue	38,735,863 08
The receipts from miscellaneous sources, of which amount there was received from premium on bonds sold to redeem Treasury notes the sum of $587,725 12	6,249,979 97
Total receipts, exclusive of loans	$95,392,868 77
Expenditures for the civil service (of which amount there was paid as premium on purchase of Treasury notes prior to maturity $300,000)	$21,237,106 83
Expenditures for pensions and Indians	12,358,647 70
Expenditures for War Department	27,219,117 02
Expenditures for Navy Departm't.	5,604,785 33
Expenditures for interest on public debt	38,742,814 37
Total expenditures, exclusive of principal of public debt	$105,152,470 75

The Secretary estimates that, under existing laws, the receipts and expenditures for the three quarters ending June 30, 1869, will be as follows:

From customs	$125,000,000 00
From lands	1,000,000 00
From internal revenue	100,000,000 00
From miscellaneous sources	20,000,000 00
Receipts	$246,000,000 00

And that the expenditures for the same period, if there be no reduction of the army, will be—

For the civil service	$40,000,000 00
For pensions and Indians	18,000,000 00
For War Department, including $6,000,000 bounties	63,000,000 00
For Navy Department	16,000,000 00
For interest on public debt	91,000,000 00
Expenditures	$281,000,000 00

The receipts and expenditures under existing laws for the fiscal year ending June 30, 1870, are estimated as follows:

From customs	$160,000,000 00
From internal revenue	140,000,000 00
From lands	2,000,000 00
From miscellaneous sources	25,000,000 00
Receipts	$327,000,000 00

The expenditures for the same period, if the expenses of the army should be kept up to about the present average, will be as follows:

For the civil service	$50,000,000 00
For pensions and Indians	30,000,000 00
For War Department	75,000,000 00
For Navy Department	20,000,000 00
For interest on public debt	128,000,000 00
Expenditures	$303,000,000 00

☞ The suit of Cheever and Hart *vs.* the Rutland and Burlington Railroad Company, which has been on trial at Rutland, Vt., for several days, has been decided against the Trustees of the First Mortgage, the bill being dismissed with costs. The case will probably go to the Supreme Court on appeal.

☞ The stockholders of the East Tennessee and Virginia Railroad (from Bristol to Knoxville) have consolidated the management of that road with that of the East Tennessee and Georgia (from Knoxville to Chattanooga) by electing the President of the latter, Colonel Thomas H. Callaway, and the Superintendent, Major R. C. Jackson, to fill the same offices in the former.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, December 19, 1868.

Stock Exchange and Money Market.

Money has been in fairly active demand since our last at from 5@7, generally at 6@7 per cent. on call, for the use of the Government, Stock and Gold Dealers; and 7@9 per cent. per annum, for mercantile purposes. The available supply has been quite equal to the wants of responsible borrowers, though the city banks, having Western and Southern connections have been rather freely drawn upon for currency, to aid the Pork packing, and cotton forwarding interests. The banks report a loss of nearly three millions of legal tender notes, mainly accounted for by the drain of the Treasury Department, through its gold sales, which closed for the present on Saturday. An increase of nearly 2⅛ millions has been noted in the bank deposits, which are now up to about 190 millions, as against $175,150,589 a month ago. The banks have added over five millions to their loan and discount averages, within the week making the actual aggregate 259½ millions, as against a trifle more than 249 millions four weeks since. Their specie reserve shows an addition of about 1⅞ millions as compared with the preceding weekly exhibit, making the present total $17,644,264 against $9,186,620 on the 17th of October, eight weeks back. The U. S. Sub Treasury has enlarged its cash balances more than three millions, during the week, partly from the proceeds of the coin sales of last week, and from the deposits of funds derived from excises, under the recent order of the Treasury Department, requiring collectors of internal revenue to deposit with the Sub Treasury, instead of the National banks, as heretofore. Secretary McCulloch's exhibit of the national financial account, in his annual report, is generally received with favor, as far as relates to statements of fact, though on the subject of the Secretary's recommendations, particularly as to the wisdom of repealing the legal tender act, opinions differ widely. The Secretary congratulates the country that the national finances are in a good condition, and that the nation has not suffered for the present commercial year from an expansive credit system, based on a too redundant currency. Economy in public and private business interests has diverted industry into healthy channels, and he believes that with proper financial legislation, a revision of the tariff and the modification of certain portions of the Internal Revenue laws that the path to specie payments may be reached, though he is opposed to naming by legislation any time for resuming, and declares that nothing can be gained by a forced resumption. The funding of the public debt he regards as one step towards resumption. The statement that the Public Debt has increased from the 31st October, 1867, to the 1st November, 1868, by the sum of $35,625,102, and that this increase, with the exception of $4,373,102, grows out of $24,152,000 subsidies to the Pacific Railways and $7,200,000 for the purchase of Alaska, is not unsatisfactory, under the reduced rates of Internal taxation, and in view of the extraordinary progress made in our great Pacific enterprise. Of the entire subsidies authorized to these Roads, amounting to $60,000,000, about three-fourths the amount have been issued and placed, leaving only $15,000,000 to be issued for the completion of the work. The Secretary shows that the aggregate indebtedness of the Government has been reduced full $679,825,126 since April 1865, basing this claim of sweeping liquidation on the established facts that the money expended by the War and Navy departments between the first day of April, 1865, and the first day of November, 1868, on claims justly chargeable to the expenses of the war, (though not actually part of the audited and recognized debt when the war ended), amounted to $630,431,125 90, to which should be added amount advanced to the Pacific roads, $42,194,000; amount paid for Alaska, $7,200,000. Total, $679,825,125 90. Deducting this sum from the amount of the revenues, $1,662,276,062 20, and $160,174,475 48 the increase of the public debt, the remainder, $1,142,825,411 78, or an average of $318,928,021 89 per annum is the amount actually expended in the payment of current expenses and interest. Secretary McCulloch strongly urges economy in every department of the government, and thinks $250,000,000 per annum ought to be made sufficient for the current expenses, and that a revenue of $300,000,000 ought to leave $50,000,000 every year for the reduction of the debt. The Secretary wishes to continue the reduction of the debt, and insists that there

will never be so good a time for it as the present. He recommends an explicit declaration that the entire principal of the public debt, including the five-twenties, shall be paid in coin. He asks for authority to issue, at his discretion, $500,000,000 of new bonds, to fund outstanding dues; and proposes that bonds payable, principal and interest, in London or Frankfort, be substituted for those bonds already exported.

The specie reserve of the city banks is now $17,644,264, against $15,805,254 same time last year. The city bank deposits are now $189,843,817, against $174,926,355 week ending Nov. 30, 1867 The legal tender reserve amounts to $59,492,476, against $52,595,450 same time last year. The circulation now stands at $34,254,759, against $24,092,202 same time last year. The loans are now $259,491,905, against $247,450,084 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $105,855,566 a day, against a daily average of $102,590,560 the preceding week, and $144,185,333 the week ending with Nov. 19, 1868. The current week's exchanges average about $104,000,000 a day. The city banks, last week, gained $1,857,987 of specie, and $2,424,982 of deposits, while they lost $2,947,780 of legal tender notes. They increased their loans, $5,105,848; and reduced their circulation, $29,804.

National Bank notes to the amount of $164,430 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $311,030,406, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $11,145,997, leaving, with the existing 1,629 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,874,409. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,638,600; and for the public deposits, $37,554,850—making a total of $379,193,450. The Treasury Department last week redeemed and destroyed $605,900 of worn and mutilated fractional currency, and issued $124,978 of new. The outstanding amount of fractional currency on the 1st of November, was $33,413,985, against $32,933,614 on the 1st of October, 1868.

The U. S. Sub-Treasury receipts, week ending with Dec. 5, were $11,752,757, including $1,558,656 from customs duties; payments, $12,403,599, including $1,010,000 of coin interest; balance at the close of the week, $88,482,011, against $89,132,854, at the close of the preceding week, showing a decrease of $650,842. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,967,712 including $197,000 from customs; and payments, $1,756,962, including $160,000 of coin interest; on Tuesday, receipts, $2,517,794 including $400,000 from customs, and payments, $597,261, including $164,000 of coin interest. The balance at the close of business on Tuesday stood at $90,613,293, against $87,568,657 a week previous; and $86,259,666, on Nov. 18, 1868. The aggregate receipts of the office from all sources in November, were $64,306,032; aggregate payments, $70,227,813. The balance on the 1st of December was $86,077,866, or nearly six millions less than on the 1st of November, which amounted to $91,999,615.

The outstanding amount of coin certificates on the 1st of Nov., was $19,716,840, against $20,236,400 on the 1st of Oct., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,614,000, and retired $1,470,656 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during November, reached $7,658,840.

Government revenues have been light, since our last. The excises, last week, yielded about $2,500,000; customs at the port of New York, $1,558,654, and at the outports about $535,000 (in coin) more, making the grand total income for the week equal to abou $5,326,500 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $64,000,000, according to the latest Washington advices. Commissioner Rollins, in his annual report, estimates the excises for the whole of the current fiscal year, ending with and including June 30, 1869, will yield $145,000,000 or equal to $12,083,333 a month. The past fiscal year's excises yielded $191,180,564 to the Treasury; 1866–'7, $265,920,475; 1865–'6, $310,906,984. The expense of assessing and collecting the internal revenue for the fiscal years ending with June 30th 1866, was $7,689,700 46; 1867, $8,982,686 03; and 1868, $9,327,301 74.

Gold has been rather more active, since our last, the speculative demand has been on a more extensive scale, while the customs and export inquiry has been quite limited. The offerings have been less liberal and there has been more buoyancy in the market, partly influenced by a variety of sensational exports from Europe and from Washington. The range of the price, has been from 134¾ to 136¾ and the closing figures on Wednesday were 135¾. Government closed its gold sales on Saturday last. According to the latest Washington advices, the Treasury Department held at the beginning of December a coin reserve of about 88 millions, of which some 23 millions were to the credit of private depositors whose claims are represented by outstanding coin certificates.

Secretary McCulloch reports that the receipts for customs for the last three years were as follows: For the fiscal year ending June 30, 1866, $179,046,651 58; for the fiscal year ending June 30, 1867, $176,417,810 88; for the fiscal year ending June 30, 1868, $164,464,599 56.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,817,041, against $3,032,610 same time last year. The customs demand for Gold last week, averaged $259,778 a day; thus far, this week, it has been equal to $298,500 a day, or equal to a weekly aggregate of $1,791,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $182,878 and from California, $225,208. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $111,220,321, against $113,105,410 same time in 1867. At the port of San Francisco, $7,550,891, against $6,764,517 last year.

The total receipts of California gold at this port, since Jan. 1, 1868, have been $34,007,918, against $25,814,258 in 1867, showing an increase thus far in 1868, of $8,193,660. The exports of specie, from this port, last week, were $230,432, against $327,575 same week last year; total, since Jan. 1, 1868, $69,354,117, against $45,388,574 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,010,000; since Jan. 1, 1868, $81,165,517, against $61,263,585 same time in 1867. The specie exports from San Francisco, from Jan. 1, to Nov. 23, were $32,098,721, against $34,957,346 same time last year.

Foreign Exchange has been in rather better demand, and firmer in price, since our last. Bankers' prime sixty day bills on London closed on Wednesday at 109¼@109½, and on Paris to 5.20c.@5.16¼; sight bills on London to 109¾@110¼, and on Paris to 5.15c.@5.13⅛. The offering of produce bills has been less extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,020,901, against $4,628,013, same week last year; total, since Jan. 1, 1868, $156,892,265, against $179,678,834 in 1867.

Secretary McCulloch, in his annual report, estimates the amount of United States securities of different kinds, including railroad and other corporate obligations held in Europe, at the present time, exclusive of stocks, at $850,000,000, of which not less than $600,000,000 are United States bonds, nearly all of which have left the United States within the last six years. In this estimate of our foreign indebtedness, railroad and other stocks are not included, as they are not a debt, but the evidence merely of the ownership of property in the United States.

Government securities have been less active, since our last, and since the opening of the current week, the dealings have been unusually limited, pending the development of Congressional plans and projects, relative to the financial situation. Prices which advanced early in the week, have yielded a little within a day or two, influenced by the prevailing dullness.

U. S. sixes of 1881 closed here on Wednesday at 114⅞@115; U. S. Five-twenties of 1862, 111@111¼; U. S. Five-twenties of 1864 at 107⅜@107⅝; U. S. Five-twenties of 1865 at 107¾@108; U. S. Five-twenties of 1865, consolidated, 110⅜@110½; U. S. Five-twenties of 1867, 110½@110⅝; U. S. Five-twenties of 1868, 110¾@111; U. S. Ten-forties at 105⅝@105¾; U. S. Six per cent. currency bonds, 99¼@99½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 25.	Dec. 2.	Dec. 9.
Consols	94⅜	*92⅝	92½
U.S. 5-20's of 1862	75	74½	74½
Erie	26¾	27	26¼
Ill. Central	96	96	96¼

* Ex-dividend.

Railway and miscellaneous stocks have been in less active speculative request, as a rule, since our last. New York Central stocks has been liveliest of all the railway list, and has fluctuated widely. The general market closed weak.

An improved demand has been experienced for most kinds of domestic produce. Breadstuffs and provisions have been quoted stronger. Middling upland cotton closed pretty briskly on Wednesday at 24½ cents per lb. The stock of cotton

now here is estimated at about 31,500 bales. The receipts at the port this week, have averaged about 2,800 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 678,000 bales, against 506,000 bales same time last year; exports, same time 826,000 bales, against 223,000 bales same time last year; stock on hand at latest dates, 220,000 bales, against 226,200 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 22,590 pkgs., against 12,114 pkgs., same time last year. At the Live Stock market, this week, Beeves have been in more demand at from 9@17½c. per lb.; week's receipts, 5,526. Veal calves have been in request at from 9@13c. per lb.; receipts, 1,051. Sheep and lambs more sought after at from 4@7, and 5@7c. respectively, per lb.; receipts, 36,557. Swine, fairly active at from 8¼@8¾c. per lb., all live weight; receipts, 31,566. Foreign merchandise has been attracting rather more attention, and has been held with increasing confidence. The total imports of foreign dry goods, last week, were $981,508 and the total amount marketed $775,920. The value of foreign merchandise imported last week, was $3,917,237—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,899,237, against $2,187,172 same week last year; from Jan. 1, 1868, $233,002,354, against $226,265,919 same time in 1867. The ocean freight market has been moderately active, but rates have been irregular. For Liverpool we quote flour at 2s. 3d. @2s. 6d. by sail, and 3s. 6d.@4s. by steamer, per bbl.; grain at 6½d.@6d. by sail, and 6½d.@7d. by steamer, per bushel; cotton at $\frac{5}{16}$d.@$\frac{3}{8}$d. by sail, and ⅛@¾d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 35s.@50s. steamer, per ton. Total number of vessels in port on Wednesday, 505.

The New York exports, exclusive of specie, for the week ending Dec. 8, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$4,628,013	$4,020,901
Prev. reported	175,050,821	152,871,364
Since January 1	$179,678,834	$156,892,265

The imports for the week ending December 5, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$471,886	$981,508
Gen. merchandise	1,715,286	3,917,729
Total for the week	$2,187,172	$4,899,237
Previously reported	224,078,747	228,103,117
Since January 1	$226,265,919	$233,002,354

The balance in the Sub-Treasury on Wednesday was $90,088,819 27.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

BANKING AND FINANCIAL.

☞ TO CAPITALISTS AND INVESTORS.

The First Mortgage Bonds of the ROCKFORD, ROCK ISLAND and ST. LOUIS RAILROAD COMPANY pay the Principal and Seven per Cent. Interest, 1st February and 1st August, in GOLD COIN, *free of Government tax.*

A limited amount only of these bonds will be sold at 97½ and accrued interest in currency, by bankers and brokers, agents of the Company in different parts of the country, and at the office of the Company, No. 12 Wall st., New York.

Government and other approved Securities received in exchange at full market rates.

Pamphlets giving full information sent on request.

H. H. BOODY,
Treasurer.

Erie Railway.

The following report of Mr. Jay Gould, President of the Erie Railway Company, in reference to the late heavy expenditures on the road—its enormous increase of traffic and prospective earnings—was issued from the office of the company on the 5th inst. The President says:

Shortly after I became President of this company, some months since, and after thoroughly acquainting myself with the wants and requirements of the company, with the view of devoting what energy and experience I had to their consummation, I acted upon the theory that the Erie Railway Company which owed its existence to the State, was bound to pursue a policy that would foster and protect both the commerce of the City and the business interests of the State. I found the equipment of the road, both engines and cars, inadequate for its business. There is not a local station between New York and Buffalo, where business men and shippers are not now greatly suffering for want of cars. In addition to these local requests, we are bound to give facilities to our Western connections. They are now and have been greatly suffering from an inability to furnish cars and engines to bring forward the freight. Much Western trade has thereby been driven away from New York to Philadelphia and Baltimore. I propose to remedy this evil by furnishing the road with ample equipments to accommodate the public and protect the local customers of this road.

The Western connections of the company were in an unsatisfactory condition. The Michigan Central and Great Western Railways, forming a line between Chicago and Suspension Bridge, were completely shut off from us by want of a link of twenty miles of road between Buffalo and Suspension Bridge. I entered into negotiations with these companies, and, as a result, the road in question is now being rapidly constructed, and by July 1 the Erie Railway will be doing a fair share of the business of those companies between New York and Niagara Falls and Suspension Bridge, connecting at Chicago. From this source I expect to derive a revenue of from one to two millions of dollars per year.

We not only are suffering for engines and cars, but a large portion of the line was single track, and the pressure upon it was so great that it was almost impossible to pass the vast traffic of the company over it. Frequent delays in both passenger and freight trains were a necessary result. These delays injured the traffic of our line, to obviate which I am now double-tracking the road as rapidly as possible from Buffalo east, Hornellsville east, Corning west, and on the Delaware Division. Very soon the entire line between Buffalo and New York will have a double track, easily saving one hour in the running of passenger trains, and one day in the running of freight trains, beside doubling the capacity of the road. I found the character of the iron rails so deficient in quality that I considered the road unsafe, and immediately called to my assistance the best talent and experience in the country, and we are now manufacturing our own steel rails at a rate which will cover the entire line between Buffalo and New York in about two years, and we have already eighty miles of steel rails laid on the Eastern Division, and I consider our track to-day equal to any in the country. I found the road in bad shape. As to the supply of fuel and its great cost, although we were buying a large amount of coal, we were buying much of it at retail prices, and our fuel account was costing us $1,700,000. I am now mining coal at our own mines at a cost of about $2 50 per ton, or a saving of nearly $1,000,000 on the single item of fuel alone.

There was another important matter presented to my attention at an early day, namely, a third rail, or narrow gauge. All our Western connections, excepting the Atlantic and Great Western, were narrow gauge, requiring a transhipment at Buffalo and Dunkirk of every car of through freight passing over the road, while on the competing lines of the New York Central and Pennsylvania Central there was no transhipment between Chicago and New York. The Western roads agreed to furnish the cars for the whole line between Chicago and New York, leaving it only for the Erie Company to provide the third rail. I could not, acting for this company, decline so important an improvement, and I was rapidly concentrating the arrangements to carry out this plan, when the recent litigations, supposed to be in the interest of competing lines, broke out. Beyond the expense of these litigations, and the annoyance and loss of time they occasioned me, I do not regret them. The charges made are without the slightest foundation in truth, as was well known to the principal instigators.

Since I have been connected with the Company I have secured the following roads and on the following terms:

The Paterson and Newark, extending from Newark to Paterson, leased; the Erie Company to operate the road, and to pay as rent thirty-five per cent. of the gross earnings; the Erie Company have the fixing of rates.

I regard this connection as very important. It makes Newark a city of one hundred and twenty thousand population, and the largest manufacturing city in the Union, one of the termini of the Erie Railway.

The Newburg and New York Railroad, fourteen miles, making the shortest line between Newburg and New York, is being constructed by this company. It had been contemplated.

I have made a contract with the Delaware and Hudson Canal Company for the entire transportation of the Western coal, amounting to 500,000 tons per annum, a tonnage equal to our total through tonnage last year. This embraces the use of eight miles between Honesdale and Hawley; and also a new road between Carbondale and Susquehanna. This, coupled with the new road being constructed in conjunction with the Michigan Central and Great Western, between Buffalo and Suspension Bridge, embraces all the new lines that have been secured or constructed under my administration. I consider them all important additions to the company.

I have also revised and made a new contract with the United States Express Company, made upon a more equitable basis, and largely increasing our compensation for doing the express business.

At a meeting of the Executive Committee to-day, the President was directed to commence suits against Cornelius Vanderbilt for the recovery of the $1,000,000 subsidy paid him, and to compel him to take back the $5,000,000 of stock at the $3,500,000 originally paid him by the company.

Suits were to-day commenced against Daniel Drew to compel him to account to the company for the profits of several years in the Lake Erie steamboats amounting to $1,000,000; another against Daniel Drew, R. H. Berdell, D. B. Eaton, John Arnot, Samuel Marsh, A. S. Murray, W. B. Skidmore, H. L. Peirson, Thos. W. Gale, comprising the old Board, to compel them to take back the $1,800,000 Buffalo, Bradford and Pittsburg bonds, which were saddled on the Erie Railway Company after the enterprise had proved a total failure; the actual loss to this company in operating the road since Jan. 1, 1866, the date of the lease, being $238,991.

Whenever the facts are fully known and the public become aware of what is being done to make the Erie Railway the most magnificent and perfect railway line in the country and the pride of the City and State, then the acts of the present managers will be appreciated.

☞ The St. Joseph and Council Bluffs Railroad has passed into the hands of the Hannibal and St. Joseph Railroad Company, and trains will be run hereafter from West Quincy, on the Mississippi River, to Council Bluffs, under one management.

☞ The receipts of the Richmond and Petersburg Railroad during the past fiscal year were $146,985; and the expenses $83,601—leaving a net balance of $63,384. The earnings show an increase over the previous year of $10,528 33, and the expenditures a decrease of $7,939, or an improvement in net income of $18,467 33.

Union Pacific Railroad.

The report of the special Commissioners appointed by the President of the United States to examine the Union Pacific Railroad, in regard to its location, road bed, cross ties, track laying, ballasting, rolling stock, repair shops, station buildings, culverts, bridges, viaducts, turnouts and all other appurtenances of the road, and what amount of expenditure would be required in order that the road so far as built might be rendered in those particulars equal to a fully completed first class railroad, has been published. The following is a full and correct synopsis:

At the time the Commissioners inspected the road it had been constructed for a distance of 890 miles. They report the general location of the road, as a whole and in its several parts, to be the most direct and practicable that could be found between Omaha and the head of Great Salt Lake, a distance of 1,118 miles, and that the construction of the road, in regard to the amount and character of the excavations and embankments, has been remarkably easy. Between Omaha and Granite Canon, a distance of 535 miles, there was not a yard of rock excavation, and the natural surface itself over a great portion of it has presented nearly practicable grades. From Granite Canon westward to the end of the track the work is less than on Eastern roads of the same length, and the most difficult parts are light compared with roads in the Alleghany mountains. There is but one tunnel on the whole distance, which is on St. Mary's Creek, 230 feet in length. Although generally the line is well adapted to the ground there are points where the full capabilities of the country have not been fully developed, and others where, in its details, the location is radically wrong. In a majority of such cases the prevailing idea seems to have been to diminish the cost of the work by the introduction of a greater number and sharper curves than the circumstances required. In view of the rapid prosecution of the work they may have been admissible, but cannot justify a permanent adoption of the line as built.

While the road bed is designed to have embankments fourteen feet wide on top, with usual

slopes and cuts of not less than sixteen feet width of bottom, the higher embankments are not generally brought to the proper standard, being often incomplete, and in some instances the width on top is less than the length of the ties. Instances occur where the cuts have not been excavated to the depth designed, in consequonce of which the grades at those points are higher than was intended, in some cases reaching ninety feet per mile, when much easier grades are shown on the profiles. A considerable portion of the ties used in the Platte Valley were cotton wood, and they will have to be replaced by others of better timber. The ties probably average 2,500 to the mile. The track laying has been as well done as the exceedingly rapid construction of the road would allow. The only deficiency worthy of notice in the track laying is that on the curves the rails have not been bent to conform to them. Upon portions of the road ballasting is entirely wanting, and can only be supplied by transporting from the most accessible points by rail. The track has, without exception, been laid on the bare roadway without having been previously prepared to receive it by a covering of ballast. As a consequence, except where the embankments happened to have been built of gravel or other good material, the track is without ballast, the surfacing having been done by throwing up the necessary material for that purpose from the sides of the embankments themselves. The bridging on the line consists of stone culverts, girder and truss bridges and many varieties of trestle and pile bridges. The number of these structures between Omaha and the end of the track is 944, of which 250 are deemed permanent. The remaining 694, with an aggregate length of 43,717 feet, or nearly eight miles, will have to be replaced. Of these thirty-four are to be replaced by Howe truss bridges, erected on permanent stone abutments and piers, and 660 by box culverts, arches, or stone abutments, with girders or trusses of short spans.

The rolling stock consists of 117 locomotives, 27 passenger cars, and 1,799 baggage and other cars, besides hand cars and those suitable for special purposes. The accommodations for the care, maintenance and repair of the rolling stock, erected and designed, are likewise sufficient to meet current demands; but the process of enlargement in this department must likewise be continued for some time. Machine shops and engine houses are erected or in process of construction at Omaha, North Platte, Cheyenne, Laramie and Rawlins, with additional locomotive stalls at Grand Island, Sidney, Sherman, Medicine Bow and Bitter Creek. At Omaha there is also a shop for the manufacture and repair of cars. The shops already erected are well supplied with machinery and tools of good quality, and the crowded condition of these at Omaha sufficiently indicates the necessity for their enlargement or the early completion of others.

The sidings of the road are of ample length, from 2,000 to 3,000 feet connected at both ends, and nearly every station is supplied with a spur siding for its own special accommodation. The rails are of good quality, generally twenty-eight feet long and of American manufacture. They appear to wear well. Snow fences have been built at a number of the cuts in the Black Hills, but more will be required at this and other points on the road. They estimate the expenditure which will be required in order that the road, so far as built may be rendered equal to a fully completed first class railroad, as follows:

Changing locations to improve line and diminish curvature, at Black's Fork, Red Desert, Rawlings, Rock Creek, Red Buttes, Dale Creek, Granite canon and Hazard, not including cutting off large bends on Rock Creek	$200,000
Completing embankments to full width, filling trestleworks (six and a half miles) and ripraping	240,000
Completing excavations of cuts to grade on Black's Fork, Bitter Creek, &c.	20,000
Reducing grades between Omaha and Elkhorn to conform with condition on which change of line was approved	245,000
525,000 cross ties, to replace those of cotton wood timber, including transportation, removal of old ties and placing new in track, at $1	525,000
Ballasting, including transportation, lifting track, placing materials, surfacing and readjusting track and curving rails, 890 miles	910,000
Seventy abutments and 26 tier foundations, including excavations, piles, gullage and securing with riprap, at $1,500	144,000
30,480 yards masonry, in abutments and piers, at $15	457,200
8,450 lineal feet Howe's truss—viz., 49 spans, of 150 feet, and 11 spans of 100 feet, at $45	380,250
Supplying 121 openings of trestlework, of 50 feet length and under, between Omaha and North Platte, with permanent works of masonry and girders, at $500	60,500
Supplying 254 openings of trestlework, of 50 feet length and under, between North Platte and end of track, with permanent works of masonry and girders, at $900	228,600
Supplying 184 openings of trestlework, averaging 103 feet each, with permanent structures of masonry, and girders or short trusses, including foundations, $1,500	276,000
Renewing Dale Creek Bridge, or replacing same embankment and arched water way	100,000
Probable expenditure for additional water ways in Mary's Creek, Bitter Creek and other points not provided for, and renewing and enlarging stone culverts	100,000
60 new passenger locomotives for through travel on opening of road, at $14,000	840,000
Thorough repair of say one-third of locomotives used in construction and on hand when road is opened, say 50, at $3,000 each	150,000
44 new passenger cars for through travel on opening of road, $6,000	264,000
30 baggage, express and mail cars, $3,800	114,000
500 box freight cars, $900	450,000
50 additional locomotive stalls, $4,000	200,000
Completing shops at Cheyenne, additional shops at Bryan and enlarging shops at Omaha, with tools for Cheyenne, Rawlins and Bryan	350,000
Additional water stations and probable additional expenditures to secure full supply of water between Rawlins and Bitter Creek	80,000
Additional station buildings	75,000
Additional snow fences	50,000
Additional fencing against stock	30,000
Total	$6,489,550

The foregoing estimate is confined to the 890 miles of road from Omaha to the end of the track, and is a statement of the expenditures deemed necessary to complete the construction and equipment of that part of the road ready for the traffic to be thrown upon it when the line is opened to California.

The estimated cost of constructing and fully completing the road from Weber canon to the head of the Great Salt Lake is $3,515,550. The report closes as follows:

Taken as a whole, the Union Pacific Railroad has been well constructed. The general route for the line is exceedingly well selected, crossing the Rocky Mountain ranges at some of the most favorable passes on the continent, and possessing capabilities for easy grades and favorable alignment unsurpassed by any other railway line on similar elevated ground. The energy and perseverance with which the work has been urged forward and the rapidity with which it has been executed are without parallel in history. In the grandeur and magnitude of the undertaking it has never been equalled, and no other line compares with this in the arid and barren character of much of the country it traverses, giving rise to unusual inconveniences and difficulties and imposing the necessity of obtaining almost every requisite of material and labor and of supplies for its construction from the extreme initial point of its commencement. Deficiencies exist, but they are almost without exception those incident to all new roads or of a character growing out of the peculiar duties encountered or inseparably connected with the unexampled progress of the work.

A matter of the greatest importance and highly creditable to the able managers of the company is, they can all be supplied at an outlay but little exceeding that which would have obviated them in the first instance, but at the cost of materially retarding the progress of the great work. Under the circumstances it is much more a matter of surprise that so few mistakes were made and so few defects exist, than it would be had serious deficiencies been of more frequent occurrence, and the country has reason to congratulate itself that this great work of national importance is so rapidly approaching completion under such favorable auspices.

We are very respectfully your obedient servants,

G. K. WARREN,
Brevet Major General, U. S. A.
J. BLICKENSDERFER, Jr.,
Civil Engineer.
JAMES BARNES, C. E.
Special Commissioners on Union Pacific R.R.

Central Pacific Railroad.

The special commissioners recently appointed to examine the line of the Central Pacific Railroad have reported by telegraph to the Secretary of the Interior. The dispatch is dated Sacramento, December 3, 1868, and is as follows:

The Central Pacific Railroad is well and substantially built to Wadsworth on the Truckee River, 189 miles from Sacramento, except two bridges now nearly finished. Grades and curves are within the limits, and the locations are satisfactory. The rails weigh fifty-six to sixty-four pounds to the lineal yard. The ties are of sound timber and are of full size, and are laid at the rate of twenty-four hundred to the mile. The track is firmly laid and ballasted, the culverts and bridge foundations are of heavy granite masonry. The bridges are of Howe's truss pattern, well framed and ironed. The tunnels are sixteen feet wide. About twenty miles on the summit of the Sierra's are covered with snow sheds.

Passenger trains can run from fifteen to thirty miles per hour safely and smoothly. The equipment of rolling stock, engine houses and machine shops is fully equal to the demands of the traffic. Seventy-nine locomotives are running on the road

and eighty more on the way. On the new portion of the road along the Humboldt Valley the cross ties, bridges and rails are up to the standard. There are a few minor defects—not of vital importance—in culverts, drains, width of embankment and ballast, but these can be remedied at small cost when the hurry of pushing forward the road is over.

Heavy trains of rails, ties and fuel are running safely to the extreme end of the road, 445 miles from Sacramento. The road is being constructed in good faith, in a substantial manner, without stint of labor, material or equipment, and is worthy of its character as a great national work. The telegraph line is first class. The report is signed by Sherman Day, R. S. Williams, Major of Engineers United States Army, and Lloyd Tevis, Special Commission.

PACIFIC RAILROAD BONDS.

FIRST MORTGAGE THIRTY-YEAR GOLD OBLIGATIONS

OF THE

CENTRAL PACIFIC RAILROAD COMPANY,

SECURED BY AN ABSOLUTE FIRST LIEN

UPON THE

MOST DESIRABLE PORTION

OF THE

GREAT NATIONAL PACIFIC RAILROAD LINE.

DEAR SIR :—This great enterprise is approaching completion with a rapidity that astonishes the world. Less than 400 miles remain to be built to connect the Central Pacific Railroad with the Atlantic Lines. The greater part of the interval is now graded, and it is reasonably expected that the THROUGH CONNECTION BETWEEN SAN FRANCISCO AND NEW YORK WILL BE COMPLETED BY JULY NEXT.

The Western portion of the Line—known as the CENTRAL PACIFIC RAILROAD—besides having the largest settlement, the richest mines, and most valuable lands along its route, is also built and completed as a first-class Railroad, in all respects, being constructed directly by the company themselves, without the intervention of contractors, and in such a manner as to insure future stability, economy of operation, and the permanent value of the property.

The Report of the Special Commission of Experts, recently appointed by the President to examine the railroad and telegraph lines of the Central Pacific Railroad Company, telegraphed to the Secretary of the Interior, Dec. 8, is full and specific, and concludes as follows :

"Heavy trains of rails, ties, and fuel are running safely to the extreme end of the road, four hundred and forty-five (445) miles from Sacramento. The road is being constructed in good faith, in a substantial manner, without stint of labor, materials or equipment, and is worthy of its character as a great national work."

By the aid of the General Government, and valuable grants from California sources, the company have already met the bulk of their expenditures, and have sufficient Cash Resources to enable them to finish their work with the utmost vigor. The iron, and a liberal equipment for the five hundred miles now about completed, as well as the material needful for two hundred and fifty miles additional, are all bought, *paid for*, and at hand for use. The speedy completion of their entire line, and its success as a grand business enterprise, are no longer matters of hopeful promise, but are placed beyond all ordinary contingencies.

The business of the road, although in its infancy only, is without precedent. THE GROSS EARNINGS FROM JULY 1, TO DEC. 1, WERE UPWARD OF **$1,400,000,** IN GOLD, OF WHICH ABOUT ONE MILLION was NET PROFIT. This result was from local commercial business only, at a time when the company felt compelled to employ their available equipment, to a large extent, in transporting the vast amounts of supplies required to subsist 12,000 men, along a line of more than five hundred miles, and the material required for extending the track THREE HUNDRED MILES during the period, to the temporary neglect of the enormous freighting business seeking transit over the road. At a late date there were no less than 79 locomotives running on the road, 80 more on the way, and over 1,200 cars, to which the Company are constantly making large additions, so that by the time the immense tide of THROUGH TRAVEL AND FREIGHT ACROSS THE AMERICAN CONTINENT shall be ADDED TO THE NATURAL AND EXPANDING LOCAL BUSINESS, and the energies of the Company, with their immense facilities, can be devoted to the regular traffic, THEIR EARNINGS WILL BE ON AN UNEXAMPLED SCALE, and their securities be ranked AMONG THE MOST POPULAR IN THE WORLD.

The current Interest Liabilities upon the Bonded Debt, upon an average of three hundred miles in operation during the above period, were less than $350,000.

The issue of the Company's FIRST MORTGAGE BONDS is limited by Act of Congress, and will not equal one-third the cost and value of the property upon which they constitute the first lien. The greater part of this Loan is already marketed, and is held as a permanent investment by the capitalists of this country and Europe. We are authorized to offer a portion of the remainder at **103** AND ACCRUED INTEREST, IN CURRENCY.

The Bonds are of $1,000 each, bear Six per cent. interest, per annum, payable in the City of New York, IN UNITED STATES GOLD COIN.

☞As the accrued interest from July 1, is charged to the purchaser *in currency*, and the semi-annual coupons maturing Jan. 1 next will be paid in full in gold, there is an advantage in purchasing during the present month equal to the premium on the back interest.

The Company reserve the right to advance the price at any time, but all orders actually in transitu at the time of any such advance will be filled at present price. At this time they pay *more than eight per cent. upon the investment*, and have, from National and State laws, guarantees superior to any other corporate securities now offered.

We receive all classes of Government Bonds at their full market rates, in exchange for the Central Pacific Railroad Bond, thus enabling the holders to realize from 5 to 10 PER CENT. PROFIT, and keep the principal of their investments equally secure.

Orders and inquiries will receive prompt attention. Information, Descriptive Pamphlets, &c., giving a full account of the Organization, Progress, Business and Prospects of the Enterprise furnished on application. Bonds sent by return express at our cost.

Bankers and Dealers in Government Securities, and financial Agents of the C. P. R. R. Co.

Pacific Railroad.

We publish elsewhere a synopsis of the report of the Special Commissioners appointed by Government to examine the track, roadway, etc., etc., of the Union Pacific Railroad. Also a synopsis of the reply of the officers of the company. It will be seen that the reply controverts many of the allegations of the Commissioners. It is said that there is every prospect that the company will succeed in arranging its matters with the Government satisfactorily to both parties. The Secretary of the Treasury issued to the company on the 4th inst., $1,280,000 in bonds for another section of the road completed.

☞ The Secretary of the Treasury has issued bonds to the Central Pacific Railroad, amounting to $640,000, for the section commencing at the 390th mile-post, and terminating at the 410th mile, east from Sacramento. The bonds are dated Dec. 5, and, consequently, bear interest from that date.

☞ The Secretary of the Treasury has issued to the Union Pacific Railroad Company bonds to the amount of $1,280,000 for another section of the road completed. It is understood that there is every prospect of a satisfactory arrangement of matters between the company and the Government.

☞ The Milwaukee and St. Paul Railroad Company are surveying the route for a new track to connect the Northern Divison with the Prairie du Chien Division depot. The route surveyed is outside of the city, the connection with the Northern road being made at Granville station.

☞ The Rockford, Rock Island and St. Louis and St. Louis, Alton and Rock Island Railroad Companies have been consolidated.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

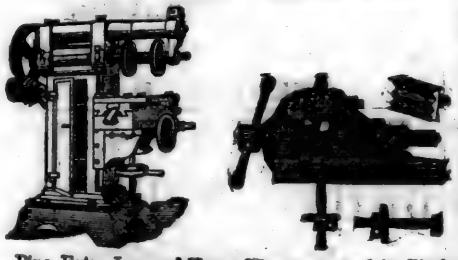
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

VAN ANDEN
SWAGED

Patented Sept., 18, 1866.

WROUGHT IRON

RAIL CHAIRS.

RAILROAD SUPPLIES.

The VAN ANDEN CHAIR recommends itself above all others now in use, having continuous base and lips, the grain of the Iron running across the line of the Rail, giving it additional strength over all others now in use, with no liability to split. The spike holes being punched within the edge of the lip, admits of one half the Spike being recessed back in the solid metal, which cannot be done in the rolled chair.

Notice to Contractors.

GENERAL OFFICE OF THE RONDOUT AND OSWEGO RAILROAD COMPANY, Rondout, N. Y., November 13th, 1868.

Proposals will be received at this office until January 2d, 1869, for the Grading and Masonry of the Mountain and Delaware Divisions of this Road. The Mountain Division consists of 23 sections containing 23 miles, commencing at Phœnicia, in Ulster County, and extending to Margaretville, in Delaware County. The Delaware Division consists of 29 sections, containing 29 85-100 miles, commending at Margaretville, in Delaware County, and extending to Harpersfield Centre, in Delaware County. Map, plans, and specifications will be furnished on and after December 1st 1868, at the Chief Engineer's Office in Rondout. All other information furnished at this office.

6t48 THOMAS CORNELL, President.

SALE OF THE UNITED STATES MILITARY ROLLING MILL at Chattanooga, Tennessee.—The Directors of the South-Western Iron Company will receive proposals for the purchase of their Rolling Mill at Chattanooga, Tennessee, erected by the United States authorities, and greatly enlarged and improved since it became private property. The land (comprising 150 acres) and the railroad are now held in fee simple, with brick works, saw-mill, dwellings, and all the appurtenances required for the production of 300 tons of railroad iron per week. The superior character of the works and their admirable location are well known, but a detailed description can be had on application to the undersigned.

The proposals will be opened on the 31st day of December, 1868, and if none satisfactory to the Directors are received, the property will then be sold at public auction, in the City of New York, on WEDENSDAY, the 3d day of February, A. D. 1869, to the highest bidder.

Parties desirous of examining the works will apply to GUSTAVUS W. SMITH, General Manager of the Works, at Chattanooga, and further information may be had on application to the undersigned, at No. 17 Burling-slip, New York.

ABRAM S. HEWITT, Treasurer.
5t48 EDWIN F. BEDELL, Secretary.

To All Whom it may Concern.

Notice is hereby given that the Mead Rubber Company of the City of New York, a corporation duly organized, under and in pursuance of an act of the Legislature of the State of New York entitled: "An Act to authorize the formation of corporations for Manufacturing, Mining, Mechanical, or Chemical purposes," passed February 17th 1848, and the several acts amendatory thereto, will apply to the Legislature of said State, at the next session thereof, for a special act of said Legislature, altering or amending the charter of said corporation, by changing the name of said Company from the "Mead Rubber Company," to the "Star Rubber Company."

Dated New York, November 4th, 1868.

For the Company,
JOSIAH J. BURGESS, President.

New York Saturday, December 19, 1868.

Albany and Susquehanna Railroad.

It is expected that this road will be opened throughout its entire length from Albany to Binghamton, a distance of 140 miles, on the 24th inst. Upon the completion of the road there will be due the company from the State the sum of $200,000. The amount of capital stock paid in September 30, 1868, was $1,861,393 18. Funded debt, $2,802,000. Floating debt, $560,000. The total cost of road and equipment, September 30, 1867, was $5,415,929 28, of which $445,102 08 was for interest. During the past year the sum of $753,170 92, exclusive of interest, has been expended, of which $399,307 65 was in the engineer department, the remainder, $353,863 27, being made up of payments on account of iron, rolling stock, etc. The total cost, exclusive of interest, on the 30th of September, 1868, was $5,564,757. The estimated cost to complete the road, on the 1st of August, exclusive of any additional rolling stock, was $592,920; which added to the above, gives $6,157,677 as the total cost, exclusive of interest.

The receipts from operation of the road during the year ending Sept. 30, 1868, were $535,822 64, and the transportation expenses, $308,003 85—leaving a balance of $227,818 79, out of which there has been paid for interest, $174,467 95, and for U. S. tax, $6,069 92. The remainder, amounting to $47,280 92, has been carried to surplus fund. The total amount of surplus fund is now $406,829 82. The value of fuel and supplies on hand, Sept. 30, 1868, was $48,526 11.

The total earnings of the road since it was opened to Schoharie, 35 miles from Albany, on the 16th of September 1863, have been $1,878,839 89.

Two branches have been constructed, one from Central Bridge to Schoharie Court House, 12 miles in length, and the other from Colliers Station to Cooperstown, about 16 miles. It is proposed to construct another branch, about 14 miles in length, from Cobleskill to Sharon Springs, and thence to Cherry Valley, 6 miles further.

Communication is already had with the coal regions through the Delaware and Hudson Canal, which it meets at Ninevah, and preparations are being made to carry the track on to the Scranton district soon after its completion to Binghamton. It is also proposed to extend the road to Troy and Whitehall, which will perfect a connection between Binghamton and Montreal.

School of Mines, Columbia College.

The School of Mines proposes to establish, in connection with its Metallurgical Department, a Bureau of Statistics relating to the working of different ores in this country. Its efforts in the first place, will be directed to the collection of statistics of the Blast Furnaces, with the view of having, in this city, some place where reliable information can be had with regard to the working of iron. These statistics will be used to establish general principles which will be announced in the lectures on Metallurgy.

The information required, is as follows: name and location of works, names of proprietors, number of furnaces, total height, height of bosh, height of hearth, height of tuyeres, diameter of bosh, diameter at the tuyeres, number of tuyeres, diameter of tuyeres, hot or cold blast, temperature of the blast, pressure of the blast, kind of ore, yield of the ore, kind of iron—white, gray or mottled—kind of fuel, quantity of fuel per ton of cast iron, production of each furnace in tons of 2240 lbs. by 24 hours. It is important to know the general form of the furnace, whether it is egg-shaped, the curve being continuous, or whether it is made up of straight lines. A sketch of the shape of the furnace will also be acceptable.

We are in receipt of a circular which has been prepared with a view to eliciting the above information, which the managers of the different furnaces to whom it may be addressed are respectfully invited to fill up and return.

It is proposed with the aid of those engaged in the manufacture of the different metals, to form at the School of Mines a Bureau like the Bureau of Mineral Statistics connected with the Government's School of Mines in London, in view of having in this city as complete a collection as possible of the Statistics of the Manufactures of Metals in this country.

Atlantic and Great Western Railway.

This road has been leased by the Erie Railway Company for a term of twelve years, upon condition of the Erie Company paying 30 per cent. of the gross earnings of the Atlantic and Great Western, or a minimum of $1,800,000 yearly in event of the 30 per cent. of the earnings falling below that amount. The Erie Company engages to keep the track, stations and rolling stock of the Atlantic and Great Western in repair, and gives to that company the option of renewing the lease at its expiration. The arrangement will give the Atlantic and Great Western Company an amount more than sufficient to cover the interest upon its bonds due under the recent arrangements by the bondholders. The transfer of the Atlantic and Great Western to the control of the Erie Railway Company, took place at Meadville, Pa., on the 12th inst. The road is to be known in future as the Atlantic and Great Western Division of the Erie Railway.

It is stated that $2,000,000 have been spent by the receiver of the Atlantic and Great Western Railway, during the past sixteen months, in placing its track, road bed and rolling stock in the most perfect condition. Important improvements and renewals have been, during the period named, continually in progress. Two hundred miles of new rails, weighing sixty-five pounds to the yard, of the best quality and most improved pattern, laid with the celebrated fishplate joint, have taken the place of old ones, rendering the track like one

continuous rail and preventing the jarring and noise so exhausting and disagreeable to passengers. Five hundred thousand new oak cross ties have been laid; new bridges, durable and substantial, have been built; trestle works have been replaced by solid earth and stone embankments, and new day cars and sleeping coaches have been placed upon the line. Mr. L. D. Rucker is to be retained as Superintendent of this division.

Portland, Saco and Portsmouth Railroad.

The earnings of this road for the years ending May 31, 1867 and 1868 were as follows:

	1867.	1868.
From passengers	$320,653 66	$296,441 37
" freight	189,844 41	195,092 88

		84,206 44
		$322,183 04
Estimated increase of surplus account in May		7,971 97
Total, above		$330,155 01

During the past year, about four hundred tons of re-rolled iron were laid down, and twelve thousand sleepers put into the track, which taking into consideration the largely increased service required of it by the running of additional passenger and freight trains, is a much less amount than could be reasonably expected.

Owing to the continuous and extreme cold weather of the past winter, and to the fact that but little snow had fallen to protect the earth, the frost penetrated the ground to a great depth, rendering the road bed unyielding, and solid as a rock, thereby subjecting the track and rolling stock to extraordinary and unusual wear and strain, consequently a larger amount of iron will be required the present season than heretofore. Three hundred tons have already been laid in the track this spring, and some five hundred tons in addition, will be needed during the year. This amount of iron, and about twelve thousand sleepers, will, it is believed, keep the track in good and safe condition.

The Southerly end of the arch at Mousam River has been completed in a very permanent and thorough manner, and as there seems to be no immediate necessity for further repairs on the Northerly end, operations at that point are for the present suspended.

The buildings and other improvements near the westerly end of the Portland bridge, have progressed as rapidly as circumstances would admit, and with a due regard to permanency and economical construction, and it is believed that the coming summer will witness the entire completion of these long needed improvements.

New and suitable passenger and freight houses have been built at Oak Hill; and the depot buildings at West Scarborough have received the necessary repairs.

The motive power of the road has been increased by the addition of two new engines from the works of Hinckly & Williams, Boston. Both seem well adapted to the purposes for which they were obtained.

The work in the machine and repair shops has been carried on promply and economically, and the rolling stock kept in good and efficient condition to answer the demands made upon it.

The running of trains and the general operations of the road the past year have been characterised, as in former ones, by freedom from accidents to passengers, promptness in the arrival and departure of trains, and the harmonious and energetic working of both officers and employees for the best interests of their employers.

We believe that the general condition of the road, the track, bridges and rolling stock, will compare favorably with any other in New England. Its constantly increasing business, particularly in the freight department, demands a corresponding outlay. These demands have been promptly met and supplied in the past, as they doubtless will continue to be in the future, until this line of road is advanced to the highest business capacity of which it is capable, and which its advantageous location and important connection, insures at no distant day.

The improvements now in progress, and to be made at Portland, comprised in new depot at that point, &c., &c., are not to be classed as repairs; they are permanent and needed additions to the capital of the road, and the expense should be carried to construction account. Considerable expenditure will be required in the completion of these accommodations and improvements, which cannot be promptly paid out of the current earnings of the road.

Two modes of raising the money to defray the expenses of these improvements, are open to the corporation.

One of these would be, to receive the money of the Lessees, according to the conditions of the Indenture. The objection to this method is, that it would be practically carrying a debt, by the corporation, for improvements, which should be paid for with capital. Besides, it might not be desirable for the Lessees now, to advance the money, and at the termination of the lease or contract, it might not be convenient for this corporation to refund it.

In any view of the subject there would be inconvenience and disadvantage, in carrying for an indefinite period, a debt which had entered into the permanent improvement of the road, and which should take the form of capital.

The natural, and in a financial point of view, the soundest and safest mode of raising the money, would be by an increase of capital, and the sale of shares, equal in amount to the permanent additions and improvements to the accommodation and property of the road.

This is a question which must be determined by the stockholders. And in order to afford them their full choice of the modes just cited, we have procured from the Legislature of Maine, an act, authorising an increase of capital of $500,000, which would make the capital stock $2,000,000.

It was stated in our last Annual Report, that a suit had been instituted by this Corporation against the Boston and Maine Railroad Company to recover about thirty one thousand five hundred dollars, with interest from June, 1865.

This action is upon a vote of the Directors of the latter corporation Dec. 17th, 1864. The offer contained in which vote, was accepted by the stockholders of this corporation, at their annual meeting June 5th, 1865.

It is claimed that by this vote the Directors of the Boston and Maine Railroad Company offer to this corporation, to pay its stockholders the above amount, subject to the condition that the Boston and Maine R. R. Co. should, on such payment, become exonerated from whatever liability it might be under to pay its share of those semi-annual dividends, in gold or silver coin, of which a payment in coin was claimed.

This suit is still pending.

This case was tried before a single justice at Boston, in the latter part of last April, and owing to the fact, that the questions involved therein, are for the most part questions of law, the case was taken from the jury, and reported to the full bench of the Supreme Court of Massachusetts.

It is not probable that a final decision will be reached before the coming winter.

Number of miles run, 258,977; expense per mile, $1.23. Av. receipts per mile, $2; per cent. of receipts used in expenses, 61.5. Number of passengers carried, 341,082.

TRIAL BALANCE, APRIL, 1868.

Kennebec and Portland Railroad	$100,000 00
Wharf at Portland	33,574 11
Property	3,417 80

Superintendent.—FRANCIS CHASE.

☞ The Camden and Atlantic R. R. Co. are in want of 15,000 White Oak or Chestnut sleepers, to be delivered at Cooper's Point, Camden, N. J., as follows: 5,000 by the 1st of April, and the remainder by June 1, 1869. Address G. W. N. Custis, Gen'l Supt.

Commerce of New York.

The foreign imports at New York for the month of November, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$8,198,013	$9,707,521
Do. for warehousing....	6,414,609	7,050,229
Free goods.....	1,082,066	1,323,254
Specie and bullion.....	181,319	220,316
Total entered at port...	$15,871 007	$18,301,320
Withdrawn fr. wareh'use	6,378,248	6,104,542

The foreign imports at New York for the eleven months from January 1st, were:

	1867.	1868.
Entered for consumpt'n.	$121,124,673	$120,278,048
Do. for warehousing...	104,825,824	99,282,123
Free goods.....	10,279,075	10,916,677
Specie and bullion.....	3,043,323	6,693,899
Total entered at port..	$239,272,895	$237,170,747
Withdrawn fr. wareh'se	101,573,817	94,361,534

The revenue from customs at New York, were:

	1867.	1868.
1st quarter.....	$32,916,085 09	$28,026,042 14
2d quarter.....	26,438,603 81	27,424,706 51
3d quarter.....	33,840,898 17	34,150,298 97
In October.....	8,682,889 05	10,059,277 84
In Nov.....	6,931,212 90	7,309,086 88
Total 11 months.	$108,809,689 02	$106,969,411 84

The exports from New York to foreign ports in the month of November, were:

	1867.	1868.
Domestic produce.....	$20,056,540	$13,681,126
Foreign free goods.....	8,515	9,768
Do. dutiable.....	613,460	517,907
Specie and bullion.....	1,733,261	1,181,085
Total exports	$22,408,776	$15,589,881
Do. exclusive of specie.	20,675,515	14,408,796

The exports from New York to foreign ports for eleven months from January 1st, were:

	1867.	1868.
Domestic produce.....	$164,768,232	$141,543,298
Foreign free goods....	353,961	561,594
Do. dutiable	7,609,846	6,273,925
Specie and bullion.....	44,947,400	69,123,694
Total exports	$217,679,439	$218,202,511
Do. exclusive of specie	172,732,039	149,078,817

Illinois Central Railroad.

The statement of this Company for the month ending November 30, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold.....	10,023.11 for	$102,763 87
Acres Int. Fund Lands sold.....	800.00 for	10,623 40
Acres Free Lands sold..	1,930.07 for	25,259 15
Total sales during month of November, 1868..	12,753.18 for	$138,646.42
To which add Town Lot Sales.....		1,335 00
Total of all.....	12,753.18 for	$139,981 42
Cash collected in November.....		$290,844 76

TRAFFIC DEPARTMENT.

Receipts from	Freight.....	$372,391 00
do.	Passengers.....	128,966 65
do.	Mails.....	6,358 33
do.	Rent of Road.....	4,000 00
do.	Other Sources.....	90,000 00
Total Receipts in November, 1868....		$601,715 98
Total Receipts in November, 1867....		$658,791 35
Estimated earnings in the month of November, on the D. & S. C. R. R., not included above.....		$98,175 19
Corresponding month of 1867.....		$106,000 00

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of November, as compared with the same period of the year 1867:

	1868.	1867.
From freight.....	$452,511 96	$435,186 47
" passengers.....	203,743 46	229,697 29
" express matter...	9,862 50	8,307 00
" mail	7,825 00	7,825 00
" rent of railway...	7,083 33	7,083 33
" miscellaneous....	1,000 00	2,499 05
Total.....	$682,026 25	$690,598 14
Expenses	417,204 07	429,949 80
Net earnings.....	$264,822 18	$260,648 34

This shows a decrease in earnings of $8,571,-89; with a decrease in expenses of $12,745 73—making the increase in net earnings, $4,173 84.

The earnings and expenses. from January 1 to November 30, compare as follows:

	1868.	1867.
Earnings	$7,294,842 57	$6,668,399 13
Expenses.....	4,431,427 16	4,413,886 54
Net earnings.....	$2,863,415 41	$2,254,512 59

This shows an increase in earnings of $626,443 44; with an increase in expenses of $17,540 62—making the increase in net earnings, $608,902 82.

Cheap-Freight Railways.

One of the best indications of the day, especially for New York, New Jersey and the New England States, is the proposed "through freight railway," now projected to run from Perth Amboy through to the anthracite coal fields of Pennsylvania. The report connected with the incipient survey of this route is a very able document, as it could not well be otherwise considering the great merit of the projected enterprise. There are some estimates contained in the report which are of peculiar interest. Now that coal has been carried up to $11 per ton, with an unlimited supply in less than one hundred and thirty miles from the City of New York, it may be interesting to learn that coal can be transported over the proposed road to Perth Amboy, at 79 cents per ton—the distance of 127 miles.

It is maintained by the National "Cheap-freight Railway League," that ponderous freights can be transported for 55 cents per ton for each 100 miles, by adopting the plan of management advocated by that association of gentlemen. Mr. Galt, one of the prominent Public Economists of England, says—

"We can buy coal at the pit's mouth and transport it to the metropolis for seven or eight shillings ($2.00) per ton; but, as a general rule we pay four times that price in London. The price the poor pay for small quantities they are able to purchase at a time during a severe winter, the extent to which they are cheated, and the sufferings they in consequence endure are matters every one are well acquainted with. Monopoly charges them three or four hundred per cent. in ordinary times, and in extraordinary, as much as it can lay on."

Coal Companies have frequently been formed in New York and Brooklyn, based on the project of supplying fuel at cheaper rates. They have all failed, however, for the simple reason that they could not obtain transportation, there being an interested connection between those furnishing the supply and the monopoly of transportation. Under this state of things coal in winter has been carried up to enormous prices, while the great bulk of coal lands were excluded from all advantages. The unjust rapacity of combinations has goaded the excluded owners of coal lands into seeking for some efficient remedy. The people of this city will be happy to learn that the coal interests of Pennsylvania are opening a way to disenthrall the five or six millions of people from their dependence on this hitherto merciless coal monopoly. We trust that this movement of the Pennsylvanians will arouse a co-operative spirit in New York, New Jersey and New England, and that the projectors of the enterprise will not be permitted to lack for capital to carry it out, and to put it on principles of management that shall take away the power of the present combinations.

It is estimated that on a coal thoroughfare, such as that contemplated by the bill of Senator Nye, and now pending in Congress, ten or fifteen millions tons of coal could be transported annually. Our friends in Pennsylvania may meet with obstructions by the refusal of State Legislation, in which event we recommend that they go directly to Congress. The great fuel question is too important to be kept under the control of mercenary interests.

Baltimore and Ohio Railroad.

At the regular monthly meeting of the directors of this company held in Baltimore on the 9th inst., JOHN W. GARRETT, ESQ., was unanimously re-elected President for the ensuing year. Upon taking the chair Mr. Garrett addressed the board as follows:

GENTLEMEN: For the past two years I have expressed my desire to retire from the presidency of the Baltimore and Ohio Railroad Company. Circumstances affecting me personally, especially in a great family bereavement suffered during that period, have thrown upon me heavily-increased duties, and I have felt that after ten year of laborious and earnest efforts in behalf of the great public interests connected with the company, I might be permitted to retire from the post. For some months past I have renewed the statement of the design which was previously indicated. I was prepared to accept a place in the board and continue as long as might be desired a colaborer in the direction, to accomplish the great objects the company still have in view. This desire has been met with a universal protest on the part of leading citizens, and appeals from all the interests connected with the road to me to remain your executive. It has again been urged that I might be more useful than another in perfecting the grand plans of the company which have been inaugurated and are being carried out by the present administration.

Your committee has announced that you have again unanimously chosen me for the presidency. My anxiety is as cordial and warm as at any other former period to assist in developing the interests of this community, and of the great cities and vast territories with which the road and its branches have been and are being connected, and in response to the arguments used, I feel compelled again to undertake the onerous duties of the office. I yield to these solicitations although convinced that the partiality of those with whom I have been so long associated in managing the vast concerns confided to this board causes them to err as to the importance they attach to the continuance of my services. I cannot, however, but profoundly appreciate the high honor you confer upon me.

It will be my desire, as expressed to those with whom I have conferred on the subject, to decrease to the greatest practicable extent, my relations to the detail of management, and to confine my attention still more than heretofore to the leading subjects of policy and connections, and to the furtherance of those enterprises which are

deemed of high moment. The ability and energy of the vice president, Mr. King, have aided greatly in the past, and will doubtless assist largely in the future, in performing many duties which would otherwise attach to the executive.

In undertaking, for the eleventh year, the responsibilities of the office, I do not fail to appreciate the policy of the company and the grand objects it has in view. To aid in their promotion and to achieve such objects, should gratify the highest ambition. In the past your stockholders have sustained, with unanimity, a rigidly economical and careful management, with tariffs so low as to build up all the interests of Baltimore and our terminal cities, as well as the vast territories through which your roads pass. This system has enabled you to expend, under the present administration, after making moderate dividends, more than fifteen millions of dollars, to perfect your road with double tracks, with iron bridges, and the requisite machinery and buildings; to aid in opening the line through the Washington county road to the Cumberland Valley of Pennsylvania; through the Winchester and Potomac road to the Valley of Virginia; through the Parkersburg road to the Ohio river and to Marietta and Cincinnati; and through Bellaire and the Central Ohio Road to Columbus, thus, connecting also with numerous radiating lines from great centres of railway improvements. It has enabled you, too, to organize—thus advancing the interests of all regions with which you are connected—lines of ocean steamships to Liverpool and Bremen, and to assist in establishing lines of steamships between the leading cities upon the Southern coast and Baltimore. By economy and prudence, and persistent energy, this vast sum has been expended, enhancing and developing grand public interests without any strain upon the finances of the State or city, and these expenditures have produced rapidly, and with almost magic power, the largest reactive and most beneficial fruitions.

Whilst, however, population and wealth and the prosperity of every mineral, mining, manufacturing, agricultural and commercial interest are expanding around you with marvellous vigor, to maintain our progress will require the best and most determined exertions. The Pittsburgh and Connellsville road—a line of singular power and value—is to be completed. After years of misrepresentation—after attacks in every form in courts and in the Legislature of Pennsylvania—the decisions at all points—confirmed with great unanimity by the people—have been against the Pennsylvania Railroad Co., and in favor of this great enterprise of the Baltimore and Ohio Railroad Co. The contractors are now at work upon this road, and you have decided that it shall be pushed rapidly to completion.

The Pittsburg and Connellsville road will open a superior line to the great, opulent and rapidly-improving city of Pittsburg, and through it to the entire Northwest.

The minimum grade for 84 miles of this excellent line, will be but 26 feet to the mile, and for the remainder of the distance no grade will exceed 52 feet for the entire east bound traffic.—You will thus furnish for the immense agricultural area and the vast populations of the Northwestern States their *shortest and cheapest path to the sea.* You will divide at Pittsburgh with the Pennsylvania road the immense business of those fertile and extensive regions; and, prosperous as has been Baltimore, under the influence of your previous enterprises, the results from this work will prove even greater and more striking. Business, wealth and population will flow from this source in a mighty volume to Baltimore.

During the present month the arching of the twenty three tunnels upon the Parkersburg Branch road (18,103 feet in length) will be completed. But enormous expenditures are required to complete the great bridge in progress to connect, by this economical transit, Southwestern Ohio, through the Marietta and Cincinnati road, with your line. Equally large expenditures are required to complete the similar work connecting the main stem with the Central Ohio road.

The construction of the Winchester and Strasburg road has been commenced; and will be completed chiefly with capital which must be furnished by this company. The opening of the line through to Harrisonburg will occur at no distant day, and the upper valley of Virginia is full of enthusiasm and energy in arranging for the extension of the line from Harrisonburg to Salem. This great work will develope a region of extraordinary fertility, of mineral and other wealth, and will furnish to immense regions their *shortest and cheapest path to the sea.* Judicious aid should be extended by this community to promote the construction of a work which must prove so valuable and so useful.

A costly enterprise, largely for the benefit of the national capital—the Metropolitan road—is in progress. You will remember that by this line the distance from the Point of Rocks to Washington is rekuced from 91 to 42 miles, and that by this expensive, though very direct avenue, the city of Washington will be placed in most advantageous relations with your entire system of improvements, which have cost more than fifty millions of dollars. By this road, in connection with the Pittsburg and Connellsville line, the distance is reduced 74 miles from Pittsburg and 128 miles from Cincinnati to Washington, as compared with the shortest lines to that city by the Pennsylvania road.

You furnish betwixt Baltimore and Washington a first-class double track road, which has been worked from its origin with a smaller proportion of accidents than any road in Europe or America. It performed throughout the war a transportation, at times, scarcely equalled in the history of railways, with singular freedom from delays and accidents. In connection with the Main Stem of the Baltimore and Ohio road, the Washington Branch proved a very sheet anchor of power and efficiency in the late terrible struggle for the preservation of the Union.

Commencing on the 19th of April, 1861, at the imminent peril of the lives of its officers and employees, it received the Massachusetts Sixth Regiment, held the train until those whose movements had been interrupted had arrived, and forwarded every soldier of that regiment who reached Camden Station with safety to Washington. Subsequently, after failures to protect it rolling stock and property, it enlarged its capacity, and during the war, with a celerity, a safety and a success that astonished the leaders who controlled the movements of our armies, it met every requirement of the government.

When the history of the late war is written it will be found that the services of the Baltimore and Ohio Railroad Company, marked by perfect fidelity to its engagements and untiring energy—moving great armies through territories frequently raided upon—by which movements remarkable results were achieved, will prove to be among the most conspicuous rendered in aid of the government. Such were these services, constant, weighty, of vital importance, requiring the greatest thoroughness and largest resources, that they elicited frequently the highest approval and commendation of the lamented Lincoln.

The Secretary of War throughout that perilous period, and the most illustrious generals of our armies, all knew, and appreciated, and still appreciate these invaluable services. The great historic facts connected with the continuous and important relations of the Baltimore and Ohio Railroad Company crush the misrepresentations of the hostile and untruthful to their deserved nothingness.

As rival interests have constantly indulged in the grossest misstatementr and calumnies on the subject, it is proper now to state, that for all the vast amount of the company's property, the engines and cars, the buildings, the bridges and the tracks of the company destroyed during the war by the Confederate armies, amounting to many millions of dollars, no payment has been made by the government, nor has any compensation yet been made for large amounts of property destroyed by our federal forces for strategic purposes.

Rival interests, with an equally reckless disregard of truth and fact, have continued to assert that the Washington Branch road received a dollar and a-half per passenger for its military transportation. The fact is the company reduced its rate to $1 10 and $1 per passenger, and carried all through freight to the West at the lowest rates at which competing lines would agree to transport it. In no instance did it receive for work upon its line, whilst required constantly to make, at its own cost, the most expensive repairs and to frequently reconstruct the road, more than its ordinary tariff rates. Soldiers' tickets were also furnished throughout the war at largely reduced rates, and much free travel was accorded constantly in cases of peculiar difficulty, and half fare tickets were liberally furnished to parties engaged in patriotic labor.

I have heretofore had occasion to call attention to the strange course pursued by parties who, professing to act for the interests of the city of Washington, allege that that great city is dependent solely upon a single line of railway. Why misrepresent thus grossly the varied, extensive and economical transportation facilities of the city of Washington. They ignore the great lines of improvements and means of transportation which not only exist, but are daily availed of by the population of that city.

The Chesapeake and Ohio Canal—a work costing more than twenty millions of dollars—extending 184 miles into the western portion of Maryland, which brings the bituminous coal of the Cumberland region to Washington at a lower cost than it can be transported by any railway, is utterly ignored; and yet the tax-payers of Baltimore have paid the interest on one-half of this twenty millions of dollars since the construction of that canal. The great advantages flowing from this communication, from which no revenue has ever been derived by the State of Maryland—its whole earnings being used for repairs—should be spread before the public as one of the bases of the prosperity of Washington. It is well known that supplies of fuel, breadstuffs and all agricultural products are obtained most economically by this channel.

The direct line of railroad from Washington to Gordonsville, connecting at that point with the Virginia Central (now styled the Chesapeake and Ohio) railroad, and to Lynchburg, connecting at that point with the Virginia and Tennessee road, (a great and effective trunk line,) and thence with the entire system of Southern railways, is also ignored, a line of the highest utility to Washington, both for furnishing cheap supplies and commanding a large passenger and other business, the profits of which are distributed in that community.

Why ignore the noble Potomac river, presenting a navigation unsurpassed on the continent? Ignore it, too, while first-class steamers connect by a double daily line, via Aquia Creek, the business of Washington with the Richmond, Fredericksburgh and Potomac railroad! Why ignore the fact that a regular line of steamers from Baltimore constantly brings freight to Washington at at the lowest charges which can be afforded by water? Why assert that there is a difference of four dollars per ton in the price of coal betwixt Washington and Baltimore, and that difference is created by charges of the Baltimore and Ohio road, when *the whole charge* by the Baltimore and Ohio road is but *a dollar and sixty cents per ton,* and when the fact is that the supplies of authracite coal are chiefly brought down the Tide Water canal—another Maryland improvement—taken up the Potomac river, and delivered at the low rates which the water, the cheapest of all avenues of transportation, enables the boatmen to afford?

The absurdity of the statement made of the losses of citizens of Washington of MILLIONS by the alleged charges of the Washington Branch road will be appreciated when the fact is stated that for the past three years the whole freight business to and from Washington amounts to less than $125,000 per year. It is needless to state, also, that its charges are strictly within its char-

tered limits, and generally largely less than authorized by law.

As evidencing the liberal policy of the Baltimore and Ohio Company, it charge for passengers from the West to Washington, and Washington to the West, (notwithstanding the thirty-one miles greater distance,) only the same rate as is charged to and from Baltimore. From the facts and tariff rates adduced, the many statements regarding oppressive charges are so palpably and recklessly contrary to truth as not to be worthy of serious notice or refutation.

The immense and rapid growth of the population of Washington certainly proves that it possesses attractive and commanding facilities and advantages. It is true that another road is needed from Washington.

On examination of the statements made, which can be verified by all who take the trouble to make inquiries, it will be seen that but one road is really needed, and that is a road which will intersect the Main Stem of the Baltimore and Ohio Company, giving the city of Washington the shortest possible access to the Southwest and the West and the Northwest—a line which will reduce, in connection with the Connellsville road, the distance from Pittsburgh and the Northwest so largely—a line which opens the Cumberland Valley of Pennsylvania, the Valley of Virginia, the western counties of Maryland, West Virginia, Ohio and the great central West, by the *shortest and cheapest practicable route.*

This subject was fully discussed two years since in Washington, and although prejudices engendered by rival interests and misrepresentations then existed, yet the facts were so clear and commanding that the people of Washington and their representatives, the mayor and city councils, were anxious for the construction of the road from Washington to the Point of Rocks, as the great, reliable and practicable remedy for all disadvantages under which they may have suffered in their Western connections.

The absurdity of the charge of excessive rates upon the Washington road will be seen when it is stated that the rate is but eight cents per 100 lbs. on fuel, ten cents per 100 lbs. on goods of the lower class, and but 12½ cents per 100 lbs. on goods of the higher class. The bulk of transportation is at 10 cents per 100 lbs., and the moderate character of this charge will be understood when it is known that leading railways from New York city charge, besides their divisions by mileage of the earnings on goods, *five cents per 100 lbs. for terminal expenses alone.* One half of the whole charge made by the Baltimore and Ohio road on such freight, is thus charged from the Empire City, when the 10 cents per 100 lbs. by the Washington Branch road *includes the terminal expenses,* embracing labor at the stations in both Baltimore and Washington.

With the enlarged and comprehensive views which have distinguished this board, whilst the company owns and has in successful operation a first-class double tracked road from the Point of Rocks via the Junction to Washington, it yet determined to afford to that city, to members of Congress, to all the great local and national interests that will be so favorably affected, the advantages of an additional and the shortest practicable line.

In the midst of the expenditure of more than three millions of dollars, which will so immensely benefit that city, the investment being influenced by the best feeling on the part of this board and this community to aid the progress of Washington, to advance its interests, to regard it as one of the great eastern *termini* of our railway system, when not one fact can be adduced to show other than a most friendly disposition to co-operate in building up the permanent prosperity of that city, we find the mayor of Washington absolutely *arresting the workmen* employed in constructing the Metropolitan road, and pursuing this course notwithstanding the company was acting under the direct authority of the Congress of the United States and mayor and city councils of Washington. His honor, the mayor,

——"Dressed in a little brief authority,
Most ignorant of what he's most assured,
Plays such fantastic tricks as make"—

himself rediculous, and cause the courts to intervene to maintain clear rights and to protect great public interests. In order to arouse popular prejudice, the most extraordinary misstatements are promulgated as facts, and unfounded allegations of oppression and injustice on the part of the Baltimore and Ohio Company are spread constantly before the people. Well might we say—if without irreverance—as was said to the men of Athens, who inscribed upon their altar, "To the unknown God"—well might we say to his honor Mayor Bowen, and those who are associated with him in hostility to the Baltimore and Ohio road and its great enterprises, which so directly act upon and which *must* advance the prosperity of Washington, "Whom ye ignorantly worship, him declare *we* unto you."

It needs but a calm examination of the subject to convince every citizen of Washington and every member of Congress that the Baltimore and Ohio Company has pursued and is pursuing a broad, comprehensive, liberal and national policy. As during the war it furnished gigantic facilities to the government in perpetuating the Union, so now it devotes its capital, its energies, it resources and its credit to extending lines of railways through Maryland and Pennsylvania, and West Virginia, and Ohio, and Virginia and Tennessee, and thus spreads those iron arms which assist in binding together indissolubly the interests of the people in maintaining a common government.

It asks but a dispassionate consideration, and the company feels that instead of attack and abuse, it will receive approval, support and increased strength. In times past accusations were made that, having built the main stem, the Baltimore and Ohio Company sought only to obtain the Parkersburgh road to crush it; that when it obtained the Central Ohio road it designed to neglect the Marietta and Cincinnati road, and as was alleged in Pennsylvania, when it secured influential relations with the Pittsburg and Connellsville Company, that its only object was to prevent the building of that road; yet as the gradual developements of its policy, of its honesty, persistency and good faith have been exhibited in each case as calmly, firmly, with unflinching determination, it carries forward all these improvements, bearing as each does so largely upon the interests of the communities with which the works are connected---as great facts finally govern the judgment of the people --so have the misstatements and hostilities of the Baltimore and Ohio Company melted away even as the snows of winter disappear under the genial rays of the sun of spring.

We still see parties in Virginia attempting similar sophistries. It is asserted there that the Baltimore and Ohio Company only *assists* the roads of Virginia for the purpose of *preventing* their successful and vigorous operations. We still see produced there, as formerly in Pennsylvania, the arguments which were made adverse to the Pittsburg and Connellsville road, that the cities of that State would be injured by giving to the agricultural interests their shortest and cheapest routes to competing markets. But the common sense of the people will overwhelm the authors of these sophistries in the future, as in the past.

It will be as impossible to persuade the farmer of Virginia as it was to persuade the farmer of Pennsylvania, that by depriving him of a market where he can net five cents per bushel more for his grain or any additional sum for his products, his pocket is benefitted, or that the agricultural interests which are the basis of the power of the commonwealth, can be thus protected and promoted. The common sense and the common interests of the masses ultimately govern in all such cases.

The path of the Baltimore and Ohio Company has been one of triumph, because its action has been based, in organizing its great enterprises, upon broad and liberal principles, which, carried out, necessarily resulted in advancing mutual interests and benefitting the entire territories through which the improvements are made. With beneficent and valuable objects in view, based upon correct principles and sound policy, your gigantic enterprises have succeeded, and won general approval, whilst their reactive influences have caused the city of Baltimore to grow, legitimately and rapidly, into a mighty, properous and commercial community.

After the transaction of the regular business, a form of lease, which had been previously approved by the board of the Washington County Railroad Company, was submitted, and after discussion, was unanimously adopted.

Under the lease six per cent. per year is to be paid to the stockholders on the cost of that line, and it is to be equipped and worked exclusively by the Baltimore and Ohio Railroad Company.

The meeting then adjourned.

New York Central Railroad.

The annual election for directors of this company was held at Albany on the 9th inst. The following gentlemen were chosen: Cornelius Vanderbilt, Daniel Torrance, William H. Vanderbilt, Horace F. Clark, James H. Banker, Augustus Schell, Samuel F. Barger, Henry Baxter, Joseph Harker, and William A. Kissam, of New York; Chester W. Chapin, of Springfield, Mass.; Amasa Stone, Jr., of Cleveland, Ohio, and James F. Joy, of Detroit, Mich. For Inspectors of the next Election—Sidney T. Fairchild and Lansing Pruyn, of Albany, N. Y.; and Nicholas B. La Bau, of Luzerne, N. Y.

At a subsequent meeting of the directors, Cornelius Vanderbilt was unanimously elected President, and Daniel Torrance, Vice-President. The following resolution was adopted:

Resolved, That although the Board of Directors of this Company have full confidence in the correctness of the stock account of the company, and have no doubt as to the validity of every share outstanding, they do, nevertheless, for the greater satisfaction of the stockholders, invite Hon. Rufus W. Peckham, of Albany, Hon. Charles Stebbins, of Cazenovia, and Hon. John A. Griswold of Troy, to act as a committee to examine the stock books of the company and report thereon.

Railroad Consolidation.

At a meeting of the leading officers of the Pennsylvania railroad and Pittsburg, Fort Wayne and Chicago Railway Companies, held on Friday last in Philadelphia, arrangements were made whereby the latter company passes under the management of and is consolidated with the former corporation. Negotiations for the consolidation of these great railway arteries have been pending many months, and it is given out that the final agreement reached affords the liveliest satisfaction to the managers of both roads. By the consolidation effected the Pittsburg, Fort Wayne and Chicago and Pittsburg, Cincinnati and St. Louis Railroads are united with the Pennsylvania Railroad, which will have control of more than a thousand miles of railway, and property approximating three hundred millions of dollars. This movement is one of vast importance, and betokens the shrewdness of those at the head of the gigantic corporation of our State. The consolidation will afford almost direct connection with the roads leading to the Pacific coast now being constructed, and gives the Pennsylvania Company new and vast fields for profit from freight and passenger traffic.—*Pittsburg Gazette*, Dec. 7.

☞ The Ottawa *Citizen* says that Mr. Abbott, who went a short time ago to England on business connected with the Canada Central road, has returned, after successfully carrying out the objects of his journey. The work on the line will now be pushed forward with all celerity towards completion.

American Railroad Journal.

Saturday, December 19, 1868.

Stock Exchange and Money Market.

There has been a gradual increase of activity in money, growing chiefly out of the drain of currency to the West and South, for pork packing and cotton forwarding operations, which has made a very unfavorable impression on the city bank reserves, cutting down the legal tender averages nearly five and a half millions, and the deposits half a million on the last return, and continuing to operate against their resources in these important items. Some of the banks have been less liberal of aid because of their diminished facilities, for making advances, even in a temporary form. Private lenders have been enlarging their dealings of mercantile paper, finding employment for large balances in this way, in the absence of sufficient inducements at the Stock or Gold Boards, to justify them in purchasing stocks or gold for a rise. The inquiry from borrowers has been more urgent on the basis of full seven per cent. on call, and 7@9½ per cent. per annum in the discount form. The banks last week added nearly 3⅞ millions to their loan and discount averages, but have been restricting their operations in this line, since Monday. They reported a gain of about 1½ millions of specie, on their last weekly exhibit, with a contraction of their circulation to the amount of about $49,000. The recent change of order from the Treasury Department, requiring the Collectors of Revenue to make their deposits primarily with the Sub-Treasuries throughout the country, tends to concentrate the funds of the Government in its New York and other prominent offices, chiefly at New York, and it has also made necessary the transfer of money to the office here, for account of the National Banks of the interior, heretofore acting as depositories of revenue. This, however, will prove only a temporary inconvenience, as it is not the purpose of the Secretary, to let his New York accumulation of currency, above a reasonable working balance, remain long idle. The cash balances of the Treasury Department on the 1st inst., were $106,679,321, against $113,873,019 on the 1st of November. Of the reserve on the 1st inst., $18,253,946 were in currency. This currency reserve has since been reduced to about 16 millions. To the coin reserve which was $88,425,375 at the beginning of the month, some addition has since been made. The currency reserve on the 1st of November, was only $10,465,033, while the coin reserve was up to $103,407,986. Government disbursed some 24¼ millions of interest in November, and nearly 11½ millions more on account of civil, naval, military, and interior branches of the public service, same time, yet closed the month with an addition to its currency balances of about 7¾ millions, while reporting a decrease of only about 15 millions in its coin balances.

The specie reserve of the city banks is now $19,140,788, against $14,866,848 same time last year. The city bank deposits are now $189,337,415, against $177,044,250 week ending Dec. 7, 1867. The legal tender reserve amounts to $54,015,865, against $54,954,308 same time last year. The circulation now stands at $34,205,906, against $34,118,911 same time last year. The loans are now $263,360,114, against $246,327,545 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $97,509,745 a day, against a daily average of $105,855,566 the preceding week, and $102,590,560 the week ending with Nov. 26, 1868. The current week's exchanges average about $95,000 a day. The city banks, last week, gained $1,496,514 of specie, while they lost $506,402 of deposits, and $5,476,611 of legal tender notes. They increased their loans $3,868,239; and reduced their circulation, $48,858.

Washington advices intimated that the National Banking act will probably be so amended or modified during the present session of Congress, as to give to the Comptroller of the currency full power to call on the National Banks of the country for a statement of their business, at any date which he may see fit to name, retrospective or otherwise. Such an amendment would guard against the manipulation of the assets and liabilities of the banks at the approach of quarter-day, as under the prevailing policy; would tend to place banking, under national authority, on a more stable and trustworthy basis; and would effectually prevent the periodical spasms in money, resulting from the sudden calling in of loans by the banks in order to make a creditable, even though an utterly deceptive exhibit to the Comptroller, which has been the experience of the

country almost from the introduction of the existing system.

National Bank notes to the amount of $131,330 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $311,151,736, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $11,294,736, leaving, with the existing 1,629 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,857,000. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,721,900; and for the public deposits, $36,729,350—making a total of $378,451,250. The Treasury Department last week redeemed and destroyed $344,000 of worn and mutilated fractional currency, and issued $357,207 of new. The outstanding amount of fractional currency on the 1st of December, was $33,875,268, against $33,418,985 on the 1st of November, 1868.

The U. S. Sub-Treasury receipts, week ending with Dec. 12, were $9,785,820, including $1,438,373 from customs duties; payments, $6,174,851, including $509,000 of coin interest; balance at the close of the week, $89,091,980, against $88,482,011, at the close of the preceding week, showing an increase of $609,969. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,137,430 including $261,344 from customs; and payments, $3,601,517, including $54,000 of coin interest; on Tuesday, receipts, $945,961 including $345,000 from customs, and payments, $553,592, including $38,436 of coin interest. The balance at the close of business on Tuesday stood at $91,020,262, against $90,613,293 a week previous; and $87,568,657, on Nov. 25, 1868.

The outstanding amount of coin certificates on the 1st of Dec., was $23,255,840, against $19,716,840 on the 1st of Nov., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $1,235,000, and retired $1,858,373 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during November, reached $7,658,840.

Government revenues have yielded lightly, since our last. The excises, last week, yielded about $3,000,000; customs at the port of New York, $1,438,373, and at the outports about $500,000 (in coin) more, making the grand total income for the week equal to about $4,942,650 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $67,000,000, according to the latest Washington advices.

Gold has been comparatively steady, during the week, the extremes having been 135@136¼, and the closing figures on Wednesday 135⅛@135¼. The dealings in it have been on a moderate scale, chiefly speculative. The *bull* interest has been enabled to prevent any serious depression of the price, even in view of the impending heavy disbursements of 1st of January coin interest on the public debt. They have been aided in this effort by the condition of the foreign exchanges, the prices of which have remained for some time at a point very nearly justifying gold shipments; and also by apprehensions of the action of Congress on financial questions. The strength of the exchange market is, of course, owing to the state of business and commerce; and till produce, or produce bills, come to market in larger quantity than of late, it will remain strong. The financial bill of Senator Morton has been likewise used to keep up the gold premium; as it has been interpreted in Wall street as favoring an advance in price. Since Jan. 1, foreign goods to the specie value of nearly 237 millions have been imported into this port. In the same period, the produce exports hence have been to the currency value of about 159 millions; and the specie exports about 70 millions. With gold at 135, the currency value of our imports would be about 320 millions. On the same basis of calculation, our aggregate exports (produce and specie) would be equal to about 253 millions of lawful money. This would show an apparent balance against us of 67 millions of our currency. The trade of the outports has doubtless materially diminished this adverse balance. Sufficient of a debt, however, is believed to have resulted from the year's foreign commerce of the country, to account for the present buoyancy of exchange, and firmness of gold. It is expected, however, that the outflow of cotton alone will speedily adjust the difference, if any really exists.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,822,508, against $3,058,048 same time last year. The customs demand for Gold last week, averaged $233,562 a day; thus far, this week, it has been equal to $253,000 a day, or equal to a weekly aggregate of $1,518,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $5,467 and from California, $91,214. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $112,710,321, against $114,216,410 same time in 1867. At the port of San Francisco, $7,869,739, against $7,120,706 last year.

The total receipts of California gold at this port, since Jan. 1, 1868, have been $34,099,137, against $26,485,700 in 1867, showing an increase thus far in 1868, of $7,613,437. The exports of specie, from this port, last week, were $483,329, against $1,705,420 same week last year; total, since Jan. 1, 1868, $69,837,000, against $47,093,994 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $509,000; since Jan. 1, 1868, $81,674,517, against $61,501,595 same time in 1867. The specie exports from San Francisco, from Jan. 1, to Nov. 30, were $32,179,651, against $34,961,784 same time last year.

Foreign Exchange has been generally firmer in price and in fair demand, on a restricted offering of prime bills. Bankers' prime sixty day bills on London closed on Wednesday at 109⅜@109⅝, and on Paris to 5.20c.@5.16¼; sight bills on London to 109⅞@110⅜, and on Paris to 5.13¾c. @5.12½. The offering of produce bills has been rather limited this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,202,177, against $3,249,109, same week last year; total, since Jan. 1, 1868, $160,094,442, against $182,927,943 in 1867.

Government securities have been quoted a trifle cheaper, since our last, and have been in quite moderate request, chiefly for investment purposes. The offerings of bonds have been comparatively light at the slightly reduced figures. The net public indebtedness was $2,539,031,844 on the 1st Inst., against the reported net aggregate of $2,527,129,553 on the 1st of November, which would show an apparent increase in the national obligations, during the month, of $11,902,292. But in the Nov. 1, exhibit, the Department did not include the interest on the debt which accrued on that day, and which it paid off during November, to the amount of $24,205,000. Adding this sum, to the reported aggregate on Nov. 1, would make the actual debt on that day, $2,551,334,552. Deducting the net debt of $2,539,031,844 as officially reported for December 1, would show that, instead of an addition of $11,902,292, there was an actual liquidation of $12,302,708, during the past month. The statement of Dec. 1, was regarded as less unfavorable than had been anticipated.

U. S. sixes of 1881 closed here on Wednesday at 114½@114¾; U. S. Five-twenties of 1862, 110½@110¾; U. S. Five-twenties of 1864 at 107⅛@107¼; U. S. Five-twenties of 1865 at 107¾@107⅞; U. S. Five-twenties of 1865, consolidated, 110⅛@110¼; U. S. Five-twenties of 1867, 110⅓@110¼; U. S. Five-twenties of 1868, 110⅛@110⅝; U. S. Ten-forties at 105¼@105½; U. S. Six per cent. currency bonds, 99⅜@99½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 2.	Dec. 9.	Dec. 16.
Consols	92⅝	92½	92½
U. S. 5-20's of 1862...	74½	74½	74½
Erie	27	26¼	27½
Ill. Central	96	96¼	96¼

Stocks have been rather more active and on the whole, stronger in price, since our last, closing, however, feverishly and heavily, under the increasing activity in money. Dealings in State bonds have been more extensive, particularly in the North Carolina and Tennessee, prices of which have fluctuated widely, closing buoyantly.

General business has been on a moderate scale in the line of domestic produce. Prices of Breadstuffs and Provisions have been quoted firmer as a rule.. Middling upland cotton closed actively on Wednesday at 25¼ cents per lb. The stock of cotton now here is estimated at about 31,000 bales. The receipts at the port this week, have averaged about 3,200 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 764,500 bales, against 629,000 bales same time last year; exports, same time 379,000 bales, against 287,000 bales same time last year; stock on hand at latest dates, 252,500 bales, against 255,000 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 22,945 pkgs., against 12,196 pkgs., same time last year. At the Live Stock market, this week, Beeves have been in good demand at from 10@17½c. per lb.; week's receipts, 6,683. Veal calves have been in more request at from 9½@13c. per lb.; receipts, 895.

Sheep and lambs actively sought after at from 4¼ @7½, and 5½@9c. respectively, per lb.; receipts, 32,978. Swine, less active at from 8½@8¾c. per lb., all live weight; receipts, 31,774. Foreign merchandise has been in moderate request at generally firm and buoyant prices. The total imports of foreign dry goods, last week, were $834,765 and the total amount marketed $847,-023. The value of foreign merchandise imported last week, was $2,171,735—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $3,006,500, against $4,598,351 same week last year; from Jan. 1, 1868, $236,008,854, against $230,864,270 same time in 1867. The ocean freight market has been less active, and rates have been quoted easier. For Liverpool we quote flour at 2s.@2s. 6d. by sail, and 3s.@3s. 6d. by steamer, per bbl.; grain at 5½d.@6d. by sail, and 6d.@6½d. by steamer, per bushel; cotton at ⅝d.@⅞d. by sail, and ⅜@½d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 35s.@50s. steamer, per ton. Total number of vessels in port on Wednesday, 482.

The New York exports, exclusive of specie, for the week ending Dec. 15, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$3,249,109	$3,202,177
Prev. reported.....	179,678,834	156,892,265
Since January 1.....	$182,927,943	$160,094,442

The imports for the week ending December 12, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$918,280	$834,765
Gen. merchandise.....	3,680,071	2,171,735
Total for the week.....	$4,598,351	$3,006,500
Previously reported....	226,265,919	233,002,354
Since January 1.....	$230,864,270	$236,008,854

The balance in the Sub-Treasury on Wednesday was $91,423,034 98.

BANKING AND FINANCIAL.

☞ TO CAPITALISTS AND INVESTORS.

The First Mortgage Bonds of the ROCKFORD, ROCK ISLAND and ST. LOUIS RAILROAD COMPANY pay the Principal and Seven per Cent. Interest, 1st February and 1st August, in GOLD COIN, *free of Government tax.*

A limited amount only of these bonds will be sold at 97½ and accrued interest in currency, by bankers and brokers, agents of the Company in different parts of the country, and at the office of the Company, No. 12 Wall st., New York.

Government and other approved Securities received in exchange at full market rates.

Pamphlets giving full information sent on request.

H. H. BOODY,
Treasurer.

☞ The Richmond *Inquirer* says that arrangements have been made by which the July interest on the State debt, and which was not paid when due, will be paid on the first of January. The total amount of the debt is, in round numbers, $40,000,000. Of this sum about $10,000,000 in registered bonds and $2,500,000 in coupon bonds are held in the State. The balance is held by parties outside of it. It will require $700,000 to pay the interest to be paid on the 1st of January.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States November 1, and December 1, 1868:

DEBT BEARING COIN INTEREST.

	Nov. 1, 1868.	Dec. 1, 1868.
Five per cent. bonds	$221,538,400.00	$221,538,400.00
Six per cent. bonds of 1881	283,677,300.00	283,677,300.00
Six per cent. Five-twenty bonds	1,602,312,250.00	1,602,570,400.00
Total	$2,107,577,950.00	$2,107,836,100.00

DEBT BEARING CURRENCY INTEREST.

Six per cent. Pacific R. R. bonds	$42,194,000.00	$44,337,000.00
Three per cent. certificates	58,325,000.00	58,140,000.00
Navy pension 3 p. ct.	14,000,000.00	14,000,000.00
Total	$114,519,000.00	$116,477,000.00

MATURED DEBT NOT PRESENTED FOR PAYMENT.

Three years Seven-thirty notes, due Aug. 1, 1867, June and July 15, 1868	$2,956,950.00	$2,478,450.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867, and May 15, Aug. 1, Sept. 1 and 15, and Oct. 1 and 15, 1868	5,128,310.00	4,224,920.00
Bonds (Texas indemnity)	256,000.00	256,000.00
Treasury notes, (acts July 17, 1861, and prior thereto)	151,611.64	149,361.64
Bonds April 15, 1842, Jan. 28, 1847, and March 31, 1848	487,500.00	435,500.00
Treasury notes, March 3, 1863	445,492.00	445,492.00
Temporary loan	314,860.00	243,160.00
Certificates of indebtedness	13,000.00	13,000.00
Total	$9,753,723.64	$8,245,883.64

DEBT BEARING NO INTEREST.

United States notes	$356,021,073.00	$356,021,073.00
Fractional currency	33,413,985.42	33,875,268.17
Gold certificates of deposit	19,716,840.00	23,255,840.00
Total	$409,151,898.42	$413,152,181.17
Total debt	$2,641,002,572.06	$2,645,711,164.81

AMOUNT IN THE TREASURY.

Coin	$103,407,985.77	$88,425,374.54
Currency	10,465,033.47	18,253,946.13
Total	$113,873,019.24	$106,679,320.67
Debt less cash in the Treasury	$2,527,129,552.82	$2,539,031,844.14

By comparing this with the statement of November 1, it is shown that the debt bearing coin interest has increased $258,150; the debt bearing currency interest has increased $1,958,000; the matured debt not presented for payment has decreased $1,507,840; and the debt bearing no interest has increased $4,000,282 75—making the increase in the total debt since November 1, 1868, $4,708,592 75. The amount of coin in the Treasury during the same period has decreased $14,982,611 23, and the amount of currency has increased $7,788,912 66—leaving the amount of debt less cash in the Treasury December 1, $11,902,291 32 more than on November 1.

☞ Mr. T. Henry Perkins, who formerly owned a controlling interest in the South Shore Railroad, has sold his stock and resigned his position as President of the road. The parties who purchased the stock have elected Onslow Stearns as President of the road. Mr. Stearns is now President of the Old Colony Railroad, and will fill both positions at present.

From the Indianapolis Journal, Dec. 12th, 1868.

Railroad Consolidation.

The Cincinnati *Commercial* says it is rumored that the Ohio and Mississippi Railroad and the Jeffersonville Railroad are about to be consolidated.

In Indiana Railroad circles the impression has been general that the Ohio and Mississippi Railroad recently purchased the franchises of the defunct Fort Wayne and Southern Railroad, with the view of building a branch from North Vernon to the Louisville bridge at Jeffersonville. This branch road, if built, would run nearly parallel with, and often in sight of that portion of the Jeffersonville Railroad lying South of Seymour, penetrating very little new territory, and commanding no trade that might not, so far as the public can judge, be enjoyed by the Ohio and Mississippi Road, by means of her existing connections with Louisville.

The New route via North Vernon contemplated by the Ohio and Mississippi Road would shorten the line of travel between Louisville and the East only eleven miles, while at the same time it would increase the distance between Louisville, St. Louis and the West by the same line, eighteen miles.

At present the Railroad business between the Falls of the Ohio and Cincinnati, and with the East by way of that city, is done by the Jeffersonville railroad and the Ohio and Mississippi railroad conjointly—Seymour being the point of transfer, and the mail boats running between Louisville and Cincinnati. These boats having facilities for carrying passengers and freight cheaper than the railroads, always command the lions share of business between the above named points. The annual gross receipts of throuhg business by both lines, rail and river, between Louisville and Cincinnati, does not exceed six or seven hundred thousand dollars. In a few months the branch of the Louisville and Frankfort railroad will be opened to Covington, Kentucky, and enter the lists for this same business, and having the shortest line by nearly thirty miles, will be a competitor not to be regarded with indifference. New lines are continually being built and opened to the public to compete for the business between the East and Southwest, offering increased facilities for the carrying of freights and passengers far in excess of the most sanguine expectations of the increase of business. In face of all this, outside parties would be puzzled to see what object the O. & M. road could have in building a new road costing perhaps a million and a half of dollars which at best could not command more than its share of business, already overdone, and which in view of additional competition in the immediate future, is certain to become less remunerative. Any differences between the two companies will be terminated by the consolidation, and the new company will be in position to command a large business and give the public increased facilities at reasonable charges. One prosperous railroad being of more benefit to a community than a half dozen bankrupt ones. Indianapolis will receive some benefits from this consolidation, as it will open a new line between this city and Cincinnati, via North Vernon, as soon as the Ohio and Mississippi road shall complete the narrowing of their guage; while the business between this city and Louisville would not be materially effected, except by the diversion of through business at Seymour, East and West via the Ohio and Mississippi Railroad. This consolidation if carried into effect, is truly, as the *Commercial* remarked, a master stroke on the part of President Griswold. It makes him master of the situation, as it will give him the control of the only approach to the Ohio Falls Bridge at Louisville, which forever puts an end to a ruinous competition for Northern and Western business out of that city, and places him in a strong position to compete for the Eastern business. ***

Pacific Railroad.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

At the date of my last annual report you had accepted four hundred and ninety miles of the road and telegraph line of the Union Pacific Railroad Company, and the commissioners were then engaged in the examination of an additional section of twenty miles. Since that date, including said twenty miles, 330 have been accepted. The commissioners have submitted reports upon four additional sections, amounting to 100 miles.

By a report from the government directors it appears that the expenses for operating the road for the year ending September 30, 1868. were $3,213,565. The amount received from passengers during the same time was $1,109,501, of which $130,239 was from the United States. The amount received from freight was $3,077,330, of which the government paid $550,759.

This Department, on the 25th of September, represented to you that the time had come for such revision. Brevet Major General Governeur K. Warren, United States Army; Jacob Blickensderfer, Jr., of Ohio, and James Barnes of Massachusetts, were appointed commissioners for that purpose. The first is an accomplished officer of the corps of engineers, the other gentlemen are civil engineers of large experience, and are reputed to be thoroughly versed in the science and practice of their profession.

The commissioners' report has just been received. The trust confided to them appears to have been executed with intelligence and fidelity. A description of the location of the road is given. The elevation at Omaha is 946 feet above tidewater, and at the head of Great Salt Lake 4,315 feet. The sum of the ascents going westward is 12,995 feet, and the consequent sum of the descents is 9,626 feet. They are of the opinion that the location of the road as a whole, and in its different parts, is upon the most direct, central and practicable route, but that the line is not in all respects well adapted to the ground, as there are points where the full capabilities of the country have not been developed, and others where, in its details, the location is radically wrong. This has been occasioned by a desire to diminish the cost of work by the introduction of more and sharper curves than the circumstances require, although the saving in cost was but small in comparison to the permanent injury of the road. The commissioners are of opinion that the line, as built, should not be permanently adopted, and that economy and the best interests of the road require alterations and improvements to be made.

The road, when examined, was built 890 miles from Omaha. Its construction, so far as excavations and embankments were required, was remarkably easy. From Omaha to a point 535 miles west there are no rock excavations, and the natural surface of a great portion of the intermediate country presents nearly practicable grades. From the latter point to the end of the track the work is less than on Eastern roads of the same length and the most difficult parts are light in comparison with roads in the Alleghany mountains. There is but one tunnel. It is on the bank of St. Mary's creek, 230 feet in length.

The rolling stock of the road consists of 117 locomotives, 19 first class and 8 second class passenger cars, 15 baggage, 442 box, 1,227 flat, 43 coal and 72 caboose cars, besides hand and other cars suited to special purposes. The locomotives are well constructed and the number on hand probably sufficient for the present wants of the road. An additional number will be required for that part of the road where the line is open for through traffic. The cars are equal to those on the best roads, and the accommodations for the care, maintenance and repair of the rolling stock are now sufficient to meet current demands, but must be enlarged from time to time to meet the increasing necessities of the road.

The Commissioners submit the following estimate of expenditures which will be required to render the first 890 miles of the road equal to a

fully completed first class railroad. No allowances are made for work in progress or materials or equipments ordered or reported to be *in transitu* for delivery or already delivered except so far as they are placed in position in the structures themselves—$6,409,550.

The following estimate is furnished by the Commissioners of the cost of constructing and fully equipping the road from the mouth of the Weber canon to the head of Great Salt Lake—$3,515,550.

As the actual cost of this road is a matter of public interest, I deem it proper to present, in a condensed form, the estimates submitted, on the 14th inst., by Jesse L. Williams. He states that the cost of the road as shown on the books of the railroad company is, of course equivalent to the contract price per mile. The actual cost to the contractors forming an association which embraces most of the larger stockholders of the company, is shown only by their private books, to which the government directors have no access. The calculations were, therefore, made from the most accurate available data and the estimated cost of the first 710 miles of the road was taken as the basis for computing that of the whole line. Should the road, as is expected by the company, form a junction with that of the California company, near the northern extreme of Great Salt Lake, a little west of Monument Point, its length would be about 1,110 miles. The cost of locating constructing and completely equipping it and the telegraph line is $38,824,821 an average per mile of $34,977.

The government subsidy in bonds for that distance at par amounts to $29,504,000, an average per mile of $25,580. The company's first mortgage bonds are estimated at 92 per cent. and would yield $27,143,680. The fund realized by the company from these two sources amounts to $56,647,680, being an average per mile of, $51,-034, exceeding by $16,056 the actual cost of constructing and fully equipping the road, and yielding a profit of more than $17,750,000.

The Central Pacific Railroad Company, of California, have constructed 390 miles of their road and telegraph line, of which 296 were constructed and accepted since my last annual report. This company filed a map of the definite location of their road from Humboldt Wells via the head of Great Salt Lake, to the mouth of Weber canon. On the 15th of May last I gave my "consent and approval" to the location as far as the head of Great Salt Lake, a distance of 140 miles. Subsequent surveys corrected and improved the unaccepted part of the line, and on the 14th they filed a map and profile from the head of Great Salt Lake to Echo Summit, to which location I gave my "consent and approval."

The company state that their earnings for the six months ending June 30, 1868, were, from passengers, $145,048, and from freight, $264,410. Their expenses for the same period were $157,063, and their indebtedness at that date, $26,862,727, of which the sum of $7 340,000 was on account of bonds issued by the United States in aid of the construction of the road.

On the 13th ultimo special Commissioners Sherman Day, United States Surveyor General of California; Brevet Lieutenant Colonel R. S. Williamson, United States Army, and Lloyd Tevis were appointed to examine the roads and telegraph lines of the Central Pacific Railroad Company of California and the Western Pacific Railroad Company. They were instructed to report in regard to the location, road-bed, cross-ties, track laying, ballasting, rolling stock, repair shops, station buildings, culverts, bridges, viaducts, turnouts and all other appurtenances of the roads, and the amount of expenditure required to render them, so far as built, equal in every respect to fully constructed first class railroads. No report has been received.

At the date of my last annual report the Union Pacific Railway Company Eastern division had constructed 305 miles of their road and telegraph line, and 285 miles thereof had been accepted. Since that date 88 9425-1000 additional miles have been constructed and accepted.

The amendatory act approved July 3, 1866, authorized this company to designate a new route and file a map thereof. They were required however to connect with the Union Pacific at a point not more than fifty miles westerly from the meridian of Denver, in Colorado. Their right to bonds was limited to the amount they would have received had the road been constructed on the original route to the one hundredth meridian of longitude. No acceptable survey had been made from Fort Riley to that meridian; and as the department was not officially advised of the exact distance between those points, Brevet Major C. W. Howell, Captain of Engineers, United States Army, was, at my request, assigned, on the 8th of June last, by the Secretary of War, to make such survey. He executed the duty and submitted a report under date of September 28, 1868. He determined the distance to be 258 9,425-10,000 miles. He also ascertained that the meridian is 9,300 feet west of the point designated by the Union Pacific Railroad Company. This survey was approved by you. The distance for which the company was entitled to bonds is 393 and 9,425-10,000 miles. The following summary is made from their report:—They have constructed and operated the road 405 miles west of the initial point. It has been provided with round house accommodations, repair shops, turn tables, water tanks, sidings, &c., to meet the immediate wants of business, and the necessary warehouses and depot buildings have been erected at the stations for the accommodation of passengers and freight. The equipment is as follows:—Twenty-nine locomotive engines, twenty-one passenger and 878 other cars. The aggregate earnings from September 1, 1867, to August 31, 1868, were $1,878,588, and the expenses $1,247,816, leaving the net earnings $630,771. The average length of road operated during the year was 331½ miles, and the average earnings per mile $5,666. Surveying parties in examining the routes of the thirty-second and thirty-fifth paralleles, have discovered on the latter a practicable route westward from Albuquerque to the Pacific. It crosses the Colorado river south of Fort Mohave, and thence runs westward to the city of San Francisco, through Tehachepah Pass of the Sierra Nevada Mountains, which is only 4,020 feet above the sea. The highest point is in the San Francisco Mountains, 7,464 feet. The entire line is exempt from obstructions by snow, and traverses a country rich in mineral wealth and abounding in timber and coal. Surveys have also been made from Fort Mahove, on the Colorado river, to San Diego, and from Fort Wallace, Kansas, via Puntia Pass and San Louis Park, to Albuquerque. The cost of surveys in 1867 and 1868 was about $225,000.

Sixty-nine and one-half miles of the road and telegraph line of the Sioux City and Pacific Railroad Company were completed, equipped and excepted in March last. About thirty one and a half miles, necessary to make a connection with the Union Pacific Railroad, are under contract and in process of grading. The iron has been purchased and is in transitu. The company has secured a water front of about one mile on each side of the Missouri river, and has contracted for a steam ferry to pass the cars over the river.

The indebtedness of the company is represented to be $3,299,801.

The amount received is given as $96,699; operating expenses, $53,184.

The company have six first class locomotives ninety-nine passenger and other cars in use. They expect to have the whole line of road completed and in operation next month.

No track has been laid by the Western Pacific Railroad Company within the past year. They, however, reported on the 15th of September last that the grading of the unfinished part of the road would be completed and ready for the track in a few months.

No portion of the Northern Pacific Railroad has been constructed. The company report that surveys have not been continued during the past season for want of a military escort to protect surveying parties.

In 1867, two lines were run from Lake Superior. One commencing at the west end of the lake and the other at Bayfield. The first, following a westerly course, crosses the Mississippi about twelve miles above Crow Wing; thence runs south of and near to Otter Tail lake, and, pursuing the same general course, intersects the Red river at a point between Fort Abercrombie and the mouth of the Sioux Wood river. The second follows a southwesterly course for fourteen miles to Pleasant bay; thence westerly to within eighteen miles of Superior; thence its course is direct to the Mississippi, crossing that river at St. Cloud; thence northwesterly up the Sauk Valley to the Sioux Wood river, a little south of where it joins the Otter Tail river. Both of these lines have such a direction on approaching the Red or Sioux Wood rivers that when continued westerly they will pass to the south of and near the Cheyenne river in Dacotah. The distance of the first is 232 miles and its estimated cost $7,967,000, being an average per mile of $34,357. The distance of the second is 317 miles and its estimated cost $11,815,-000, being an average per mile of $37,236. The alignment is favorable on both routes. The maximum gradients will not exceed thirty to forty feet to the mile and are of limited extent. Upon the Pacific side the surveys were confined to an examination of the Cascade range, with a view to ascertain the relative elevation add practicability of the passes. Three were found, the Cowlitz or Packwood, 2,600; the Snoqualmie, 3,030, and Cady's 4,800 feet above the level of the sea.

The Southern Pacific Railroad Company report that they have surveyed only that portion of their line lying between the towns of San Jose and Gilroy, in the county of Santa Clara, a distance of thirty miles. The grading is rapidly progressing. The iron has been purchased and is *in transitu*. They expect to complete this thirty miles of road by the 1st of April, 1869. Their capital stock is $1,800,000, of which $72,000 has been actually paid in, and their indebtedness $480,000.

The following statement exhibits the amount of United States bonds issued to the railroad companies:—1,793½ miles, nearly $44 337,000.

The act of July 13, 1868, authorized the sum of $6,500, appropriated by the act of March 3, 1865, to be applied to the completion of the bridge over the Dakota river, on the line of the wagon road between Sioux City and the mouth of the Big Cheyenne. A superintendent was appointed in August last and the bridge is in process of construction.

Union Pacific Railroad.

The following is a copy of a letter addressed to Hon. O. H. Browning, Secretary of the Interior, by Mr. James Barnes, one of the Special Commissioners appointed to examine the line, etc., of the Union Pacific Railroad. Mr. Barnes says:

In the report of the Special Commissioners appointed to examine the Union Pacific Railroad, it will be noticed we have omitted to take into account the amounts expended by the company or appropriated for construction, material, rolling stock, station houses, &c., &c., which were, at the time of the making our examination, either in process of completion or *in transitu* or contracted for, our instructions not appearing to contemplate such investigations. It will also be observed that many of the estimates necessarily involve gradual expenditures, which a true regard for economy will extend over a number of years after the road is opened, while some of them are contingent upon a prospective amount of traffic, which is entirely a matter of judgment, and in relation to which actual results only can establish the necessity. I would beg to be permitted to state that for my own part I did not intend the improvements, to which the report alluded, should be at once supplied, or to suggest that the Government should still further secure their accomplishment by withholding any large proportion of its promised assistance. The work already completed, in progress and under contract constitutes, in my

opinion, an ample security for the improvements suggested by your Commissioners, as, well as for the good faith of the managers of this great enterprise, and it would be to me a matter of grave regret that I should be considered as having given authority, by assenting to the resort to any measures on the behalf of the Government which will retard the early completion of the national work.

Journal of Railroad Law.

COMMON CARRIERS.—WHAT BAGGAGE THEY ARE OBLIGED TO CARRY—WHEN LIABLE FOR LOSS OF FREIGHT ON PASSENGER TRAIN—WHO HAS AUTHORITY TO CHECK BAGGAGE.

In the recent case of Minter *vs.* Pacific R. R. Co., [41 Mo. 503] just published, the facts will sufficiently appear in the following opinion of

WAGNER, Judge.—Plaintiff brought his action in the court below against the defendant, as a common carrier, for the value of a piece of carpeting, alleged to have been delivered to the defendant for transportation from St. Louis to Kansas city, and by the defendant lost. The defendant denied that the carpeting was ever delivered to it, and on this fact issue was joined. The facts appear to be that, on or about the 20th of October 1865, plaintiff came to defendant's passenger depot at St. Louis, Missouri, having with him a trunk and the piece of carpeting in controversy; that, having purchased a ticket to his destination in Kansas city, he demanded of the defendant's agent for receiving and checking baggage at the depot a check for the trunk which was given, and at the same time asked for a check for his carpeting, when the agent told him that "it was unnecessary," that "he would strap it on the trunk; one check would do for both; it would go safely." Plaintiff then delivered the same to the baggage agent, who took them into his care and custody, but it was lost in the course of the transit and never returned to plaintiff. The trunk went safely and was duly delivered. The defendant resisted a recovery exclusively on the ground that the agent had no authority to receive the carpeting to be carried by the passenger train, and that it should have been taken as freight to another and distinct depot and carried on another train. It also introduced in evidence its instructions to baggage men, by which they were prohibited to check or receive any articles of freight or merchandise on passenger trains. On the above facts the court gave judgment for the plaintiff.

A delivery to a servant or duly authorized agent of a common carrier, who is in the habit of receiving packages, is unquestionably to be considered a sufficient delivery—Aug. on Car. § 146. But to make the common carrier responsible as such, the delivery must be made to a servant who is instructed to receive the goods and not to a person engaged in other duties—Aug. § 129. In Blanchard *vs.* Isaacs, 3 Barb. 388, a coat was delivered to the driver of a stage coach by a person not a passenger, to be delivered to another in a different place, but nothing was paid for the transportation of the coat, and the driver refused to put it upon the way bill, saying that he had no right to do so; and there was no proof that the coat ever came to the possession of the proprietor of the stage or any of his agents; it was held that there was no delivery of the coat to the proprietor, and that he was not responsible as a common carrier for the loss. The driver of the stage coach had no authority to receive the coat, and hedistinctly informed the owner of the fact. It was not put upon the way bill nor was it taken as baggage, because the person to whom it belonged was not a passenger. Under the circumstances the proprietor was clearly not liable, and the owner knowingly sent the coat at his own risk. When there is no special contract, a common carrier is only bound to carry the passenger, with such baggage as the traveler usually carries, comprising clothing and such articles as are generally taken along for personal convenience—Aug. on Car. § 115; Sto. on Bail. § 499. But if the traveler takes with him other articles, which do not come strictly within the denomination of baggage and exposes them to view, so that no concealment is practised, and the carrier chooses to treat them as personal baggage and carries them accordingly, and a loss occurs, he will be responsible therefor—Great Northern Rail. Co. *vs.* Shepherd, Eng. Rail. Cas. 310.

Will the fact that the company instructed the baggage master not to receive or check any article of merchandise on the passenger train exonerate them from liability? It is not pretended that the plaintiff had any notice of such instruction, or that the agent was not acting within the general line of his duty. The general rule is that "If a servant is acting in the execution of his master's order, and by his negligence cause injury to a third party, the master will be responsible although the servant's act was not necessary for the proper performance of his duty to his master, or was even contrary to his master's order"—Smith on Mast. & Serv. 157. And so Story lays down the law, that the act of the agent binds the principal in all cases where the agent is acting within the scope of his usual employment, or is held out to the public, or to the other party, as having competent authority, although he has, in the particular instance, exceeded or violated his instructions, and acted without authority (Sto. on Ag. § 448; and by the application of these elementary rules to railroad companies, it has been held to make no difference in regard to the liability of the company for the act of the servant, while acting in the due course of his employment, that he did not follow their instructions either general or special—Derby *vs.* Phil. & Read. R.R., 14 How. (U. S.) 468.

Now, the right of the plaintiff to recover here, is because the carpeting was placed in charge of the baggage master to be transported to Kansas City. The company had entrusted to their agent authority to receive and check baggage, and had also given him power to determine what property came within that class, or description of property. The agent, in the usual and ostensible scope of his employment, received the carpeting without hesitation, and said that one check would answer for both the carpeting and the trunk; that he would strap them together and they would go safe, This was a complete reception by and delivery to the company. The plaintiff was not apprised or notified that it was against any law or regulation of the company for the article to be carried on the train on which he took passage; the person authorized and appointed for that purpose received it willingly, and any private order or instruction given by the company to its agents as to what articles should be received and checked for, could not exonerate it from liability or impair the right of the plaintiff. The disobeying of orders on the part of the servant cannot be allowed to work an injury to innocent third persons.

Judgment affirmed. The other judges concur.

Nashville and Northwestern Railroad.

The Tennessee Legislature has passed a resolution providing for the return to the stockholders of the Nashville and Northwestern Railroad, which at present, is in the hands of a receiver, being about $400,000 in arrears on its interest account. This action of the Legislature was induced by a proposition from the lessees of the Mississippi Central Railroad, the officers of which propose to lease or purchase the Nashville and Northwest line and advance money to pay the past due interest to the State. They also agree to pay the accruing interest of the company to the State. The Nashville and Northwestern road owe the State about $3,500,000.

☞ The Atlantic and George's Creek Coal Company, of Baltimore, has declared a dividend of 30 cents per share—15 cents to stockholders and 15 cents to contingent fund—payable on and after 10th of January.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, Dec. 15, 1868.

AT A MEETING OF THE BOARD OF DIRECTORS of this Company, held this day, it was *Resolved*, That a dividend of FIVE PER CENT., in cash, free of Government tax, be paid, on the 1st day of February next, to the holders of the full paid shares, registered on the 18th day of January next, and that the transfer books be closed on the said 18th day of January, and opened on the 5th day of February following.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

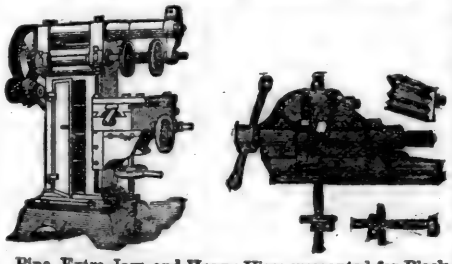
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

GENERAL OFFICE OF THE RONDOUT AND OSWEGO RAILROAD COMPANY, Rondout, N. Y., November 13th, 1868.

Proposals will be received at this office until January 2d, 1869, for the Grading and Masonry of the Mountain and Delaware Divisions of this Road. The Mountain Division consists of 23 sections containing 23 miles, commencing at Phœnicia, in Ulster County, and extending to Margaretville, in Delaware County. The Delaware Division consists of 29 sections, containing 29 85-100 miles, commencing at Margaretville, in Delaware County, and extending to Harpersfield Centre, in Delaware County. Map, plans, and specifications will be furnished on and after December 1st 1868, at the Chief Engineer's Office in Rondout. All other information furnished at this office.

6148 THOMAS CORNELL, President.

SALE OF THE UNITED STATES MILITARY ROLLING MILL at Chattanooga, Tennessee.—The Directors of the South-Western Iron Company will receive proposals for the purchase of their Rolling Mill at Chattanooga, Tennessee, erected by the United States authorities, and greatly enlarged and improved since it became private property. The land (comprising 150 acres) and the railroad are now held in fee simple, with brick works, saw-mill, dwellings, and all the appurtenances required for the production of 300 tons of railroad iron per week. The superior character of the works and their admirable location are well known, but a detailed description can be had on application to the undersigned.

The proposals will be opened on the 31st day of December, 1868, and if none satisfactory to the Directors are received, the property will then be sold at public auction, in the City of New York, on WEDENSDAY, the 3d day of February, A. D. 1869, to the highest bidder.

Parties desirous of examining the works will apply to GUSTAVUS W. SMITH, General Manager of the Works, at Chattanooga, and further information may be had on application to the undersigned, at No. 17 Burling-slip, New York.

ABRAM S. HEWITT, Treasurer.

New York Saturday, December 26, 1868.

The Union Pacific Railroad.

It will be seen by the new advertisement of the Company in another column, that 960 miles of the Union Pacific Railroad have been completed and put into active operation. For 120 miles more the track is graded, and the iron on the ground ready for laying. More than four hundred miles have been built in the season of 1868, and with less than 400 miles now intervening between the rails of the Union Pacific and the Central Pacific Companies, every indication guarantees the opening of the entire line to the Pacific in the early summer of 1869. The earnings for the year ending June 30, were more than four million dollars, on an average of 472 miles in operation; and the earnings for the last five months were $2,886,870. These amounts are so largely in excess of the liabilities of the Company on account of interest upon its own First Mortgage Bonds and the Government bonds loaned to it as a subsidy, as to allow of no doubt that all such liabilities will be promptly met when due. The road is well equipped, and large orders have been given for such an increase of rolling stock as will be necessary when to the local trade is added the immense through traffic, which must follow the opening of the entire line. Each section of twenty miles has been critically examined by the regular Government inspectors appointed for the purpose, and reported to the President as possessing all the characteristics of a first-class road. A special commission, appointed by the President in September last, made thorough re-examination of 890 miles, and summed up their conclusions by saying:

"Taken as a whole, the Union Pacific Railroad has been well constructed. The general route for the line has been well selected, crossing the Rocky Mountains at some of the most favorable passes on the continent. The energy and perseverance with which the work has been urged forward, and the rapidity with which it has been executed, are without parallel in history. The country has reason to congratulate itself that this great work of national importance is so rapidly approaching completion, under such favorable auspices."

The evidence of many other able and critical examiners of the road coincides with this testimony to the faithfulness with which the road has been constructed. The First Mortgage Bonds of the Company are now offered for sale at par and accrued interest, at which price they pay a high rate of interest. Both principal and interest being fully secured by the value of the road and the extent of its business, it would seem that no better investment can be offered; and we cheerfully call attention to the facts set forth in the advertisement of the Treasurer of the Company.

New York Central Railroad.

At a meeting of the directors of the New York York Central Railroad Company, held on the 19th day of December, 1868, the following resolutions were passed:

Whereas, This Company has hitherto expended of its earnings for the purpose of constructing and equipping its road, and in the purchase of real estate and other properties, with a view to the increase of its traffic, moneys equal in amount to eighty per cent. of the capital stock of the Company; and whereas, the several stockholders of the Company are entitled to evidence of such expenditure, and to reimbursement of the same at some convenient future period; now, therefore,

Resolved, That a certificate, signed by the President and Treasurer of this Company, be issued to the stockholders severally, declaing that such stockholder is entitled to eighty per cent. of the amount of the capital stock held by him, payable rateably with the other certificates issued under this resolution, at the option of the Company, out of its future earnings, with dividends thereon, at the same rates and times as dividends shall be paid on the shares of the capital stock of the Company, and that such certificates may be at the option of the Company convertible into stock of the Company, whenever the Company shall be authorized to increase its capital stock to an amount sufficient for such conversion.

Resolved, That such certificates be delivered to the stockholders of this Company at the Union Trust Company, in the City of New York, on the presentation of their several certificates of stock, and that the receipt of the certificate provided for in these resolutions shall be indorsed on the stock certificate.

Resolved, That a dividend of four (4) per cent., free of Government tax, is hereby declared, payable on the 20th day of February next, upon the stock of this Company, and also upon the interest certificates of the Company this day authorized.

The interest certificates authorized by said resolutions will be issued to the several stockholders entitled thereto at the office of the Union Trust Company, in the City of New York, where the same will be ready for delivery on the presentation of the stock certificates. Dated Dec. 21, 1868. E. D. WORCESTER, Treasurer.

Railroad from Cobleskill to Cherry Valley.

We learn from the Albany *Journal* that the contract for the construction of this road has been made with the Messrs. Weed, who are just completing the last fifteen miles of the Albany and Susquehanna Railroad. The road is to be completed to Sharon Springs on the first of August, and to Cherry Valley on the first of December next. The whole distance is twenty-one miles, through a most beautiful and rich section of country. There is now, in progress of construction, a road from Utica to Richfield. When completed, as it will be next year, there will only be the distance of fourteen miles, from Cherry Valley to Richfield, to be spanned, to open up, to the East and West, a large area now destitute of all railroad facilities.

☞ A dispatch dated Ottawa, Dec. 21, says the Intercolonial Railway Commissioners advertise for tenders for the construction of four sections of that road—two in Quebec, connecting with the Grand Trunk at Riviere du Loup; one in New Brunswick, near Dalhousie, and the fourth in Nova Scotia. The sections are from twenty to twenty-six miles in length.

Emigration to the South.

PROPOSED CONVENTION OF SOUTHERN RAILROAD MANAGERS.

Superintendent Hulbert, of the Western and Atlantic Railway, proposes that a convention of Southern railroad managers be held in Atlanta on the 4th day of January next to take measures to cheapen transportation to travellers from the North visiting the South to examine the country with a view to immigration. Mr. Hulbert says in his circular:—It is very evident from the tone of the Northern press that there is a strong inclination in that section to sell lands at the prevailing high prices there, and to invest in the cheap lands of the South. This inclination should be encouraged by us as far as practicable. One great restraint upon emigration, or the travel which to a great extent precedes it, is the expensiveness of the trip, as compared with the accustomed Northern rates. To obviate this objection it has been suggested that winter excursion tickets, at half fare, good for any route, be arranged for two or three months this winter on Southern lines, giving the traveller an opportunity of seeing the country by stopping and laying over a reasonable time at such point as might attract his attention. If Southern roads generally would enter into an arrangement of this kind, giving it an extensive and general publicity though the Northern press, it is believed that a large travel would be attracted to our lines which we would otherwise fail to secure, and ultimately result in a large emigration to our section of a skilled and wealthy class of agriculturists and manufacturers. It is presumed that our hotels, with their usual liberality, would heartily concur in the proposed plan and make the same reduction in their charges.

The attention of our railroad managers is being directed to European immigration as a question of deep importance to the great interest entrusted to their sagacity and care, and it is deemed of the utmost importance that some well devised plan be put into immediate action to secure the South its share of the benefits to be derived from the large immigration that is now pouring its wealth of labor and population upon this Continent.

Railroad Connections South of Kalamazoo.

The readers of the *Gazette* will recollect that some weeks since, we noticed the proposed *through route* from Grand Rapids *via* Allegan, Kalamazoo and White Pigeon, in Michigan, and Goshen, Warsaw, Peru, Indianapolis, in Indiana, and thence to Louisville, Kentucky. This project is still in a favorable state of preliminary arrangement, and the prospects are very favorable for its early completion.

The cars are now running from White Pigeon to Allegan, a distance of 62 miles on this through route. The Michigan parties interested in it are devoting nearly all their time and energies to getting the road in running condition from Allegan to Grand Rapids, as the best mode of securing this great through route.

A great part of the work is done between Allegan and Grand Rapids, the iron is purchased and in process of delivery, and the Iron Bridge, over Grand River, is under construction in Cleveland, O.

By looking at the map the reader will see that this line from here to Warsaw, is very direct towards Cincinnati; and he will also notice a Cincinnati railroad running from that city to Hagerstown, Ind., directly towards Kalamazoo.

Leaving a gap from Hagerstown to Warsaw to be filled up, to make this a Southern through route to Cincinnati, as well as a Louisville route.

We notice that a movement is on foot to extend the Cincinnati road still farther in this direction. A meeting was recently held at Wabash, when it was resolved to hold meetings all along the route from Hagerstown to Elkhart. Judging from the character of the gentlemen taking part in the proceedings of the meeting, we should say the prospects of success are favorable.

In case the route from Grand Rapids *via* Warsaw shall succeed, as it now bids fair to do, this extension of the Cincinnati road need not extend this side of Warsaw; from that point direct connections will be made to the pineries, gypsum, fisheries and all other important interests of Western Michigan. The road from Grand Rapids South will probably be constructed and running to Warsaw before the Cincinnati Road can possibly reach that point—and that will give ample northern connections to the Cincinnati route.

Railways of Michigan.

From the report of the Auditor General just published for the use of the State Legislature, and which includes the reports for the year ending December 31, 1867, as the reports for the present year would not be received in time to answer the requirements of the law, the following statistical information is obtained:

The number of railroad corporations from which reports were received last year, as required by law, was 22; in addition to which there were 5 to which blanks were forwarded, but which made no report, as follows: Chicago and Northwestern, Erie and Kalamazoo, (the Toledo and Adrian Branch of the Michigan and Southern Railroad), Grand River Valley, Holly, Wayne and Monroe, and Iona and Lansing. The number of railway corporations which have filed articles of association as required by the laws of 1855, but have neglected to make the annual report required by the same laws, is 44; besides the following, which having been incorporated the present year are not required to render a report for the year in question: Allegan and Holland, Hecla and Torch Lake, Elkhart and Lake Michigan, Howell and Lansing, Jackson, Fort Wayne and Cincinnati, Kalamazoo and Grand Rapids, Lawton, Paw-Paw and South Haven, and the Michigan Air-Line—making a total of 52, or an aggregate of 79 railroads on iron and on paper, and lying in whole or in part within the boundaries of Michigan.—*Detroit Free Press.*

East Tennessee and Georgia Railroad.

The gross earnings of this road for the fiscal years ending June 30, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$216,269 87	$208,754 34
" freight	270,379 46	251,923 77
" express	19,795 03	15,654 08
" transp. for U. S.	8,914 61	4,053 00
" mail service	12,624 96	16,825 00
" other sources	15,749 67	15,654 32
	$538,733 60	$512,864 51
Expenses, viz:		
Transportation	$63,926 45	$63,400 15
Motive power	75,682 67	115,775 36
Maintenance of way	119,290 52	135,410 08
" cars	38,305 01	46,485 30
General expenses	21,859 85	21,512 96
Equipment	4,700 00	9,162 10
Depot buildings	1,115 12	1,841 69
Extraordinary exp	51,750 83	52,279 40
Real estate	.....	240 00
Taxes	16,280 84	5,761 46
	$392,911 29	$451,868 50
Net earnings	$145,822 31	$60,996 01

From the total expenditures for the year 1868, as given above, deduct extraordinary expenses, $52,279 40; depot buildings, $1,841 49; equipment, $9,162 10: rebuilding engines and cars, $13,100—total, $76,383 19—leaving the amount of actual expenses $375,485 31. A similar deduction in the expenditures of 1867, will leave the actual expenses, for that year, $334,319 06. But it is claimed by the president that there should also be deducted in 1867, the sum expended for rebuilding engines and cars, and new cars, amounting to $18,900, which would leave for actual operating expenses the sums of $305,419 06. The amount of fuel on hand July 1, 1868, was $13,000 in excess of quantity on hand July 1, 1867, reducing the amount of actual expenses during the past year to $362,485 31. The per centage of expenses to earnings in 1867 was 60 per cent., and in 1868, 70 per cent.

During the past and previous years, many things have been carried to general expense account, that properly belong to extraordinary expense account. That this may be better understood, a statement is given of the amount of expenditures which have gone into the permanent improvement of the property of the company from August, 1865, to June 30, 1868, viz.:

For machine shops	$31,860 00
Cross-ties	30,601 20
Bridges	94,084 20
Depots	6,941 18
Cars	42,211 00
Engines	25,000 00
Real estate	8,500 00
Culverts, embankments, ballasting, etc.	28,480 00
Cash paid on old debts	40,308 41
Total	$307,985 99

The whole of which is justly chargeable to extraordinary expense account, when the books show $122,779 14 only charged to this account, from which you will see that $185,206 85 not charged to extraordinary expense account has gone to the improvement of your property and payment of debts. And in this connection it is deemed but just to say that your property has improved fully to the extent of the $307,985 99; this amount having gone into the permanent improvement of the property, as all the rolling stock of every description is in better condition than it was in 1865.

On the 28th of August, 1865, when the road was turned over to us, the old books of the company showed the road and fixture account to be $3,022,938 03. In closing the old books this account was increased by profit and loss account to $3,447,737 63. This loss was mainly in Confederate Bonds and notes on hand at the time the road was turned over to the present managers, less amounts due on dividends, payable in Confederate money; and since the account was transferred to the new books the profit and loss account has been increased $82,754 83. This increase has been caused principally by discount on Tennessee bonds; this will show the cost of the property up to July 1st, 1868, to be $3,530,492 46.

At a meeting of the Directors, March 14th, 1866, a resolution was passed directing bonds of the company to be issued to pay past due coupons on company bonds, in an amount not to exceed $138,000. It was expected that the interest due on endorsed bonds would be funded by the State of Tennessee, but as no special instruction had been given to our Agent at Augusta, he funded a considerable amount of the coupons on endorsed bonds, and under this resolution the company have issued of their bonds for the purpose of funding interest, to June 30, 1868, $142,900, of which $7,000 have been returned, which leaves the sum of $135,900 for which company bonds have been issued.

The company have 19 locomotives, 9 first-class and 4 second-class passenger cars, 4 baggage and mail, 140 box, 43 flat, 1 pay and 1 wrecking cars.

During the past year, 95,000 cross-ties have been purchased, and 80,000 used in the track, 270 tons of worn out rails re-rolled, and 2,500 wrought chairs purchased. The company have 152 tons old rails unfit for use, and will require 60 tons new rails for use during the present winter.

The financial condition of the company at the close of the fiscal years, June 30, 1867 and 1868, was as follows:

	1867.	1868.
Capital stock	$1,289,767 25	$1,290,067 25

President.—Thos. H. Callaway.

Directors.—Thos. H. Callaway, Joseph Jaques, C. M. McGhee, R. T. Wilson, Robert Sneed, Daniel Heiskell, Wm. Heiskell, A. G. Jackson, E. W. Cole.

Superintendent.—R. C. Jackson.

Treasurer.—R. M. Fisher.

Post Office Department.

REPORT OF THE POSTMASTER GENERAL.

The ordinary postal revenue for the year ended the 30th of June last, was $16,292,600, and the expenditures during the same period, including service for which special appropriations were made, $22,730,592, showing an excess of expenditures of $6,437,991.

The receipts from postages, as compared with the previous year, show an increase of six per cent., and the expenditures an increase or 18 per ct.

The ordinary expenses, not including mail transportation for which special appropriations were made, were $21,555,592, and the receipts, including the amount drawn under the acts making appropriations for carrying "free mail matter," were $20,092,600, showing an excess of expenditures of $1,462,991.

The receipts of the department were: From postages, $16,292,600; the amounts drawn from the Treasury under acts making appropriations for "carrying free matter," $3,800,000, and under the acts making special appropriations for "overland mail and marine service between New York and California," $1,125,000; "steamship service between San Francisco, Japan and China," $125,000; between the "United States and Brazil," $150,000; for "carrying the mail on routes established by acts passed during the first session of the Thirty-ninth Congress," $486,525, and "for preparing and publishing post route maps," $10,000, making the receipts from all sources $21,989,125. The expenditures of all kinds were, as above stated, $22,730,592, showing an excess of expenditures over receipts of $741,466, for which a special appropriation will be required.

The revenue account stated by the Auditor differs from the foregoing because of his adding to the receipts of the department, from all sources, a balance of $1,494,469, standing to the credit of the revenue account July 1, 1867, but which is not immediately available.

The estimates for the current fiscal year, as submitted to Congress with the last annual report, showed an anticipated deficiency of $3,296,000, to meet which there was then in the Treasury $2,000,000, being the unexpended balances of former appropriations standing to the credit of the department, leaving the amount to be provided by appropriation from the general Treasury $1,296,000. Of this sum Congress appropriated $800,000.

The expenses during the fiscal year just closed exceeded the estimated amount, especially in the item of transportation, and thus absorbed the $2,000,000 relied on to assist in meeting the anticipated deficiency for the current year. The ordinary expenditures for the current year were also estimated too low, from the fact that the department could not, at the time the estimates were made, anticipate the extraordinary increase of service established by acts of Congress. Taking those of the last fiscal year as a basis it is anticipated that in the current year there will be a deficiency of $3,604,500. There will also be required $97,000 for service on the route from Fort Abercrombie to Helena, Montana, authorized by the act of July 27, 1868, from January 1, 1869, to June 30, 1869; and to meet the increased liabilities of the department for service on the "overland route," $161,000, making $3,862,500 which will be required to meet deficiencies in the receipts for the current fiscal year.

The ordinary expenditures for the year ending June 30, 1870, (including $645,250 for overland and sea mails to California,) are estimated at	$24,540,413
The ordinary revenue is estimated at an increase of five per cent. on that of the year just closed, or	$17,100,000
Add the standing appropriations for carrying free mail matter	700,000
Making the total estimated revenue	17,800,000

Showing an excess of expenditures of $6,740,413 to be provided for from the general treasury.

It will also be necessary to make the usual special appropriations, as follows:

Mail steamship service between San Francisco, Japan and China	$500,000
Mail steamship service between the United States and Brazil	150,000
Mail steamship service between San Francisco and the Sandwich Islands	75,000

During the year 383,470,500 postage stamps, of the value of $11,751,014 (including 160,000 periodical stamps, valued at $14,750;) 44,552,300 plain stamped envelopes, representing $1,285,218; 25,469,750 stamped envelopes, bearing printed cards and requests for return to writers, representing $759,520, and 3,372,600 newspaper wrappers, valued at $67,372, were issued. The aggregate value of these issues was $13,863,124—being an increase of 3.45 per cent. over the issues of the previous year. The sale of postage stamps and stamped envelopes during the year, was $14,066,139, or $23,015 more than the issue; thus absorbing to that amount the stock remaining unsold in the hands of postmasters June 30, 1867. The number of packages of postage stamps lost in the mails during the year was 33, representing $2,672, and of stamped envelopes 7, valued at $226.

There were in the service of the department on the 30th June, 1868, 6,891 contractors for the transportation of the mails. Of mail routes in operation there were 8,226; aggregate length, 216,928 miles; aggregate annual transportation, 84,224,325 miles; aggregate annual cost, $10,266,056; including the compensation of postal railway clerks, route agents, local agents, mail messengers, mail route messengers, and baggage masters in charge of mails, viz: $1,114,833, the aggregate annual cost, was $11,380,689. This service was divided as follows: Railroad routes—Length, 36,018 miles; annual transportation, 34,886,178 miles; annual cost $4,177,126, about 12 cents per mile. Steamboat routes—Length, 19,647 miles; annual transportation, 3,797,560 miles; annual cost, $650,631, about 17.13 cents per mile. Celerity, certainty and security—Length, 161,263 miles; annual transportation, 45,540,587 miles; annual cost, $5,438,299; about 12 cents per mile. The length of routes was increased over the preceding year 13,683 miles; the annual transportation, 5,241,536, and cost, $929,770; to which add increased cost for railway postal clerks, route, local and other agents, $93,762, making an aggregate of $1,023,562.

In reference to the overland mail route the report states that a contract was made with Wells, Fargo & Co., to carry the mails between the termini of the Union Pacific and the Central Pacific Railroads for one year, or until the two roads meet, at the rate of $1,750,000 per annum, subject to deduction *pro rata* for every section of fifty miles of railroad completed and reported to the department ready to carry the mails, it being estimated that the gap between the railroads covered by the stage service, will be lessened at the rate of fifty miles every fifteen days or a hundred miles a month, and that it will be closed up entirely by the 1st of August, 1869, and that upon this basis the pay to Wells, Fargo & Co., under their accepted proposal, will amount in all to about $670,000. Messrs. Wells, Fargo & Co., also obtained the contract to carry the mails from Cayote, Kansas, to Denver, Colorado, at $79,000 per annum, and also, on the route from Cheyenne, Dacotah, to Denver at $9,970 per annum, on the same terms as above stated. Under these arrangements the overland mail service on the three routes is now in regular operation. The territorial mails are now carried from Fort Abercrombie, Dacotah, to Helena, Montana, at $194,000 per annum. The service, on the route from Sheridan (on the eastern division of the Union Pacific Railroad to Santa Fe has been increased from three to six trips per week, and the schedule time reduced to four days in summer. The service is well performed, though still occasionally interrupted by hostile Indians. The important route from Salt Lake City to the Dalles, Oregon, has been relet from 1st October last for six-times-a-week service, at the rate of $149,000 per annum—a saving as compared with the last contract, of $164,000 per annum.

READJUSTMENT OF PAY ON RAILROAD ROUTES.

The 30th of June, 1868, being the period for the expiration of the term of contracts for transporting mails in the States of New Jersey, Pennsylvania, Delaware, Maryland and Ohio, the department, in anticipation of the close of the term, entered upon a systematic revision and readjustment of the rates of pay on railroad routes in those States. Many routes in other States than those above named have been brought up for review, upon application made by the proprietors of the railroads interested, and in every case where the returns showed a readjustment to be proper it has been ordered. Thus the rates have been changed upon seventy-one routes in all. The total amount of the annual pay upon these routes, under the readjustment, is $926,043 and the total amount of the former annual pay $775,722—an excess of the present over the former amount of $150,320.

RAILWAY POSTAL SERVICE.

There are now in operation in the United States 26 railway postal lines, subdivided into 34 routes, extending in the aggregate over 7,019 miles of railway and steamboat lines, upon 1,571 miles of which twice daily service is being performed, making a total equal to 8,090 miles of railway postal service daily each way and an increase of 3,276 miles over the service in operation in 1867. There are employed in this service 279 men, as head clerks, clerks and assistant clerks, at salaries ranging from $900 to $1,400 per annum making an aggregate cost of $329,700 per annum, an increase

of 119 men, at a cost of $141,800 over the previous year. To perform this work in the old way would require the services of 283 employes, at a cost of $331,935, showing a saving of $2,235 as the work is now being done. It is proper to state that the service is being performed, not as formerly, by route agents on the slow way or accommodation trains, but upon the fastest express trains, and that by means of Ward's mail bag catcher the clerks are exchanging pouches at all offices on the line once and in many cases twice daily each way. On the Hudson River and New York Central Railroads, for instance, the postal car leaves New York at eight A. M., performing service at all stations to Syracuse, where they arrive at half-past six P. M.; and from Syracuse to Buffalo, where they arrive at twelve, midnight, at all express stops. The night line leaves New York at eleven P. M., performing service for all offices at express stops at Albany; leaving Albany at quarter past seven A. M., performing the service at all post offices to Buffalo, where they arrive at half-past eight P. M., so that every office on the line from New York *via* Albany to Buffalo that chooses to exchange mails twice is served twice daily with mail each way. Now letters can be sent and answers returned between almost any two offices on the line within twenty-four hours. This is simply an illustration, the same improved facilities for the rapid transmission of mails obtaining on most other lines of railway postal service.

The aggregate amount of postage (inland, sea and foreign) upon the letter correspondence exchanged with foreign countries was $2,153,690. Of this amount $1,706,497 accrued on the letter mails exchanged with European countries, $309,516 on letters exchanged with the Dominion of Canada, and $137,706 on the letters exchanged with the West Indies, Mexico, Brazil, Central and South America, the Sandwich Islands, Japan and China. The total letter postages on mails exchanged with countries of Europe during the first six months, from July 1 to December 31, 1867, inclusive, under the provisions of the postal conventions then in force, amounted to $1,057,612, and on mails exchanged with the same countries during the residue of the fiscal year, from January 1 to June 30, 1868, at the reduced rates established by existing conventions, amounted to $648,854, being a reduction to the advantage of correspondents during said six months of $408,758, on an increased correspondence amounting to 626,548 letters per annum. The postage collections in the United States on the correspondence exchanged with Great Britain and countries on the Continent of Europe amounted to $1,090,244, and the postages collected in Europe amounted to $616,223—excess of collections in the United States, $474,020. The estimated amount of United States postage upon the letter mails exchanged with Great Britain and the Continent of Europe was $792,700; with Canada and the British North American provinces, $176,179, and with the West Indies, Brazil, Mexico, Japan and China and Central and South America, $128,098, making in all $1,097,979—a decrease of $93,425 compared with estimate of previous year. Adding the amount of United States postage upon printed matter exchanged in United States and European mails, calculated at $90,000 and $10,529 the reported amount of United States postage on printed matter exchanged with the West Indies, Mexico, South America, China, &c., the total United States postages on foreign mails (exclusive of printed matter interchanged with the British North American provinces, of which no separate account is kept), was $1,198,508.

The number of letters exchanged with foreign countries (exclusive of the British North American provinces) was 11,128,532, of which 5,900,307 were sent from and 5,228,225 received in the United States. Increase over number of previous year, 830,298. Of this number 10,068,659 were exchanged with European countries, an increase of 626,548 compare with the previous year. Estimating the number exchanged with the British provinces at 2,476,000, the total number of letters exchanged in the mails with foreign countries was 13,600,000.

From the 1st of January, 1868, the date on which the new postal conventions with Great Britain, North Germany, Belgium, &c., came into operation, the arrangements made by this department for the transatlantic mail steamship service have been restricted to the outward mails, in accordance with the new system adopted in said convention that each office shall make its own arrangements for the mails which it despatches, and shall, at its own cost, remunerate the owners of the steamships employed for the conveyance of the same; and in like manner the sea transportation of mails received from Europe since the 1st of January, 1868, has been provided and paid for by the respective foreign post departments despatching the same to this country. From July 1 to Decembr 31, 1867, inclusive, the steamers employed by this department in transporting mails in both directions conveyed mails the total postages on which amounted to $491,534, and those employed in same service by foreign post departments conveyed mails, during same period, the total postages on which amounted to $566,078. During the last half of the fiscal year, from January 1 to June 30, 1868, inclusive, the total postages on mails sent to Europe under the new arrangements amounted $340,835, and the total postages on mails received from Europe during the same period amounted to $308,019—these reduced amounts resulting from the reduced rates of international postage charged on and after the 1st of January, 1868, under the provisions of the new postal conventions, which came into operation on that date. The cost of the United States transatlantic mail steamship service from July 1 to December 31, 1867, under arrangements then in force, allowing the sea postage as compensation, was $282,017, and from January 1 to June 30, 1868, under the new arrangements, $139,760—a reduction of over one-half from the cost of the same service during the previous six months. Total cost of transatlantic service for the year, $421,777, being $129,560 less than the preceding year. The amount paid for the transportation of mails to and from the West Indies, &c., by steamers receiving various rates of compensation within the limit of the postages, was $70,287, and the cost of sea and isthmus conveyence of mails to and from Central and South America, *via* Panama, was $27,334, making a total expenditure for ocean transportation of $519,399, exclusive of payments amounting to the sum $497,916 made during the year to the steamship lines to Brazil, to Japan and China and to the Sandwich Islands, respectively, receiving subsidy grants fixed by special acts of Congress.

POSTAL CONVENTIONS WITH COUNTRIES OF EUROPE.

New postal conventions with Great Britain, the North German Union, Belgium and the Netherlands, respectively, the leading provisions of which were stated in my last report, were carried into effect on the first of January, 1868; and those concluded with Switzerland and Italy went into operation on the first of April, 1868. On the 13th of December, 1867, before the new convention with the United Kingdom of 18th June, 1867, went into operation, notice was given by the British Post Office to terminate the same on the 31st of December, 1868, in accordance with the power reserved in the 21st article thereof; which notice was accompanied by the announcement that Mr. Anthony Trollope would be dispatched to Washington in the spring of 1868, with full powers to negotiate a new convention better calculated to afford satisfaction to the people of the two countries. The provisions of a new convention to supercede the present one on the 1st of January, 1869, were accordingly arranged with Mr. Trollope at Washington in July last; and, after adjusting by direct correspondence between the two post departments certain modifications on which Mr. Trollope did not consider himself authorized to treat, the modified convention was formally executed on the 24th of November last. Its general provisions are substantially those of the present convention.

There has been a modification of the postal convention with Canada, one made establishing an exchange of mail with British East Indies. The mail steamship service to Japan is referred to as being regular and energetic. An increase and extension of the service on the Japan and China line is recommended to the consideration of Congress. The mails have been satisfactorily carried to Brazil and the Hawaiian Islands. With regard to the proposed contract with the Commercial Navigation Company, of New York, authorized by act of Congress, Mr. Randall declined to execute one in the manner and on the conditions stated, but expressed his willingness to make a conditional contract for the carrying of mails to Europe by American steamships, at least four outward trips each week. In view of the great importance of the subject he earnestly recommended the proposed contract to the careful consideration and action of Congress.

During the year there were 2,167 post offices established, 849 discontinued and 26,481 in operation on June 30, 1868. The aggregate compensation for special agents, route agents, mail route messengers, postal railway clerks, local agents and baggage masters in service during the year ending June 30, 1868, amounted to $961,070.

The free delivery system has been in operation during the year in forty-eight of the principal cities. The aggregate results for the year are shown in the following figures:—The number of letter carriers employed was 1,198; mail letters delivered, 64,349,486; local letters delivered, 14,081,906; newspapers delivered, 16,910,715; letters collected, 63,164,625; amount paid carriers, including incidental expenses, $995,934; postage on local matter, $475,982; the salaries of 232 postal clerks aggregated $274,000, and those of 1,198 letter carriers, including incidental expenses, $995,934. The whole number of letters of all classes received at the dead letter office during the year ending the 30th June last, by actual count, was 4,162,144, showing a decrease of 144,864 letters from the number estimated to have been received during the previous year. Of these letters 3,995,066 were domestic letters; 167,078 were foreign, and were returned unopened to the countries where they originated. The whole number returned was 2,258,199, of which about eighty-four per cent. were delivered to owners and sixteen per cent. returned to department. The aggregate of postal letter service during the year is estimated at 720,000,000, and the proportion of domestic dead letters to the number of domestic letters mailed is about one to 126. The money order offices in operation number 1,468. During the year 831,937 orders were issued, representing $16,197,858, and the number paid 836,940, representing $15,976,501, and $142,035 paid to purchasers. The excess of issues over payments was $79,321. The total receipts from this branch were $124,503 and the expenditures $54,158.

The aggregate salaries of postmasters as revised July 1, 1864, was $3,383,381. As adjusted July 1, 1866, the sum was $4,033,728. As adjusted July 1, 1868, the sum was $4,545,888. The increase in a little over two years, from June, 1866, to and including July, 1868, was $1,162,506. This increase of salaries, under the rules prescribed by law, is encouraging. It is based solely upon the continual increase of the business of the department and of the people. The increase of the expenses of the postal service, based as it is upon public necessity and public demand, instead of being cause of discouragement is a subject of congratulation. The restoration of so large a part of the postal service suspended during the war, and the new service created by Congress since the close of the war—equal to one-third of the amount of service in operation at that time—have produced a less deficiency than existed in time of peace and prosperity previous to 1860. The proportion of deficiency to revenue is far less now than then, notwithstanding the service is very much greater than ever before. In 1859 the sum of the deficiency was only one million less than the entire revenue. In 1860 the sum of the deficiency

was about $3,500,000 less than the entire revenue. For the year 1868 the deficiency is ten millions less than the entire revenue. The majority of the Southern States have never paid their own expenses for postal service. They will not do so for a long time to come. With the exception of Iowa and Missouri none of the States or Territories west of the Mississippi river have ever paid a revenue equal to their postal expenses. The cost of the transportation of the mails in all new States and Territories and in all sparsely populated portions of the country never has been paid by those States or Territories out of their own revenues. It is only as population and business increase and the country is developed that postal service can be self-sustaining. The idea that the Post Office Department can be self-sustaining, in the present condition of the country is absurd. It cannot be, and ought not to be, for fifty years to come. The revenues will largely increase, and so will expenditures. Ten years hence I estimate the expenses of the Post Office Department at $40,000,000 and the revenues at $30,000,000. This increase must go on as long as the country prospers, and mineral, agricultural and commercial business increases. The mines are not yet all developed. The lands are not all cultivated. The rivers are not all navigated. The railroads are not all surveyed. The cities are not all built. The sea has not given us all we have a right to exact. Our country is not finished. Until it is finished he is not a wise or a sagacious man who assumes that the postal service will pay for itself. The Post Office Department can be made self-sustaining in one way, and that is by cutting off the postal service in the States and Territories where the receipts for postage are not equal to expenses. This would exclude all but Iowa and Missouri west of the Mississippi and all the States overborne by the rebellion. It could further economize by withdrawing all aid from the China, Brazil and Sandwich Islands steamship lines, thus saving $725,000. It could save $995,000 by abolishing the letter carrier system for the cities. It could also economize to the extent of over $700,000 by overturning the system of postal cars. It is true that in public estimation the letter carriers for cities are thought to be almost indispensible, but the system costs money and brings small revenue. It is all disbursement and no receipt. What if from twelve to twenty-four hours are saved in the transmission of mails between Washington and Cincinnati, or St. Louis, or Chicago and the whole West and Northwest by these traveling post offices, which put off and receive mails while traveling at thirty miles an hour, and which receive mails, make up mails and distribute mails as they go hurrying along? It costs money, and the government, like a miser, can keep its money in its chest. It gives no return and helps nobody, but is safely hoarded. A halting, timid, illiberal policy like this will save one million and lose twenty. Every dollar put out by the government in subsidies to build railroads, in subsidies to aid ocean commerce, in liberal appropriations to open lines of travel and develop material resources in a great nation like this is money put out at exorbitant usury, and will bring returns in development of material wealth and in making the nation great and rich and strong in everything of value and interest to a great people.

In the city of Boston the government has purchased, for a large sum of money, a very valuable site for a post office and for revenue offices. It is of very great importance, both to the postal and revenue service, that at as early a day as possible, plans for buildings should be adopted and appropriations made to erect them. There is no occasion for any delay, and every reason that economy and public necessity can suggest, why the work should go immediately forward. Boston is the capital of New England, and the government ought to erect public buildings there which would gratify the pride of that people and do honor to itself. I must again urge that steps be immediately taken to erect a suitable post office in the city of New York. A most eligible site has been purchased for that purpose. The necessities of the public service demand that there shall be no further delay in this case.

The actual difference between revenues, independent of special appropriations, and expenditures, including special appropriations, was $3,998,456. The revenues, independent of special appropriations, for the year ending June 30, 1868, were $16,292,600, and the expenditures, including service for which special appropriations were made, were $22,730,592, showing an excess of expenditures of $6,437,991. To meet this deficiency there were drawn under appropriations made for carrying free matter $3,800,000, and under acts making special appropriations for overland mail and marine service between New York and California, $1,125,000; steamship service between San Francisco, Japan and China, $125,000; between the United States and Brazil, $150,000; for carrying mail on routes established by acts passed during the first session of the Thirty-ninth Congress, $486,525, and for preparing and publishing post route maps, $10,000, leaving a deficiency, as stated in the first part of this report, for the year ending June 30, 1868, of $741,466. It is seen from the foregoing statement of receipts, expenditures and appropriations that in supplying necessary postal accommodations for the people, the excess of expenditures over revenues rapidly increased from 1854 to 1859 and 1860, inclusive, the deficiency for 1859 being $6,996,009, and for the year 1860 being $5,656,705. After the year 1860 the expensive service of the Southern States began rapidly to diminish, until in the year 1865 there was so little mail service performed in the States involved in the rebellion that the revenues exceeded the expenditures by $861,430. The service was almost entirely suspended. Directly after the war ended and during the second year of the administration of my immediate predecessor, ending June 30, 1866, the Post-master General entered upon the serious task of restoring the service in the insurgent States. In the States of Virginia, North Carolina, South Carolina, Georgia, Florida, Tennessee, Alabama, Mississippi, Arkansas, Louisiana and Texas, the service was restored during the year ending June 30, 1866, to an extent costing $1,086,527. In the same States the cost of service for the year ending June 30, 1867, increased to $1,891,531, and for the year ending June 30, 1868, it increased to the sum of $2,168,459. This expenditure was for transportation alone, and includes none of the other large expenses necessarily connected with the postal service in those States. During the year ending June 30, 1868, the aggregate length of routes increased to 216,928 miles, and the annual transportation increased to 84,224,325 miles, an increase of 14,683 miles in length of routes and 5,241,516 miles in annual transportation. Since the 30th day of June, 1865, and to the first day of July, 1868, three years, the aggregate length of mail routes has increased 74,588 miles and the annual transportion has increased 26,230,031 miles. Since I came to the head of the Post Office Department, in July 1866, after the close of my immediate predecessor's second and last year as Postmaster General, the aggregate length of mail routes put under contract and in actual operation up to the first day of July, 1868, is 36,008 miles, and the increase of annual transportation for the time increased 12,386,411 miles. The increase of service and the great increase of the expenses of the department for inland mail transportation have not all arisen from the restoration in the late disordered States. A large amount of the service in operation previous to the war, and discontinued during the war, has not yet been restored. In addition to the increased and increasing railroad transportation, with its increasing expenses, Congress, by a series of acts, between the 3d day of March, 1865, and the 25th day of July, 1868—a little over three years—created 1,267 new mail routes, with an aggregate length of 48,744 miles. Of these thirty-three were established in the late rebel States, with an aggregate length of less than 1,000 miles. One hundred were established in Territories, with an aggregate length of 12,141 miles.

The subject of connecting the postal service with the magnetic telegraph is one deserving the special attention of Congress.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement to the close of navigation during the years 1867 and 1868, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1868..	467,900	14,085,200	16,990,400	3,682,200
1867..	410,100	9,466,100	15,405,800	3,866,100
Inc..	57,800	4,619,100	1,584,600	
Dec.				287,900

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase of 4,981,620 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement to the close of navigation in the years indicated:

	1866.	1867.	1868.
Canal opened—	May 1.	May 6.	May 6.
Flour, bbls.	570,700	410,100	467,900
Wheat, bushels..	7,684,200	9,466,100	14,085,200
Corn, bushels...	26,516,500	15,405,800	15,990,400
Barley, bushels.	7,440,800	3,866,100	3,628,200
Oats, bushels...	11,220,600	8,841,000	12,184,000
Rye, bushels....	1,749,500	890,300	869,500
Malt, bushels...	329,600	817,900	510,700
Beef, bbls.....	2,312	1,481	1,800
Pork, bbls.....	69	919	120
Bacon, lbs.....	10,000	34,000	.....
Butter, lbs.....	1,468,000	694,000	348,300
Lard, lbs.....	108,000	1,236,000	601,600
Cheese, lbs.....	11,770,000	8,284,000	7,769,200
Wool, lbs.....	584,000	360,000	250,000

Pittsburg and Connellsville Railroad.

The affairs of this company are represented as being in a prosperous condition. Thirty-eight miles of the road between Pittsburg and Cumberland have been put under contract, including all the heavy work upon the line. The contractors are already at work, and in two years the entire line will be completed to Cumberland. As soon as the heavy work on the line is sufficiently advanced the remainder of the road will be put under contract so that the whole work will be completed and put in running order by the winter of 1870. The heavier portions of the work at Sand Patch tunnel have been let upon most favorable terms, and that work will be pushed with energy.

☞ Mr. Jacob F. Randolph has succeeded to the position of president of the Morris Canal and Banking Company, rendered vacant by the death of Mr. Wm. H. Talcott. Mr. Randolph has for a long time served as vice-president of the company.

☞ The Secretary of the Treasury has just issued to the Union Pacific Railroad Company $640,000 in bonds, being for the thirty-second section of the road, extending from the eight hundred and sixtieth to the eight hundred and eightieth mile post.

☞ The Southwest and Northwest Railroad has been sold under mortgage by the State for $318,000. It was purchased by John Stanton, of Boston, in interest of the Wills Valley Railroad, of which ex-Gov. Patton is president.

☞ The stockholders of the railroad to run from Chattanooga to Meridian have elected N. D. Stanton, of Boston, president, and Ex-Governor Patton, vice-president.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, December 26, 1868.

Stock Exchange and Money Market.

Money has been in quite urgent request for both speculative and mercantile purposes, since our last; while the available supply has been materially reduced, and the price of accommodation to borrowers correspondingly advanced. Call loans closed more generally at the full rate of 7 per cent. in coin, than at the same legal figure in currency, only a few of the more prominent Government and Stock houses having had balances tended to them at the latter quotation. A good many street operators have paid liberally for aid until the bank quarter day (Jan. 4,) shall have been passed. The banks of the city have been further weakened in the cash reserves, by the Western and Southern drain of funds. On their last weekly averages, they reported a loss of a little over 6¼ millions of deposits, nearly 3¼ millions of legal tender notes, and ½ million of specie. The Philadelphia Banks, on the other hand, made a slight gain in specie and legal tender, as also in deposits. The city banks cut down their loan averages nearly a million, while the Philadelphia Banks added to their loan and discount item, about half a million. The discount market here has been working closer and rates on prime to good business paper have been quoted up to 8@10 per cent. per annum. On Tuesday of this week, the failure of a leading Worth street commission house in the domestic dry goods line was reported, with liabilities placed as high as 1½ millions. This report seriously disturbed confidence in mercantile credits, and led to a temporary suspension of dealings on the part of the street brokers in business paper. The failure was attributed to the very heavy advances made by the unfortunate firm on property consigned to them for sale, and on which they were not able to realize as promptly and advantageously, as they had calculated on. The Sub-Treasury disbursement, last week, were a million in excess of its receipts. Thus far, in the current week, it has been gaining a little in its cash reserves. It held a balance on Tuesday evening of $91,054,011 or a trifle more than on the preceding Tuesday. It has been stated that the Sub-Treasury will probably commence disbursing the January coin interest about Monday or Tuesday next. Washington advices intimate that the forthcoming January interest, to be paid on Government account, will exceed $30,000,000 in gold. It will embrace the interest on a variety of securities, including three issues of Five-twenties, namely: the whole of the '68s, all of the '67s and the new issue of '65; and, beside these, the sixes of 1881, and the loans of 1858 and 1860.

The specie reserve of the city banks is now $18,643,584, against $13,468,109 same time last year. The city bank deposits are now $183,077,228, against $177,832,583 week ending Dec. 14, 1867. The legal tender reserve amounts to $50,796,133, against $58,311,432 same time last year. The circulation now stands at $34,353,758, against $24,019,101 same time last year. The loans are now $262,434,180, against $244,165,358 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $101,851,355 a day, against a daily average of $97,509,745 the preceding week, and $105,855,566 the week ending with Dec. 2, 1868. The current week's exchanges average about $125,000,000 a day. The city banks, last week, lost $497,194 of specie, $6,260,187 of deposits, and $3,219,732 of legal tender notes. They reduced their loans, $925,964; and increased their circulation, $147,852.

National Bank notes to the amount of $142,850 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $311,294,086, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $11,431,972, leaving, with the existing 1,629 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,862,114. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,827,000; and for the public deposits, $36,378,850—making a total of $378,205,350. The Treasury Department last week redeemed and destroyed $607,500 of worn and mutilated fractional currency, and issued $612,000 of new. The outstanding amount of fractional currency on the 1st of December, was $33,875,268, against $33,413,985 on the 1st of November, 1868.

The Gold Exchange Bank clearances last week

were on a reduced scale. Its average amount of loans and discounts was $1,195,841 00, average amount of specie $677,935 61, average amount of deposits $1,103,508 79. This bank has declared a dividend of eight per cent., payable January 1.

The U. S. Sub-Treasury receipts, week ending with Dec. 19, were $7,158,050, including $1,562,102 from customs duties; payments, $8,230,647, including $335,000 of coin interest; balance at the close of the week, $90,019,384, against $91 091,980, at the close of the preceding week, showing a decrease of $1,072,596. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,201,648 including $289,000 from customs; and payments, $903,800, including $78,000 of coin interest; on Tuesday, receipts, $1,286,274 including $269,000 from customs, and payments, $549,494, including $50,857 of coin interest. The balance at the close of business on Tuesday stood at $91,054,011, against $91,020,262 a week previous; and $90,613,293, on Dec. 2, 1868.

The outstanding amount of coin certificates on the 1st of Dec., was $23,255,840, against $19,716,840 on the 1st of Nov., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $578,000, and retired $1,470,102 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during November, reached $7,658,840.

Government revenues have been on a very moderate scale, since our last. The excises, last week, yielded about 2½ millions; customs at the port of New York, $1,562,102, and at the outports about $500,000 (in coin) more, making the grand total income for the week equal to about $5,284,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were $191,180,564. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about 69½ millions, according to the latest Washington advices.

Gold has been fairly active but more than usually variable in price, influenced by the varying financial and commercial reports from Europe, and by the stringency in Money, which latter circumstance bore sharply against speculative operations for higher figures, toward the close. The range of the price, during the week has been from 134¾@135⅞, and the latest quotation on Wednesday, 134⅞. The export movement has been light. The customs drain has been very moderate. Many of the domestic holders of the public funds have been realizing on their January coupons, which the brokers have been buying at a reduction of ¼@½ per cent. from the going rates for coin.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $6,880,850, against $3,096,869 same time last year. The customs demand for Gold last week, averaged $260,350 a day; thus far, this week, it has been equal to $279,000 a day, or equal to a weekly aggregate of $1,674,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $58,342 and from California, $392,410. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $114,309,321, against $116,100,000 same time in 1867. At the port of San Francisco, $8,045,193, against $7,203,534 last year.

The total receipts of California gold at this port, since Jan. 1, 1868, have been $34,483,540, against $27,677,556 in 1867, showing an increase thus far in 1868, of $6,805,984. The exports of specie, from this port, last week, were $274,543, against $1,584,206 same week last year; total, since Jan. 1, 1868, $70,109,991, against $48,564,601 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $335,000; since Jan. 1, 1868, $82,009,517, against $61,718,595 same time in 1867. The specie exports from San Francisco, from Jan. 1, to Dec. 4, were $33,327,343, against $38,519,841 same time last year.

There has been more inquiry for foreign exchange, and increasing firmness has been reported in the price. Bankers' prime sixty day bills on London closed on Wednesday at 109½@109¾, and on Paris to 5.20c.@5.16¼; sight bills on London to 110¼@110½, and on Paris to 5.13¾c.@5.12½. The offering of produce bills has been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,666,217, against $2,607,233, same week last year; total, since Jan. 1, 1868, $163,760,659, against $185,535,176 in 1867.

Government securities have been rather weaker in price, influenced chiefly by the unusual and unexpected pressure in the money line, which has compelled many holders, short of means, to realize, while there has been only a moderate local inquiry for the public funds. Speculation has been partially suspended, and the aggregate dealings of the week fall short of the average weekly transactions. The principal street firms have been less willing to sell than to buy at the going rates, as they have been looking for a much augmented trade after the Christmas and New Year Holidays at an advanced range of prices, in view of the enormous impending interest and dividend disbursements, which after Jan. 1, must find lucrative employment, and of the fact that the national funded obligations afford an unrivalled form of prompt, secure, and profitable investment.

U. S. sixes of 1881 closed here on Wednesday at 114⅜@114½; U. S. Five-twenties of 1862, 110¼@110⅜; U. S. Five-twenties of 1864 at 106½@106⅝; U. S. Five-twenties of 1865 at 107⅜@107½; U. S. Five-twenties of 1865, consolidated, 109⅞@110; U. S. Five-twenties of 1867, 110@110⅛; U. S. Five-twenties of 1868, 110⅛@110⅜; U. S. Ten-forties at 105⅛@105⅜; U. S. Six per cent. currency bonds, 99⅛@99⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 9.	Dec. 16.	Dec. 23.
Consols	92½	92½	92½
U.S. 5-20's of 1862	74½	74½	74¼
Erie	26¼	27½	26¼
Ill. Central	96¼	96¼	95¼

The railway and miscellaneous stock market has been in a highly excited state, since the formal announcement on Monday morning of the enormous 80 per cent. scrip, and 4 per cent. cash dividends on the New York Central property, which led to a sudden advance of full 28 per cent. in the market value of the stock which stood at 134 on Saturday night, and sold as high as 162 early on Monday. The dealings in this interest were of extraordinary magnitude, and the fluctuations after the first great rise, frequent and violent. The dividend announcement took the street operators completely by surprise. Many of them were caught *short* of the stock, and according lost heavily. Very few of them, however, were forced into suspension on their contracts. For a while the balance of the list benefitted by the rapid rise in Central; but under the money pressure, the market closed feverishly and irregularly.

General business has been on a restricted basis. Provisions have been buoyant in price. Most other kinds of domestic produce have been depressed and declining. Middling upland cotton closed heavily on Wednesday at 25@25¼ cents per lb. The stock of cotton now here is estimated at about 32,500 bales. The receipts at the port this week, have averaged about 4,000 bales a day. The receipts at all the ports, since Sept. 1, 1868, have been 853,000 bales, against 691,000 bales same time last year; exports, same time 415,000 bales, against 331,000 bales same time last year; stock on hand at latest dates, 285,000 bales, against 291,000 bales same date last year. Total crops of 1867–'8, 2,430,893 bales; total receipts at ports year ending Sept. 1, 1868, 2,240,282 bales; total exports thence, same time, 1,657,015 bales. The exports of domestic cotton goods from this port, since Jan. 1, have been 28,034 pkgs., against 13,283 pkgs., same time last year. From Boston, 8,193 pkgs., against 8,977 pkgs. same time in 1867. At the Live Stock market, this week, Beeves have been in more demand at from 10@20c. for poor to extra per lb.; week's receipts, 6,042. Veal calves have been in active request at from 9@13c. per lb.; receipts, 656. Sheep and lambs quite brisk at from 4¼@9½, per lb.; receipts, 34,262. Swine, fairly active at from 9⅛@9½c. per lb., all live weight; receipts, 28,627. There has been more activity in both domestic and foreign dry goods, but in imported merchandise transactions, as a rule, have been light, and prices rather weak. The total imports of foreign dry goods, last week, were $691,940 and the total amount marketed $686,412. The value of foreign merchandise imported last week, was $1,100,305—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $1,792,245, against $2,117,077 same week last year; from Jan. 1, 1868, $237,801,099, against $232,981,347 same time in 1867. The ocean freight market has been moderately active, and rates have been quoted firmer. For Liverpool we quote flour at 2s.@2s. 6d. by sail, and 3s.@3s. 6d. by steamer, per bbl.; grain at 6¼d.@6½d. by sail, and 8d. by steamer, per bushel; cotton at 5/16d.@3/8d. by sail, and 3/8@½d. by steamer, per lb.; and heavy goods 20s.@35s. by sail, and 35s.@50s. steamer, per ton. Total number of vessels in port on Wednesday, 519.

The New York exports, exclusive of specie, for the week ending Dec. 22, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$2,607,233	$3,666,217
Prev. reported	182,927,943	160,094,442
Since January 1	$185,535,176	$163,760,659

The imports for the week ending December 19,

and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$918,857	$691.940
Gen. merchandise.....	1,198,220	1,100,305
Total for the week.....	$2,117,077	$1,792,245
Previously reported....	230,864,270	236,008,854
Since January 1.....	$232,981,347	$237,801,099

The balance in the Sub-Treasury on Tuesday was $91,054,011 75.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Buffalo, New York and Erie 1st mort., 89; New York and New Haven 6s, 96; New Jersey Central 2d mort., 100; Long Dock bonds, 85; St. Louis and Iron Mountain 1st mort., 86½; Oil Creek and Allegheny River R. Richmond and Danville Railroad.

At the recent annual meeting of this company in Richmond, Va., A. S. Buford, Esq., was unanimously re-elected President. Resolutions were adopted asserting the importance of railroad connection between Richmond and the Roanoke Valley, by way of the Richmond and Danville Railroad, and the Keysville extension to Clarksville; appointing a committee to examine and report as to the best mode of encouraging such connection, and appointing a committee to confer with the directors of the Richmond and Petersburg Railroad in regard to a connection with their road, and the use of their bridge across the James, in anticipation of the building of an air line road from Washington to Atlanta.

☞ The contract for building the railroad bridge across the Mississippi River at Keokuk has been closed with the Keystone Bridge Company, of Pittsburg, for $1,000,000. The bridge is to be of iron, like the one at Dubuque, to be commenced in the spring, and finished within one year.

TO CAPITALISTS AND INVESTORS

The First Mortgage 7 per cent. Bonds
OF THE
Rockford, Rock Island and St. Louis Railroad Co,
PAY BOTH
PRINCIPAL AND INTEREST IN GOLD,
And are free of Government Tax.

This enterprise has long since past the point at which its completion could be considered doubtful. *Nearly half the line is substantially ready for the rails,* and contracts are in progress for large quantities of iron, and an adequate supply of rolling stock. The rails for the division connecting the Company's coal mines with the Chicago and Northwestern Line are all on the ground, and being rapidly laid; so that *the Company will shortly be delivering their coal,* for which they have contracts covering all they can mine this season.

THE CAPITAL STOCK,
FIXED AT
NINE MILLIONS,
is already largely subscribed for, and the remainder is going into the hands of individuals along the route, or being taken by the counties and towns through which the road passes.

THE ENTIRE CAPITAL
will, without doubt, be soon taken, and the subscription closed.

THE BONDS ARE A FIRST AND ONLY LIEN of $21,000 per mile upon 400 miles of railroad, traversing

THE RICHEST AND MOST POPULOUS DISTRICT
of Illinois, upon the Company's franchises, and property of every description, including
20,000 ACRES OF VALUABLE COAL LANDS,
partly owned in fee and partly leased for 50 years, and estimated to contain
ONE HUNDRED MILLION TONS OF COAL

Each bond is for $1,000, or £200 sterling, and is convertible into stock of the Company at the option of the holder. The interest is payable on Feb. 1st and Aug. 1st.

The Trustees for the Bondholders is the Union Trust Company of New York. Arrangements have been perfected by which a considerable part of this Loan is likely to be placed in Europe, and only a small portion of the issue will remain to be disposed of at home.

Parties subscribing at once *will secure the Gold premium on the coupon of Feb. 1st,* which is equal to a reduction of one per cent. on the price of the Bonds.

We are authorized to offer what remains of these Bonds at 97½ and accrued interest in currency; at which price, considering the soundness of the enterprise and the ample security of the Loan, the Bonds must be regarded as the
CHEAPEST AND BEST INVESTMENT ON THE MARKET.

Other approved Securities received in exchange at market rates.

Pamphlets giving full information sent on application.

The Bonds may be had at the office of the Company, 12 Wall street, and of
HENRY CLEWS & CO., Bankers,
32 Wall street, New York.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of November, were:

ENTERED FOR CONSUMPTION.

☞ The Baltimore and Potomac Railroad is being pushed rapidly to completion. Hon. Oden Bowie president of the company writes that "every mile of the road from the Annapolis line to the District of Columbia boundary is being worked, and the whole road from Baltimore to Washington will be completed by the 1st of January, 1870."

Mississippi River Railroad.

A meeting of the directors of this Company was held in Memphis, Tenn., on the 10th of December. A. S. Mitchell, Esq., President, in the chair. After full explanations by the President and by Major Cochran, of the surveys and stock subscriptions recently made under their direction in Obion county, the following orders were entered:

Ordered, That the President and Chief Engineer be instructed to put under contract forthwith the work of preparing the roadbed of the Mississippi River Railroad between Paducah Junction and the town of Troy, and that a call of twenty-five per cent on the stock subscriptions in Obion be made to meet the cost of the work.

Ordered, That a committee of five, consisting of the President and Vice President, Messrs. A. H. Kerr, A. Harris and J. T. Douglass, be instructed to wait on the County Commissioners of Shelby county and urge upon them a subscription to the stock of the Mississippi River Railroad; and, also, that the same committee be constituted, with the co-operation of such citizens of Memphis as they may be able to obtain, to solicit from the City Council a subscription of $300,000, so that the construction of the road may be commenced forthwith at Memphis and be conducted energetically from each end of the road.

The following resolution was submitted by the President and unanimously adopted by the Board:—

Resolved, That the Mississippi River Railroad Company, while intending to prosecute the construction of their road with all energy, relying on the aid of the city of Memphis and the county of Shelby, and the liberal support of the people along the line, will gladly welcome foreign capital to their support, and they hereby distinctly invite the co-operation of any and all capitalists who are willing to put their money in this valuable line of railroad in the Southwest.

The Cincinnati and Newport Bridge.

The Cincinnati *Commercial* publishes a view and a description of the Bridge for Railroads, vehicles and foot passengers, intended to be built over the Ohio River, between Butler street in Cincinnati, and Saratoga street, in Newport, Ky. The view represents the proposed appearance of the projected bridge. To the right, looking down stream, is the Ohio shore, and to the left that of Kentucky. Seen beyond the railroad bridge, a quarter of a mile or more, is the present majestic suspension bridge. The Little Miami elevator, which conceals the Cincinnati end of the new bridge, is nearly two squares east of it. The bridge, as planned, is of wrought iron with stone piers, five in the water, two on the land on the Cincinnati and one on the Newport side.

The stone work of all the piers is to be of the best limestone, up to the line of high water, and freestone above that, excepting the two piers of the middle, or long span, which will be entirely limestone. Much of the stone for the piers has already been quarried, George A. Smith, of Cincinnati, has the contract for the stone-work.

The bridge proper will be of the best wrought iron, in lower and upper chords, up-rights, braces, &c. No timber will be used save in the flooring. The Keystone Bridge Company has the contract for the bridge proper, which will be constructed after the popular and very safe patent of Linville & Piper, now in quite general use in this country. It was upon this plan that the Steubenville bridge was constructed. As we understand this patent, any strain on any portion of the bridge is distributed over the entire superstructure. By means of the braces and uprights, the upper and lower chords are oppositely affected by weight. The tons of tensile strain on the lower chord will produce a compressive strain of ten tons on the upper chord, the one effect, in a great measure, destroying the other.

The floor of the main span, on which the train is seen; will be about 100 feet above low water. This span is planned at a length of 400 feet; the one next south is 240 feet, and the others as near 200 feet each as the division of distance will admit. There will be seven spans in all, with the eight piers. Beyond the Front streets of both Newport and Cincinnati the grade to the cities will increase, that of the wagon tracks being much sharper than the longer and easier one of the railroad.

The bridge will be forty-one or two feet in width, with thirteen feet in the middle for trains, one way on either side for cattle and vehicles, and on the outside of these still, the passages for foot passengers.

This bridge will be built by the Newport and Cincinnati Bridge Company, organized with a capital of $1,200,000, and having the following as its Board of Directors and officers: Alfred Gaither, President; Albert S. Berry, Vice President; Charles H. Kilgour, Secretary and Treasurer; M. J. King, William Ringo, W. H. Clement and T. G. Gaylord.

They contemplate having a train cross this bridge by the 1st of December, 1869. J. H. Linville, of Philadelphia, is the chief engineer and supervising architect. Mr. John C. Wilson is the resident engineer, with an office at the north west corner of Pearl and Bulter streets, Cincinnati.

Passage Through the Suez Canal.

The Rob Roy, an English merchant vessel, recently passed through the Suez Canal, and the Captain writes to the London *Times* the following account of the present condition of this great undertaking, after thirteen years have been spent in its contruction:

"The canal, as designed, is about a hundred miles long. Of this length about half is sufficiently advanced for the sea water to reach fifty miles—that is, into the middle of the Isthmus. It is finished to its full breadth, which is a hundred yards, or the width of a considerable river, but not to the intended depth of twenty-six feet. The remaining fifty miles not yet penetrated by the sea water, are in various states of progress; parts are excavated, parts are under water, parts will have to be laid under water which is to be supplied from a great lake not yet filled, while a good many miles have to wait for large blasting operations. To English ears it must sound promising that a good deal of clay has to be cut through; for nothing can be dealt with so successfully in this country, as that material. The completion of the southern half of the canal would look like a very long work but for the fact of the immense subsidiary works being completed and a vast mass of appliances being on the spot. The service Canal, from the Nile to the mid point of the salt water Canal, and branching thence to either extremity, is an immense work, not less than a hundred and fifty miles long, and in full use for the supply of fresh water for navigation and for otherwise assisting the work to be done. The port at the Mediterranean end is an immense work, already available. The sea channel at the Suez end has difficulties, but only such as engineers are familiar with. Forty enormous and costly dredging machines are at work on different parts of the Canal—chiefly, we conclude, the

northern half—discharging mountains of mud, sand and clay over the banks or into barges. The rate of expenditure is put at £200,000 per month, or two and a half millions a year. Our informant calculates that a driving wind, after blowing a month together, will send into the canal, when finished, five hundred tons of sand a day, or fifteen thousand tons a month. This, however, is no more than a single dredging machine would be able to keep down at a certain moderate cost in coal. The difficulty of keeping up the banks of the canal, exposed as they will be to the wash of steamers, and to a surface often agitated by the wind, is a more serious matter, but one which does not enter into the present question. Upon the whole, it does seem a moral certainty that, at least in two or three years—for one year seems out of the question—this great undertaking, worthy of a heroic age, will be brought to what we may fairly call an actual completion. In the course of the year 1871, we may probably see the sea water of one ocean flowing into the other."

Pittsburg and Connellsville Railroad.

The 16th annual meeting of the stockholders of this company was held in Pittsburg on the 7th inst. The meeting was organized by calling James S. Croft, Esq., to the chair, and appointing John H. Page, Esq., as Secretary. W. O. Hughart, Esq., President of the company, having stated the object of the meeting, presented on the part of the Board of Directors the sixteenth annual report to the stockholders, with the usual accompanying tables and statements, comprising the reports of the Treasurer, Superintendent, Master of Machinery and Auditor.

The report of B. H. Latrobe, Esq., Chief Engineer, to the President, detailing operations of the Engineer Department during the year, was then read, after which the report of G. L. B. Fetterman, Chairman of the Auditing Committee, submitted their report of their examination of the company's books and papers.

On motion, the reports were received and accepted, and ordered to be printed.

An act of the Legislature of Pennsylvania, approved April 1st, 1868, empowering the Pittsburg and Connellsville Railroad Company to construct branches from its main line, was submitted to the stockholders by President Hughart, and on motion it was accepted.

A communication from his Honor, Mayor Banks, of Baltimore, nominating Messrs. James Hodges, W. H. Perkins and Hazeltine G. Vickeny, as Directors to be chosen on the part of the City of Baltimore, was presented and received.

The election was then held when the following gentlemen were declared duly elected for the ensuing year: Messrs. William Ogden Hughart, G. L. B. Fetterman, John Fleming, William Phillips, William Baldwin, of Pittsburg, Joseph Pennock, of Philadelphia; Cyrus Meyers, of Somerset; Benjamin Deford, Johns Hopkins, James Hodges, William H. Perkins, Hazeltine G. Vickeny, of Baltimore.

The meeting then adjourned.

☞ The West Wisconsin Railroad has been completed from Tomah, on the Milwaukee and St. Paul Railroad, to Black River Falls, a distance of 31 miles. Tomah is 153 miles from Milwaukee, and 42 miles from La Crosse.

☞ The contract for building the Cedar Falls and Minnesota Railroad from Charles City, Iowa, to the State line, about 12 miles south of Austin, has been let.

New Railroad Enterprise.

At a recent meeting of the New York and Highland Suspension Bridge Railroad Company, it was resolved to construct a railroad from this city to a point near the eastern terminus of the proposed Hudson Highland Suspension Bridge, where it will form a connection with the Erie and New England Railroad. It is expected to use the Harlem track to the upper end of the island, crossing the Harlem River near the High Bridge. North of this point it will run along the valley between Harlem River and Jerome Park; thence following the course of Tibbitt's Brook and Croton Aqueduct, to a point directly east of Yonkers; thence along the Saw Mill River Valley to Unionville; thence through Sleepy Hollow Valley, to Croton Lake; thence northerly to Gregory's Pond, and thence westerly to its proposed junction with the Erie and New England Railroad. About half of the right of way for the proposed railroad has been bought, and the route surveyed.

Branch Railroads on Long Island.

The branch road from Sag Harbor to connect with the Long Island Railroad is making good progress. Almost all the right of way has been secured from Sag Harbor to the point where the road crosses the turnpike at Bridge Hampton, at a cost of about $250, or $10 per acre where it passes through woodland. As soon as the same has been obtained a grading force will be put at work, and the road built as soon as possible.

Much activity exists on the Mineola and Glen Cove Branch extension to Oyster Bay. About fifty men are now engaged in grading the route, which will be finished in a short time. The rails will not be laid until spring.

☞ The Havre de Grace *Republican* says that the Philadelphia and Baltimore Central and Columbia and Port Deposit Railroads have each finished the grading and laid the rails to the junction of their roads on the Susquehanna River, and that freight is already being carried from along the line of the Philadelphia and Baltimore Central over the Columbia and Port Deposit and Philadelphia, Wilmington and Baltimore roads, by way of Port Deposit and Perryville, to Baltimore, and that regular passenger trains will soon be put on the same route.

☞ The earnings of the Milwaukee Division of the Chicago and Northwestern Railroad for November, 1868, were $89,356 28, a decrease, as compared with the same month last year, of $5,872 06. For the six months ending November 30th, the earnings were $569,990 59, an increase over the same period of last year of $23,102 33.

☞ Application is to be made to the Maine Legislature for a charter for a railroad from some point on the European and North American Railway, above Lincoln, to the north line of the State.

☞ The cars of the Portland and Rochester Railroad are now running to Alfred Village Station.

☞ Two miles of the proposed horse railway to the Bluffs at La Crosse, Wis., have been graded ready for the iron early in the spring.

☞ The Sheboygan and Fond du Lac Railroad is now running within sight of the latter city.

Virginia Valley Railroad.

This road is intended to run from Harrisonburg, in Rockingham County, the present terminus of the Manassas Branch of the Orange and Alexandria Railroad, through Augusta, Rockbridge and Botetourt Counties, to Salem in Roanoke County, there to unite with the Virginia and Tennessee Railroad. The distance from Harrisonburg, its northern terminus, to Staunton, on the Chesapeake and Ohio (late Virginia Central) Railroad, will be 25 miles; from Staunton to Lexington, 36 miles; from Lexington to Salem, 55 miles—in all 116 miles. The Manassas Branch of the Orange and Alexandria Railroad, with which it will connect at Harrisonburg, crosses the Blue Ridge at Strasburg, eighteen miles from Winchester, the intervening railroad link between which point and Strasburg will soon be completed, thus giving, when the Valley Railroad line shall be completed, a continuous railroad line from Baltimore, by the Baltimore and Ohio and Harper's Ferry and Winchester roads, the Strasburg connection, and the Harrisonburg and Salem Valley Railroads, to the Virginia and Tennessee Railroad and its numerous tributaries in the Southwest.

South Side (Petersburg & Lynchburg) R.R.

The earnings of this road for the fiscal year ending September 30, 1868, were $389,360 58, and the expenses, $325,800 58, leaving the net earnings, $63,560. In 1867, the earnings were $330,090 36, the expenses $266,316 42, and the net earnings $63,773 94. This shows an increase in earnings of $59,270 22, with an increase in expenses of $59,484 16, a net decrease of $213 94. The cash transactions amounted to $810,571 93, and the balance on hand at the close of the year was $20,587 95. Much the larger portion of the increase in expenses is attributed to losses in the shape of damages to freights and to extraordinary repairs. The liabilities of the company, exclusive of interest past due upon the funded debt, and the assets, were at the close of the past fiscal year, respectively, $217,042 and $94,256. The President thinks that in the present favorable condition of the company's credit the whole floating debt could easily be discharged, in case of emergency, by the sale of its first mortgage bonds. A new mortgage is also authorized, and bonds have been prepared to issue upon it, denominated the consolidated mortgage of the Southside Railroad Company, which looks to the creation of $1,900,000 of bonds, classified with reference to the existing claims of bondholders, and preserving, relatively, the rights and privileges of each.

Hoosac Tunnel.

It is announced that the Hoosac Tunnel contract has been disposed of, so far as abstract propositions are concerned, and that the executive council are now at work upon the details. Messrs. Shanly Brothers of Canada are the successful parties, and their bid is stated to be $4,750,000. The terms of security have been so far modified as to allow the parties contracting to finish work on the tunnel to the amount of $500,000 before drawing from the Treasury in lieu of furnishing the like amount in bonds.

☞ There were sold at Auction in this city on the 7th inst., $190,000 Wilmington and Manchester Railroad 2d preferred 7 per cent. bonds at 15 to 20 per cent., and $63,000 2d mortgage 7 per cent. bonds same road at $13 per thousand.

☞ Application is to be made to the next Legislature of Massachusetts for leave to build a new railroad from Weir Junction, in Massachusetts, through Taunton, Dighton, Rehoboth and Seekonk, to the northerly terminus of the Providence, Warren and Bristol Railroad, in East Providence, R. I.

☞ The West Branch of the North Missouri Railroad was completed to the Minesville Junction of the Cameron and Kansas City Railroad on the 1st inst. Trains have since been running regularly over it.

☞ The Denver Pacific Railroad, it is stated, has been graded the entire distance, 105 miles, from Denver to the connection with the Union Pacific Railroad. The entire work is paid for. The track it is asserted, will be laid early in the spring.

☞ A bill has been introduced into the Mexican Congress, for the construction of a railroad from Anton Lizardo to Puerto Angel. The demands are so liberal on the part of the company, that it is believed the bill will pass at an early day.

☞ The earnings of the Atlantic and Great Western Railway from 1st April, 1868, (the commencement of the receiver's fiscal year,) to 31st Oct., 1868, were $2,804,708 44; for the same period last year, $3,085,038 35—decrease, $280,329 91.

☞ Regular trains are now running West on the Union Pacific Railroad as far as Evanston, 97 miles West of Bryan station. The 960th mile post has been reached, and the road thus far is ready for inspection.

☞ F. W. Winshon, of Chicago, has been elected President of the Leavenworth and Des Moines Railroad. Arrangements have been made for the immediate completion of the road from Leavenworth to Chicago.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our

LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

S. W. HOPKINS & CO.,
69 & 71 Broadway, New York.

THE UNION PACIFIC
RAILROAD COMPANY.

OFFER A LIMITED AMOUNT OF THEIR

First Mortgage Bonds
AT PAR.

NINE HUNDRED AND SIXTY MILES

Of the line West from Omaha are now completed, and the work is going on through the Winter. As the distance between the finished portion of the Union and Central Pacific Railroads is now less than 400 miles, and both companies are pushing forward the work with great energy, employing over 30,000 men, there can be no doubt that the whole

Grand Line to the Pacific

Will be open for Business in the Summer of 1869.

The regular Government Commissioners have pronounced the Union Pacific Railroad to be FIRST CLASS in every respect, and the Special Commission appointed by the President says:

"Taken as a whole, THE UNION PACIFIC RAILROAD HAS BEEN WELL CONSTRUCTED, AND THE GENERAL ROUTE FOR THE LINE EXCEEDINGLY WELL SELECTED. The energy and perseverance with which the work has been urged forward, and the rapidity with which it has been executed are without parallel in history, and in grandeur and magnitude of undertaking it has never been equalled." The Report states that any deficiencies that exist are only those incident to all new roads, and that could not have been avoided without materially retarding the progress of the great work. Such deficiencies are supplied by all railroad companies after the completion of the line, when and wherever experience shows them to be necessary. The report concludes by saying that "the country has reason to congratulate itself that this great work of national importance is so rapidly approaching completion under such favorable auspices." The Company now have in use 137 locomotives and nearly 2,000 cars of all descriptions. A large additional equipment is ordered to be ready in the Spring. The grading is nearly completed, and ties distributed for 120 miles in advance of the western end of the track. Fully 120 miles of iron for new track are now delivered west of the Missouri River, and 90 miles more are *en route*. The total expenditure for construction purposes in advance of the completed portion of the road is not less than eight million dollars.

Besides a donation from the Govt. of 12,800 acres of land per mile, the Company is entitled to a subsidy in U. S. Bonds on its line as completed and accepted, at the average rate of about $29,000 per mile, according to the difficulties encountered, for which the Government takes a second lien as security. The Company have already received $22,158,000 of this subsidy, of which $1,280,000 was paid Dec. 6th, and $640,000 Dec. 14th.

Government Aid—Security of the Bonds.

By its charter, the Company is permitted to issue its own FIRST MORTGAGE BONDS to the same amount as the Government Bonds, *and no more*. These Bonds are a First Mortgage upon the whole road and all its equipments. Such a mortgage upon what, for a long time, will be the only railroad connecting the Atlantic and Pacific States, takes the highest rank as a safe security. The earnings from the way or local business for the year ending June 30, 1868, on an average of 472 miles, were over FOUR MILLION DOLLARS, which, after paying all expenses, were much more than sufficient to cover all interest liability upon that distance, and the earnings for the last five months have been $2,386,870. They would have been greater, if the road had not been taxed to its utmost capacity to transport its own materials for construction. The income from the great passenger travel, the China freights, and the supplies for the new Rocky Mountain States and Territories must be ample for all interest and other liabilities. No political action can reduce the rate of interest. It must remain for thirty years—*six per cent. per annum in gold*, now equal to between eight and nine per cent. in currency. *The principal is then payable in gold.* If a bond with such guarantees were issued by the Government, its market price would not be less than from 20 to 25 per cent. premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government prices.

The price for the present is PAR, and accrued interest at 6 per cent. from July 1, 1868, in currency.

Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,

AND BY

John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Bonds sent free, but parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP WAS ISSUED Oct. 1st, containing a report of the progress of the work to that date, and a more complete statement in relation to the value of the bonds than can be given in an advertisement, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.

SALE OF THE UNITED STATES MILITARY ROLLING MILL at Chattanooga, Tennessee.—The Directors of the South-Western Iron Company will receive proposals for the purchase of their Rolling Mill at Chattanooga, Tennessee, erected by the United States authorities, and greatly enlarged and improved since it became private property. The land (comprising 150 acres) and the railroad are now held in fee simple, with brick works, saw-mill, dwellings, and all the appurtenances required for the production of 300 tons of railroad iron per week. The superior character of the works and their admirable location are well known, but a detailed description can be had on application to the undersigned.

The proposals will be opened on the 31st day of December, 1868, and if none satisfactory to the Directors are received, the property will then be sold at public auction, in the City of New York, on WEDENSDAY, the 3d day of February, A. D. 1869, to the highest bidder.

Parties desirous of examining the works will apply to GUSTAVUS W. SMITH, General Manager of the Works, at Chattanooga, and further information may be had on application to the undersigned, at No. 17 Burling-slip, New York.

ABRAM S. HEWITT, Treasurer.
5148 EDWIN F. BEDELL, Secretary.

G. H. NOTT, Pres't.
A. H. BRAINARD, Supt.

To All Whom it may Concern.

Notice is hereby given that the Mead Rubber Company of the City of New York, a corporation duly organized, under and in pursuance of an act of the Legislature of the State of New York entitled: "An Act to authorize the formation of corporations for Manufacturing, Mining, Mechanical, or Chemical purposes," passed February 17th 1848, and the several acts amendatory thereto, will apply to the Legislature of said State, at the next session thereof, for a special act of said Legislature, altering or amending the charter of said corporation, by changing the name of said Company from the "Mead Rubber Company," to the "Star Rubber Company."

Dated New York, November 4th, 1868.

For the Company,
JOSIAH J. BURGESS, President.
W. W. WARD, Secretary. 6148

VAN ANDEN
SWAGED

Patented Sept., 18, 1866.
WROUGHT IRON
RAIL CHAIRS.

RAILROAD SUPPLIES.

The VAN ANDEN CHAIR recommends itself above all others now in use, having continuous base and lips, the grain of the Iron running across the line of the Rail, giving it additional strength over all others now in use, with no liability to split. The spike holes being punched within the edge of the lip, admits of one half the Spike being recessed back in the solid metal, which cannot be done in the rolled chair.
